GENERAL INTRODUCTORY NOTES

1. **Scope of Accounts**—The Annual Statement of the Trade of the United Kingdom for 1954, which also gives comparable figures for the years 1951–1953, is issued in four volumes. Volume I contains summaries of the import and export trade ; Volume II gives detailed statements respecting articles imported and re-exported, and of imports and exports of Gold and Coin of Gold and Silver ; Volume III gives similar details of Exports of the Produce and Manufactures of the United Kingdom ; and Volume IV gives details of the trade with individual Countries. **Particulars of the trade at individual ports of the United Kingdom during the years 1952–1954 are published as a Supplement to Volume IV, 1954. The next issue of this Port Supplement will relate to the trade during each of the three years 1955–57.** Throughout these Volumes the term United Kingdom comprises Great Britain, Northern Ireland and the Isle of Man. For full particulars of the contents of each Volume see the Schedule to this introduction.

Less detailed particulars respecting trade are published monthly in the Accounts relating to Trade and Navigation of the United Kingdom. Information in amplification of those Accounts and in advance of these annual publications for any of the commodity descriptions and countries set out in the official Import and Export Lists, either for the full year or for complete months of the calendar year, can, however, be obtained when conditions allow, from the Controller, Statistical Office, Customs and Excise, 23/27, Brooke Street, Holborn, London, E.C.1, on payment of a fee to cover the cost of extraction.

Official accounts are maintained under each description of goods separately distinguished in the official Import and Export Lists.

The order and grouping of the headings in those Lists were revised in 1954 so that the compilation of the external trade statistics of the United Kingdom could be based on the Standard International Trade Classification of the United Nations (Correlation Keys which relate the official Import and Export Lists to the Standard International Trade Classification, are obtainable from H.M. Stationery Office, price 4s. 6d. each, net). As from 1954, goods have been classified as follows :—

Class A—Food, Beverages and Tobacco.
Class B—Basic Materials.
Class C—Mineral Fuels and Lubricants.
Class D—Manufactured Goods.
Class E—Miscellaneous.

The figures for earlier years are, wherever possible, on a basis comparable with 1954, but some, particularly for 1951 and 1952, are not completely comparable with those for subsequent years because of the difficulty of allocating the relevant 1951 and 1952 Import and Export List headings within the framework of the new classification. Generally, where comparability cannot be effected, this is indicated by footnotes.

EXCLUSIONS

The following classes of merchandise arriving in this country are not included in the import statistics :—

(i) Personal and household effects and parcels brought by passengers for private use.
(ii) Fresh fish and shell fish of British taking, landed from British ships arriving direct from the fishing grounds.
(iii) Stores for the naval, military and air forces carried on British Government vessels.
(iv) Equipment for the naval, military and air forces imported from the United States under the Mutual Defence Assistance agreement.
(v) Stores and equipment for the use of Commonwealth and foreign Government forces (including American Post Exchange stores).
(vi) Fissionable materials.
(vii) Goods directly imported by Ambassadors and Ministers accredited to the United Kingdom.
(viii) Articles imported solely for temporary exhibition in galleries or museums in the United Kingdom, and articles returned to the United Kingdom after temporary exhibition in galleries or museums abroad.
(ix) Imports and re-exports of unset precious and semi-precious stones and pearls (except unmounted diamonds drilled so as to be adapted for use in wire-drawing dies).
(x) Ballast of no commercial value.

The following classes of merchandise departing from this country are not included in the export statistics :—

(i) Personal and household effects and parcels taken by passengers for private use.
(ii) Stores taken on board vessels (including fishing vessels) or aircraft engaged in the foreign trade for their own use and ballast of no commercial value (see also paragraph 11 (*a*) regarding Bunker Fuel).
(iii) British Government owned stores exported for British Government use abroad.
(iv) Used clothing and household goods exported by charitable organisations.
(v) Army, Navy and Air Force stores and equipment imported by Commonwealth or foreign Government authorities in the United Kingdom and subsequently re-exported by them direct or through Overseas Government Agencies in the United Kingdom.
(vi) Articles exported solely for temporary exhibition in galleries or museums abroad, and articles re-exported after temporary exhibition in galleries or museums in the United Kingdom.

The following classes of aircraft arriving in or departing from this country are not included in the import and export statistics :—

(i) Aircraft of the Royal Air Force and of the Royal Navy.
(ii) Aircraft for the use of Commonwealth and foreign Government forces in this country.
(iii) Commercial aircraft employed on regular international air services, provided that they are merely passing to and fro between this country and abroad.
(iv) Commercial aircraft on charter and touring aircraft for which only a temporary stay in this country or abroad is intended.
(v) Aircraft imported temporarily for repair or modification and subsequent re-export ; particulars of such aircraft are, however, shown as a footnote to the figures of imports and re-exports of aeroplanes (Class D, Division 18) in Volumes I and II.

The following classes of ships and boats arriving in or departing from this country are not included in the import and export statistics—

(i) H.M. Ships.
(ii) Commonwealth and foreign Government war vessels, except newly built vessels departing from this country on their first foreign voyage.
(iii) War vessels transferred by the British Government to Commonwealth or foreign Governments.
(iv) Ships arriving or departing under their own power or in tow, as actual or prospective carriers of goods or passengers by sea, including ocean-going tugs and fishing vessels, but excluding newly built ships departing for the first time to a place, and for the purpose of delivery to a consignee, outside the United Kingdom.
(v) Ships and boats for which only a temporary stay in this country or abroad is intended.

Inclusions

Exports of relief and rehabilitation supplies other than those noted at (iv) (exports) above are included in the export figures, as also are stores shipped abroad for the Navy, Army and Air Force Institutes, the Y.M.C.A., and other similar organisations.

2. **Gold and Coin of Gold and Silver**—Particulars of imports and exports of Gold and Monetary Items as defined by the International Monetary Fund are excluded from all general tables but are given in special tables in Volumes I and II.

3. **Parcel Post**—Imports by Parcel Post charged with duty and Exports by Parcel Post from Bond or on Drawback are included, according to their descriptions, with other goods imported or exported. In general, all other imports and exports by Parcel Post are shown as such by estimated average values (in Class E), and, consequently, the figures for the descriptions of goods throughout these accounts are deficient to the extent of the volume of this parcel post trade which, in some cases, is known to be considerable (e.g., printed books). Exports of Imported Merchandise are included with the Exports of the Produce and Manufactures of the United Kingdom.

4. **Quantities and Values of Imports and Exports**—Quantities and values are based on the declarations of importers and exporters, or their agents, and may be verified by Customs officials.

Quantities are not recorded in respect of all goods, but where goods are required to be entered by weight the quantities given represent the net weight of the goods exclusive of packings and wrappings.

The value of the Imports represents the value as defined in the Sixth Schedule to the Customs and Excise Act, 1952, and applied by Section 258 of that Act, which recognises the validity of the Commercial Contract price as a basis for valuation within the limits of the definition. In practice for statistical purposes, the value is normally :—

(*a*) for goods imported under a commercial contract of sale negotiated in fully open market conditions—the price made under that contract adjusted as necessary to the landed C.I.F. point (exclusive of any duties of Customs) and, where payable in foreign currency, converted to its sterling equivalent at the rate of exchange appropriate at the time of lodgment of the Customs Import entry ;

(*b*) for goods imported otherwise—the price that would have been made under such a contract, similarly adjusted and converted to sterling.

The value of the Exports represents the cost of the goods to the purchaser abroad, including packing, inland and coastal transport in the United Kingdom, dock dues, loading charges, and all other costs, profits, charges and expenses (e.g. insurance and commission) accruing up to the point where the goods are deposited on board the exporting vessel or aircraft or at the land boundary of Northern Ireland, and is known as the " free on board " value ; this value does not include Purchase Tax.

5. **Goods Transhipped under Bond**—Transhipments under bond include all goods, whether dutiable or free, entered for removal for re-shipment abroad, either from a vessel in one port and conveyance under bond to another port, or under bond from one vessel to another in the same port. Such goods are not included in the general tables of Imports and Exports of Imported Merchandise but particulars are shown in special tables (*see* Schedule to Introduction). They are to be distinguished from goods which are entered for storage in, and are afterwards exported from, bonded warehouses, these goods being included in the general tables of Imports and Exports of Imported Merchandise.

6. **Countries to which Imports and Exports are credited**—Imports are classified as received from the place or country of consignment ; that is, the place or country from which the goods were originally despatched to the United Kingdom, with or without breaking bulk in the course of transport, but without any commercial transaction in any intermediate country. The place or country of consignment is not necessarily the place or country of shipment, origin or manufacture. But goods, the produce or manufacture of Southern or Northern Rhodesia or Nyasaland, which are consigned from the port of Beira, are classified as received from those countries.

Exports are classified as despatched to the place or country of final destination ; that is the place or country to which the goods were actually consigned, with or without breaking bulk in the course of transport, but without any commercial transaction in any intermediate country. The place or country of final destination is therefore not necessarily the place or country of unshipment or consumption. Exports of newly built sea-going ships are normally classified as despatched to the country of registration.

7. **Arrangement of Countries**—The countries are arranged in two divisions, namely—(*a*) Commonwealth Countries (including Protectorates, Trust Territories, Mandated Territories and Territories under Condominium) and (*b*) Foreign Countries. Certain re-arrangements of territories which took effect in the years 1952–1954 are shown in the table appended to these notes.

Shortened forms of certain full country titles in the Import and Export Lists have been used in Volumes II and III. The shortened and full titles are given below.

Shortened Title	*Full Title*
	Commonwealth Countries
Gold Coast	Gold Coast (including Togoland under British Trusteeship).
Nigeria	Nigeria (including Cameroons under British Trusteeship).
Basutoland, Bechuanaland and Swaziland	Basutoland, Bechuanaland Protectorate and Swaziland.
Tanganyika	Tanganyika under British Trusteeship.
Zanzibar	Zanzibar (including Pemba).
Mauritius	Mauritius and Dependencies.
Aden	Aden (including Protectorate).
British North Borneo	Borneo (British)—North Borneo.
Western Samoa and Ross Dependency	Western Samoa Trust Territory and Ross Dependency.
Jamaica	Jamaica (including Dependencies).
Trinidad	Trinidad and Tobago.
Falkland Islands	Falkland Islands (including Dependencies).
	Foreign Countries
Soviet Union	Soviet Union, Estonia, Latvia, Lithuania.
Germany (Western, &c.) ...	Germany—Western (Federal Republic of Germany, and British, French and United States Sectors of Berlin).
Germany (Eastern, &c.) ...	Germany—Eastern (U.S.S.R. Zone and Sector of Berlin).
Belgian Congo	Belgian Congo (including Ruanda-Urundi Trust Territory).
French Morocco	French—Protectorate of Morocco.
Madagascar	Madagascar and Dependencies.
Spanish Morocco	Spanish—Protectorate of Morocco.
Saudi Arabia	Saudi Arabia (including Asir).
China	China (including Manchuria, but excluding Hong Kong and Macâo).
Philippine Republic	Republic of the Philippines.
Honduras	Honduras (not British Honduras).
Panama	Panama (including Canal Zone).

In addition, " Greece " includes the Dodecanese, and the description " Spanish Ports in North Africa " comprises Alhucemas (Villa de la Sanjurjo), Ceuta, Chafarinas, Melilla and Peñon de Velez (or Peñon de Velez de la Gomera or Isla de San Antonio).

8. **Unenumerated Goods**—Special tables showing the value of the principal articles recorded under the headings " Crude minerals, not elsewhere specified " (Class B—Division 10), " Crude animal materials, inedible—Other sorts, not elsewhere specified " and " Crude vegetable materials, inedible—Other sorts, not elsewhere specified " (Class B—Division 12), and " Goods manufactured wholly or in part, not elsewhere specified " (Class D—Division 23), of the official Import and Export Lists, are given in Volume I at the end of Tables 11 and 12.

9. **Revenue Statistics**—Details of Customs and Excise Revenue are published annually in the Report of the Commissioners of H.M. Customs and Excise. The Annual Statement of Trade contains certain information as to Customs Revenue only (see Schedule to Introduction).

10. **Stocks in Bonded Warehouses**—Information as to stocks of imported goods remaining in bonded warehouses and deliveries for use of H.M. Navy and Army and for stores on ships and aircraft is given in Volume IV (see Schedule to Introduction).

11. **Miscellaneous :—**

(*a*) **Bunker Fuel** (Coal, Coke, Manufactured Fuel and Oil Fuel) shipped in the United Kingdom for use on board steamers, &c., clearing for foreign trade (including fishing vessels) and for the use of foreign-going aircraft, is not an " Export " in the ordinarily accepted meaning of the term and is, accordingly, excluded from the general tables, but is shown, by quantity only, in Tables 12 and 13 of Volume I.

(*b*) **Exports of Imported Merchandise** comprise goods, materials and articles exported in the condition in which they were imported, or after having undergone operations which leave them essentially unchanged, e.g. simple blending, cleaning, drying, sorting, husking or shelling, repacking, bottling, &c. Goods finished or wholly or partly manufactured in the United Kingdom from imported raw materials, and goods completed or further advanced towards completion in the United Kingdom after being imported partly manufactured (but not including goods which have undergone operations which leave them essentially unchanged) are, on exportation, included in the tables of Exports of the Produce and Manufactures of the United Kingdom.

Re-exports of horses and greyhounds are included in the figures of exports owing to the difficulty of separate classification (Class E).

(*c*) **Goods in transit**—The procedure for Importation and Exportation of Free Goods in transit on Through Bills of Lading (other than goods transhipped under bond) was suspended in 1939 and has not been resumed.

ALTERATIONS IN COUNTRIES REFERRED TO IN NOTE 7

Portuguese :—	Portuguese :—
Cape Verde Islands, Guinea, Principe and S. Tome Islands	Portuguese West Africa (excluding Angola)

SPECIAL INTRODUCTORY NOTES TO VOLUME I

(*a*) **Customs Revenue**—The figures given in Table 24 are of gross receipts and include, besides the duties, the charges for bottling spirits in bond and monies deposited but not appropriated to goods. Drawbacks and allowances for over-entries, &c., have not been deducted.

(*b*) **Merchandise Retained in the United Kingdom**—The retained figures given in Tables 14, 15 and 17 represent the balances between Imports and Exports of Imported Merchandise as registered in each year. The figures shown may only approximately represent the actual quantities and values of the goods retained out of the imports of each year for the following reasons, viz. :—

(i) Goods registered as exported in any year were not necessarily imported in that year.

(ii) There is reason to doubt whether reliable information as to the country from which the goods were declared as consigned on importation into the United Kingdom is in all cases available to exporters.

(iii) Imported goods which are subsequently exported will normally have a value on exportation higher than that declared on importation.

(*c*) **Parcel Post**—The number of imported Post Parcels containing goods charged with duty is shown at the end of Table 11.

(*d*) **Unenumerated Goods**—Special tables showing the value of the principal articles are given at the end of Tables 11 and 12.

(e) **Weight Conversion Factors**—Under the terms of the International Convention relating to Economic Statistics drawn up by the League of Nations in 1928 and adopted in an amended form by the United Nations under a Protocol signed in December, 1948, adhering countries are required to publish in their Annual Trade Returns an estimate of the average weight of each item which is recorded by a unit of measure other than weight. In accordance with this requirement a table of weight conversion factors has been furnished by the Board of Trade and is printed on the following pages. These factors, which have been calculated by the Board of Trade from such information as was available, cover a number of the items recorded in these Trade Returns by a unit of measure other than weight. It has not been found practicable to calculate conversion factors for every item, but it is hoped to add to the list as opportunity offers. The Board of Trade wish it to be understood that whilst every care has been exercised in compiling the statement the figures given in the table are only estimates, applicable to aggregate imports or exports, and not necessarily to trade with individual countries, and that they are subject to revision in the light of fuller information which may become available. The same factors are suggested for imports and exports unless separate factors are given.

SCHEDULE

The information contained in the four volumes of the Annual Statement of Trade is as follows :—

VOLUME I

Abstract tables showing—

(1) Value of total Imports and Exports of Merchandise and of Gold and Coin of Gold and Silver from and to (*a*) Commonwealth Countries, (*b*) Foreign Countries, (*c*) All Countries (Tables 1–7).

SUPPLEMENT

UNITED KINGDOM TRADE STATISTICS FOR 1951-1954

CLASSIFICATION ON AN INTERNATIONAL BASIS

As a result of recommendations made by the United Nations it was decided that changes should be made in the Classification of Commodities used for the United Kingdom overseas trade statistics. The method at first adopted was a re-arrangement of data compiled according to the national classification for presentation in terms of The Standard International Trade Classification,* (S.I.T.C.) for the present volume the S.I.T.C. has been adopted *with certain modifications* as the basic classification. A change in classification inevitably results in some loss in comparability with past figures, but figures for earlier years are wherever possible on a basis comparable with 1954.

The chief advantage which it is hoped to gain by re-classification is that United Kingdom trade will be more directly comparable with that of other Countries. The S.I.T.C. consists of 570 items which include the commodities of international trade in summary form. The items are arranged in 150 groups which are designed to distinguish those commodities for which particulars are often sought in international trade returns. These groups in turn are assembled into 52 divisions and then are finally consolidated into 10 sections which serve to sub-divide the trade aggregate according to broad economic categories. In the re-classification the 10 sections above referred to have been divided into 5 Classes (see General Introductory Notes p. iii). An outline, with S.I.T.C. references is given below :—
