About the Office for National Statistics

The Office for National Statistics (ONS) is the government Agency responsible for compiling, analysing and disseminating many of the United Kingdom's economic, social and demo-graphic statistics, including the retail prices index, trade figures and labour market data, as well as the periodic census of the population and health statistics. The Director of ONS is also the National Statistician and the Registrar General for England and Wales, and the agency administers the statutory registration of births, marriages and deaths there.

A National Statistics publication

National Statistics are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

Introduction

Tables

Section A - UK Trade totals

A1	Values of trade in goods and services: Part One	4
A2	Values of trade in goods and services: Part Two	5
A3	Values of trade in goods with EU countries	6
A4	Values of trade in goods with Non-EU countries	7
A5	Trade in goods: Volume indices	8
A6	Volume indices for EU trade in goods	9
A7	Volume indices for non-EU trade in goods	10
A8	Trade in goods: Price indices	11
A9	Price indices for EU trade in goods	12
A10	Price indices for non-EU trade in goods	13
A11	Trade in oil and other fuels	14
A12	Values of trade in goods by commodity group: Part One	15
A13	Values of trade in goods by commodity group: Part Two	16
A14	Volume indices of trade in goods by commodity group	17
A15	Price indices of trade in goods by commodity group	18

Section B – Commodities by value

B1	Food, beverages and tobacco: Part One	19
B2	Food, beverages and tobacco: Part Two	20
B3	Basic materials: Part One	21
B4	Basic materials: Part Two	22
B5	Chemicals: Part One	23
B6	Chemicals: Part Two	24
B7	Material manufactures: Part One	25
B8	Material manufactures: Part Two	26
B9	Machinery and transport equipment: Part One	27
B10	Machinery and transport equipment: Part Two	28
B11	Miscellaneous manufactures	29

Section C - Exports: commodity volume and price indices

C1	Volumes of non-manufactures	30
C2	Volumes of manufactures: Part One	31
C3	Volumes of manufactures: Part Two	32
C4	Prices of non-manufactures	33
C5	Prices of manufactures: Part One	34
C6	Prices of manufactures: Part Two	35

Section D - Imports: commodity volume and price indices

D1	Volumes of non-manufactures	36
D2	Volumes of manufactures: Part One	37
D3	Volumes of manufactures: Part Two	38
D4	Prices of non-manufactures	39
D5	Prices of manufactures: Part One	40
D6	Prices of manufactures: Part Two	41

Section E - Manufactures excluding erratics

E1	Values of manufactures excluding erratics	42
E2	Values of finished manufactures excluding erratics	43
E3	Volume indices of manufactures excluding erratics	44
E4	Price indices of manufactures excluding erratics	45
E5	Values of erratic items	46

Section F - Geographical analysis of UK trade in goods

F1	EU countries: Part One	47
F2	EU countries: Part Two	48
F3	EU countries: Part Three	49
F4	Western Europe excluding the EU	50
F5	North America	51
F6	Other OECD countries: Part One	52
F7	Other OECD countries: Part Two	53
F8	Oil exporting countries	54
F9	Rest of the world: Part One	55
F10	Rest of the world: Part Two	56
F11	Rest of the world: Part Three	57

Section G - Miscellaneous

G1	Top 50 UK export markets and import sources	58
G2	Top 30 UK export and import commodities	59
G3	Selected average Sterling exchange rates	60
G4	World and G7 countries: trade in goods	61

Notes 62

Annual chain-linking will be introduced into the UK's national accounts from the Quarterly National Accounts First Release which is due to be published on 30 September. The data for trade in goods in this trade publication is fully consistent with that release. Accordingly the volume and price indices for trade in goods have also been chain-linked and referenced onto year 2000.

Introduction

The *Monthly Review of External Trade Statistics* is intended to supplement the information contained in the monthly National Statistics First Release on UK trade. This July 2003 issue of the *Monthly Review* is consistent with the figures shown in the First Release of 9 September 2003.

National Statistics Online Services

Free access to National Statistics data is available online at:
www.statistics.gov.uk

Time Series Data
Access to around 40,000 time series, of primarily macro-economic data, drawn from the main tables in a range of our major economic and labour market publications. Download complete releases, or view and download your own customised selection of individual time series.

StatBase®
Web-based access to time series, cross sectional data and metadata from across the Government Statistical Service (GSS), organised by theme and subject. Download many datasets, in whole or in part, or consult directory information for all GSS statistical resources, including censuses, surveys, periodicals and enquiry services. Information is posted as PDF electronic documents, or in XLS and CSV formats, compatible with most spreadsheet packages.

Complete copies of this publication are available to download free of charge on the following web page:
http://www.statistics.gov.uk/statbase/Product.asp?vlnk=613&image.x=15&image.y=8

Longer historical runs of the data in this publication can be downloaded free of charge from the National Statistics website (http://www.statistics.gov.uk). Links to *StatBase* (http://ww.statistics.gov.uk/statbase/mainmenu.asp) and *Time Series Data* (http://www.statistics.gov.uk/statbase/tsdintro.asp) allow individual time series to be viewed and downloaded – more details can be found online.

Electronic versions of this data are also available from National Statistics, StatBase, Zone B1/12, 1 Drummond Gate, London SW1V 2QQ . Telephone +44 (0)20 7533 5675, fax +44 (0)20 7533 5688, or email statbase@statistics.gov.uk.

Trade by Industry

Similar arrangements apply to editions of *UK Trade in Goods Analysed in Terms of Industries* (*Business Monitor MQ10)*, which shows quarterly trade data analysed according to the Standard Industrial Classification (SIC(92)).

1 The weights shown are in proportion to the total value of trade in 2000 and are used to combine the volume indices to calculate the totals for 2001 onwards. For 2000 and earlier, totals are calculated using the equivalent weights for the previous year (eg totals for 2000 use 1999 weights).

A15 PRICE INDICES OF TRADE IN GOODS BY COMMODITY GROUP

Notes

1. The statistics of trade in goods compiled by the Office for National Statistics (ONS) are derived principally from data provided by the Statistics and Analysis of Trade Unit (SATU).

Overseas Trade Statistics compiled by SATU

2. Since 1993, statistics of the United Kingdom's overseas trade in goods comprise:

- statistics of UK imports from and exports to countries outside the EU which have been compiled from declarations made to HM Customs & Excise;

- statistics of UK arrivals (imports) from and dispatches (exports) to other Member States of the EU compiled from Intrastat returns sent to SATU.

The Intrastat system is linked to Value Added Tax (VAT) and has applied since 1993 in all EU member states. Prior to 1993, statistics of UK trade with *all* countries were compiled from declarations made to HM Customs & Excise.

3. For statistical purposes, the UK adopts the valuation bases recommended in the *International Merchandise Trade Statistics Concepts & Definitions* published by the United Nations. This means the valuation of exports (dispatches) is on a *free on board* (fob) basis, that is the cost of goods to the purchaser abroad, and the valuation of imports (arrivals) is on a *cost, insurance and freight* (cif) basis. This includes all expenses incurred moving the goods to the point of entry into the UK (but excludes any duty or tax chargeable in the UK).

Balance of Payments Statistics compiled by ONS

4. In order to conform to the International Monetary Fund (IMF) Balance of Payments (BoP) definition, the value of imports required is the value of goods at the point of export (that is, the Customs border of the exporting country) rather than the value of goods as they arrive in the UK. The freight and insurance costs of transporting the goods to the UK needs to be deducted from the values recorded by SATU.

5. In addition, ONS has to make various other adjustments to include transactions which are not reported to SATU and to exclude transactions reported to SATU but where there is no change of ownership.

6. Table 2.4 in the annual National Statistics publication *United Kingdom Balance of Payments* summarises the transition from trade in goods statistics on an Overseas Trade Statistics (OTS) basis (compiled by SATU) to a BoP basis (compiled by ONS) for each of the last 11 years.

Classifications and definitions

7. The Overseas Trade Statistics of the UK are compiled under the headings of the United Nations Standard International Trade Classification Revision 3 (SITC R3). One exception is defence equipment, which in the UK is included in Section 9 rather than Section 8. In addition, ONS uses an alternative presentation within finished manufactures to classify such goods into passenger motor cars, other consumer goods, intermediate goods and capital goods. This presentation is derived from the *Classification by Broad Economic Categories defined in terms of SITC, Revision 3* published in 1986 by the United Nations.

8. Trade in gold is reported to SATU but is excluded from the statistics of total exports and imports published in the Overseas Trade Statistics. However, trade in ores and concentrates and finished manufactures of gold (eg jewellery) are included in total exports and imports.

9. In this publication, ‘oil’ means petroleum and petroleum products (SITC Division 33). The tonnages of crude oil exported and imported cannot be directly compared with those originating from the Department of Trade and Industry, which are compiled from data provided direct from oil

companies and published in *Monthly Digest of Statistics* and *Energy Trends*. The average value per tonne may reflect not only changes in price but also changes in the commodity mix and this is particularly true for imports.

10. In the context of the short-term statistics, trade in ships (including drilling or production platforms), aircraft, precious stones and silver can be regarded as erratic because of the large value of individual shipments. Precious stones are classified to SITC Division 66, silver to Division 68 and the other erratic items to Division 79.

Seasonal adjustment

11. The monthly trade in goods figures published by ONS are on a seasonally adjusted basis. Series for the value of trade in goods and the volume indices are seasonally adjusted independently. Research suggests little evidence of seasonality in the price indices. The seasonally adjusted series for total trade in goods are derived by summing or weighting together major commodity components.

12. Full seasonal adjustment runs are carried out each month using the latest data to estimate the seasonal factors for the current month and re-estimate those for the immediately-preceding month. It follows that there will be some revision to the previous month's estimates when the current month's are published. In common with other parts of ONS, the seasonal adjustment package used is X11ARIMA developed by Stats Canada.

Price and volume indices

13. The indicators of price movement ('deflators') for individual commodities used in the calculation of price and volume indices are based where possible on export price indices (EPIs) and import price indices (IPIs) directly collected by ONS from UK manufacturers. For some commodities, price movements are derived from the SATU based data. For certain commodities which are traded on World markets, price information on these markets is used for both imports and exports.

Revisions

14. Most revisions to the trade in goods figures are small in relation to the variability of the series. The monthly estimates for trade in goods with non-EU countries are revised when the following month's figures are first published, to reflect adjustments to the OTS data and revisions to the previous month's seasonal factors. Because of the Intrastat system, there is a need to revise the EU estimates over a longer period of time. However, it is the policy of ONS to minimise the frequency with which revisions are published as far as is sensible.

Rounding

15. Figures on a Balance of Payments basis are adjusted to ensure arithmetical consistency, in line with conventions used in the National Accounts. Index numbers are rounded to the nearest whole number or (for the highest-level aggregates) to one place of decimals.

Presentation

16. With the exception of the international comparisons shown in table G4, all trade in goods information in this publication is consistent with the Balance of Payments, although the conversion of the data from an OTS basis is less certain at the lower levels of aggregation. Tables containing this more detailed information have been annotated 'BoP-consistent basis', whereas the tables showing the more soundly based data have been annotated 'BoP basis'.

17. Detailed OTS figures appear in various publications issued by the Stationery Office on behalf of HM Customs & Excise. These publications provide detailed commodity level data as well as breakdowns by country and area. Information on trade in goods with both EU and non-EU countries can also be obtained through marketing agents appointed by HM Customs and Excise.

Further information

18. A paper entitled *Statistics on Trade in Goods* (GSS Methodological Series No. 10) gives comprehensive explanations of the bases on which trade in goods statistics are compiled. Copies are available, price £5, from National Statistics Direct, Room 1.015, Government Buildings, Cardiff Road, Newport South Wales NP10 8XG, Tel 01633 812078.
