(a) The figures are aggregates for the members of the London Discount Market Association, and for 1955 are partly estimated; those for "Assets" in that year are mainly at the 31st December, but partly at other dates in December.
(b) Excluding capital and reserves.
(c) At nominal value.
(d) Those banks whose main business is conducted outside the British Isles. Figures after 1958 differ slightly in coverage from those for earlier years; this difference is also reflected in the figures for "Other sources".

(a) Before December 1960 the figures generally relate to dates, varying from bank to bank, between the middle and end of each month; thereafter the figures are all at the common dates shown.
(b) Of which the "authorised" circulation was 2.7 at all dates shown, the remainder being covered by Bank of England notes and coin.
(c) Current and deposit accounts less items in transit between offices of the same bank.
(d) Coin, notes and balances with Bank of England (excluding Special Deposits), balances with other banks, money at call and short notice and bills discounted.
(e) The total includes cover for Scottish bank notes in excess of the "authorised" circulation, and also banks' holdings of each other's notes.
(f) Balances with, and cheques in course of collection on, other banks in the United Kingdom (and, before October 1961, the Republic of Ireland); includes items in transit before December 1960.

(g) From 1961 includes re-financeable export credits due for repayment within eighteen months, transferred from "Advances and other accounts".
${ }^{(h)}$ See Additional Notes to Table 3, page 242.
(i) At the 31 st December, 1955 to 1958 ; subsequently at the same dates as the other items in the table (see note (a)).
(j) Figures are the differences between "Total investments" and " British government and government guaranteed securities"; because of timing differences between these two series (see notes (a) and ${ }^{(i)}$ ) the figures for "Other investments " before 1959 are not exact.
(k) Excluding, from 1961, re-financeable export credits (see note $(\mathrm{g})$ ).
(l) Figures, which are supplied by H.M. Treasury, relate to the 31st December, 1955 to 1958, the 16th December 1959, the 14th December 1960, and thereafter to the dates shown in the table. Nationalised industries are defined in the Additional Notes to Table 7, page 242.
$(m)$ Before 1961 these residual figures reflect the inconsistencies of date between "Total advances and other accounts" (see note ${ }^{(a)}$ ) and "Advances to nationalised industries" (see note (l)).

TABLE 9

## NORTHERN IRELAND BANKS ${ }^{(a)}$

$\ddagger$ millions

(a) The figures cover all banking offices situated in Northern Ireland, other than those of The National Bank. For details of the changes in definition of certain assets after March 1963 see Additional Notes, page 243.
(b) Before the 16th April 1963 the figures relate mainly to the 30 th June and the 31st December and dates in the middle of other months; thereafter they are all at the common dates shown.
(c) The figures after March 1963 refer to the dates shown: previously they are averages of notes outstanding on Saturdays in periods of four consecutive weeks. Before April 1963 the figures also include notes issued by The National Bank, which is otherwise excluded from the table. The "authorised" circulation was approximately 2 at all dates shown, the remainder being covered by Bank of England notes and coin.
${ }^{(d)}$ Coin, notes and balances with Bank of England. The total includes cover for the note issues of the Northern Ireland banks in excess of the "authorised "circulation.
(e) Balances with, and cheques in course of collection on, other banks in the United Kingdom and items in transit between offices of the same bank. Before April 1963, the figures include some balances outside the United Kingdom.

(a) Average rate of discount on allotment for 91-day Bills at the weekly tender.
(b) Minimum rate of interest charged for loans to the discount market.
(c) Spread of fluctuating rates quoted for new deposits by some of the main hire purchase finance houses. (Fluctuating rates are quoted as a fixed premium or discount on Bank Rate and therefore move with Bank Rate during the currency of the deposit.) Rates are to some extent subject to negotiation and different rates may be paid on large amounts.
(d) For a minimum term of three months and thereafter at seven days' notice.

Table 1: Exchequer
Table 2: Holdings of Government Debt and of Bank of England Notes

These tables present an analysis of the net sterling requirements of the Exchequer Group
and show, with such statistics as are available quarterly, the changes in holdings of government debt and of Bank of England notes associated with the financing of these requirements. The Exchequer Group comprises the Exchequer, the Paymaster General, the National Debt Commissioners, the Exchange Equalisation Account and the Issue Department of the Bank of England. The quarters shown are 'banking quarters' ending on the make-up dates of the London clearing banks, i.e., the third Wednesdays of the months indicated (except in December 1962, when the make-up date was the second Wednesday); the "Year 1961/62" runs from the 16th March 1961 to the 21st March 1962 inclusive and the "Year 1962/63" from the 22nd March 1962 to the 20th March 1963.

Table 1 records the Exchequer Group's cash deficit or surplus on budgetary, extra-budgetary and external items, and shows what changes have occurred in the total of Bank of England notes in circulation with the public, and in the Group's indebtedness to the Banking Department of the Bank of England and on government debt held by the public.

The item " Government debt held by the public" comprises changes in the Exchequer Group's direct indebtedness to all others, outside the Group itself and the Banking Department of the Bank of England, on National Savings (National Savings Certificates, Defence Bonds, Premium Savings Bonds and deposits in the Post Office Savings Bank and the Ordinary Departments of the Trustee Savings Banks); on Tax Reserve Certificates; on government stocks (including the Group's net sales to the public of government guaranteed securities); and on Treasury Bills (including those acquired by the public which were originally issued otherwise than by tender).

The government guaranteed securities dealt in by the Group are principally the government guaranteed stocks of the nationalised industries.

The figures of National Savings differ from those published by the National Savings Committee in that they cover the net receipt or disbursement during the period only in so far as it has been received, or paid, by the Exchequer Group. The figures shown under "Financing" comprise capital only-payments of interest and Premium Savings Bond prizes being budgetary items; they include for the Savings Banks the changes in the Savings Banks' Funds held by the National Debt Commissioners.

Table 2 analyses and rearranges the figures in the "Financing" part of Table 1 in various ways, to fit in with the Commentary and to distinguish between the banking system and other holders. The " banking system" is here defined as the London clearing banks, the Scottish banks and the Banking Department of the Bank of England.

Part A of the table is concerned with changes in government debt held directly by the public, the total of which appears as a financing item in Table 1. It analyses by type of holder the net changes in the public's holdings of marketable government debt (stocks and Treasury Bills); and includes, as a single item, the net change in non-marketable debt, which, because the banking system's holdings of such debt are not known, is treated in Part C as if it related entirely to other holdings.

In Part B of the table the change in the discount market's total holdings of government debt is shown as the sum of changes in " indirect holdings" of those from whom the market has borrowed. "Indirect holdings" of government debt means, for the London clearing banks and for the Scottish banks, their call money with the discount market; for the Bank of England, Banking Department, advances to the discount market; and for other holders, their net provision of funds to the discount market. In practice, the discount market does not necessarily use all funds lent to it by the banking system to hold government debt; nor are its "Commercial and other bills" necessarily lodged as security for, or otherwise related to, its borrowings from "Other sources". The figures are arranged in this
way, however, for convenience in analysis, because it permits a simple division of the total change in holdings of government debt between the banking system and other holders.

In Part C changes in holdings of government debt and of Bank of England notes by the banking system and others outside the Exchequer Group are summarised from Part A (direct holdings), Part B (indirect holdings), and Table 1 (government indebtedness to the Banking Department and the public's holding of notes). The total of these items is necessarily the same as the total financing shown in Table 1, residual errors falling into "Other holders ".

The figures of notes held by the banking system include some coin and Scottish bank notes not separately identifiable; and this also affects the residual figures of notes held outside the banking system.

## Table 3: Bank of England

Special Deposits are called by the Bank of England, under the scheme announced in July 1958, from the London clearing banks and the Scottish banks and are not at their free disposal. A full description of the scheme is given in Volume I, No. 1, of this Bulletin, and the dates and percentages of the calls and releases of Special Deposits are given in Volume III, No. 1.

## Table 7 : London Clearing Banks

The ratio of total liquid assets to gross deposits (the liquidity ratio) is the clearing banks' conventional measure of their liquidity; it does not take account of the extent to which they may hold other assets of comparable liquidity (see the article in Volume II, No. 4, of this Bulletin).

The nationalised industries comprise those portions of the coal, transport, airways, gas and electricity industries which are in public ownership and to which bank advances may be made under Treasury Guarantee.

## Table 9: Northern Ireland Banks

The Northern Ireland banks to which this table relates are the members of the Northern Ireland Bankers' Association other than The National Bank Limited (whose figures are included in Table 7). The Association's members are the only commercial banks operating in Northern Ireland.

Until April 1963 the division of certain assets between offices of these banks in the United Kingdom and those in the Republic of Ireland was not known. Consequently, until March 1963 the figures of these assets-balances with Bank of England (included in cash), money at call and short notice, Treasury Bills and invest-ments-represented a proportion of the banks' total holdings of such assets equal to the proportion of their total current and deposit accounts which was held at each date by offices in Northern Ireland. From 16th April 1963 the series has been revised to include the assets held by U.K. offices only.

## Table 10 : Analysis of Bank Advances

The figures relate to all advances made by member banks of the British Bankers' Association through offices located within Great Britain, irrespective of the borrower's country of residence. The figures for the London clearing banks and, from November 1960, for the Scottish banks relate mainly to the third Wednesday in the month; those for other member banks (and for the Scottish banks before November 1960) relate to various dates, mostly about the middle of the month. The definition of advances excludes bills discounted, foreign bills negotiated or bought, and "impersonal" or "internal" accounts. Except for the " personal" advances included in the "Personal and professional " category, the classification is based on the business of the borrower and no account is taken of the object of the advance or the nature of the security held.

Table 11: Overseas Banks in London
Table 12: Accepting Houses
A list of contributors to Table 11D is given in Volume II, No. 4, of this Bulletin. The only subsequent addition, from 31st March 1963, is

Bank Saderat va Ma'aden Iran. The contributing institutions to the other tables are those which, at the dates shown, were members of the following groups:
Table 11A: The British Overseas Banks Association (but excluding British and French Bank Limited, which is a contributor to Table 11C)
Table 11B: The American Banks in London
Table 11C: The Foreign Banks and Affiliates Association
Table 12 : The Accepting Houses Committee.

The figures cover the business of all offices of the banks within the United Kingdom. Brief notes on certain items are given below. Fuller notes will be found in Volume II, No. 4.
(a) Current and deposit accounts: sterling equivalents of foreign currency deposits are included. From September 1962 the figures include, in addition to the banks' deposit liabilities, their liabilities on loans and advances (including money at call and short notice) received from other U.K. banks, and their net liabilities on internal accounts to their offices, or to their head office, overseas.
(b) Balances with other U.K. banks : all balances, in sterling and in foreign currency, with other U.K. banks (as defined in Volume II, No. 4); together with loans and advances to these banks (including any money lent at call or short notice), some of which may have been excluded before September 1962.
(c) Money at call and short notice : loans to the money market comprise all money lent to the members of the London Discount Market Association.
(d) Loans to U.K. local authorities: all deposits with, and loans and advances made to, U.K. local authorities, but excluding any money which might be placed by the banks with local authorities where the banks were acting solely as agents and had no corresponding deposit liabilities.
(e) British government and government guaranteed securities: the figures are given at book value or cost.
( $f$ ) Advances and other accounts: amounts outstanding, in sterling and in foreign currency, on loan and overdrawn accounts; the banks' foreign currency balances with banks and financial institutions overseas; and, before September 1962, the " other accounts" (impersonal or internal accounts). From September 1962 the figures are shown without deduction of provisions for bad and doubtful debts, and advances to other U.K. banks and to U.K. local authorities are excluded.
(g) Other assets: sterling securities, other than British government and government guaranteed securities, and, from September 1962, trade investments, and foreign currency assets not included elsewhere, such as investments and discounted bills denominated in currencies other than sterling.

Table 15: Capital Issues on the United Kingdom Market
The estimates relate to new money raised by issues of ordinary, preference and loan capital (public issues, offers for sale, issues by tender, placings, and issues to shareholders and employees) by quoted public companies and local authorities in the United Kingdom and by overseas public companies and public authorities (including local authorities and international organisations). Mortgages, bank advances and any other loans redeemable in twelve months or less are excluded, as also are loans from U.K. government funds. Issues to shareholders are included only if the sole or principal share register is maintained in the United Kingdom. Estimates of the amounts raised are based on the prices at which securities are offered to the market. Subscriptions are recorded under the periods in which they are due to be paid. Redemptions relate to fixed interest securities of the kinds included as issues; conversions are included in the gross figures of both issues and redemptions.

The division between U.K. and overseas company borrowers is determined by the location of the registered office. U.K. "Local
authorities" include, in addition to local governments, such public bodies as water, dock and harbour boards. "Special finance agencies" are quoted public companies engaged in the provision of medium and longterm finance to industry (e.g., I.C.F.C.). The industrial classification in Part C of the table is according to the primary occupation of the borrowing company or group and is based on the Standard Industrial Classification (H.M.S.O., revised 1958).

Volume I, No. 5, of this Bulletin contains a fuller description of the estimates, which supersede the old series published in earlier issues.

## Table 16: Investment Trusts

The investment trusts contributing returns are members of the Association of Investment Trusts and other companies listed as investment trusts by the London Stock Exchange. The figures are provisional.

Net current assets do not take account of contingent assets and liabilities such as claims on, or sums due to, the Inland Revenue, or the accrued liability for loan interest. They do include, however, (in " Other short-term assets in the United Kingdom " or "Other short-term borrowing in the United Kingdom ") sums due from or to stockbrokers on account of securities sold or purchased and still awaiting settlement.

## Table 17: Unit Trusts

The returns cover all unit trusts authorised by the Board of Trade under the Prevention of Fraud (Investments) Act, 1958. They are collected in the main through the Association of Unit Trust Managers, but include also those of trusts whose managers are not members of the Association.

## Table 20 : United Kingdom External Liabilities

 and Claims in SterlingThese comprise :
(i) U.K. liabilities
(a) Deposits, U.K. Treasury Bills, commercial bills and promissory notes held for overseas banks (including overseas offices of
U.K. banks), central banks and other account holders abroad by banks and their nominee companies in the United Kingdom (including the Bank of England, accepting houses, discount houses, the U.K. offices of Commonwealth and foreign banks and certain other financial institutions); British government and government guaranteed stocks held for account of overseas banks and central monetary institutions are also included, at nominal values, but not those held by other official bodies, private individuals and firms.
(b) Sterling funds held with the Crown Agents for Oversea Governments and Administrations and by currency boards, excluding invest-
ments in Commonwealth and South African sterling securities and in U.K. local authority mortgages and securities, and excluding British government and government guaranteed stocks held in the Special Funds.
(ii) U.K. claims

Claims of banks in the United Kingdom payable in sterling, including acceptances outstanding under acceptance credit facilities granted, and sterling commercial bills and promissory notes held for U.K. customers payable by overseas residents.

A full description of the contents and definitions of this series, and a comparison with the "Overseas Sterling Holdings" series, now discontinued, appeared in the June 1963 issue of this Bulletin.
