INTRODUCTORY NOTE.

The Abstract of Labour Statistics consists of eleven main sections dealing respectively with engloquent; production and consumption; wages and hours of labour; wholesale and retail prices; cost of living; industrial diseases and acidentes; incutonal insurance, workennis' compensation, and old age pensions; strikes and lock-outs and conceilation and arbitration; associations of employers and workpreptic; growth, movement, housing, ages and occupations of the population; and savings banks and pauperism. In most cases the serial tables website to the fifteen year-ending 1913, but, owing to their abstract the production of the production

Some of the tables, notably those relating to employment, are coupilled from information collected primarily for the Beart of Toule Labour Genetic, the mouthly journal of the Bepartment. Information as to changes in rates of wages and hourn of labour, and as to industrial disputes and the work of Conciliation Bearts, is obtained from the Anusal Reports on these subjects published by the Department. Other enquiries made by the Department trainsh the materials for the sections relating to time rates of wages, prices, cost of living, profit-sharing, trade unions, and cooperatives occities.

The remaining materials for the Abstract are mostly concluded in olicila philasization, either of the Search of Crade (e.g., Alcenture of Railway Acaidents, the Report on Emigration and Immigration) or of other Government Departments, principally the Homo Office, the Local Government Board, and the Priently Societies' Registry. The particulars given in some sections (e.g. industrial solutions) bring's gowenter information from a variety of sources, supplemented by returns specially made to the Department.

Certain of the tables are based on material published, or specially supplied to the Department, by private firms and unofficial bodies, e.g.

production of steel, supplied by the British Iron Trade Association; and workmen's cubs, compiled from Returns collected by the Working Men's Clob and Institute Union. Much of the information relating to cooperative societies is based upon Returns made to the Co-operative Union and to the Irish Agricultural Organisation Society.

Among the new tables appearing in the present issue mention may be made of those relating to Health Insurance.

In a number of instances the scope of tables published in previous Abstracts has been extended; this is particularly the case in the sections dealing with the occupations of the people, industrial accidents, workmen's compensation, co-operative societies, and wheat and bread prices

Board of Trade,

Department of Labour Statistics,

December, 1914.

BEER.

QUANTITIES PRODUCED BY BREWERS FOR SALE (LESS THE ALLOWANCE OF 6 PER CENT. FOR WASTE) WITH THE AVERAGE SPECIFIC GRAVITIES.

[Compiled from the Annual Reports of the Inland Revenue Commissioners, and from the Reports of the Commissioners of Customs and Ercise.]

Note.—A "bulk" barrel contains 38 gallons. A "standard" barrel is 36 gallons at the standard gravity of 1655". No record is kept of the bulk quantities of beer produced by browers not for sale.

WHEAT.

NOTE.—The figures are based on the Agricultural Returns of Great Britain and Ireland and the Annual Statements of Trade. Wheat-flour is expressed in wheat on the assumption that 72 units of flour represent 100 of wheat. Exported bisquit and cake are allowed for on the assumption that 75 per cent, is flour. The allowance for seed in the case of British wheat is 2 bushels per acre.

* The quantity of both coal and pig iron available for use was reduced in 1912 on account of the National Coal Dispute in March and April of that year. † Figures no longer available.

CERTAIN DUTIABLE ARTICLES OF FOOD AND DRINK AND TOBACCO.

TUBACCO.

[The figures for all the articles are compiled from the 61st Statistical Abstract of the United Kingdom issued by the Board of Trade; they are obtained by deducting the quantities over-entered, and those exported subsequently to payment of duties, from the quantities entered for Home Consumption in the first instance. The figures in the case of sugar are obtained by subtracting the exports and

No deduction is made in years prior to 1912 for cocoa contained in checolate, &c., manufactured in the United Kingdom and caported.

Based on figures given on p. 280.
Sugar has been subject to duty since April 19th, 1901.

MEAT.

QUANTITY of MEAT obtained from Home Sources and from Foreign and Colonial Sources respectively in the years ended 31st May, 1901 to 1913, together with the percentage proportion obtained from these Sources and the estimated Consumption per Head of the Population of the United Kingdom.

(Furnished by the Board of Agriculture and Fisheries, and calculated on the basis of the returns collected by that Department and by the Department of Agriculture and Technical Instruction for Ireland in connection with the Census of Production Act, 1906.)

NOTE.—It has been found necessary, in consequence fire hinformation received, to revise slightly the index numbers proviously published for Scotland. For a similar resson the index numbers for Ireland are revised for the years 1906–1912 inclusive.

* For Ragland and Welss and for Ireland the perentages are hased on the rates

of cash wages for an ordinary full week; for Scotland allowances in kind have been included in addition to cash payments, on account of the much larger proportion which und allowances form of the earnings of farm servants in Scotland than in the other countries, and the considerable fluctuations which have occurred in the amount and the value of the allowances at various periods.

Based upon returns from 135 farms only.

| September | | | 21 to 5 | February | . 5 | - |
| | | | | | | |

^{*} In September, 1882, mechanics' wages were advanced 5 per cent., but no alteration was made in the wages of other workpropke, † This reduction affected the wages of piece-workers and mechanics only; the mill bands on set wages were not reduced.

(B 54-Gp. 19)

[†] This advance was to the spinning mill workers, including receivs and winders, and did not affect weaving factory workers and mechanics.

† This advance affected the wages of jute spinners and preparers only.

70

* A better type of two-mounts house in Halitax was list at 30, 60, in May, 1912. In regard to the "through" houses, the similarity in reate of sour-comes and five-comes houses is bargely due to the four-conound houses being nor the creates of the town, while those of few resums are mainly in the contactivit.

** Never "through" houses.

^{*} The figures for 1873-1894 are exclusive of the number and membership of Trades Councils represented at the Congresses. Trades Councils costed to be represented after 1894.

† In 1875 two Congresses were held—in January and in October.

No Congress was held in 1914.

Norm.—Complete figures for 1913 are not yet available for Agricultural Societies. For Industrial Societies, however, figures for 1913 are given on the following pages. * Industrial Societies with Agricultural Departments are also shown in the totals for Agricultural Productive Societies, but are counted only once in the Grand Total (distribution and production).

^{*} In the case of production by the Wholesale and Retail Societies the goods are not munlly sold direct but are transferred to the Distributive Departments of the

[!] Information not available.

The amounts in this column show the profits before deduction of interest on share capital. (B 54-Gp. 19)

^{*} Exclusive of the number and membership of societies which paid no dividend or from which no returns as to dividend were available. + This average is not based on gross sales, but is arrived at by weighting the rate

of dividend of each Society by the number of the Society's members. † The rates of dividend taken are those paid upon the main volume of trade. In a few cases higher or lower dividends were paid upon purchases from mir or departments, such as butchery, drapery, &c. With few exceptions, the societies paid dividend to non-members at one-half the rate paid to member.

* For the purposes of this table families consisting of from 1 to 11 persons only are included, as the original figures do not show the exact number of persons in larger families. In the whole of Ireland the number of separate families of more than 11 county boroughs (†) and Galway town the number of families of more than 11 persons occupying 1, 2, 3 and 4-roomed tenements respectively was in 1901, 7, 55, 101, 280, a total of 443; and in 1911, 6, 49, 101, 269, a total of 425.

Dublin, Belfast, Cork, Limerick, Waterford, and Londonderry,

occupied according to the industries or services with which their occupations are connected. In the Table which follows (pp. 296-302) the classification relates partly to definite personal occupations which may he common to several industries and partly to industries which may comprise many distinct occupations. As a result of this difference in classification the figures given in the two Tahles differ somewhat. even in the case of groups which hear the same name. For example, the total for cotton manufacture in England and Wales is stated as \$23,825 in this Table and as 606,177 on p. 300. This excess of 18,648 in the industry figure is due to the inclusion of 19,362 clerks, mechanics, engine drivers, carmen, watchmen, &c., who were employed by firms engaged in cotton manufacture, and the exclusion of 714 operatives engaged in cotton preparing, spinning, weaving, &c., who were employed

in connection with industries other than cotton manufacture. It is also necessary to point out that the grouping of occupatious into industries or services in the Census Report for England and Wales differs somewhat from that in the Report for Scotland, and, on that account, the figures given in the two tables are, in several instances, not comparable with each other. Moreover, in the figures relating to Scotland each occupied person has been classed to one industry or service only, but in the case of the figures relating to England and Wales there is some duplication; for example, teachers in England and Wales employed by local authorities are included under "Local Government" as well as under "Teaching."

* Similar particulars relating to Iroland are not available.

^{*} The marked decrease between 1901 and 1911 in due to the operation of the Education (Scotland) Act, 1901, which came into force on let January, 1962. This Act raised the age for total probabition of the employment of children from under 10 years of age to under 12, and prohibited the employment of children between 12 and 14 unless exemption from attendance at echool was first obtained.
