FINANCIAL STATISTICS

MONTHLY

No. 8

DECEMBER 1962

Financial Statistics has been prepared by the Central Statistical Office, in collaboration with the Statistics Divisions of Government Departments and the Bank of England, to bring together monthly the key financial and monetary statistics of the United Kingdom.

2. The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations and the assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

3. The figures in *Financial Statistics* are mainly totals for calendar months. Figures for financial years relate to the period between 1st April of one year and 31st March of the following year.

4. Some of the figures included in *Financial Statistics* are provisional and may be revised in later issues.

5. *Definitions.* A section on Notes and Definitions is appended which, together with the footnotes to the tables, gives detailed definitions of the terms and units used.

6. *Area covered.* Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

7. *Symbols and conventions used.* The following symbols are used throughout:

.. = not available.

— = nil, or less than half the final digit shown.

8. *Change of basis.* A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

9. *Rounding of figures.* In tables where figures have been rounded to the nearest final digit there may be an apparent slight discrepancy between the total and the sum of the constituent items.

Change in content

10. *Table 29 Accepting houses and overseas banks: United Kingdom offices:*

This is a new table which shows Current and deposit accounts, Main assets and Acceptances for United Kingdom offices of Accepting houses and overseas banks at 30 September, 1962.

Table 44 Hire purchase finance companies.

This table has been extended to show detail of sources of borrowing.

This issue also contains Supplementary tables showing a new series on the income and finance of quoted companies for 1960 and 1961.

Table A Appropriation of income.

Table B Balance sheet summary.

Table C Sources and uses of capital funds during year.

Central Statistical Office,
Great George Street,
London, S.W.1.

5th December, 1962.

CONTENTS

	Table	Page
I. Exchequer and central government		
Exchequer receipts and issues: Summary budget totals	1	1
Exchequer receipts and issues: Summary	2	2
Revenue and expenditure	2	2
Issues and receipts below the line	2	3

⁽¹⁾ The sum of the twelve monthly receipts under certain headings is slightly greater than the total shown for the financial year. This is because the monthly figures include duties ultimately payable to the Isle of Man and adjustments for these are made only at the end of the financial year.

⁽²⁾ Includes receipts from the 10 per cent. surcharge on most Customs and Excise duties and on purchase tax, which was operative from 26 July 1961 to 9 April 1962.

⁽¹⁾ Monthly figures as at the third Wednesday of each month (except December 1960 and 1961, second Wednesday). Annual figures from 1955 to 1958 are averages of balances on the third Wednesday in the month except for 30 June and 31 December, and from 1959 averages of balances on the third Wednesday in the month (except December 1960 and 1961, second Wednesday). After December 1960, the figures exclude the business of Lloyds Bank Eastern branches.

⁽²⁾ Before October 1960, the dates at which figures were compiled varied from bank to bank between the middle and end of the month, thereafter they are at the third Wednesday (except December 1961, second Wednesday). Annual figures are averages of monthly figures.

⁽³⁾ Deposits with banking offices in Northern Ireland of members of the Northern Ireland Bankers' Association other than The National Bank (a London clearing bank). The figures relate mainly to 30 June and 31 December and dates in the middle of other months. Annual figures are averages of monthly figures.

⁽⁴⁾ Current and deposit accounts less balances with, and cheques in course of collection on, other banks in United Kingdom and Republic of Ireland (for the Scottish banks, less balances with, and collections on, other banks in the United Kingdom and, before October 1961, the Republic of Ireland) and less items in transit between offices of the same bank.

⁽⁵⁾ Current and deposit accounts of these banks comprise deposits of United Kingdom residents, overseas banking offices and other overseas residents (including unallocated items). They include deposits in foreign currencies.

(¹) Figures for the London clearing, Scottish and Northern Irish banks comprise advances to customers and other accounts (excluding items in transit); those for the British Bankers' Association, including the column relating to London clearing banks, comprise loans and overdrafts only.

(²) Monthly figures are at the third Wednesday of each month (except December 1960 and 1961, second Wednesday). Annual figures from 1955 to 1958 are averages of balances on the third Wednesday in the month except for 30 June and 31 December, and from 1959 averages of balances on the third Wednesday in the month (except December 1960 and 1961, second Wednesday).

After December 1960, the figures exclude the business of Lloyds Bank Eastern branches.

From February 1961, advances and other accounts exclude re-financeable export credits due for repayment within 18 months. In October 1961, certain assets were reclassified and approximately £40 million was deducted from advances and other accounts.

(³) Before October 1960, the dates at which figures were compiled varied from bank to bank between the middle and end of the month, thereafter they are at the third Wednesday (except December 1961, second Wednesday). Annual figures are averages of monthly figures.

From April 1961, advances and other accounts exclude re-financeable export credits due for repayment within 18 months.

(⁴) Advances and other accounts of banking offices in Northern Ireland of members of the Northern Ireland Bankers' Association other than The National Bank (a London clearing bank). The figures relate mainly to 30 June and 31 December and dates in the middle of other months. Annual figures are averages of monthly figures.

(⁵) Advances through offices located in Great Britain by members of the British Bankers' Association (see Notes and Definitions). The annual figures are averages of the figures for February, May, August and November.

(1) Advances through offices located in Great Britain by member banks of the British Bankers' Association. The annual figures are averages of the figures for February, May, August and November of each year. The figures for London clearing banks, and since November 1960 for the Scottish banks, relate to the third Wednesday in the month; those for other member banks (and before November 1960 for the Scottish banks) relate to various dates, mostly in the middle of the month.

⁽¹⁾ Partly estimated; figures of Assets are aggregates of figures mainly as at 31 December, but partly at other dates in December.

⁽²⁾ At nominal values.

⁽³⁾ Excluding capital and reserves.

⁽⁴⁾ Those banks whose main business is conducted outside the British Isles.

⁽⁵⁾ Figures after 1958 differ slightly in coverage from those for earlier years.

(1) See footnotes to Table 26. Annual figures relate to changes in calendar years.

(2) See footnotes to Table 27. Monthly figures up to September 1960 are not for specific dates shown, see page 32, footnote (1). Annual figures relate to changes between make-up dates in December.

(3) From February 1961 (April 1961 for Scottish banks) Liquid assets and Bills other than Treasury bills include, and Advances exclude, re-financeable export credits due to repayment within 18 months.

(4) Amounts of special deposits are calculated as percentages of the latest available monthly total deposits of each bank (excluding for the London clearing banks deposits with branches outside England and Wales). For details of calls and releases see Table 22.

(5) Advances to customers and other accounts (excluding nationalised industries and items in transit).

(6) Included in liquid assets. (7) Figures for London clearing banks exclude the business of Lloyds Bank Eastern branches after 31 December 1960. (8) Differs from the change shown in Table 26. In October 1961 approximately £40 million was transferred from Advances to Money at call and short notice and these figures have been adjusted by £40 million to allow for the change in definition.

(1) Before October 1960, the dates at which the figures were compiled varied from bank to bank between the middle and end of each month; see also footnotes (8) and (10).

(2) Current and deposit accounts less items in transit between offices of the same bank.

(3) From April 1961, Other bills discounted include, and Advances exclude, re-financeable export credits due for repayment within eighteen months.

(4) For detail of calls and releases see Table 22.

(5) Averages of quarterly figures for British government and government guaranteed securities and Other investments before 1961, and for Advances to nationalised industries and Other advances and other accounts for 1955 and 1956; see footnotes (7), (8), (9) and (10).

(6) Items in transit included in Balances with other banks, etc. before October 1960.

(7) Annual figures before 1959 are averages of figures for the end of each calendar quarter.

(8) Total investments less British government and government guaranteed securities; the annual figures for Other investments before 1959 reflect the inconsistencies of date between the two series; see footnotes (1) and (7).

(9) Figures supplied by H.M. Treasury. Figures relate to the third Wednesday in the month (except December 1960 and 1961, second Wednesday). Annual figures for 1955 and 1956 are averages of figures for middle of March and September, end of June and December.

(10) Before October 1960 and in December 1960 these residual figures reflect the inconsistencies of date between Total advances and other accounts and Advances to nationalised industries; see footnote (9).

(1) In general the figures, which relate mainly to 30 June and 31 December and dates in the middle of other months, represent the actual liabilities and assets of banking offices in Northern Ireland, other than those of The National Bank, but the figures of Balances with Bank of England, Money at call and short notice, Treasury bills and Investments represent a proportion of the banks' total holdings of such assets equal to the proportion of their total current and deposit accounts which was held at each date by offices in Northern Ireland.

(2) Averages of notes outstanding on Saturdays in periods of four consecutive weeks, including notes issued by The National Bank (£0.6 million in October 1962). The "authorised" circulation was approximately £2 million at all dates shown, the remainder being covered by Bank of England notes and coin. Annual figures are averages of the thirteen four-weekly periods.

(3) Including cover for Northern Irish bank notes in excess of the "authorised" circulation.

(4) Balances with, and cheques in course of collection on, other banks in the United Kingdom, including, for three banks, balances with banking offices outside the United Kingdom.

(5) Between banks and between offices of the same bank.

(1) Formerly called 'Certain other foreign banks'.

(2) There have been changes in definitions after June 1962. For details of these, see Notes on page 82.

(3) Before 1959 some of the totals include amounts which cannot be allocated between 'U.K. resi-
dents' and 'overseas residents'.

(1) See also related items of short-term foreign exchange rates in Table 61.

(2) Rates operative at beginning of week following last Friday of period shown.

(3) Spread of fluctuating rates quoted for new deposits by some of the main hire purchase finance houses. (Fluctuating rates are quoted as a fixed premium or discount on Bank rate and move with Bank rate during currency of a deposit.) Rates are to some extent subject to negotiation and different rates may be paid on large amounts.

(4) Average rate of discount on allotment for 91 day bills.

(5) Discount rate in preceding column expressed as the rate at which interest is earned during the life of the bills.

(6) For a minimum term of 3 months and thereafter at 7 days notice.

(7) The mean nominal rates are more than the actual average rates paid because interest is paid on complete pounds deposited for full monthly periods reckoned to the 20th day of each calendar month. It is estimated that average rates paid are about 0.05 less than nominal rates. Annual figures are as at end November.

(8) Minimum rate of interest charged for loans to the discount market.

⁽¹⁾ Middle market prices at 3 p.m. excluding gross accrued interest.

Gross yields, which ignore tax, are calculated on the prices shown.

Grossed-up net redemption yields are calculated using the standard rate of income tax which was 7/9 in the £ throughout the period shown. The prices used in calculating the net redemption yields exclude accrued interest net of tax.

All redemption yields are calculated to the final redemption date.

A general note on yields appears in Notes and Definitions.

⁽²⁾ Details of issues and redemptions of government securities are shown in Table 5.⁽³⁾ Free of income tax and surtax. Rates for the period 1955 to end 1959 are shown in Notes and Definitions.

(1) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest. In calculating the yields tax is ignored; for securities with more than one maturity date, redemption has been assumed at the latest date.

Source: Bank of England

(2) Representative securities, changed from time to time:

Short dated (about 4 years), 2% Exchequer stock, 1960 in 1955 and 1956; 4½% Conversion stock, 1962 in 1957 and 1958; 3% Exchequer stock, 1962-63 in 1959; 4½% Conversion stock, 1964 in 1960 and 1961; 5½% Exchequer stock, 1966 from January 1962.

Medium dated (8-10 years), 3% Savings bonds, 1955-65 in 1955; 2½% Savings bonds, 1964-67 in 1956 to 1958; 3% Funding stock, 1966-68 in 1959 and 1960; 5% Conversion stock, 1971 from January 1961.

Long dated (15-25 years), 3% Savings bonds, 1965-75 in 1955 to 1958; 3½% Treasury stock, 1979-81 from January 1959.

(1) A new series, the F.T.-Actuaries share index, has been published from 26 November 1962.

(2) Calculated from prices on the last Tuesday of each month.

Yields are based on gross market prices without deduction of accrued interest for ordinary shares, but calculated after deduction of accrued interest for debentures and preference shares. The yields of fixed interest stocks have been calculated without allowance for redemption. Income tax is ignored in calculating the yields. Annual figures are arithmetic means of monthly figures.

Price indices from 1955 to 1957 are based on 29 December 1950 = 100. From 1958 they are calculated on a revised base, 31 December 1957 = 100. Annual figures are geometric means of monthly figures. The yields from preference and ordinary shares from 1958 are not strictly comparable with those for earlier periods.

(3) Average of working days. In computing the annual figures for 1960, the averages of quotations on alternate Wednesdays in January and February have been taken as applying throughout those months.

(4) Averages of working days. Price index based on 1 July 1935 = 100, using closing prices.

NOTES AND DEFINITIONS

I. EXCHEQUER AND CENTRAL GOVERNMENT

The Exchequer

The Exchequer is the central cash account of the government kept by the Treasury at the Bank of England (and, for a limited range of transactions, at the Bank of Ireland, Belfast). Full descriptions of Exchequer management and sources of Exchequer financing were given in the Treasury evidence to the Committee on the Working of the Monetary System (Memoranda of Evidence, Volume I, pages 77 to 83) and in an article published in *Economic Trends*, October 1959.

The Exchequer is so managed that at the end of every working day the account at the Bank of England carries no more than a small working credit balance. Any excess of payments over receipts is covered by borrowing. Any excess of receipts over payments is used to redeem debt. The result is therefore that apart from small fluctuations in the Exchequer balance from day to day, the total of all the receipts on the Exchequer accounts is the same as the total of all the payments.

Exchequer receipts and issues

Summary budget totals

This provides summary totals of receipts and payments on the Budget Account. The definition of above and below the line and of expenditure and revenue are as in the annual Financial Statements which are presented to Parliament at the time of the Budget.

Exchequer receipts and issues

These tables summarise the information given in the Exchequer Return: terms such as Revenue and Expenditure are used in precisely the same sense as they are used in that Return. The Exchequer Return is published weekly and at the end of calendar quarters.

Summary

The figures are arranged to show sub-totals of receipts and issues comparable with those in the Financial Statements. The form of the Exchequer Return was changed for the financial year 1961/62. The items of self-balancing revenue and expenditure disappeared because the Post Office was no longer financed from the Votes. Post Office capital borrowing is now met from the Exchequer below the line in the same way as that of the nationalised industries.

Terminable annuities: these were issued to the National Debt Commissioners during and immediately after the war for the investment of the Savings Banks' funds managed by them.

Other debt: this item mainly reflects transactions with foreign governments and international bodies. Borrowing under this head is classified as internal when it is repayable in sterling but as External when it carries an obligation to repay the lender in foreign currencies or gold. Thus the Canadian credit and direct loans made by the Government of the United States are classified as External debt but borrowing from the International Monetary Fund and the International Bank for Reconstruction and Development of the major part of the sterling held by those bodies appears as a change in internal debt.

Civil Contingencies Fund

Issues: advances to the Fund to provide temporary finance mainly for expenditure not yet voted by Parliament.

Receipts: repayment of these advances.

Revenue and expenditure

Revenue: payments into the Exchequer as distinct from receipts by the Revenue Departments.

Miscellaneous receipts: receipts by Departments which they are not authorised to appropriate in aid of the Votes and receipts payable direct to the Exchequer but not applicable to interest on the National Debt or to debt redemption. The composition of these receipts differs from year to year.

Issues and receipts below the line

Interest below the line: receipts of interest are mainly in respect of below the line loans, but also include:

- amounts received from the Bank of England, the National Coal Board and Cable and Wireless Limited to cover interest on compensation stock, etc.;
- payments from Votes representing interest on below the line advances to Votes for certain capital expenditure;
- interest received on debts due from other countries following the liquidation of the European Payments Union; and
- interest on amounts subscribed to the European Fund.

Issues are payments of National Debt interest financed by the receipts of interest below the line.

The tables on Exchequer financing present in an alternative form the information on National Debt and other transactions.

Exchequer financing

The conventional Exchequer account as shown in the Exchequer Return is not a convenient form for the purpose of general financial analysis because 'National Debt and other transactions' are categorised by types of debt rather than sources of borrowing. The Exchequer financing tables set out the Exchequer's requirements of cash and the sources from which those requirements are met.

Some of the Exchequer transactions included in 'National Debt and other transactions' are with official agencies themselves engaged in transactions with the public. For instance, national insurance payments and contributions are brought to account in the National Insurance Funds, all of whose capital is government debt, and as the balance on these funds rises and falls, the Exchequer's indebtedness to the funds is increased or diminished. Similarly the assets of the Issue Department of the Bank of England are virtually all government debt.

In order to arrive at a figure of borrowing from the public, it is necessary therefore to produce what might be described as a consolidated cash account starting from the budget surplus or deficit and showing how the Exchequer's indebtedness to the various official agencies rose or fell. If these agencies reduce their lending to the Exchequer, the Exchequer has to borrow more from the public and vice versa. After bringing to account the budget surplus or deficit and changes in the Exchequer's net liabilities to the agencies in the "Exchequer group"⁽¹⁾ and to the Banking Department of the Bank of England, the residue represents the change in the Exchequer's liability in one form of debt or another to the public. The Banking Department and some of the agencies within the Exchequer group themselves engage in transactions in the various types of government debt with the public. These transactions must also be included in order to show the change in borrowing on the various types of debt by the Exchequer group from the public.

In Table 3 transactions within the Exchequer group are so far as possible excluded. Thus a sale of a security by the Issue Department of the Bank of England to the National Debt Commissioners is not shown. But the Budget includes a number of transactions by the Exchequer with other agencies in the group. These transactions in the Budget are offset by countervailing entries in other sections of the table. For example, interest on the government debt held by the Issue Department is included in the expenditure above the line in the budget; in so far as the interest is not required to meet the costs of the note issue it comes back as Issue Department income in Extra-budgetary funds, etc.

⁽¹⁾ The term "Exchequer group" is used here as in the Bank of England Quarterly Bulletin to denote the Exchequer, the National Debt Commissioners, the Exchange Equalisation Account, certain other government departments and funds and the Issue Department of the Bank of England. The Exchequer Group is thus almost but not quite the same as the Central Government as defined for national income purposes.

Total issues by the Exchequer equal total receipts apart from the small changes in the Exchequer balance; since the small fluctuations which occur in the Exchequer balances are taken up in the item Net indebtedness to the Bank of England Banking Department, the sum of all the items in Table 3 is nil.

Budget

The content of the Budget figures in this table is the same as that of the figures in the summary Budget tables in the *Financial Statement*. It may be noted that not all transactions of the Exchequer are included in the Budget. The Budget includes all revenue receipts and the greater part of government expenditure; but it does not include issues to or repayments by the Exchange Equalisation Account or transactions with international financial organisations, or transactions in the National Debt. Details of Exchequer receipts and issues above and below the line in the current year and the latest complete year are shown in Table 2.

Extra-budgetary funds

This item shows the net changes in the Exchequer's liability to certain official funds and agencies; it also includes Issue Department income and issues to sinking funds.

National Insurance Funds: the net surplus or deficit on National Insurance and Industrial Injury Funds.

Iron and Steel Realisation Account: the net surplus on the Iron and Steel Realisation Account (that is net receipts of the Iron and Steel Holding Account less payments by the Agency into the Budget).

Issue Department income: the profits arising in the Issue Department of the Bank of England, i.e. interest on securities held by the Department and cash payments to the Department on conversions of government securities, less expenses of the note issue. This income accrues to the Exchange Equalisation Account and is added to the sterling capital of the Account. Increases in the Account's sterling balance as a result of receipts of Issue Department income are shown in the tables as Issue Department income and excluded from the item Exchange Equalisation Account: sterling receipts.

Departmental balances: changes in balances on the accounts kept by most public departments with the Paymaster General.

Sinking funds: Exchequer issues for sinking funds are part of ordinary expenditure and as such are included in the Budget. Since, however, these issues are applied to the reduction of market debt and so reduce the borrowing from the public by way of marketable securities (see Table 4), the amounts are here brought back into the table as receipts so that the table will balance.

German arms deposits: this was an advance payment by the Federal German Republic in the last quarter of the year 1958/59 to the then Ministry of Supply to be drawn on by the Federal German Republic from time to time to pay for arms.

Post Office: the net change in the Postmaster General's cash surplus invested with the Exchequer.

External transactions

The sterling balance of the Exchange Equalisation Account (that part of the Account's sterling capital which has not been used for operations) is lent to the Exchequer. When the Account buys gold or foreign exchange in the market against sterling, that sterling is obtained by drawing on the balance lent to the Exchequer, which has to replace the sterling from other sources. On the other hand, when the Account sells gold or foreign exchange to the market against sterling, the sterling so acquired is lent to the Exchequer, which thus borrows less from other sources.

The governmental payments and receipts in external currencies, unlike sales or purchases of foreign exchange in the market, do not result in any net movement of cash into and out of the Exchequer. For example, in order to finance governmental payments in external currencies, the government buys gold or foreign exchange from the E.E.A. against sterling; the sterling is issued from the Exchequer, but goes to increase the sterling balance of the E.E.A. which is lent to the Exchequer.

The net increase or decrease in the E.E.A. sterling balance in respect of governmental transactions is included under Exchange Equalisation Account: sterling receipts in the table and is offset by corresponding Exchequer issues or receipts elsewhere in the table: either in the section on the Budget or on that of External Transactions.

Exchange Equalisation Account: sterling receipts: changes in the sterling balance of the account arising from Exchange operations.

International financial organisations: the item is the net increase in the organisations' holdings of non-interest bearing sterling notes less any increase in the United Kingdom subscriptions to the organisations. The amounts included in the table for subscriptions were: quarter ended 30 June 1959—£232 million; 30 September 1959—£2 million; 31 December 1959—£1 million; 31 December 1960—£11 million; 31 December 1961—£9 million.

The organisations will usually in the first instance invest that part of the subscriptions paid in sterling in non-interest bearing notes. The holdings by organisations of non-interest bearing notes also change as a result of their lending operations, e.g. see notes to International Monetary Fund: United Kingdom position.

United States and Canadian loans: receipts and redemption of loans from the United States and Canadian Governments or agencies of those governments.

Other: this includes receipts and redemptions in connection with various smaller items of debt, including the redemption of the loan from the Government of Portugal and of the loans created on the liquidation of the European Payments Union. A full list is available in the *Finance Accounts*.

Net indebtedness to the Bank of England, Banking Department

The Exchequer has a net liability to the Banking Department of the Bank of England, which holds government debt of various kinds and at the same time has liabilities to the government, in the shape of the balances of the Exchequer and the Paymaster-General at the Bank of England.

This item comprises the sum of the increases in:

Assets of the Banking Department

- (i) Ways and Means Advances;
- (ii) holdings of bank notes;
- (iii) holdings of tax reserve certificates;
- (iv) British government and government-guaranteed securities (net cash transactions);
- (v) holdings of Treasury bills.

Less increases in:

Liabilities of the Banking Department

- (vi) the balances of the Exchequer and Paymaster General at the Bank of England.

The amount of the Exchequer's net liability changes as a result of the Bank of England's central banking operations. A rise in this net liability helps to finance the Exchequer cash requirement, while a fall in the net liability means an addition to the amount which the Exchequer must borrow from other sources.

Notes in circulation

The increase in notes in circulation is the increase in the fiduciary note issue less the increase in the holdings of notes in the Banking Department of the Bank of England (included in the previous item).

Borrowing from the public

Small savings: comprises the net cash receipts into the Exchequer from the sale of national savings certificates, defence bonds, premium savings bonds, national savings stamps and gift tokens. It also includes the net receipts into the Savings Banks Funds held by the National Debt Commissioners, so that it reflects changes in the net sums invested by the public in the Post Office Savings Bank and the trustee savings banks (ordinary departments). See also notes on National savings.

Tax reserve certificates: this item represents the net receipts from the issue of tax reserve certificates less net purchases by the Banking Department of the Bank of England (which are included in Net indebtedness to the Bank of England Banking Department).

Marketable securities: this item shows the net purchases by the public of marketable securities: that is total net cash issues less net purchases by government sinking funds, the Bank of England and National Debt Commissioners (details are shown in Table 4). Marketable securities comprise government and government guaranteed securities.

Market Treasury bills: the increase in Treasury bills outstanding other than those held by the National Debt Commissioners, the Exchange Equalisation Account, certain other Government Departments and the Bank of England. Market Treasury bills are not necessarily tender Treasury bills. See notes to Market Treasury bills table.

Inland Revenue duties

The figures show the aggregate amount of tax actually collected and brought into the Department's accounts in the period shown, less the repayments made during the same period. They differ from the figures of amounts paid into the Exchequer owing to the time taken to realise remittances. In the main the difference represents the variation between the amount of unrealised remittances brought forward from the previous period and that carried forward to the following period.

Amounts collected by other Departments on behalf of the Inland Revenue, such as stamp duties paid by means of postage stamps, are included. Amounts collected by the Inland Revenue on behalf of other Departments, for example, war damage contribution and fee and patent stamps, are excluded. Excess profits tax post-war refunds and the income tax deducted therefrom are also excluded.

Customs and Excise duties

The figures show the aggregate amounts of duty collected and brought into the Department's accounts in the period, less drawbacks and other repayments. The difference between the net receipts and payments into the Exchequer arises from changes in

- (1) working balances held by collectors; (2) remittances in transit; (3) advances out of revenue to meet expenditure under authority of the Exchequer and Audit Departments Act, 1866, Sec. 10.

Purchase tax is remitted to collectors during the first month of the quarter following that in which the registered traders have charged the tax. Accordingly, changes in tax rates, etc., are not reflected in receipts until the quarter subsequent to that in which the change became effective. Similarly, beer duty and television advertisement duty are collected a month in arrear.

Protective duties, charged under the Import Duties Act, 1958, serve to protect United Kingdom industries and to give preference to Commonwealth trade.

National savings

There are differences between the various series concerning national savings. The series are as follows:

- (i) The series issued by the National Savings Committee (Table 10).
- (ii) National savings as shown in the central government capital account (Table 14).
- (iii) Small savings as shown in the Exchequer financing tables (Tables 3 and 6).
- (iv) Receipts into, and issues from, the Exchequer on various national savings items, as shown in the Exchequer Returns (Table 2).

The main differences between the series arise as follows:

1. Table 10 includes figures for the trustee savings banks (special investment departments) whereas these departments are not covered by central government capital account or by Small savings in the Exchequer financing tables.

Part of the funds of these departments are invested by the trustees in British government guaranteed securities, Treasury bills and defence bonds. Such purchases are included in:

- (a) New issues (net) in the central government capital account.
- (b) Borrowing from the public in the Exchequer financing tables.
- (c) The receipts and issues in the Exchequer Return for Treasury bills, defence bonds and government securities (new issues and redemption of maturing issues only).

There is a slight amount of double counting in Table 10 as purchase of defence bonds by the special investment departments are included in the sales of defence bonds.

2. Table 10 includes estimates of the accrued interest on national savings certificates as does the central government capital account. In Exchequer accounting, however, interest is taken into account

as ordinary expenditure at the time of repayment of the certificates. The interest on repayment of certificates does not appear in the Exchequer financing tables and is included in Exchequer Returns as part of the item Interest and management of the national debt (the item in the Return for repayment of national savings certificates refers to principal only).

3. Table 10 shows deposits with the Post Office Savings Bank and the trustee savings banks (ordinary departments) including accrued interest; these figures also form part of national savings in the central government capital account. Small savings in the Exchequer financing tables refers to net receipts into savings banks funds held by the National Debt Commissioners: although these figures are computed on a very different basis from those shown in Table 10 they differ only slightly in amount. The Exchequer Return includes only the amounts received from, or repaid to, the savings banks funds on Treasury bills, on new issues of government securities or on the redemption of maturing government securities (including terminable annuities).

4. National savings in Table 10 include government stocks held by investors on the Post Office register. In the central government capital account these stocks form part of New issues (net); in the Exchequer financing tables part of Borrowing from the public; and in the Exchequer Returns part of redemption of government securities on maturity where appropriate.

5. Table 10 does not include national savings stamps and gift tokens. Since 1 April 1961, these are, however, included in national savings totals in the central government capital account, and since August 1961, as part of small savings in the Exchequer financing tables, and as a separate item in the Exchequer Return. The Exchequer Returns covering August 1961, included a once and for all transfer from floating debt to the new item of the amount of the stamps and gift tokens then outstanding (£22.1 million). Since this transfer did not result in new money to the Exchequer, it did not appear in the Exchequer financing tables or in the central government account.

6. Ulster savings certificates are included in national savings in the central government capital account but not in the other series.

7. The timing of transactions differs slightly between the various series.

The terms offered on the main forms of national savings from the period 1955 onwards, giving the dates from which the changes were operative, are shown below. The standard rate of income tax was:

1953/54 and 1954/55	..	9/-
1955/56 to 1958/59	..	8/6
1959/60 to 1962/63	..	7/9

National savings certificates

Interest is free of income tax and surtax.

1954 November 1 9th issue, 15/- units. Maximum holding £750 (1,000 units). Compound interest if held for ten years £3.0.11 per cent. per annum equal to £5.10.9 per cent. per annum grossed up for income tax at 9/-.

1955 November 1 Maximum holding £900 (1,200 units).

1956 April 23 Maximum holding £1,050 (1,400 units).

1956 August 1 10th issue, 15/- units. Maximum holding £450 (600 units). Compound interest if held for seven years £4.3.11 per cent. per annum equal to £6.17.0 per cent. per annum grossed up for income tax at 7/9.

1958 May 5 Maximum holding £750 (1,000 units).

1960 April 11 Maximum holding £900 (1,200 units).

Defence bonds

Sold for £5 and multiples of £5. Interest, payable half-yearly, is assessable for income tax and surtax: bonuses are free of income tax and surtax.

1952 September 1 Maximum holding £1,000. Interest 3½ per cent. per annum. Bonus £3 per cent. if held for ten years. Equivalent to a £3.19.10 per cent. per annum grossed up net redemption yield assuming standard rate of income tax at 9/-.

1954 November 1	Maximum holding £2,000.
1955 November 1	Maximum holding £1,000. Interest 4 per cent. per annum. Bonus £3 per cent. if held for ten years. Equivalent to a £4.9.2 per cent. per annum grossed up net redemption yield assuming standard rate of income tax at 8/6.
1956 May 1	Maximum holding £1,000. Interest 4½ per cent. per annum. Bonus £5 per cent. if held for ten years. Equivalent to a £5.5.1 per cent. per annum grossed up net redemption yield assuming standard rate of income tax at 8/6.
1958 May 1	Maximum holding £2,000. Interest 5 per cent. per annum. Bonus £3 per cent. at end of seven years. Equivalent to a £5.13.6 per cent. per annum grossed up net redemption yield assuming standard rate of income tax at 8/6.
1960 June 15	2nd issue. Maximum holding £5,000. Interest 5 per cent. per annum. Bonus £3 per cent. at end of seven years. Equivalent to a £5.12.6 per cent. per annum grossed up net redemption yield assuming standard rate of income tax at 7/9.

The net redemption yield is obtained by adding to the rate of interest (less income tax at standard rate) the tax-free bonus discounted over the life of the bond. The yields shown above are grossed up for the standard rate of income tax.

Premium savings bonds

First issued 1 November 1956. Prizes are free of income tax and surtax.

1956 November 1 £1 units. Maximum holding £500. Interest was calculated at 4 per cent. per annum free of tax (equivalent to £6.19.1 per cent. per annum grossed up for income tax at 8/6 and to £6.10.7 per cent. per annum at 7/9) and formed the pool for prize drawings. Bonds were eligible for the draw six months after purchase. Prizes ranged from £25 to £1,000.

1960 August 1 Maximum holding £800. Interest at 4½ per cent. per annum free of tax (equivalent to £7.6.11 per cent. per annum grossed up for income tax at 7/9). Bonds eligible for draw after three months. Prizes range from £25 to £5,000.

Deposits with Post Office Savings Bank and trustee savings banks (ordinary departments).

Interest 2½ per cent. per annum.

1952 March 1 Maximum deposit £3,000.

1956 April 6 Interest up to £15 per annum free of income tax but not surtax. Interest on first £600 is equivalent to £4.1.7 per cent. per annum grossed up for income tax at 7/9.

1960 May 2 Maximum deposit £5,000 on individual holdings.

Deposits with trustee savings banks (special investment departments)

See Table 47 for interest rates.

1953 July 16 Maximum deposit £1,000 (previously £500).

1956 June 11 Maximum deposit £2,000.

1960 August 1 Maximum deposit £3,000.

Market Treasury bills

Market Treasury bills are the total of Treasury bills outstanding other than those held by the National Debt Commissioners, the Exchange Equalisation Account, other government departments and the Bank of England. They comprise bills issued at the weekly tenders, other than those issued to the Banking Department of the Bank of England for its own account, plus any bills—including bills originally issued outside the tender (tap bills)—sold to the market by government departments or the Bank of England less any bills purchased from the market by such bodies.

The coverage of each group of holders is defined in the notes to the main table concerning that group. Overseas official holders comprise overseas central banks, currency boards, Crown Agents for Overseas Governments and Administrations and certain other official bodies.

Treasury bill tender

The figures relate to bills issued at the weekly (normally Friday) tenders. Members of the London Discount Market Association undertake together to tender for the full amount of bills on offer. Other applications are made, for their own account or for the account of their customers in the United Kingdom or overseas, by the Banking Department of the Bank of England and by commercial banks and money-brokers in the United Kingdom.

Revenue and capital accounts of the central government

These accounts relate to the central government as defined for national income purposes. In addition to the ordinary government departments they include a number of bodies (e.g. Regional Hospital Boards) administering public policy, but without the substantial degree of financial independence which characterises the public corporations; they also include certain extra-budgetary funds and accounts controlled by departments, of which the National Insurance Funds are the most important.

The tables cover substantially the same bodies as those in the Exchequer Group, referred to in the Exchequer Financing tables, the main differences being that they include the transactions of the Government of Northern Ireland and the changes in cash balances held by Revenue Departments, and from the 1 April 1961, exclude the transactions of the Post Office.

The central government accounts are based mainly on cash payments and receipts but also include certain accrual items, such as those arising out of trading activities and the accrued interest on national saving certificates. The classification of receipts and payments into revenue and capital items differs from the budget Above and Below the line; some items Above the line are treated as capital and some Below the line as revenue. Detailed notes on the central government accounts are included in *National Income Statistics: Sources and Methods* (H.M.S.O., 1956) and notes to the *National Income Blue Book*.

II. LOCAL AUTHORITIES AND PUBLIC CORPORATIONS

Local authority borrowing

This table relates to local authorities as defined for national income purposes and includes both local government authorities, such as county councils, county boroughs, etc., and miscellaneous authorities such as harbour boards, and water boards, etc. Estimates have been included for authorities not making statistical returns. Local authority superannuation funds are not included in the local authority sector.

The figures cover the external borrowing by the local authorities and exclude internal borrowing whether from own revenue balances or from other sources. The figures exclude the borrowing by one local authority from another except that the figures for the net borrowing on quoted stock does not allow for changes in holdings of these stocks by local authorities. Borrowing from another local authority is also included in the analysis of the terms of repayment of temporary borrowing outstanding.

Temporary borrowing covers money repayable in twelve months or less including borrowing on bills and bank overdrafts (whether for revenue or capital purposes), excluding all securities, bonds and mortgages even if due to mature, or subject to repayment on notice, in twelve months or less.

The maturity classification of securities, bonds and mortgages is according to their expectation of life on the last day to which the return relates. Securities are classified by date of final maturity. Mortgages are classified according to date of next ensuring break at lenders' option (other than option exercisable by virtue of a stress clause). Where a loan or mortgage expires and is renewed during the quarter to which the return relates it is included both as new mortgage and as a repayment.

Appropriation and capital accounts of public corporations

This table relates to public corporations as defined for national income purposes and thus includes the Bank of England except for transactions of the Issue Department which are treated as transactions of the central government, the companies held by Iron

and Steel Holding and Realisation Agency and, from April 1961, the Post Office.

The trading surplus is the total balance of trading account before making any charge for depreciation, interest and taxation. The trading surplus includes subsidies and Exchequer grants received by the corporations; these comprise the subsidies received by the housing corporations and the Exchequer grants paid or payable from 1960 onwards to the British Transport Commission. Detailed notes on public corporations accounts are included in *National Income Statistics: Sources and Methods* (H.M.S.O., 1956) and notes to the *National Income Blue Book*.

III. BANKING AND BANKING INSTITUTIONS

Currency circulation and bank deposits

Notes on the individual items in this table are mostly included in the notes to the various tables for the individual banking groups and the table on currency circulation.

Neither total deposits nor net deposits show the true deposit liabilities of the banks to the public. Total deposits overstate the banks' true deposit liabilities to the public because

- (1) they include that part of "Other accounts" which comprises the internal and suspense accounts of the banks themselves;
- (2) they include deposits with one bank by another; and
- (3) they are inflated by
 - (a) items which have been credited to customers' accounts, but where the corresponding debit items are still in course of collection or in transit and have yet to be debited to drawers' deposits; and
 - (b) items which have been debited to customers' accounts but where the corresponding credit items are still in course of transmission (and included in "Other accounts") and will ultimately be credited to overdrawn accounts.

These three factors cannot be measured; in particular, it is not possible to distinguish those debit or credit transit items which have affected, or will affect, overdrawn accounts rather than deposits.

This same difficulty arises with net deposits [as defined in footnote (4) to Table 17] where all debit items in course of collection or in transit are deducted and where no account is taken of credits in course of transmission (the total of which has almost certainly increased since 1960). Net deposits, therefore, understate the banks' true deposit liabilities to the public where

- (i) items have been credited to customers' accounts but the corresponding debit items are still in course of collection or in transit and have yet to be debited to overdrawn accounts; and
- (ii) items have been debited to customers' accounts but the corresponding credit items are still in course of transmission and will ultimately be credited to other customers' deposits.

The percentages of currency and deposits to the gross domestic product are calculated using the gross domestic product at factor cost as defined for national income purposes (without seasonal adjustments). See *National Income Statistics: Sources and Methods* (H.M.S.O., 1956). The quarterly figures are expressed at annual rates.

Bank advances

Advances and other accounts as published by the London clearing, Scottish and Northern Irish banks include, in addition to bank advances, some internal accounts of the banks, for example, certain foreign currency balances.

Analysis of bank advances

The figures of bank advances analysed by type of borrower which are given in this table relate to all advances made by member banks of the British Bankers' Association through offices located within Great Britain, irrespective of the borrower's country of residence.

The fifty-six current members of the British Bankers' Association

comprise the London clearing banks, the Scottish banks, the Northern Irish banks, twenty-nine members of the British Overseas Banks Association (four are not members of the British Bankers' Association, namely the Bank of Ceylon, British and French Bank Ltd., Ghana Commercial Bank and The National Bank of Nigeria Ltd.), and four other banks (C. Hoare and Co., Isle of Man Bank Limited, Yorkshire Bank Limited and The Royal Bank of Ireland Limited).

The figures for the London clearing banks, and since November 1960, for the Scottish banks, relate to the third Wednesday in the month; those for other member banks (and before November 1960, for the Scottish banks) relate to various dates, mostly about the middle of the month. The definition of "advances" excludes bills discounted and foreign bills negotiated or bought and also "impersonal" or "internal" accounts.

Except for the "personal" advances included in the "Personal and professional" category, the classification is based on the business of the borrower and no account is taken of the object of the advance or the nature of the security held.

The classification adopted differs in several respects from the *Standard Industrial Classification* (H.M.S.O., 1958). In particular, (a) brokers, merchants, agents, wholesalers, importers, exporters, etc., who specialise in a particular class of commodity are classified under the same heading as the producers of that commodity, and (b) transport undertakings and public utilities owned by local authorities are classified as "Local Government Authorities" rather than as "Transport" or "Public Utilities".

The following notes give particulars of some of the headings:

Iron and steel and allied trades

Includes railway rolling stock (other than locomotives), bridge and constructional ironwork, tools (other than machine tools), nuts, bolts, rivets, etc., hardware, hollow-ware and metal small-ware.

Engineering, etc.

Includes locomotives, motor vehicles, cycles and aircraft, machine tools, electrical engineering, wireless apparatus, cutlery, jewellery, clocks and watches and abrasives, but excludes marine engineering.

Other textiles

Includes clothing (except footwear).

Leather and rubber

Includes footwear.

Food, drink and tobacco

Includes oil seed crushing and refining, etc.

Building materials

Includes cement, refractory fire-clay, bricks, tiles, glazed fire-clay and earthenware, sanitary pipes, asbestos cement and saw-milling.

Public utilities (other than transport)

Electricity, gas and water supply undertakings.

Transport and communications

Includes road, rail, air and inland water transport, docks, wireless and cable services.

Shipping and shipbuilding

Includes shipowners as well as shipbuilding and marine engineering.

Retail trade

Includes hotels, restaurants, etc., and motor garages.

Unclassifiable industry and trade

Includes glass and glass bottles, china and earthenware, paper, printing and publishing, furniture and other woodworking, laundries, etc., together with all minor industries and trades not appropriate to other headings.

Other financial

Includes banking, insurance, building societies, investment trusts, moneylenders and bookmakers.

Personal and professional

Includes executor and trust accounts.

Bank of England

Issue Department

Government debt (£11 million) is included in government securities. Issue Department assets excluded from the table (other securities, gold coin and bullion, and coin other than gold coin) were all small in the periods shown.

Banking Department

The only liabilities not shown are Capital (constant at £14.6 million) and Rest (which has fluctuated between £3.1 million and £4.0 million in the periods shown).

Public deposits

All government balances held at the Bank, including the accounts of H.M. Exchequer and H.M. Paymaster-General, Savings Banks and Dividend Accounts, those of the Commissioners for the Reduction of the National Debt, and those connected with tax collection and various government funds.

Special deposits

Deposits called, under the Special Deposits Scheme announced in July 1958, from the London clearing banks and the Scottish banks and not at their free disposal. The first call was made in April 1960. Amounts are calculated as percentages of the latest available monthly total deposits of each bank (excluding for the London clearing banks deposits with branches outside Great Britain).

Interest is paid on Special deposits at a rate adjusted weekly to the nearest $\frac{1}{8}$ per cent. per annum to the average rate for Treasury bills issued at the latest weekly tender.

Bankers' deposits

Include the balances, held at the Bank, of the London clearing banks, Scottish banks, the offices in the United Kingdom of other deposit banks (apart from overseas central banks), accepting houses and discount houses. Balances of overseas central banks are included in Other accounts.

Other accounts

These also include balances held at the Bank by the Crown Agents for Oversea Governments and Administrations, and the dividend accounts of stocks managed by the Bank other than the direct obligations of the British Government.

Discount market

The discount houses included in the table are those institutions belonging to the London Discount Market Association, currently Alexanders Discount Co. Ltd., Allen, Harvey & Ross Ltd., Cater Ryder & Co. Ltd., Clive Discount Co. Ltd., Gerrard & Reid Ltd., Gillett Bros. Discount Co. Ltd., Jessel, Toynbee & Co. Ltd., King & Shaxson Ltd., National Discount Co. Ltd., Seccombe Marshall & Campion Ltd., Smith, St. Aubyn & Co. Ltd., and The Union Discount Co. of London Ltd.

The table continues the series published in the *Memoranda of Evidence* submitted to the Committee on the Working of the Monetary System (Volume 2, Statistical Appendix, Tables 10 and 11).

Assets

Other bills

Mostly commercial bills drawn on banks and firms resident in the United Kingdom and on the London offices of overseas banks. The maximum maturity is not ordinarily longer than six months.

British government and government guaranteed securities

These are given at nominal value and are mostly with redemption dates of under five years to the final date of maturity.

Other assets

Including a small amount of cash in hand and at banks.

Borrowed funds

Very short-term interest-bearing loans, mainly from United Kingdom and overseas banks. Overseas and foreign banks are those whose main business is conducted outside the British Isles.

Currency circulation

The series showing the estimated circulation of notes and coin with the public relates to the total note issues of the Bank of England, the Scottish banks and Northern Irish banks, plus the estimated total of United Kingdom silver, cupro-nickel, bronze and nickel-brass coin in circulation (excluding coin in the Bank of England,

Issue Department), less notes and coin held by the Bank of England (Banking Department), by the Scottish and Northern Irish banks (as published in the London and Belfast Gazettes) and by the London clearing banks.

London clearing banks

The London clearing banks are the eleven banks (Barclays Bank Ltd., Coutts & Co., District Bank Ltd., Glyn, Mills & Co., Lloyds Bank Ltd., Martins Bank Ltd., Midland Bank Ltd., The National Bank Ltd., National Provincial Bank Ltd., Westminster Bank Ltd., and Williams Deacon's Bank Ltd.) forming the membership of the London Bankers' Clearing House. They are the principal commercial banks operating in England and Wales.

Deposits

Balances on current accounts may be withdrawn or transferred on demand, usually by cheque.

Deposit accounts are not ordinarily operated upon by cheque; balances are subject to agreed notice of withdrawal (seven days' notice since January 1955).

Other accounts cover such items as credits in course of transmission, contingency reserves and various other internal funds and accounts of the banks themselves.

Total liquid assets

Comprises items coin, notes and balances with Bank of England, etc.; money at call and short notice; bills discounted. Excludes special deposits with Bank of England.

The ratio of Total liquid assets to Deposits (the Liquidity Ratio) is the conventional measure of the London clearing banks' liquidity. It does not take account of the extent to which they hold other assets of comparable liquidity, or of the terms on which the deposits are held.

Special deposits with Bank of England

The amounts of special deposits are calculated as percentages of the latest available monthly total deposits of each bank (excluding for certain banks deposits with branches outside England and Wales).

See note under Bank of England.

Investments

These are given at book value.

British government and government guaranteed securities normally have definite and relatively early redemption dates.

Other investments include securities issued by local authorities, by Commonwealth governments (other than British Government) and by public companies. Investments in affiliated banks and subsidiary companies as shown by the respective balance sheets are not included here.

Advances to customers and other accounts

These include both loans and overdrafts, whether secured (by Stock Exchange securities, title-deeds, life assurance policies, etc.) or unsecured, to public bodies, business undertakings and private borrowers.

The figures of advances to nationalised industries are obtained from the industries themselves and published by H.M. Treasury. They represent advances to those public corporations to which advances have also been made by the Exchequer under the Finance Acts, 1956, 1958, 1959 and 1960.

Balances with other banks, items in transit, etc.

This item comprises balances with and cheques in course of collection on, other banks in the United Kingdom and Republic of Ireland and items in transit between offices of the same bank.

Coin, notes and balances with the Bank of England, etc.

The cash holdings of the banks.

Money at call and short notice

Money at call, etc., to the Money Market comprises all loans to members of the London Discount Market Association for carrying bills of exchange, Treasury bills and other short-term government securities.

Other money at call, etc., includes loans, for periods not exceeding one month, to members of the Stock Exchange, on the security of readily marketable stocks and shares; to bullion brokers; and to money markets in other centres. It also includes balances, in sterling and in specified foreign currencies, with other banks, both in the United Kingdom and overseas.

Bills discounted

These are normally held until maturity, and ordinarily the maximum maturity is something under three months.

Treasury bills are those issued by the United Kingdom Government.

Other United Kingdom bills are commercial bills drawn on United Kingdom residents.

Other bills include Treasury bills of Commonwealth (other than United Kingdom) and foreign governments.

That part of medium-term export credits covered by E.C.G.D. guarantee, due for repayment within eighteen months and re-financeable by the Bank of England under the terms of the scheme announced in February 1961, is excluded from Advances to customers and other accounts and included in Bills discounted.

Scottish banks

The Scottish banks are the five banks (Bank of Scotland, British Linen Bank, Clydesdale & North of Scotland Bank Ltd., National Commercial Bank of Scotland Ltd., and The Royal Bank of Scotland) represented on the Committee of Scottish Bank General Managers. They transact virtually all the commercial banking business in Scotland, where they maintain a clearing system; they also have offices in London and a few in the northern counties of England.

The table continues the series published in the *Memoranda of Evidence* submitted to the Committee on the Working of the Monetary System (Volume 2, Statistical Appendix, Table 3).

Deposits

Balances on current accounts may be withdrawn or transferred on demand, usually by cheque.

Deposit accounts comprising Deposit Receipts and Savings Accounts, are not operated upon by cheque but are repayable on demand. Interest is paid on Deposit Receipts if lodged for at least 30 days and on the minimum monthly balance in Savings Accounts.

Other accounts are such items as credits in course of transmission, contingency reserves and various other internal funds and accounts of the banks themselves.

Notes outstanding

By virtue of the Bank Notes (Scotland) Act, 1845, as amended by the Currency and Bank Notes Act, 1928, and the Coinage Act, 1946, each of the Scottish banks has the right to issue notes. A small part of this issue, approximately £2.7 million for all banks together, is authorised by the governing Acts, the remainder being covered by Bank of England notes and coin.

Total liquid assets

Comprises coin, notes and balances with Bank of England (excluding special deposits); balances with other banks, money at call and short notice and bills discounted.

Special deposits with Bank of England

The amounts of special deposits are calculated as percentages of the latest available monthly total deposits of each bank. See note under Bank of England.

Investments

Other investments include securities issued by local authorities, by Commonwealth governments and by public companies. Investments in affiliated banks and subsidiary companies are not included here.

Advances and other accounts

These include both loans and overdrafts whether secured (by Stock Exchange securities, heritable property, life assurance policies, etc.) or unsecured, to public bodies, business undertakings and private borrowers.

The figures of advances to nationalised industries are obtained from the industries themselves and published by H.M. Treasury. They represent advances to those public corporations to which advances have also been made by the Exchequer under the Finance Acts, 1956, 1958, 1959 and 1960.

Items in transit

This item comprises cheques and other items in course of transmission between offices of the same bank.

Coin, notes and balances with Bank of England

Includes the banks' holdings of each other's notes (but not of a bank's own notes) and Bank of England notes and coin maintained as cover for their note issues in excess of the "authorised" circulation.

Balances with other banks, etc.

Balances with, and cheques in course of collection on, other banks in the United Kingdom and, before October 1961, the Republic of Ireland.

Money at call and short notice

Money at call, etc., comprises all loans to members of the London Discount Market Association for carrying bills of exchange, Treasury bills and other short-term government securities. It also includes loans, for periods not exceeding one month, to members of the Stock Exchange, on the security of readily marketable stocks and shares, and to bullion brokers; and balances, in sterling and in specified foreign currencies, with other banks both in the United Kingdom and overseas.

Bills discounted

These are normally held until maturity.

Treasury bills are those issued by the United Kingdom Government.

Other bills include commercial bills drawn on United Kingdom and overseas residents and Treasury bills of Commonwealth (other than United Kingdom) and foreign governments. They also include that part of medium-term export credits covered by E.C.G.D. guarantee, which are due for repayment within eighteen months and are re-financeable by the Bank of England under the terms of the scheme announced in February 1961.

Northern Irish banks

The table covers the following seven banks: Bank of Ireland, Belfast Banking Co. Ltd., The Hibernian Bank Ltd., The Munster and Leinster Bank Ltd., Northern Bank Ltd., Provincial Bank of Ireland Ltd., and Ulster Bank Ltd. These banks, together with The National Bank Ltd. (which is also a London clearing bank and is therefore generally excluded from the table) form the Northern Ireland Bankers' Association. The Association's members are the only commercial banks operating in Northern Ireland; all but the Belfast Banking Co. Ltd. have offices in the Irish Republic, and the Provincial Bank of Ireland Ltd. has an office in London.

The table continues the series published in the *Memoranda of Evidence* submitted to the Committee on the Working of the Monetary System (Volume 2, Statistical Appendix, Table 4). In general the figures represent the actual liabilities and assets of banking offices, other than those of The National Bank Ltd., in Northern Ireland; but the figures of Balances with Bank of England, Money at call and short notice, Treasury bills and Investments represent a proportion of the banks' total holdings of such assets equal to the proportion of their total current and deposit accounts which was held at each date by offices in Northern Ireland.

Notes outstanding

By virtue of the Bankers (Northern Ireland) Acts, 1845 and 1928, as amended by the Currency and Bank Notes Act, 1928, and the Coinage Act, 1946, six banks (Bank of Ireland, Belfast Banking Co. Ltd., Northern Bank Ltd., Provincial Bank of Ireland Ltd., Ulster Bank Ltd., and The National Bank Ltd.) have the right to issue notes. Part of this issue, approximately £2 million for all banks together, is authorised by the governing Acts, the remainder being covered by Bank of England notes and coin. Notes issued by The National Bank (see above) are included in the table.

Deposits

Balances on current accounts may be withdrawn or transferred on demand, usually by cheque.

Deposit accounts are not operated upon by cheque and are subject to agreed notice of withdrawal.

Other accounts cover such items as credits in course of transmission, contingency reserves and various other internal funds and accounts of the banks themselves.

Coin, notes and balances with Bank of England

Includes the banks' holdings of each other's notes (but not of a bank's own notes) and Bank of England notes and coin set aside as cover for their note issues.

Balances with other banks, etc.

Balances with London agents and "transit" items arising from transfer arrangements and clearings between banks; also includes, for the three banks registered in Northern Ireland (Belfast Banking Co. Ltd., Northern Bank Ltd. and Ulster Bank Ltd.), their balances with banking offices (other than their own branches) outside the United Kingdom.

Items in transit

This item arises from transfer arrangements between banks and between offices of the same bank.

Money at call and short notice

This consists of very short-term loans, primarily to members of the London discount market for carrying bills of exchange, Treasury bills and other short-term government securities.

Bills discounted

These are normally held until maturity, and ordinarily the maximum maturity is something under three months. Treasury bills are those issued by the United Kingdom Government. Other bills include Treasury bills of the Northern Ireland Government and commercial bills drawn on United Kingdom and overseas residents.

Investments, British government and government guaranteed securities

These are given at book value.

Advances and other accounts

These include both loans and overdrafts, whether secured (by Stock Exchange securities, title-deeds, life assurance policies, etc.) or unsecured, to public bodies, business undertakings and private borrowers.

Accepting houses and overseas banks: United Kingdom offices

Tables 30-33 continue those first published in the *Memoranda of Evidence* submitted to the Committee on the Working of the Monetary System, Vol. 2, Statistical Appendix, Tables 6-9. From September 1962 the series has been extensively revised; and comparable figures have been obtained from some other banks. The figures for September 1962 for these new contributors are shown separately in Table 29, which aggregates the figures for the accepting houses and the groups of overseas banks.

A list of the individual banks covered by the figures up to 1958 appears in the Radcliffe Committee's *Memoranda of Evidence*, Vol. 2, page 200; subsequent figures cover the members at each of the reporting dates shown. Current lists of members of the various groups are given below.

The figures cover the business of all offices of these banks within the United Kingdom. The definitions used, and the changes in definition from September 1962, are described below: fuller details are given in the Bank of England's *Quarterly Bulletin*, Volume II, No. 4 (December 1962).

Overseas residents

Overseas banking offices

All banking offices located outside the United Kingdom, irrespective of the location of the registered (or head) offices.

Other overseas residents

Governments, companies, persons, etc., whose registered address or permanent domicile is outside the United Kingdom.

From September 1962 no separate figures are given for overseas banking offices and for other overseas residents.

Current and deposit accounts

Bank customers' funds whether transferable or withdrawable on demand (current accounts), or lodged for a definite period or subject to agreed notice of withdrawal (deposit accounts). Sterling equivalents of foreign currency deposits are included. An important point of difference, from September 1962, is that from this date the figures include, in addition to the bank's deposit liabilities, their liabilities on loans and advances (including money at call and short notice) received from other U.K. banks and their net liabilities on internal accounts to their offices, or to their head office, overseas.

Balances with other U.K. banks

From September 1962 the figures include all balances, in sterling and in foreign currency, with other U.K. banks, together with loans and advances to these banks (including any money lent at call or short notice), some of which may previously have been excluded. U.K. banks are defined as banking offices situated within the United Kingdom of members of the groups of banks covered by these tables, of the British Bankers' Association, and of certain other banks carrying on a similar business. (For full details see the Bank of England's *Quarterly Bulletin*, December 1962).

Money at call and short notice

The term 'money market' is confined, from September 1962, to the members (at present twelve) of the London Discount Market Association. Other money at call, and at short notice (up to one month), is shown separately, and is defined as follows:

Loans to jobbers and stockbrokers, including those from Account to Account, to money brokers on the Stock Exchange, to bill brokers and similar money market institutions which are not members of the London Discount Market Association, and to bullion brokers. The banks' own holdings of Tax Reserve Certificates are also included.

Money lent at call and short notice to U.K. banks is excluded from this heading and included under 'Balances with other U.K. banks'.

Loans to U.K. local authorities

This column includes all deposits with, and loans and advances made to, U.K. local authorities: but it excludes any money which might be placed by the banks with local authorities where the banks were acting solely as agents and had no corresponding deposit liabilities.

British government and government-guaranteed securities

The figures are given at book value or cost.

Advances and other accounts

Before September 1962 these comprised amounts outstanding on loan and overdrawn accounts, the banks' foreign currency balances with banks and financial institutions overseas (the coverage of which may not have been complete) and the 'other accounts' of the banks themselves. From September 1962 the figures are shown without deduction of provisions for bad and doubtful debts and excluding the 'other accounts': they also exclude advances to other U.K. banks and to U.K. local authorities.

Other assets

Before September 1962 these comprised sterling securities, other than British government and government-guaranteed securities (excluding trade investments and investments in affiliated banks and subsidiary companies). From September 1962, the figures include trade investments but exclude all investments in other U.K. banks or in other affiliated and subsidiary banks; also included since September 1962 are foreign currency assets not included elsewhere, such as investments and discounted bills denominated in currencies other than sterling.

Accepting houses

Comprises the seventeen current members of the Accepting Houses Committee, namely:

Arbuthnot Latham & Co. Ltd., Baring Brothers & Co. Ltd., Wm. Brandt's Sons & Co. Ltd., Brown, Shipley & Co. Ltd., Antony Gibbs & Sons Ltd., Guinness Mahon & Co. Ltd., Hambros Bank Ltd., Philip Hill, Higginson, Erlangers Ltd., S. Japhet & Co. Ltd., Kleinwort, Benson Ltd., Lazard Brothers & Co. Ltd., Samuel Montagu & Co. Ltd., Morgan Grenfell & Co. Ltd., N. M. Rothschild & Sons, M. Samuel & Co. Ltd., J. Henry Schroder, Wagg & Co. Ltd., S. G. Warburg & Co. Ltd. (incorporating Seligman Brothers).

British overseas banks

Comprises thirty-two of the thirty-three current members of the British Overseas Banks Association, namely:

Australia and New Zealand Bank Ltd., The Bank of Adelaide, Bank of Ceylon, The Bank of India Ltd., Bank of London and South America Ltd., Bank of Montreal, Bank of New South Wales, Bank of New Zealand, The Bank of Nova Scotia, Bank of West Africa Ltd., Barclays Bank D.C.O., The British Bank of the Middle East, Canadian Imperial Bank of Commerce, The Chartered Bank, The Commercial Bank of Australia Ltd., The Commercial Banking Company of Sydney Ltd., Commonwealth Trading Bank of Australia,

The Eastern Bank Ltd., The English, Scottish and Australian Bank Ltd., Ghana Commercial Bank, The Hong Kong and Shanghai Banking Corporation, Lloyds Bank (Foreign) Ltd., Mercantile Bank Ltd., National and Grindlays Bank Ltd., The National Bank of Australasia Ltd., The National Bank of New Zealand Ltd., The National Bank of Nigeria Ltd., Netherlands Bank of South Africa Ltd., The Royal Bank of Canada, The Standard Bank Ltd., State Bank of India, The Toronto-Dominion Bank.

The British and French Bank Ltd. is also a member of this Association but contributes to the figures for Foreign banks and affiliates only.

American banks

Comprises nine American banks in London, namely:

The American Express Company Inc., Bank of America National Trust and Savings Association, Bankers Trust Company, The Chase Manhattan Bank, Chemical Bank New York Trust Company, Continental Illinois National Bank and Trust Company of Chicago, First National City Bank, Manufacturers Hanover Trust Company, Morgan Guaranty Trust Company of New York.

Foreign banks and affiliates

Comprises the nineteen current members of the Foreign Banks and Affiliates Association, namely:

Anglo-Israel Bank Ltd., Anglo-Portuguese Bank Ltd., Banco de Bilbao, Banco Español en Londres S.A., Bank of China, Banque Belge Ltd., Banque Belgo-Congolaise S.A., Banque de l'Indochine, British and Continental Banking Company Ltd., British and French Bank Ltd.⁽¹⁾, Comptoir National d'Escompte de Paris S.A., Crédit Industriel et Commercial, Crédit Lyonnais, Italo-Belgian Bank, National Bank of Greece, Société de Banque (C.F.A.T) S.A., Société Générale, Swiss Bank Corporation, Živnostenská Banka National Corporation.

Other overseas banks

Comprises the Ottoman Bank; six Japanese banks, namely Bank of Tokyo Ltd., Fuji Bank Ltd., Mitsubishi Bank Ltd., Mitsui Bank Ltd., Sanwa Bank Ltd., Sumitomo Bank Ltd.; and nineteen other banks registered overseas, namely Afghan National Bank Ltd., African Continental Bank Ltd., Bangkok Bank Ltd., Bank of Baroda Ltd., Bank of Cyprus (London) Ltd., Central Bank of India Ltd., Commercial Bank of the Near East Ltd., Habib Bank (Overseas) Ltd., Intra Bank S.A., Ionian Bank Ltd., Malayan Banking Ltd., Moscow Narodny Bank, Ltd., National Bank of Pakistan, Palestine-British Bank, Rafidain Bank, Rea Brothers Ltd., E. D. Sassoon Banking Co. Ltd., Swiss-Israel Trade Bank, United Commercial Bank Ltd.

Bank clearings

Debit clearing

The clearings reported by the London Bankers' Clearing House represent the total of bankers' effects (cheques, drafts, bills, interest warrants, etc.) passed through the clearing house for collection from the banks. They exclude cheques, bills, etc., drawn on and paid into offices of the same bank.

The figures are published under two regions: (a) Town, restricted to cheques, bills, etc., paid into and drawn on Town Clearing Offices in the City of London, and (b) General, which covers cheques, bills, etc., drawn on Offices in the rest of England and Wales (apart from those passed through the Provincial and other purely local clearings) and includes those drawn on but not paid into Town Clearing Offices.

Provincial clearings represent, with certain minor exceptions, cheques, bills, etc., paid into and drawn on selected branches in the following twelve towns:

Birmingham, Bradford, Bristol, Hull, Leeds, Leicester, Liverpool, Manchester, Newcastle-upon-Tyne, Nottingham, Sheffield and Southampton.

Credit clearing

A general credit clearing, similar to the debit clearing (see above), was instituted at the London Bankers' Clearing House in April 1960, to cover, in the first instance, payment by traders' credit (including salary and pension payments effected through the traders'

credit machinery) and standing order payments. In October 1960, the scheme was extended to include credits paid in over the counter by customers for transmission to accounts at other banks. In March 1961, a further stage was introduced enabling credits to be paid in at any clearing bank by a member of the public (whether having a banking account or not) for credit to any banking account elsewhere with a clearing bank; for certain organisations this stage was delayed until October 1961.

The figures exclude credit transfers between offices of the same bank.

IV. OTHER FINANCIAL INSTITUTIONS

Building societies

The figures, which are partly estimated, cover all building societies in the United Kingdom. The annual totals as compiled by the Registrar of Building Societies (and the Registrar of Friendly Societies in Northern Ireland) from the statutory annual returns have been adjusted to provide estimates on a calendar year basis. The quarterly figures are based on quarterly returns from a statistical panel of members of the Building Societies' Association, together with returns from the Halifax Building Society; these cover societies with about 90 per cent. of the total assets of all building societies. Estimates are included for the quarterly transactions of non-reporting societies.

Interest accrued is that accruing in the quarter, whether or not credited to accounts, less amounts paid out. Interest on shares and deposits includes dividends and bonuses.

Government Loans: advances to societies under the House Purchase and Housing Act, 1959.

Advances on mortgages (net) are advances less repayments of principal.

Other assets consist mainly of office premises.

The figures for persons relate to individuals and unincorporated bodies.

Trustee savings banks: special investment departments

The special investment departments are not included in the Exchequer group nor in the central government as defined for national income purposes. In the Exchequer financing table the purchases by the special investment departments of British government and government guaranteed securities, Treasury bills, tax reserve certificates and defence bonds are included in the sales to the public. Deposits received by the special investment departments are not included in small savings as shown in Table 3, but are shown as part of national savings in Table 10.

Superannuation funds: public sector (excluding local authorities)

The figures are based on quarterly and annual returns received from those funds which are available for investment by their trustees. The main superannuation arrangements in the central government sector do not result in independently administered funds. A small amount is included for non-reporting funds. The funds cover mainly employees currently employed in the nationalised industries, but also include some pre-nationalisation funds and certain other funds (these are: British Council superannuation scheme, Commonwealth War Graves Commission superannuation scheme, Indian Family Pension funds and National Industrial Fuel Efficiency Service superannuation scheme).

Superannuation funds: local authorities

The figures of annual holdings are compiled from returns covering virtually all of the local authority superannuation funds in the United Kingdom. The quarterly figures are based on returns from a sample covering over 90 per cent. of the assets of these funds. Estimates are included for the non-reporting funds.

Investment trusts

The investment trusts invited to contribute returns are members of the Association of Investment Trusts and other companies listed as investment trusts by the London Stock Exchange. If further returns are received, figures will be amended.

Net current assets exclude contingent assets and liabilities such as claims on, or sums due to, the Inland Revenue or the accrued

⁽¹⁾ Also a member of the British Overseas Banks Association

liability for loan interest. They include (in Other short-term assets or borrowing) sums due from, or to, stockbrokers on account of securities sold or purchased and still awaiting settlement.

Unit trusts

The returns cover all unit trusts authorised by the Board of Trade under the Prevention of Fraud (Investments) Act, 1958. They are collected in the main through the Association of Unit Trust Managers but include also the returns of trusts whose managers are not members of the Association.

Hire purchase finance companies

The figures, which are partly estimated, relate to the same hire purchase finance companies as those in Table 46 on hire purchase and other instalment credit.

The figures in Table 44 of hire purchase, credit sale and other instalment credit outstanding relate to agreements entered into directly by finance companies plus amounts owed on agreements discounted with them by retailers; the figures in Table 45, on the other hand, relate only to the amount owed on direct agreements with the finance companies.

The figures are not presented as an aggregate balance sheet of the finance companies; some fixed assets such as buildings and office equipment are omitted, for instance, while the amount of hire purchase, credit sale and other instalment credit outstanding includes unearned finance charges (the charges element in instalments not yet due or received); provision for unearned finance charges is not included in the liabilities shown.

For fuller details see *Board of Trade Journal*, 19 October 1962.

V. CAPITAL ISSUES AND CREDIT

Capital issues

The estimates relate to new money raised by issues of ordinary, preference and loan capital (public issues, offers for sale, issues by tender, placings, and issues to shareholders and employees) by quoted public companies and local authorities in the United Kingdom and by overseas public companies and public authorities (including local authorities and international organisations). Mortgages, bank advances and any other loans redeemable in twelve months or less are excluded, as also are loans from United Kingdom government funds. Issues to shareholders are included only if the sole or principal share register is maintained in the United Kingdom. Estimates of issues are based on the prices at which securities are offered to the market. Subscriptions are recorded under the periods in which they are due to be paid. Redemptions relate to fixed interest securities of the kinds included as issues; conversions are included in the gross figures of both issues and redemptions.

The division between United Kingdom and overseas company borrowers is determined by the location of the registered office. United Kingdom local authorities include, in addition to local governments, such public bodies as water, dock and harbour boards. Special finance agencies are quoted public companies engaged in the provision of medium and long-term finance to industry (e.g. I.C.F.C.). The industrial classification in the third part of the table is according to the primary occupation of the borrowing company or group and is based on the *Standard Industrial Classification* (H.M.S.O., 1958).

A fuller description of the estimates is given in the Bank of England's *Quarterly Bulletin*, Volume I, No. 5 (December 1961) where they were first published.

Hire purchase and other instalment credit

Instalment credit

The figures relate mainly to hire purchase agreements, but include other forms of instalment credit, for example, credit sale agreements and personal loans repayable by instalments. Excluded from the figures are forms of instalment credit used mainly for non-durable goods, for example, budget accounts and sales against checks or tickets and non-instalment credit, such as ordinary monthly charge accounts.

Goods covered

Hire purchase and other instalment credit sales of durable goods are nearly all financed by household goods shops and finance houses. Household goods shops (covering sales of furniture, carpets, soft furnishings, radio and television sets, cookers, refrigerators and other domestic electrical goods and hardware, pedal cycles and

perambulators) directly finance most of their instalment credit sales, the balance being directly financed by finance houses. Finance houses also directly finance nearly all instalment credit sales of motor vehicles and caravans, together with a substantial amount of farm, industrial and commercial equipment and other non-household goods, such as portable sheds and garages.

Debt

Estimates relate to the balance of instalments to be paid. Some of the debt owing directly to shops is discounted with finance houses, but this discounted debt is included in the figures for shops. The figures for finance houses comprise only the debt on agreements entered into by them directly with users of goods, and exclude debt on their other financing activities (discounting of retailers' agreements, financing of dealers' stocks, etc.).

New business

Hire purchase and other instalment credit sales of shops are valued at the credit price of the goods (that is, including deposits and credit charges). Figures relate to all the instalment credit sales of shops whether financed by the shops or by finance houses, in contrast to figures of debt for shops which relate only to that part which is directly financed by the shops. Figures of new business of shops therefore duplicate to some extent the figures of new business of finance houses.

New credit extended by finance houses is the credit price of the goods less deposits but including charges. As with their figures of debt, figures relate only to agreements entered into by finance houses with users of goods.

Sources of the figures

The values of credit sales by household goods shops (£314.60 million) and of new credit extended by finance houses (£350.52 million) in 1957 were derived from the Census of Distribution. The index numbers are projections of these figures calculated by means of monthly returns from a sample of household goods shops comprising showrooms of the gas and electricity boards, co-operative societies and panels of retailers, multiple and independent, and department stores and from a sample of finance houses reporting a high proportion of the business of all finance houses. The totals of debts outstanding for household goods shops and for all finance houses are likewise projections of the end-1957 figures by means of the same samples.

Statistics are published in greater detail each month in the *Board of Trade Journal*.

Quarterly series

Details of the derivation of these estimates were given in the September 1961 issue of *Economic Trends*. The figures have been revised in the light of more comprehensive information about deposits on household goods derived from the Family Expenditure Surveys. Information from these sources has cast doubt on the accuracy of the estimates of deposits on non-household durable goods (mainly cars) hitherto included in the section of the table entitled Estimated consumer transactions and this section has consequently been withdrawn.

Finance houses

Members of the Finance Houses Association

Currently, the principal members are: Astley Industrial Trust Ltd., Bentinck Ltd., Beverley Finance and Discount Company Ltd., Bowmaker Ltd., British Wagon Company Ltd., Castle Finance Ltd., Charterhouse Credit Company Ltd., Forward Trust Ltd., Kingsland Finance Company Ltd., Lloyds and Scottish Finance Ltd., Lombank Ltd., Mercantile Credit Company Ltd., North Central Finance Ltd., North West Securities Ltd., Northern & General Finance Ltd., Southern Industrial Trust Ltd., St. Margaret's Trust Ltd., United Dominions Trust (Commercial) Ltd. A list of subsidiary and associate companies who are also members of the Association may be had on application to the Association.

Deposits held with the Lombard Banking Group are excluded from the figures.

Total instalments owing at end June 1962, to all companies which had ceased to be members between end June 1961 and end June 1962, were about £20 million and their deposits £5 million.

VI. INTEREST RATES AND SECURITY PRICES

Short-term money rates

Bank rate

The minimum rate at which members of the Discount Market may discount British Government Treasury bills or approved bills of exchange at the Bank of England. The Bank of England also makes advances to the Discount Market, against the security of such bills or of British Government securities with five years or less to final maturity, at a rate that is currently not less than Bank rate.

British government and government guaranteed securities: prices and yields

Yields

The gross flat yield on a security is the annual amount receivable in interest expressed as a percentage of the purchase price. The net flat yield is the gross flat yield less income tax at the standard rate. These yields are used mainly for irredeemable or undated stocks, where the absence of a fixed redemption date does not permit the calculation of any certain capital gain or loss; and they are comparable with rates of interest obtainable on deposits, mortgages and other investments that offer no capital gain or loss. For investors whose only concern is annual receivable income (e.g. life interests) these yields are a measure of their return on dated securities also; but most investors in these stocks will be concerned, in addition to the annual income, with the capital gain or loss arising from the difference between the price at which they were purchased and the price at which they will be redeemed at a known date (or range of dates).

The gross redemption yield comprises the gross flat yield together with an annual apportionment of the calculated capital gain or loss on dated securities held to redemption. It is an appropriate measure of the gross annual return on these securities, if held to maturity, for investors who either pay no tax (e.g. pension funds) or pay tax on income and capital profits alike (e.g. security dealers) it provides a convenient means of comparing the annual return on dated securities with different nominal rates of interest.

The net redemption yield is similar to the gross redemption yield except that income tax at the standard rate is deducted from dividends, but not from capital appreciation. It therefore indicates the net return to investors in the form of taxed dividend income and untaxed capital gains.

The grossed-up net redemption yield, which is the net redemption yield grossed up at the standard rate of income tax, is not an actual return to any class of holder. It provides, for those who pay tax only on income, a notional gross return on dated securities which can be compared with other gross returns containing no tax-free element, such as income (before tax) on investments which offer no capital gain or loss, e.g. deposits, or on which the capital gain or loss cannot be calculated in advance, e.g. equities.

See page 77 for grossed-up net yields on national savings.

Tax reserve certificates

The rates of interest (free of tax) paid on tax reserve certificates for the period from 1955 to end-1959 were as follows:

From 1954	July 14.....	1 %
1955	February 21.....	1½ %
	March 21.....	1½ %
	July 11.....	1½ %
	September 10.....	2½ %
1956	February 29.....	3 %
1957	September 25.....	3½ %
1958	March 29.....	3½ %
	June 7.....	3 %
	August 20.....	2½ %
	November 29.....	2½ %

Industrial security prices and yields

Actuaries' Investment Index

Monthly prices are those on the last Tuesday of each month computed as geometric means, and the annual prices are the geometric means of these monthly series.

Yields are based on gross market prices without deduction of accrued interest for ordinary shares, but calculated after deduction of accrued interest in the case of debentures and preference shares: they are computed as arithmetic means. The yields of fixed interest stocks have been calculated without allowance for redemption.

The Times index of industrial ordinary shares

These figures are taken from *The Times* daily index numbers of Stock Exchange security prices. Full details on the composition and compilation of the index numbers are given in the booklet, "The Times" daily index numbers of Stock Exchange security prices (The Times Publishing Company Ltd.).

Each index number is a weighted arithmetic average of the prices of all shares included in that index. The weight given to each share is proportionate to the average market value of the issue on two dates: 1 July 1958 and 27 October 1959. The base date for each index number is 2 June 1959.

The index for all classes cover 150 shares: 50 large companies (over £30 million market capitalisation) and 100 smaller companies. The indices for capital goods and consumer goods each relate to 43 companies producing wholly or mainly capital goods or consumer goods respectively.

The prices used for computation of the indices are the daily closing prices given in the Stock Exchange price list in the City columns of *The Times*. Where any price is affected by a new issue of shares through a 'rights' issue, capitalisation of reserves, etc., the price used for computation of the index number is adjusted accordingly.

Since March 1960, the monthly figures are the averages of working days. Before March 1960, the figures are based on quotations on alternate Wednesdays.

Financial Times index of industrial ordinary shares

This is a geometric index, calculated and published by the *Financial Times* twice daily, at noon and at the close of Stock Exchange business for the day. Figures shown in the table are closing figures. The base date is 1 July 1935, which equals 100. Constituents of the index are thirty market leaders, representing a cross-section of British industry. Dividend and earnings yield calculations are also geometric.

A fuller description of the composition and compilation of the index is given in the *Financial Times*, 5 March 1960, page 7.

Building societies: rates of interest

The new rates recommended by the Building Societies Association are maximum rates for shares and deposits and minimum rates for mortgages. The quoted rates on shares and deposits are net of income tax where this is paid by societies at the agreed composite rate. The latest composite rates for fiscal years are as follows: 1958/59, 5s. 7½d.; 1959/60, 5s. 1½d.; 1960/61, 5s. 4d.; 1961/62, 5s. 5d.; 1962/63, 5s. 6d. Changes in the rates by individual societies which are members of the Association are not made simultaneously.

VII. OVERSEAS FINANCE

Balance of payments

The items in this table are more fully defined in the October 1962 white paper on *United Kingdom Balance of Payments, 1959-1962* (Cmd. 1837).

Current account

Imports f.o.b., exports f.o.b.

The *Trade and Navigation Accounts* are the basis of the balance of payments figures, but certain adjustments are made in respect of valuation and coverage. The principal adjustment is the deduction of freight and insurance from the *Trade Accounts* figures of imports.

Government (net)

The net total of all United Kingdom Government current expenditure and receipts not included under imports, exports, shipping, interest profits and dividends or travel.

Shipping (net)

Covers dry cargo and tanker transactions. The net total of (a) the United Kingdom shipping industry's disbursements abroad and United Kingdom payments to non-residents for chartering, freight and passenger fares and (b) the overseas earnings of the United Kingdom shipping industry from chartering, freight and passenger fares, and the disbursements of foreign ships in the United Kingdom.

Interest profit and dividends (net)

The net total of debits and credits in respect of interest, profits and dividends. It includes investment income remitted from, or to, the United Kingdom for payment of interest and dividends (after deduction of local taxes) and profits remitted or retained

for reinvestment. Other components include income on portfolio investment and interest on overseas sterling holdings, inter-government loans, bank credits and medium and long-term trade credits.

Travel (net)

The net total of the personal expenditure by United Kingdom residents inside foreign countries and by foreign residents inside the United Kingdom.

Migrants' funds, legacies and private gifts (net)

The net value of private assets passing from resident to non-resident ownership, or vice versa without a *quid pro quo*. The item also includes private gifts of money and of goods sent by parcel post to or from non-residents (other than forces abroad) but excludes migrants' personal or household belongings.

Other services (net)

The net total of all other current transactions. Components include payments and receipts in respect of civil aviation, education, royalties, commissions and banking (excluding interest earnings); foreign government agencies' expenditure in the United Kingdom, including United States and Canadian Forces' expenditure other than payments to United Kingdom Government Departments; and net earnings in respect of insurance and merchanting transactions.

Long-term capital account

Inter-government loans (net)

Net total of loans by the United Kingdom Government to other governments and vice versa and repayments.

Other United Kingdom official long-term capital (net)

Long-term investment and disinvestment in the rest of the world by official bodies.

Private investment (net)

The net total of all other long-term investment and disinvestment by the United Kingdom in the rest of the world and investment and disinvestment by the rest of the world in the United Kingdom. The figures include re-investment of retained profits.

Balancing item

The amount necessary to balance the account; it represents the net total of the errors and omissions in other items.

Monetary movements

Overseas sterling holdings

Changes in overseas sterling holdings: see below.

Gold and convertible currency reserves

The change in the sterling equivalent of the gold and convertible currencies held in the Exchange Equalisation Account. See below.

Other monetary movements

- the change in the sterling equivalent of the Exchange Equalisation Account's currency holdings which were not convertible at the relevant dates;
- the change in the United Kingdom balance in the European Payments Union up to the liquidation of the Union on 15 January 1959;
- changes in foreign currency balances outside the Exchange Equalisation Account, for example, by banks and oil companies;
- changes in sterling acceptances outstanding, and
- all other identified transactions (mainly of a short-term monetary nature) not specifically provided for in other items.

Overseas sterling holdings

Overseas sterling holdings comprise:

- the net holdings, including Treasury bills, in sterling or sterling area currencies of overseas banks (including overseas offices of United Kingdom banks) and other account holders abroad with banks in the United Kingdom (including accepting houses, discount houses and the United Kingdom offices of Commonwealth and foreign banks); British government securities held for account of overseas banks are included;
- sterling funds held with the Crown Agents for Oversea Governments and Administrations and by Currency Boards, excluding Commonwealth (other than United Kingdom) and South African sterling securities; and

- so far as known, the nominal value of British government securities held by other official bodies but not those held by private individuals or firms.

Some funds held by overseas official bodies are included in Other funds and not in Central banks and other official funds.

A full description of these holdings appeared in the May 1958 issue of *Economic Trends*.

Gold and currency reserves and acceptances

Gold and convertible currency reserves

These are the sterling equivalents of the gold and convertible currencies held in the Exchange Equalisation Account and in the accounts into which the interest due on 31 December 1956, on certain loans from the United States and Canada was temporarily paid. (The interest was returned to the Exchange Equalisation Account in April 1957). Gold is valued at 250s. per ounce fine and currencies at parity.

Acceptances

Acceptances outstanding represent claims on overseas residents arising from acceptances given by banks in the United Kingdom.

International Monetary Fund: United Kingdom position

The amount of United Kingdom gold subscription to the International Monetary Fund is not included in the figures for gold and convertible currency reserves. The amount the United Kingdom may draw from the fund is related to the size of the United Kingdom quota and the Fund's holding of sterling. The quota was increased in September 1959, from \$1,300 million (£464 million) to \$1,950 million (£696 million).

Foreign exchange rates

The exchange rates for Australia, New Zealand, South Africa, Bombay and Karachi were:

Australia (£A to £100) (selling rate): 125 throughout.

New Zealand (£NZ to £100) (selling rate): 100.375 throughout.

South Africa (£SA to £100) (selling rate): 1955 to 13 February 1961, 99.875.

From 14 February 1961 a new unit—the Rand—was established on the basis of £SA 1 = Rand 2. The new selling rate (Rand to £100) = 199.75.

Bombay (pence per rupee) (averages of daily mean rates): 18.00 throughout.

Karachi (pence per rupee) (averages of daily mean rates): 1 January 1955, to 31 July 1955, 25.89; thereafter 18.00.

NOTES ON SUPPLEMENTARY TABLES

INCOME AND FINANCE OF QUOTED COMPANIES NEW SERIES

The figures in these tables are derived from an analysis by the Board of Trade of the annual accounts of about 2,000 companies whose shares are quoted on a United Kingdom stock exchange.

The companies included are those with assets of £0.5 million or more or income of £50,000 or more, who are mainly engaged in the United Kingdom in manufacturing, distribution, construction, transport and certain other services. Companies are not included whose main interests are in agriculture, shipping, insurance, banking, finance and property and those operating wholly or mainly overseas.

Wherever possible the analysis is based on the consolidated accounts of groups of companies, including the balance sheets and profit and loss accounts of subsidiary companies within each group. The statistics are not therefore confined to activities in the United Kingdom but include the activities of some subsidiaries operating overseas whose accounts are consolidated with those of the group. The figures relate to a fixed population of quoted companies in 1960: thus if companies within this population amalgamated their place is taken by the new companies. Companies granted stock exchange quotations after 1960 are not included. The figures relate to companies' accounting years ending between 6th April of the year shown and 5th April of the following year. The accounting years of companies end on different dates throughout the year but about 40% of quoted companies have accounting periods ending in the fourth quarter of the calendar year and about 30% end in the first quarter.

For fuller notes see *Board of Trade Journal* for 7th December 1962.

INDEX

Figures indicate Table numbers

- Acceptances:
 - accepting houses, 29, 30
 - Northern Irish banks, 28
 - on non-resident accounts, 56
 - reporting overseas and foreign banks, 29, 31, 32, 33
- Accepting houses, 29, 30
- American banks, 32
- Balance of payments, 54
- Bank advances, 19

ECONOMIC TRENDS

The November issue of *Economic Trends* contains an article on The impact of taxes and social service benefits on different groups of households.

Economic Trends has been prepared to meet the needs of those who want to follow the main trends of the economic situation in the United Kingdom. For this purpose it brings together the main statistical series covering employment, output, consumption, prices, trade and finance, in addition to an article on some aspects of official statistics. For each subject a short table gives the latest figures and a chart shows the way the figures have moved over the last few years.

Each quarter there is a regular article on National income and expenditure. Articles in recent issues have also included:

- New agricultural price indices for the United Kingdom
- Hours and earnings of agricultural workers in England and Wales
- The index of retail prices, January 1956 to January 1962
- The capital account in the balance of payments
- Fuel and power consumption in 1961
- Estimates of the future working population
- Developments in home financial statistics
- Balance of payments statistics

It has been prepared by the Central Statistical Office in conjunction with the Statistics Divisions of Government Departments and is published monthly by Her Majesty's Stationery Office.

Price per copy 5s. 0d. net.

Annual subscription £3 4s. 0d. (including postage)
