CENTRAL STATISTICAL OFFICE

Abstract of Regional Statistics

No. 4

1968

LONDON: HER MAJESTY'S STATIONERY OFFICE

PRICE 12s. 0d. NET

CENTRAL STATISTICAL OFFICE

This Abstract has been compiled by the Central Statistical Office, a Government Department, with the concurrence of the relevant Government Departments in order to bring together the main economic and social statistics available for the regions of the United Kingdom.

Data where relevant are shown by country, that is, Great Britain, Northern Ireland, Scotland, Wales, the Islands, and those principally New Zealand Regions. Standard figures for each of these Regions are given to facilitate comparison with the corresponding or other areas, and important divergences, if any exist, are brought together to provide figures for analysis.

It is hoped that later issues of this Abstract will contain more detailed information on specific topics.

This issue also includes a section on regional figures for the Standard Regions of England.

The tables of the statistical data have been arranged so as to facilitate comparison between the figures presented in this issue, together with the appropriate figures from previous issues which are capable of being compared. The tables are arranged to cover the topics in the order in which they appear and in some cases in the order in which they are likely to be required. It is, however, not always possible to provide in the Abstract all the information which may be required.

Definitions of terms occurring in the Abstract are given in detail in the Supplement of Definitions and Explanatory Notes published annually by the Central Statistical Office. The reader is referred to the notes on the history of the Central Statistical Office for further details.

Revisions and changes in existing tables and new tables

The following new tables have been added in this issue:

Table 3. Births and deaths by cause of death

INTRODUCTION

This Abstract has been compiled by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments in order to bring together the main economic and social statistics available for regions of the United Kingdom.

Except where otherwise stated all series have been classified by New Standard Regions. Detailed descriptions of these Regions are given in Appendix I, which also contains notes on other classifications used and important divergencies. In certain cases it has been possible to provide figures for conurbations.

It is hoped that later issues of the *Regional Abstract* will contain series analysed by sub-divisions of regions.

This issue also includes an outline map of the New Standard Regions of England and Wales (page 65).

The sources of the statistical data are given in Appendix II, together with the approximate date of publication which will enable users to obtain later figures as they appear and in some cases a greater amount of detail than it is practicable to publish in this Abstract.

Definitions of terms occurring in this Abstract are given in detail in the *Supplement of Definitions and Explanatory Notes* published annually in conjunction with the January issue of the *Monthly Digest of Statistics*.

Revisions and changes in content

New tables

The following new tables have been added in this issue:

Table 3 Daily mean air temperature

Table 4 Monthly general rainfall

Table 15 Estimated thermal content of fuel consumed

Table 46 Analysis of wages by range of wages
Table 47 Analysis of salaries by range of salaries

Revisions

Revisions have been made to the presentation of some tables; the following are those principally affected:

Table 6. This table now shows population changes in Great Britain and Northern Ireland.

Table 12. National Coal Board Areas have replaced National Coal Board Divisions as the basis of analysis. For purposes of comparison, figures are given for the last five financial years.

Table 23. The table on public investment in new construction has been recast to show figures for the three years 1965/66 to 1967/68.

Tables 50 to 52. The three tables relating to Family Expenditure Survey have been updated to cover the three-year period 1964 to 1966.

Deletion

Annual gross migration of employees, (Table 10 in last year's issue) has been omitted.

Symbols and conventions used

Rounding of figures: In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Symbols: The following symbols have been used throughout this Abstract:

.. = not available.

- = nil or negligible (less than half the final digit shown).

(²) These projections correspond to the total population projections prepared in 1967 by the Government Actuary. These projections incorporated the 1966 revisions to the assumptions about future births, mortality and migration. For further details see Appendix E to the Registrar General's Quarterly Return for England and Wales, No. 476, for the fourth quarter of 1967.

(³) The projections for Yorkshire and Humberside and East Midlands regions incorporate an adjustment for the boundary change between these two areas on 1 April 1967.

* For changes between Old and New Standard Regions see notes 1-5 in Appendix I, page 66. Because the method of calculating regional estimates was changed, the estimates for 1965 and later years are not strictly comparable with those for 1964 and earlier years. Alternative estimates for South West, North West, North, Scotland and Wales only for 1964 based on the current method of calculation are published on page 391 of the July 1966 issue of the Ministry of Labour Gazette. (1) Including some civil servants stationed overseas not allocated to regions. (2) Throughout, Poole is included in South East and Dorset (other than Poole) in South West. (3) Peterborough is included in North Midland up to 1964 and in East Anglia from 1965.

(1) Including some civil servants stationed overseas not allocated to regions.

(2) Because of an alteration of regional boundaries made as a result of the Sheffield Order 1967, about 25,000 persons aged 15 and over who were included in the home population estimates for the East Midlands in 1966 and earlier years are now included in the Yorkshire and Humberside estimates. The activity rates for 1967 for these regions are therefore not strictly comparable with those for earlier years. On the basis of the revised boundaries in 1966 overall activity rates (males and females combined) would have differed from those shown by +0.6 in East Midlands and -0.4 in Yorkshire and Humberside.

(3) Peterborough is included in North Midlands up to 1964 and in East Anglia from 1965.

(4) Throughout, Poole is included in South East and Dorset (other than Poole) in South West.

(5) In compiling the December 1967 quarterly estimates it was found that about 3,000 civil servants working in the South East had been included in all previous estimates for East Anglia. The activity rates for East Anglia are therefore slightly overstated. It was estimated that in 1967 the overstatement of the overall activity rate (males and females combined) is about 0.2 per cent. Activity rates for the South East are unaffected.

EMPLOYMENT

Activity rates: employees at mid-year expressed as a percentage of the home population

(1) Mines operated by the National Coal Board.

(2) The Areas shown were introduced by the National Coal Board on 26 March 1967 on the basis of collieries in operation at the time. For this table, collieries which were in production in earlier years but had closed before the Area organisation was introduced have been allocated to the Areas appropriate for their situations.

(3) Figures relate to periods of 52 weeks.

Opencast coal

National Coal Board Opencast Executive Regions⁽¹⁾

TABLE I3

| | 1957 | 1958 | 1959 ⁽³⁾ | 1960 | 1961 | 1962 ⁽⁴⁾ | 1963 | 1964 | 1965 | 1966 | 1967 |

| North Western | 1,336 | 1,126 | 622 | 392 | 361 | 268 | 190 | 96 | 92 | 85 | 10 |
| West Midlands | 446 | 446 | 268 | 231 | 251 | 208 | 287 | 281 | 225 | 315 | 161 |
| South Western | 1,713 | 1,759 | 1,559 | 1,442 | 1,316 | 1,518 | 1,682 | 1,800 | 2,003 | 2,187 | 2,068 |
| Scotland | 776 | 771 | 510 | 649 | 678 | 415 | 559 | 376 | 353 | 365 | 389 |

(¹) The Regions approximate to National Coal Board Divisions in operation immediately prior to the introduction of a new Area structure on 26 March 1967, except that Cumberland is included with Northumberland and Durham and not with the North West Region.

(²) Periods of 52 weeks. The figures exclude all screening and washing losses.

(³) The production figures for 1959 include 30,100 tons put into stock prior to that year but not previously included, and a reduction of 93,700 tons due to screening losses not previously accounted for.

(⁴) From 1962 the production figures include the output of certain licensed sites previously excluded.

(⁵) The figures are for the last pay day of each year.

(¹) For definition of coverage see Page 96 of the *Ministry of Power Statistical Digest*, 1967. Figures relate to periods of 52 weeks.

(²) The number of establishments in these cases is small and publication of these figures might reveal consumption by individual establishments.

The figures suppressed have, however, been included in those for the United Kingdom as a whole.

(³) The figures for Northern Ireland are estimates designed to have similar coverage to those for Great Britain.

(1) Crude steel comprises all qualities; semi-finished steel comprises steel makers' deliveries (excluding used in own works for heavy products) of re-rolling and forging non-alloy blooms, billets and slabs; finished steel comprises net deliveries from home production excluding welded tubes over 16 inches in diameter.

(2) Periods of 53 weeks. Other periods relate to 52 weeks.

(3) Production of crude steel in district 3 is included in the figures for district 2.

(1) Standard Industrial Classification Orders III-XVI. Where combined returns were made covering establishments in more than one region, total sales, net output and employment have been estimated in proportion to the number of operatives at each establishment. Estimated figures are also included for small firms who were not required to complete detailed returns and for unsatisfactory returns.

(2) Value of sales of goods and work done. Merchant goods and canteen takings are included for 1958 but excluded for 1954.

(3) Excluding outworkers but including working proprietors. Persons engaged in merchanting or factoring and canteen workers are included for 1958 but excluded for 1954.

(1) The figures shown for 1967/68 are preliminary estimates based on incomplete data and may be revised later.

(2) Some headings other than this include the values of dwellings provided by authorities acting otherwise than as housing authorities. Thus the total for dwellings shown here is lower than that for public sector dwellings in the national income accounts.

(3) This represents the grants made by the University Grants Committee for new construction.

(4) The estimates for 1967/68 include expenditure of about £30 million not treated as investment in new construction in earlier years.

(¹) The figures relate to schemes over 5,000 square feet. The definition of industrial floor space was changed in all regions except North, Scotland and Wales in 1960/61. The ancillary space for storage, canteens, etc. excluded at that time has been included in the area of industrial development certificates issued since mid-August 1966. The figures in column a for 1966 are estimates of the area which would have been approved on the 1960/61 to 1965 basis. The impact of this change cannot be related to completions.

(²) For all projects (new buildings, extensions to existing premises and buildings converted to industrial use) for which industrial development certificates were issued.

(³) For manufacturing industry only (new buildings and extensions to existing premises).

New houses started: public and private sectors

(1) Analysis of public authorities' housing figures is given in Table 28.

(2) Poole is included in South West region for housing purposes.

(3) Except for Greater London these figures exclude building by government departments for years before 1966.

CONSTRUCTION

(1) Analysis of public authorities' housing figures is given in Table 29.

(2) Revised basis. From 1 January 1967 the Greater London Council changed its previous practice in the recording of dwellings started and the effect was to reduce by 4,623 the number shown as under construction.

(3) Poole is included in South West region for housing purposes.

(4) Except for Greater London these figures exclude building by government departments for years before 1966.

(5) Following boundary alterations on 1 April 1966, the area of the West Midlands conurbation was changed. This has resulted in an increase of 170 in the number of dwellings under construction, not balanced by completions and starts.

New houses completed: public and private sectors

(¹) Figures for Great Britain are derived from returns made by harbour authorities to the National Ports Council. (Details for individual ports are available in the N.P.C. Digest of Port Statistics.) Figures for Northern Ireland are estimated from Customs and Excise records. The figures relate to the regions in which the ports are situated and not to the origin or destination of the goods.

(1) For definition of foreign trade statistics see *Board of Trade Journal*.

(2) Vessels which load or unload merchandise, bullion, specie or mail except those loading or unloading only government stores, bunkers or ships' stores.

(3) Vessels as defined in (2) together with those loading or unloading only government stores, bunkers, ships' stores or passengers.

(4) Various regions; the aggregate of the principal ports in each region does not therefore equal the total for the region.

Notes on Tables 44-48

Surveys of personal incomes (Tables 44-47)

The allocation to regions is based on the place of main assessment of each person, which is usually the place of business or employment and not the place of residence. H.M. forces and merchant seamen are assessed centrally and are shown as two separate regions. In 1965/66 for the first time civil servants were as far as possible included in the region in which they live. Hence the figures for Public Departments are much lower than formerly.

The estimates in Tables 44 and 45 relate to all personal incomes over the effective tax exemption limit (£275 in 1965/66). Tables 46 and 47, published for the first time, are on a slightly different basis from and slightly less reliable than Tables 44 and 45. They also include a few cases with income below the effective exemption limit. The figures for these low income cases are incomplete.

In these tables, the heading 'Thousands' is the number of persons (counting husband and wife as one person in Tables 44 and 45) having total incomes within the range or category concerned. Each person appears once in each class in which he has income, and the total number of cases exceeds the total number of incomes because of persons counted in more than one class.

Salaries are defined by occupations. The main occupations (in addition to managerial, administrative, professional, technical, clerical and office staff generally) treated as salaried are as follows: works foremen, draughtsmen, laboratory employees, telephone and radio operators, travellers and agents, railway officials, air crew, police and ships, officers, farm managers, matrons, actors, musicians, professional sportsmen and officers of the armed forces.

Wage earners comprise the non-salary earning categories: operatives and manual working foremen, factory inspectors, store-keepers, caretakers, transport workers, shop assistants, barbers and others in personal service, stagehands, gas inspectors, etc.; police 'other ranks,' fire officers and men, seamen, and postmen.

The best estimates of United Kingdom total number of cases (all incomes) in Tables 46 and 47 differ from those published and are as follows (thousands):

Wages
males 11,698·4; females 4,815·1

Salaries
males 4,084·3; females 3,018·7.

Regional statistics of earnings (Table 48)

From the introduction of the graduated pensions scheme, information became available in the records of the Ministry of Social Security about the gross earnings of persons of different ages covered by the income tax P.A.Y.E. scheme through which the graduated contributions are collected. The informa-

tion has now been used to produce a new series of analyses showing the pattern of earnings in the standard statistical regions.

The analyses are based on a sample of the population registered for national insurance, whether paying contributions to the graduated pensions scheme, or not. A 2 per cent. sample of people with contribution cards covering the year to the beginning of March is maintained for general statistical purposes. From this sample, equal to about one-half of 1 per cent of the total number registered for national insurance, the records of employed people aged not less than 18 or more than 69/64(men/women) were selected. Such people were within the scope of the graduated pensions scheme for the whole of the year, whether participating in it, or contracted out.

These records were scrutinised and sorted to identify two groups of people: (a) those who in that contribution year had actually paid at least 48 contributions as an employed person, and (b) in addition, those others who had paid at least one (but less than 48) such contributions, and had a total of at least 48 paid or credited, usually for sickness or unemployment. The relevant records were then matched against microfilms of the P.A.Y.E. deduction documents to obtain total gross earnings in the tax year ending on 5th April.

The matched records were analysed – separately for men, all women, spinsters, married women, and widows and divorced women – in two ways: group (a) separately (i.e. those whose flat-rate contribution records indicated that they had had virtually a full year's pay), and groups (a) and (b) together (i.e. the records of everyone who had had at least one week's pay in the year, and who had apparently remained in the employment field throughout the year). Both series exclude men and women whose sickness or unemployment had lasted the whole year.

For the purpose of comparing earnings in different regions, each person was allocated to a standard statistical region by reference to his home address. Because this method of allocation would not be satisfactory in relation to forces personnel, regional comparisons were limited to persons in civil employment.

The figures in Table 48 are subject to sampling error, and the extent of this error depends on the numbers in the samples and the dispersion of the amounts received in each area. On this occasion, averages include all levels of earnings covered by the P.A.Y.E. arrangements. The analyses for married women and widows are less representative than those for men and spinsters because many employed married women and widows – especially those working part-time – have low earnings which do not bring them within the scope of the income tax P.A.Y.E. arrangements. For this reason, the table does not show a separate breakdown by region of the figures for married women and widows, but these categories are included in the regional averages for 'All women'.

INCOME AND EXPENDITURE

Average gross annual earnings of persons in civil employment according to age⁽¹⁾ and region of residence

(1) The figures for the United Kingdom include all households interviewed in the three years 1964-1966. The results for Northern Ireland are based on a relatively small number of households and, although included in the United Kingdom figures, are considered to be too unreliable for separate publication.

(2) The recorded expenditures on alcoholic drink and tobacco are known to be understated.

(3) Including children's pocket money and other expenditure not assignable elsewhere.

(¹) All staffed beds, including those temporarily unavailable by reason of redecoration, quarantine, etc. Figures for England and Wales and Northern Ireland are at end-December, those for Scotland at end-September.

Hospitals: staff employed (England and Wales)

New Standard Regions

TABLE 55

| | | Number of Class I insurance cards held ⁽¹⁾ | | Whole-time equivalent of staff in post ⁽²⁾ | | 1966 | 1967 |
|--------------------------|-----|---|---------|---|---------|------|------|
| | | 1966 | 1967 | 1966 | 1967 | | |
| North | ... | 35,563 | 36,366 | 33,500 | 34,100 | | |
| Yorkshire and Humberside | ... | 54,761 | 57,309 | 48,800 | 51,100 | | |
| East Midlands | ... | 30,830 | 31,767 | 28,200 | 29,000 | | |
| East Anglia | ... | 15,857 | 16,553 | 13,800 | 14,300 | | |
| South East | ... | 228,560 | 237,523 | 211,800 | 217,600 | | |
| South West | ... | 43,573 | 44,875 | 39,900 | 40,900 | | |
| Wales | ... | 32,825 | 34,179 | 30,600 | 31,500 | | |
| West Midlands | ... | 49,818 | 53,197 | 45,900 | 47,500 | | |
| North West | ... | 81,119 | 85,206 | 73,600 | 76,500 | | |

(¹) The allocation to regions of Class I insurance cards is based on the location of the employing authority holding the cards. The numbers of insurance cards relate only to employees paying Class I contributions.

(²) Some estimation is necessary to allocate the whole-time equivalent of staff to the regions and because of this all figures have been rounded to the nearest hundred.

(1) In England and Wales 13,876 part-time pupils in maintained primary schools, 10,726 part-time pupils in grant-aided nursery schools and 1,535 part-time pupils in independent nursery schools have each been included as 0.5 pupils. In Scotland and Northern Ireland all part-time pupils in these schools have been counted as whole numbers.

(2) Maintained and direct grant schools.

(3) 'Grant-aided secondary' schools in Scotland, 'Voluntary grammar' schools in Northern Ireland.

(4) The term 'recognised as efficient' applies only to independent schools in England and Wales. For Scotland and Northern Ireland only those independent schools which are registered have been included.

(5) Taking account of the full-time equivalent of part-time teachers.

(6) The number of teachers in independent schools in Scotland has been estimated.

(7) Including pupils in the preparatory departments of grammar schools.

**Percentage of pupils in maintained schools (excluding special schools)
remaining beyond the statutory leaving age**

(1) Since January 1964, 15-year-olds in England and Wales have been over school-leaving age only if born between January and August, as in 1963 the Christmas leaving date was abolished. Therefore, the comparison for these two countries or the constituent elements in the United Kingdom totals, is between one part of the age group 15 and the corresponding part aged 13 two years earlier. The apparent decline, from 1963 to 1964, in the percentage staying on is due to the fact that the tendency, before 1964, to remain at school during the winter was stronger among those born between September and December than among those born between January and August. In Scotland and Northern Ireland the whole age group is regarded as above school-leaving age although in some Scottish areas the Christmas leaving date was also abolished in 1963.

(2) Including small numbers aged over 18.

NEW STANDARD REGIONS OF ENGLAND AND WALES

APPENDIX I

REGIONAL CLASSIFICATION

New Standard Regions

The standard regions for statistical purposes have been revised to coincide with the regions now used for economic planning. The revised definitions are as follows:

North

Cumberland, Durham, Northumberland, Westmorland, and the North Riding of Yorkshire.

Yorkshire and Humberside

The East and West Ridings of Yorkshire (including City of York) and Lincolnshire (Parts of Lindsey excluding Lincoln C.B.).

East Midlands

Derbyshire (except the High Peak District, which is included in the North West Region), Leicestershire, Lincolnshire (Parts of Holland, Parts of Kesteven and Lincoln C.B.), Northamptonshire, Nottinghamshire and Rutland.

East Anglia

Cambridgeshire and the Isle of Ely, Huntingdonshire, the Soke of Peterborough, Norfolk and Suffolk.

South East

Bedfordshire, Hertfordshire, Essex, Berkshire, Buckinghamshire, Oxfordshire, London (Greater London Council area), Kent, Surrey, Sussex, Hampshire (including the Isle of Wight) and the Borough of Poole.*

South West

Cornwall (including the Isles of Scilly), Devonshire, Dorset (excluding the Borough of Poole)*, Gloucestershire, Somerset and Wiltshire.

Wales

The whole of Wales and Monmouthshire.

West Midlands

Herefordshire, Shropshire, Staffordshire, Warwickshire and Worcestershire.

North West

Cheshire, Lancashire and the High Peak District of Derbyshire (the Boroughs of Buxton and Glossop, the urban districts of New Mills and Whaley Bridge, and the rural district of Chapel-en-le-Frith).

Scotland

The whole of Scotland.

Northern Ireland

Antrim, Down, Armagh, Fermanagh, Tyrone, Londonderry.

*Poole is in the South West Economic Planning Region but was previously in the Southern region for statistical purposes and has been left in the new South East statistical region pending the report of the Local Government Commission on this area.

The changes compared with the standard regions as previously defined are:

1. Lincolnshire (parts of Lindsey) has been transferred from the former North Midland Region and added to the East and West Ridings to form the new Yorkshire and Humberside Region.
2. The remainder of the former North Midland Region, less the Soke of Peterborough (which has been joined to Huntingdonshire) has been renamed the East Midlands Region. The County Borough of Lincoln remains in this region.
3. Part of the former Eastern Region—Norfolk, Suffolk, Cambridgeshire and Huntingdonshire—together with the Soke of Peterborough forms the new Region of East Anglia.
4. The remainder of the Eastern Region, together with the former London and South Eastern and Southern Regions, forms the new South East Region. It should be noted that this Region differs from that covered by the South East Study, which included East Anglia.
5. The remaining Regions have the same definitions and names as before, except that the former Midland Region is now renamed the West Midlands Region.

Apart from the major changes noted above there have been some minor adjustments of county boundaries on the recommendation of the Local Government Commission. Some of these have affected two counties which both form part of the same region and where regional boundaries have been affected the changes have been too small to be of any statistical significance.

Government Departments publishing statistics analysed by region are basing their figures on the revised regional definitions from the earliest convenient date and, wherever possible, adjusting figures for earlier periods. This process of revision is not yet, however, complete and in many of the tables figures for earlier years are on the basis of the old standard regions and only some for the later years on the new basis. The regions used are indicated in the headings to the tables. In the case of statistics provided by the Department of Employment and Productivity the regional figures are built up by aggregating the appropriate local employment exchange areas. The boundaries of such areas, however, do not in all cases agree precisely with county or regional boundaries. A note of the areas affected in this way was given in an article in the *Ministry of Labour Gazette* for February 1966; subsequent amendments were notified in the December 1966 issue.

The Greater London Council area forms part of the new South East region, but in view of its importance for planning purposes figures for this area are, wherever possible, being made available as well as those for the South East region as a whole. Where statistics are published for conurbations the Greater London Council area will replace the Greater London conurbation with which it largely coincides.

Other Regional classifications

Ministry of Agriculture Regions

The composition of the Ministry's eight regions in England and Wales was described in *Farm Classification in England and Wales 1964-65*. The only two regions which coincide exactly with the New Standard Regions are Northern (North), and Wales.

National Coal Board Divisions

National Coal Board Areas

Electricity Board Areas

Gas Board Areas

Maps defining these special areas can be found in the *Ministry of Power Statistical Digest*

British Iron and Steel Federation Districts

These areas are defined in *Annual Statistics* published jointly by the British Steel Corporation and the British Independent Steel Producers' Association.

Conurbations

These areas are as defined in the *Annual Abstract of Statistics*, Appendix I.
