## Introduction

*UK Economic Accounts* – the quarterly national accounts publication brings together recently published data on national and financial accounts and the balance of payments for the United Kingdom. *UK Economic Accounts* replaces the articles on the National Accounts and Balance of Payments previously included in *Economic Trends*.

---

### Concepts, Sources and Methods

With effect from 24 September 1998 the UK national accounts were converted onto the European System of Accounts 1995 (ESA95). This change results in a number of changes to the terminology and methodology used in presenting and compiling the accounts. A short description of the national accounts is given in the introduction to the 2005 edition of *United Kingdom National Accounts*, the National Statistics *Blue Book*. More detailed information is available in *United Kingdom National Accounts: Concepts, Sources and Methods* (TSO 1998) and an overview of the move to ESA95 is available in *Introducing the ESA95 in the UK* (TSO 1998). Details of the balance of payments accounts are given in the 2005 edition of the *Pink Book*. Further information on the financial accounts is in the *Financial Statistics* and the *Financial Statistics Explanatory Handbook*.

---

### Comments

National Statistics are keen to receive comments on this publication. Comments should be sent to:

### Notes on the tables

- 1 Most quarterly data are available seasonally adjusted; those not seasonally adjusted are indicated.
- 2 Rounding may lead to inconsistencies between the sum of constituent parts and the total in some tables.
- 3 “Billion” denotes one thousand million.

- 4 There is no single correct definition of money. Consequently, several definitions of money stocks are used:

**M0** the narrowest measure consists of notes and coins on circulation outside the Bank of England and bankers' operational deposits at the Bank.

**M2** comprises notes and coin in circulation with the public plus sterling retail deposits held by the UK private sector with UK banks and building societies.

**M4** comprises notes and coin in circulation with the public, together with all sterling deposits (including certificates of deposit) held with UK banks and building societies by the rest of the private sector.

5. **DM** - Deutschmark
6. **ERM** - Exchange Rate Mechanism
7. **ERI** - Exchange Rate Index
8. Symbols used:
  - .. not available
  - nil or less than half the final digit shown

### UK Economic Accounts on the Internet

Complete copies of this publication are available to download free of charge on the following web page:

[www.statistics.gov.uk/statbase/product.asp?vlnk=1904&More=N](http://www.statistics.gov.uk/statbase/product.asp?vlnk=1904&More=N)

### Free access to National Statistics data is available online at:

[www.statistics.gov.uk](http://www.statistics.gov.uk)

### Time Series Data

Access to around 40,000 time series, cross sectional data and metadata from across the Government Statistical Service (GSS), organised by theme and subject. Download many datasets, in whole or in part, or consult directory information for all GSS statistical resources, including censuses, surveys, periodicals and enquiry services. Information is posted as PDF electronic documents, or in XLS and CSV formats, compatible with most spreadsheet packages.

## Quarterly alignment adjustments

To improve the coherence of the quarterly accounts, adjustments are made to quarterly estimates of both the expenditure and income analyses of GDP for 1983 onwards. These adjustments, which sum to zero across each of the years 1983 to 2004, are attributed to the change in inventories component of GDP analysed by expenditure and to gross operating surplus of companies component analysed by income. These adjustments may be considered as allowing for timing differences in the recording of transactions in different parts of the economy. In addition changes in inventories is a component where accurate quarterly measurement is more difficult. These quarterly adjustments modify the aggregates derived from expenditure or income components so that they better reflect the quarter to quarter paths of the output measure of GDP.

The alignment adjustments included in GDP estimates in this publication are as follows:

ALIGNMENT ADJUSTMENTS				£ million
		Change in inventories		
		Current prices	Chained Volume Measure	Gross operating surplus of companies at current prices

1 Estimates given to the nearest million but cannot be regarded as accurate to that degree

3 Includes mixed income and the operating surplus of non-corporate sector less the adjustment for financial intermediation services indirectly measured (FISIM)

2 Quarterly alignment adjustment included in this series.

# A4 Gross value added at chained volume measures basic prices, by category of output<sup>12</sup>

2003 = 100

	Production						Service industries					Gross value added at basic prices
	Agriculture, forestry, and fishing	Mining & quarrying inc oil & gas extraction	Manufacturing (revised definition)	Electricity, gas and water supply	Total	Construction	Distribution hotels and catering; repairs	Transport storage and communication	Business services and finance	Government and other services	Total

1 Estimates cannot be regarded as accurate to the last digit shown.

2 Components of output are valued at basic prices, which excludes taxes and subsidies on production.

3 Weights may not sum to the totals due to rounding.

# A4 Gross value added at chained volume measures basic prices, by category of output<sup>12</sup>

1 The residual error is, by convention, the amount by which the expenditure-based approach to measuring GDP exceeds the income-based estimate. It is also the sum of two components: the statistical discrepancy (expenditure) with sign reversed, and the statistical discrepancy (income) with natural sign.

2 Income data deflated by the implied GDP deflator, based on expenditure data.

1 Using series YBHA: GDP at current market prices

2 This series represents net errors and omissions in the balance of payments accounts. It is the converse of the not seasonally adjusted current and capital balances (HBOG and FKMJ) and net financial account transactions (HBNT) and is required to balance these three accounts.
