About the Office for National Statistics

The Office for National Statistics (ONS) is the government agency responsible for compiling, analysing and disseminating many of the United Kingdom's economic, social and demographic statistics, including the retail prices index, trade figures and labour market data, as well as the periodic census of the population and health statistics. The Director of ONS is also the National Statistician and the Registrar General for England and Wales, and the agency that administers the statutory registration of births, marriages and deaths there.

Introduction

Consumer Trends presents comprehensive estimates of household final consumption expenditure together with tables detailing other indicators which affect the household sector. These include the final consumption expenditure of non-profit institutions serving households (NPISH), personal income, the labour market, retail prices, consumer credit, housing and income & capital. The national accounts aggregates contained in this publication have been constructed so as to conform to the European System of Accounts 1995 (ESA95).

Definition of household consumption

A concise definition of household final consumption expenditure within the context of the UK national accounts would be:

Personal expenditure on goods, both durable and non-durable, on second-hand goods, and on services, including the imputed rent of owner-occupied dwellings, the administrative costs of general insurance and of life assurance and superannuation schemes.

Excluded are all business expenditure and expenses, interest and other transfer payments and capital expenditure on dwellings.

At component level, expenditure in the United Kingdom by foreign visitors is included. This is then netted off to produce the aggregate total for United Kingdom household final consumption expenditure. The total also includes United Kingdom tourist expenditure abroad but this is not allocated to component series. These and other points which affect the general definition of household final consumption expenditure are discussed in greater detail in Appendix A.

Definition of NPISH consumption

The final consumption expenditure of NPISH, covers compensation of employees, purchases less sales of goods and services and an allowance for capital consumption. Whilst NPISH final consumption expenditure is not directly household consumption it is deemed to be for the benefit of households.

Sources of data

The quarterly and annual estimates of household final consumption expenditure at current and constant prices are built up commodity by commodity from a variety of independent sources. Where more than one potential source is available the source used for a particular commodity or service is the one which is judged to provide the most reliable estimate of the level and changes in expenditure on that commodity or service. In some cases a combination of sources is employed so as to make the best use of the available information.

Each component series within household final consumption expenditure is individually seasonally adjusted at both current and constant prices. The main sources of data for household final consumption expenditure are detailed in Appendix B.

Indicators other than household final consumption expenditure come from a variety of sources. Appendix B details contact addresses and telephone numbers for each table.

Publication of estimates

A more detailed breakdown of all tables appearing in *Consumer Trends* prior to 1992 is available on paper, from Household Expenditure Branch (consumer.trends@ons.gov.uk), D4/15, Office for National Statistics, 1 Drummond Gate, London SW1V 2QQ (Tel: 020 7533 5998/6000/6001/, fax 01633 652608).

ONS DataBank, Navidata and the Internet

The household final consumption data in this publication can be obtained in computer readable form via the ONS DataBank service which provides macro-economic time series data on disk. For details contact:

DataBank Marketing, B1/06, Office for National Statistics, 1 Drummond Gate, London SW1V 2QQ (tel 020 7533 5673, fax 020 7533 5688).

Alternatively, the data are available on Navidata, a Windows based package available from DataBank Marketing, at the above address. Data are also available via the Internet (www.statistics.gov.uk). Full details of web access are listed in the NOTICEBOARD on page 5 of this publication.

Comments and enquiries

The ONS is keen to receive comments on this publication. Comments can be sent, in writing, to:

Consumer Trends, (consumer.trends@ons.gov.uk), Household Expenditure Branch, D4/15, Office for National Statistics, 1 Drummond Gate, London SW1V 2QQ (tel 020 7533 5999, fax 01633 652608). Enquiries regarding household final consumption expenditure estimates should also be directed to this address.

General National Statistics enquiries

National Statistics Public Enquiry Service, room DG/18 at the above address (info@statistics.gov.uk) (tel 0845 601 3034) fax: 01633 652747 minicom: 01633 812399

Consistency with other publications

The household final consumption estimates in this edition of *Consumer Trends* are consistent with those appearing at Tables E1-E2 of the first release *Quarterly National Accounts* published on 26 March and Tables 6.2 to 6.5 of the 2000 edition of *United Kingdom National Accounts (The Blue Book)* for the years prior to 1999.

Consumer Trends briefing

by Murray Greenberg - (consumer.trends@ons.gov.uk)

Total expenditure

Household final consumption expenditure for 2000 quarter four was £150.0 billion seasonally adjusted at current prices and £134.8 billion seasonally adjusted at constant 1995 prices (Chart C1).

At current prices the figure for quarter four 2000 represents an increase over the previous quarter of £1.7 billion or 1.2 per cent and £0.8 billion or 0.6 per cent seasonally adjusted at constant 1995 prices (Chart C2). Over the same quarter in 1999 current price expenditure increased £6.4 billion or 4.5 per cent and £4.4 billion or 3.4 per cent at constant 1995 prices

Chart C1

Total Household Final Consumption Expenditure, seasonally adjusted
£billion

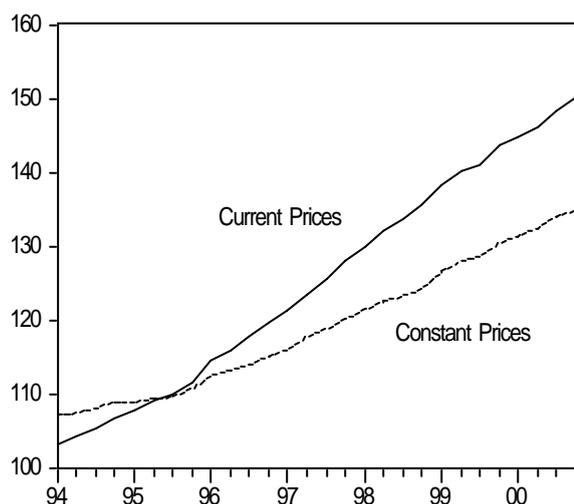

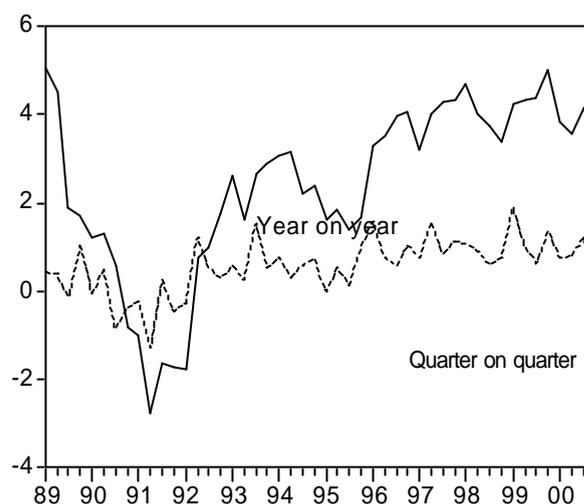

Chart C2

Household Final Consumption Expenditure seasonally adjusted, at constant 1995 prices:
Growth rates
percent

In common with all components of UK Gross Domestic Product (GDP), Household Final Consumption Expenditure is subject to the revisions policy of the National Accounts. This allows revisions to earlier data to be made only at particular times of the year.

In this edition of Consumer Trends revisions have been made back to the first quarter of 2000 and the effect of these revisions is shown in table C3.

Changes to the data have occurred in all of the main household expenditure categories. These changes are mainly due to the receipt of revised data from suppliers.

NOTICEBOARD

1. The next issue of Consumer Trends will be available on 17 July. The tables for the quarterly accounts will be available from 26 March and can be obtained from the editor on or after that date. The July edition will be the final full paper version. Consumer Trends will continue as a web-only based publication.

2. The change of Consumer Trends to COICOP format will now be published to coincide with the 2001 Blue Book in September 2001. An advance preview of the new format is now available on the National Statistics website at: www.statistics.gov.uk/themes/economy/Articles/NationalAccounts/SectorAccounts/households/ctpreview.asp.

3. Consumer Trends is now available on the internet, free of charge at statbase/nsbase/downloads/theme_economy/Consumer_Trends_Q4_2000.pdf. Individual series are available via "Statbase" then "Timezone" then "Access data" on our main website: www.statistics.gov.uk

Table C3
Revisions to Household Final Consumption Expenditure¹, seasonally adjusted

| | £ million | |
|---------|----------------|-----------------|
| | Current prices | Constant prices |
| 2000 Q1 | 20 | 142 |
| Q2 | - 457 | - 63 |
| Q3 | -52 | 210 |
| Q4 | - 428 | 74 |

1.since the last edition of Consumer Trends.

The largest growth in the fourth quarter of 2000 is in Other durables(ie other than vehicles). In particular, Photographic goods and Audio-visual goods have shown the the largest growth at 5.9 and 4.3 per cent respectively over the figure for the previous quarter.

Table C4
Household Final Consumption Expenditure Deflator, seasonally adjusted, 1995=100

| | Household Final Consumption Expenditure Deflator | Annual Percentage Change |
|---------|--|--------------------------|
| 1997 | 105.4 | 2.9 |
| 1998 | 108.0 | 2.4 |
| 1999 | 110.0 | 2.5 |
| 1997 Q1 | 104.5 | 2.6 |
| Q2 | 104.8 | 2.3 |
| Q3 | 105.8 | 2.4 |
| Q4 | 106.5 | 2.5 |
| 1998 Q1 | 106.9 | 2.3 |
| Q2 | 107.7 | 2.8 |
| Q3 | 108.4 | 2.5 |
| Q4 | 109.1 | 2.4 |
| 1999 Q1 | 109.2 | 2.2 |
| Q2 | 109.5 | 1.7 |
| Q3 | 109.6 | 1.1 |

| 2000 Q1 | 110.1 | 0.8 |
| Q2 | 110.3 | 0.7 |
| Q3 | 110.7 | 1.0 |
| Q4 | 111.4 | 1.1 |

Household final consumption expenditure deflator

Table C4 shows the total household final consumption expenditure implied deflator from 1997 to the fourth quarter of 2000 and also the annual percentage change. Between the fourth quarter of 1999 and the fourth quarter

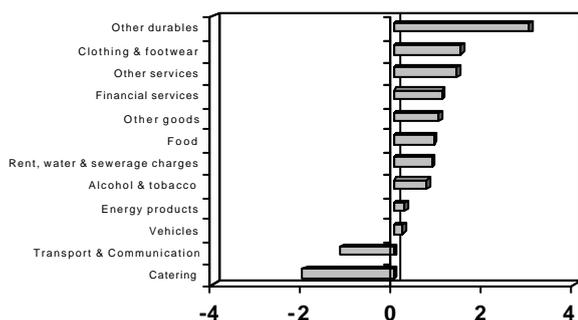

of 2000 the implied deflator of goods and services purchased by consumers increased by 1.1 per cent, the highest growth since the third quarter of 1999. It should be noted that these changes reflect not only changes in prices but also any changes in the commodity 'mix' within the totals.

Chart C5

Household Final Consumption Expenditure seasonally adjusted, at constant 1995 prices.

percentage change

Quarter 4 2000 on Quarter 4 1999

percentage change

Commodity changes

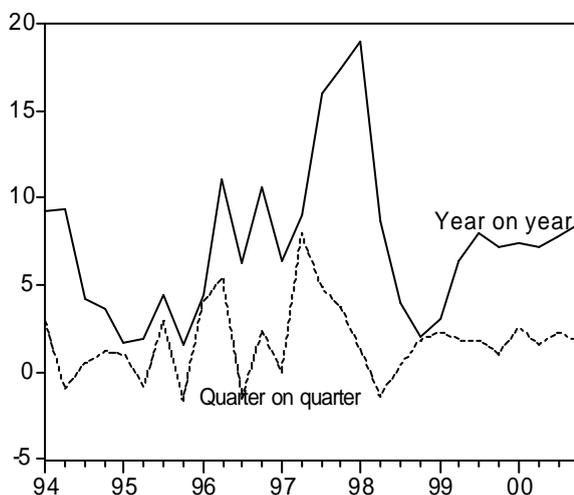

(Change between quarter three 2000 and quarter four 2000 - seasonally adjusted, constant 1995 prices)

- ▲ Services up £42 million, 0.1 per cent
 - ▲ Rent, water and sewerage charges up £136 million, 0.9 per cent
 - ▼ Transport and communications down £159 million, 1.2 per cent
 - ▼ Catering, down £222 million, 2.0 per cent
 - ▲ Financial services up £61million, 1.1 per cent
- ▲ Non-durable goods up £524million, 0.9 per cent
 - ▲ Energy products up £16 million, 0.2 per cent
 - ▲ Food up £118 million, 0.9 per cent
- ▲ Durable goods up £267 million, 1.8 per cent
 - ▲ Motor vehicles up £12 million, 0.2 per cent

Durable goods

The volume of spending on vehicles is estimated to have increased 0.2 per cent over the previous quarter. Current rice expenditure fell, by 0.3 per cent. Seasonal adjustment of the motor vehicles expenditure series has been under review, but remains difficult following the change in March

Chart C7
Durable goods seasonally adjusted at constant 1995 prices: Growth rates

1999 to March and September for the new registration letters in place of August. A smoothed path has been adopted for expenditure during 1999 and 2000, relative to the previous year. A new style of registration plate will be introduced from September 2001.

Spending on durables other than vehicles rose 3.0 per cent at constant 1995 prices. Strongest growth was in Audio-visual equipment (which includes personal computers and telecommunications equipment) and Photographic & optical goods, up 5.9 and 4.3 per cent respectively.

Non-durable goods

Overall spending on food was up 0.9 per cent at constant 1995 prices (Chart C10) in the fourth quarter of 2000. The largest rises were seen in Fish, Bread and Oils & fats, up 6.7, 5.0 and 4.5 per cent respectively, but the rise in expenditure was widespread. The largest decreases in food were in Sugar and Other food down by 3.5 and 2.0 per cent respectively on the previous quarter. The RPI first release noted that food prices in general have risen compared to the same period a year ago.

Spending on alcohol rose by 0.7 per cent at constant 1995 prices. Spending on tobacco overall showed a decline from the third quarter of 2000 into the fourth quarter of 2000. At constant 1995 prices expenditure fell by 1.7 per cent. The rise in expenditure on cigarettes in the fourth quarter of 1999 of 1.1 per cent was the first increase in expenditure since 1996.

Clothing and footwear increased by 1.5 per cent overall in the fourth quarter. Womens' & girls wear rose by 1.9 per cent, while Men's & boys' wear rose by 1.3 per cent. Footwear decreased by 0.1 per cent - the first fall in this category since the same quarter a year ago..

Chart C8

Motor vehicles seasonally adjusted, at constant 1995 prices: Growth rates percent

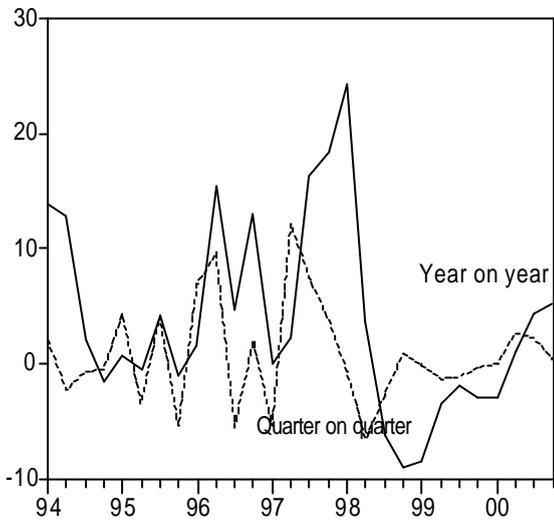

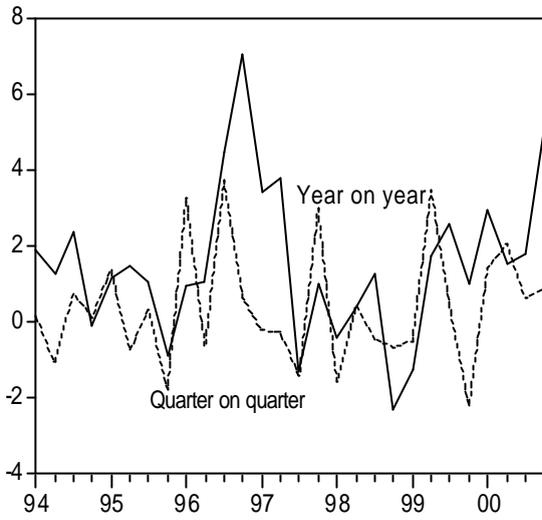

Chart C10

Food seasonally adjusted, at constant 1995 prices: Growth rates percent

Spending on Energy products increased by 0.2 per cent over the previous quarter. Within this category, Petrol & diesel rose by 1.7% while both Electricity and Gas fell by 1.1 and 0.8 per cent respectively.

Services

Total spending on services rose by 0.1 per cent in the fourth quarter. Strongest growth was in Other services which increased 1.4 per cent over the figure for the previous quarter. Most components showed an increase, including Recreation & cultural services which increased by 3.0, largely due to the National Lottery which is detailed later in this article. The only falls in the services

Chart C9

Non-durable goods seasonally adjusted, at constant 1995 prices: Growth rates percentage change

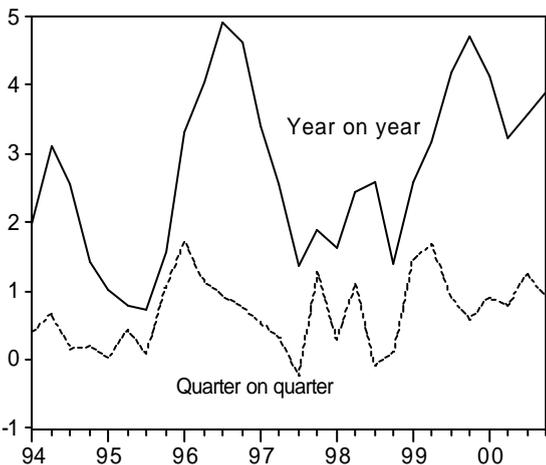

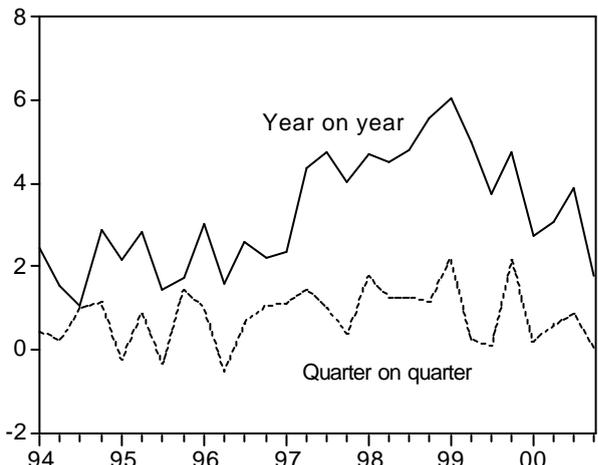

Chart C11

Services seasonally adjusted, at constant 1995 prices: Growth rates percentage change

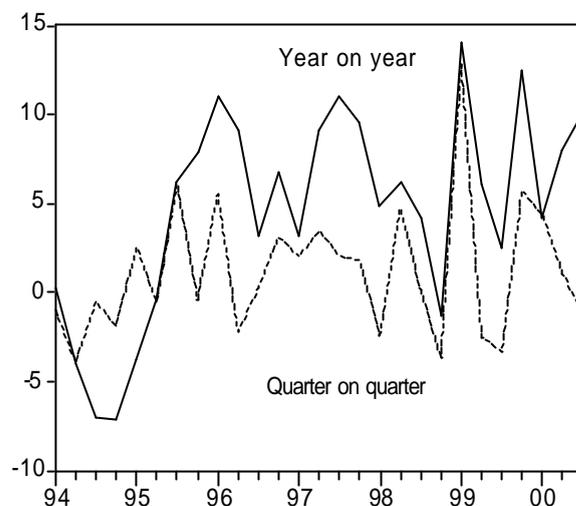

category were in Catering and Transport & communication which fell by 2.0 and 1.2 per cent respectively. Within Catering, Meals and accommodation fell by 2.0 per cent in the fourth quarter. Also in the fourth quarter there were falls in Motor vehicle running costs of 1.3 per cent and in all major forms of Transport totalling 1.1 per cent. Annual expenditure on Postal services fell for the first time in three years. Financial services increased by 1.1 per cent. This was driven by increases in all components except for a per cent fall in Stamp duties on securities transactions reflecting weakening market conditions (Chart C13). Within other services is included net expenditure on the National Lottery (tickets sold less prizes), net tourist expenditure and some smaller components. In the fourth quarter of 2000 expenditure on the National Lottery increased from £616 million to £761 million at current

Table C12

prices and from £541million to £665 million at constant 1995 prices. (Table C12). Increased expenditure is usually generated when rollovers occur or with the addition of extra prize funds by Camelot. In the fourth quarter of 2000 the Lottery Extra draw was introduced. There were several rollovers and the usual Christmas draw with a prize of £20 million. All these produced extra expenditure. The increase in the fourth quarter of 1999 was mainly due to the millennium superdraws. Although one of the draws actually took place in the year 2000, all the expenditure was made in the fourth quarter of 1999. Three lottery rollovers between January and March led to increased expenditure for the first quarter of 2000.

Both Expenditure by UK tourists abroad and expenditure by Foreign tourists in the UK decreased, by 1.1 and 2.3 per cent respectively in the fourth quarter. The effect was higher net UK and foreign tourist expenditure, of £2975million, only £4 million higher than in quarter three.

Long term trends

In addition to producing quarterly estimates of household final consumption, long run annual totals are available; for details see the Introduction. In addition, two tables (21 and 22), which follow the quarterly tables, include a longer run of annual data at the level of the twelve main groups back to 1963.

Over the years the types of goods and services bought by households have changed considerably. Chart C14 illustrates spending at current prices on the three main groups as a percentage of total household final consumption expenditure. In 1964 spending on services comprised 28 per cent of total expenditure - by 1982 this had risen to 42 per cent, and by 2000 to 46 per cent. Over this period expenditure on durable goods changed relatively slightly, whereas non-durable goods declined from 54 per cent in 1964 to 43 per cent in 2000 as there was a large switch from non-durable goods to services.

Underlying Factors

by Cedrik Schurich - Economic Assessment (cedrik.schurich@ons.gov.uk)

Underlying factors

Overview

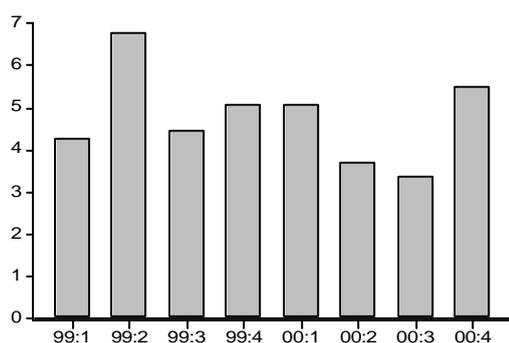

In Q4 2000, household disposable income growth increased strongly while household consumption growth moderated somewhat. As a result, the saving ratio increased substantially and the household net borrowing position went into surplus. These movements in the saving ratio and household net lending/borrowing contrast with earlier quarters.

Recent movements in the saving ratio

In Q4 2000, the saving ratio - which is the ratio of gross savings to gross disposable income - increased to 5.5 per cent, up from 3.4 per cent in the previous quarter (chart F1). The saving ratio is obtained as the ratio of gross savings to gross disposable income. This is the first increase in the saving ratio after three consecutive quarters of decline. This movement was in contrast to previous quarters in which growth in expenditure outstripped that in household disposable income and the saving ratio fell.

Chart F1
Saving ratio

Seasonally adjusted Percentage change

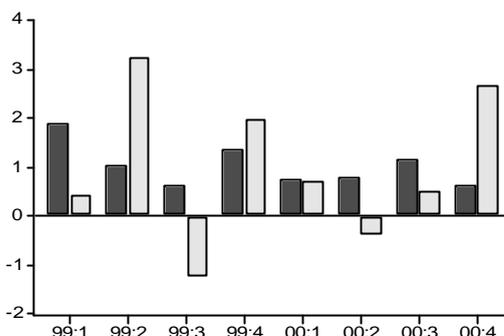

The increase in the saving ratio of 2.1 percentage points was caused by a combination of weaker growth in real household consumption and a strong acceleration in the growth of real household disposable income (chart F2). In Q4 2000, real consumer expenditure rose by only 0.6 per cent, compared with 1.2 per cent in the previous quarter. However, real household disposable income increased strongly by 2.7 per cent, up from 0.5 per cent in Q3 2000.

Chart F2

Growth in real household expenditure and disposable income

Seasonally adjusted Percentage change

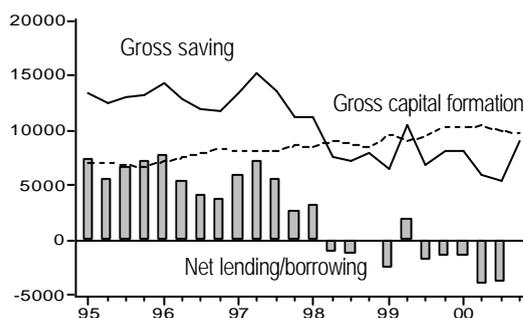

The increase in household disposable income was the result of a number of factors. The contribution from wages and taxes was modest. Growth in real wages and salaries rose from 1.2 per cent to 1.5 per cent while increases in taxes paid fell from 3 per cent to 2.3 per cent. However, growth in dividends and social benefits receipts expanded strongly. Growth in dividends received increased, a fall of 2.8 per cent in Q3 2000 being followed by a rise of 4.7 per cent in Q4 2000 while growth in social benefits rose from 1 per cent in Q3 2000 to 5.5 per cent in Q4 2000, mainly because of the winter fuel allowance.

The sharp increase in savings in Q4 2000 also explains why household net lending/borrowing moved into a surplus of £54m, up from a deficit of £3.9bn in the previous quarter (chart F3). This is the first surplus since Q2 1999.

Chart F3

Gross saving, net capital formation and nominal household net lending/borrowing

Seasonally adjusted Percentage growth and £ millions

Recent movements in labour income

The largest source of household disposable income is gained through participation in the labour market in the form of wages, salaries and employer's social contributions. Compensation of employees, which is the sum of the above three items, accounts for around 80 per cent of household's gross disposable income. Wages and salaries are by far the largest component of compensation of employees. They are determined by the level of employment and average earnings.

In Q4 2000, growth in nominal compensation of employees has continued to expand strongly - by 1.3 per cent - following increases of 1.5 per cent in Q3 2000 and 0.3 per cent in Q2 2000 (chart F4). On an annual basis, growth flattened out, with growth of 5 per cent in Q4 2000 compared with 5.3 per cent in the previous quarter.

Chart F4
Quarterly and annual growth in nominal compensation of employees
 Seasonally adjusted Percentage

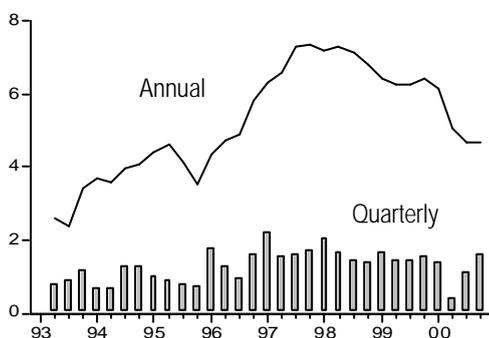

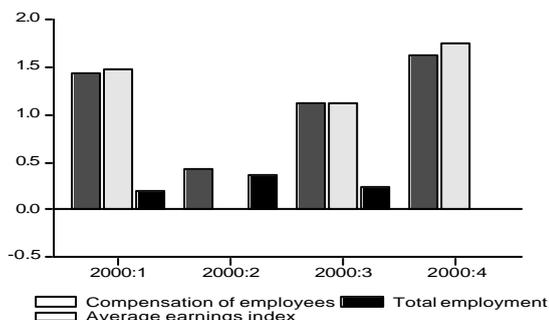

Chart F5
Growth in average earnings, employment and nominal compensation of employees
 Seasonally adjusted Percentage change

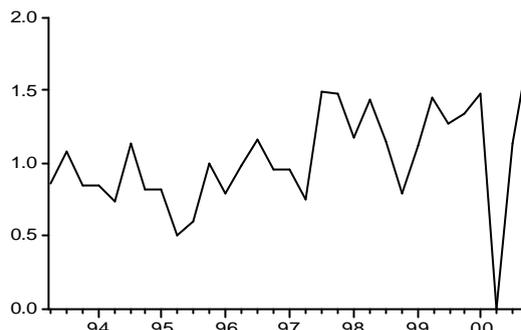

As was the case in Q3 2000, growth in compensation of employees in Q4 2000 was driven by strong growth in

average earnings, which increased by 1.8 per cent, up from 1.1 per cent in the previous quarter (chart F5).

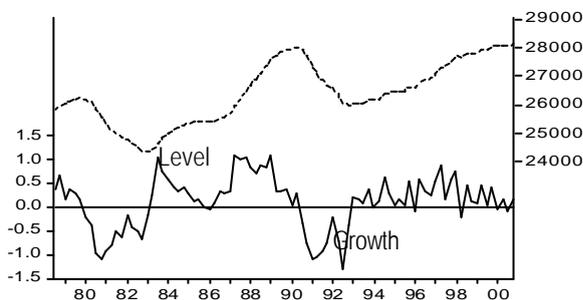

Growth of 1.8 per cent in average earnings is the highest rate recorded since Q3 1991 (chart F6). The drop in average earnings growth to zero in Q2 2000 was caused by large bonus payments in financial services dropping out.

Chart F6
Growth in average earnings
 Seasonally adjusted Percentage change

Growth in workforce jobs employees rose by 0.1 per cent, the same growth as in the previous quarter. Growth in workforce jobs thus contributed only marginally to the strong increase in compensation of employees. According to the Labour Force Survey, growth in employment was zero in Q4 2000, down from 0.2 per cent in the previous quarter. Growth in workforce jobs employees has flattened since 1997 and is now very low (chart F7).

Chart F7
Workforce jobs, quarterly growth and levels
 Seasonally adjusted Percentage change and thousands

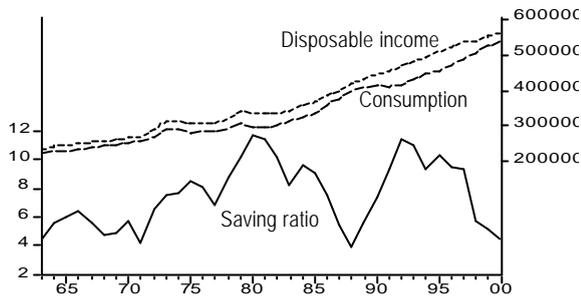

Long-term trends in household disposable income, consumption and savings

While household disposable income rose strongly in Q4 2000 and outstripped consumption expenditure (chart F8), from a long-term perspective growth in real household disposable

Chart F8

Saving ratio, real household disposable income and final consumption expenditure
Seasonally adjusted Percentage change and 1995 £ millions

income has been lagging behind growth in real consumption expenditure over the 1993-2000 period. Average quarterly growth in this period was 3.2 per cent for consumption while it was only 2.2 per cent for household disposable income. This discrepancy explains the falling trend of the saving ratio since 1993.

Concentrating on the period since 1970, the saving ratio has displayed four distinct trends. The following table presents average annual growth rates for real consumption expenditure and real household disposable income for the four periods:

| | 1971-79 | 1980-87 | 1988-92 | 1993-2000 |
|--------------------|---------|---------|---------|-----------|
| Consumption | 2.4 | 3.3 | 0.6 | 3.0 |
| HDY* | 3.1 | 2.6 | 3.3 | 2.1 |

*HDY: household disposable income

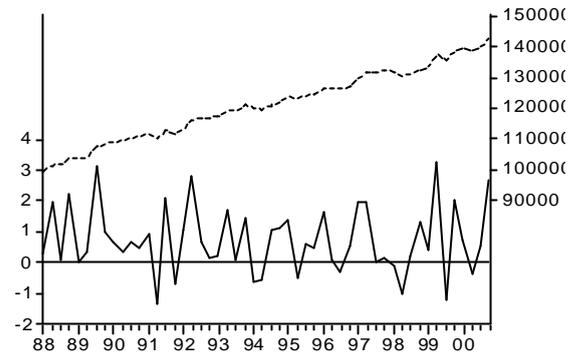

The change in the trend of the saving ratio after 1979 was caused by growth in consumption outstripping growth in household disposable income while in the 1988-92 period, the reverse was the case.

The 1993-2000 period of expansion differs from the 1982-87 expansion in that growth in household disposable income has been slower, in particular since 1997, where it is also slightly more volatile (chart F9). Average quarterly growth in household disposable income from Q1 1993 to Q4 1996 was 0.66 per cent while from Q1 1997 to Q4 2000 it was slightly lower, at 0.54 per cent. In 1998, household disposable income growth was only 0.1 per cent. The last time it was so low was in 1982, when income fell by 0.3 per cent.

Since 1997, subdued growth in household disposable income has been caused by a number of factors. Growth in wages and salaries was quite strong over that period,

Chart F9

Real household disposable income, 1995 prices
Seasonally adjusted Percentage change and £ millions

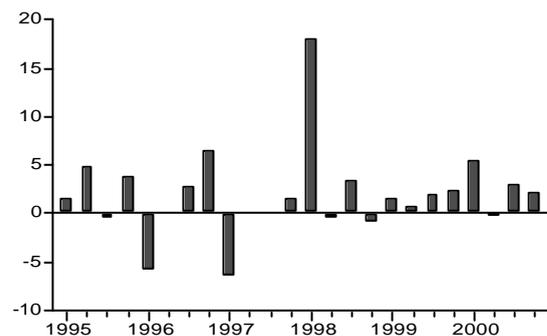

suggesting that the erosion of household disposable income growth was caused by adverse changes in taxes paid, interest payments and dividends receipts.

With respect to income taxes, there appears to be a one-off increase of 18 per cent at the end of 1997 due mainly to the introduction of self-assessment (chart F10). Also, quarterly growth in taxes has been somewhat more sustained and smoother since 1999, with the exception of 2000q2, when taxes paid declined by 0.4 per cent.

Chart F10

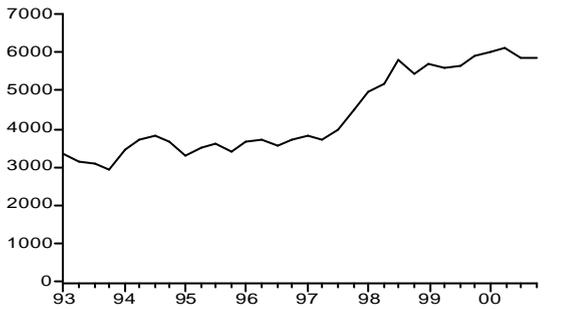

Quarterly growth in nominal income taxes
Seasonally adjusted Percentage change

On an annual basis, growth in taxes paid was 10.7 per cent in 2000, higher than the 4.7 per cent in 1999. This is partly because income tax allowances and thresholds have been increased by an indexation factor (linked to the increase in RPI) which is less than the increase in earnings. As a result, some taxpayers have become liable to pay tax at higher thresholds and are now taxed at a higher rate (fiscal drag effect). Pay liability has also been affected by various past budget measures, such as the end of tax relief on profit related pay and the abolition of the married couples allowance.

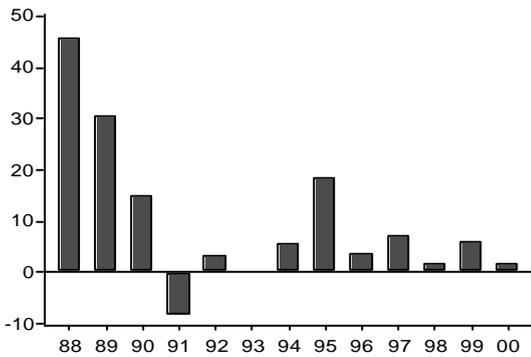

Net interest payments have been relatively flat since 1998 (chart F11), after having increased strongly in the period from mid-1997 to mid-1998, in response to the rise in interest rates over that period. The increase in net interest payments has contributed to the 1998 slower rate of growth in household disposable income.

Nominal net interest payments
Seasonally adjusted £ millions

Finally, growth in dividends receipts (chart F11) was particularly low in 1998 and 2000, 1.8 per cent and 2.1 per cent respectively. Lower dividends receipts have also contributed to lower growth in household disposable income.

Seasonally adjusted Percentage change

Consumer confidence

Consumer confidence improved slightly in Q4 2000 according to the MORI measure (chart F13), while it was flat according to the GfK measure. Overall, the data suggests that consumer confidence has been stable in 2000, after having improved strongly in 1999. It is too early to say how consumers will react to the cut in base rates in February 2001. Relative to average movements over the last five years, consumer confidence remains at moderate levels.

1 Some data on this table are only updated for Blue Book, thus this table remains consistent with Blue Book 1999.

2 "Purpose" or "function" classifications are designed to indicate the "socio-economic objectives" that institutional units aim to achieve through various kinds of outlays. COICOP is the Classification of Individual Consumption by Purpose and applies to households. COPNI is the Classification of the Purposes of Non-profit Institutions Serving Households and COFOG the Classification of the Functions of Government. The introduction of ESA95 coincides with the redefinition of these classifications and data will be available on a consistent basis for all European Union member states.

Appendix A: Definitions and conventions

This annex describes a number of issues of coverage, definition and presentation of the main statistical series appearing in Consumer Trends. More detail is contained in UK National Accounts Concepts, Sources and Methods, particularly Chapter 22 and the annex to it, - published by the Stationery Office price £75 - ISBN 0 11 621062 1. The national accounts aggregates contained in this publication have been constructed so as to conform to the European System of Accounts 1995 (ESA95).

Household Final Consumption Expenditure

Household final consumption expenditure represents in the main, traditional consumer spending. It includes however, imputed rent for the provision of owner-occupied housing services, and consumption of own production. Also included is household expenditure overseas, with spending by non-residents in the UK being excluded. The household sector includes not only those living in traditional households, but also those people living in institutions, such as retirement homes, boarding houses or prisons.

Business expenditure and expenses

Household final consumption excludes any business expenditure incurred by the household as part of the economic activity of unincorporated businesses. Such expenditure is included in household intermediate consumption. Also excluded from household final consumption is any business expenditure which might otherwise be claimed for tax purposes on, for example, cars.

Household final consumption expenditure does not cover the whole of expenditure on consumer type goods and services. Where methods of estimation rely on total supplies or sales, for example the ONS Retail Sales Inquiries, purchases by businesses must be excluded, but in practice this can be done only roughly.

Income in kind

Household consumption includes a wide range of goods and services received by households as income in kind, in lieu of cash. The main items are the use of company cars for private purposes, and free or subsidised accommodation or meals.

Own account production

Household production of goods and certain services for own consumption is included in household consumption. The main items are owner-occupied housing services, domestic service and agricultural produce. The estimation of own account agricultural production is included within the food items. The employment of paid domestic staff, such as servants and gardeners, is regarded as part of household consumption. However, where such work is undertaken by members of the household for the household, the activity is not part of consumption.

Second-hand goods

The estimates of household consumption are net of sales of second-hand goods. Where the sale of such goods is between households, neither the sale nor the purchase is recorded in household consumption (since they cancel each other out). However, where purchases are made from dealers, the figures include the net value of the dealers' margins. Where transactions are with other sectors, such as the purchase of a second-hand company car, the full value of the purchase is recorded in household consumption (while the sale value would have been included as negative capital formation). See also *Valuables* below.

Betting and Gaming

Household consumption on betting and gaming, including the national lottery, is defined as the amount staked less the amount returned in winnings, representing, essentially, the cost of the service. In the case of the National Lottery this is ticket sales less prizes.

Insurance

Insurance premiums are composite payments which consist of a charge for the service of insuring, a payment covering the risk insured and, in the case of life assurance and pension schemes, a substantial element of saving. Only the first of these elements is included in consumers' expenditure. For non-life insurance an imputed "premium supplement" must be added to the gross premiums actually paid so as to calculate the service charge. This supplement represents all property income received from investing any reserves held by the insurance company but deemed to belong to policy holders. Without this income the company would have to charge higher premiums to cover its charges.

Fees paid to general government

Households make certain payments to government to obtain various kinds of licences, permits, certificates or passports. In the accounts, some of these payments are treated as taxes and the rest as household consumption. In broad terms, if licences are granted automatically on receipt of the due fee, then the payment is regarded as a tax. However, where government uses the issue of a licence to undertake some regulatory function, the payments are treated as household expenditure. Thus, payments for owning and using vehicles, boats and aircraft, and also for licences to hunt, shoot and fish are all to be regarded as taxes. All other payments are included within household consumption.

Fines paid direct to general government are regarded as transfers and are outside the scope of household consumption.

Interest payments

Interest payments in general, though part of a household's spending, are treated as distributive transactions of property income in the economic accounts and not part of household

consumption. This applies to all interest payments on loans or credit purchase arrangements except where the credit is extended by the retailer and is included in the amount charged for the goods. This principle applies also to mortgage interest payments whilst the repayment of mortgage principal is a financial transaction.

Imputed rents for owner-occupied dwellings

One particular feature of the household sector is that owner-occupiers are deemed to be unincorporated businesses producing housing services which they then consume. This requires imputing a rental payment to the owner-occupied sector, analogous to the activity of payment of market or public sector rentals. The main reason for this approach is to minimise distortions to the consumption figures which would otherwise arise when there were changes in housing tenure, for example from rented to owner-occupied.

Capital expenditure on dwellings

Expenditure on the purchase of new dwellings, including any transfer costs or on major improvements to existing dwellings is not part of household consumption, but is included in gross fixed capital formation (GFCF).

Durable goods

With the exception of GFCF on dwellings, household consumption embraces spending on all other durable goods, such as motor cars. In certain circumstances, such expenditure might be thought of, not as final consumption, but as GFCF. However, to treat this expenditure in this way would require, say, the imputation of an annual amount representing the value of the benefit derived by the household from the goods, essentially as is done for owner-occupied dwellings. Such imputation would be far from easy. Expenditure is treated as household consumption spending. Nevertheless, to aid interpretation, durable goods items are, as far as possible, separately identified within household consumption.

Valuables

Valuables are items such as antiques and jewellery which are primarily held as a store of value and which do not decline in value over time. They are thus not consumed. A proportion of the sales of antiques dealers are deemed to represent the transfer costs of valuables and are excluded from household consumption and included in GFCF.

Household consumption overseas and spending in the UK by non-residents

The aggregate estimates of household consumption in the accounts include spending overseas by UK residents and exclude spending in the United Kingdom by non-residents. However, the data collected to estimate the commodity components of spending include expenditure in the UK by non-residents, but not spending abroad. The estimates for the aggregates, on the proper UK residence basis, are arrived at by adding to the sum of the component-based

figures an estimate of total UK household spending overseas and deducting the total of non-residents' spending in the UK.

Time of recording

Expenditure must be understood as the acquisition of goods and services rather than actual disbursements of cash in the period of account. It relates to the total value of goods acquired whether paid for outright or not. Thus when consumers buy on hire purchase or other forms of credit much of the payment may occur after the transaction is recorded. Similarly, contributions to Christmas or holiday funds are not in principle regarded as expenditure until goods or services are actually acquired. Payments in advance are in effect regarded as saving and payments in arrears, dissaving.

Final Consumption Expenditure of Non-Profit Institutions Serving Households

The final consumption expenditure of non-profit institutions serving households (NPISH) is separated from expenditure of households on goods and services. Final expenditure by NPISH is defined as expenditure on wages and salaries, etc. plus the imputed charge for capital consumption plus purchases of goods and services (including any taxes on expenditure) less sales of goods and services. It represents expenditure on goods and services which is paid for not by the beneficiaries directly but out of other resources available to the NPISH, for example gifts, endowments, property income, government grants, etc. Implicit in this approach is the assumption that NPISH are producers of goods and services as well as being consumers of them. NPISH include charities and colleges of further and higher education amongst many others.

Actual final consumption

Household final consumption expenditure includes only the direct spending of resident households. Some of this spending is on goods and services, such as health and education, which are provided by both the market and the State. Household consumption includes only the former. However, spending by Government (and NPISH) on such goods and services are part of the provision of individual (as opposed to collective) goods and services by these sectors. This spending is included in final consumption expenditure of the providing sector. For these and other 'individual' components of spending, changes in the pattern of provision will clearly affect the level of the figures of household final consumption.

Thus, an alternative, wider concept of consumption has been established. This is called actual final consumption, and for households is defined as household final consumption expenditure plus government and NPISH individual consumption expenditure. Figures of actual final consumption are not affected by arrangements for who provides the good or service and are of use for comparative analyses of spending over time and between countries. Figures for government individual consumption and actual final consumption are shown in Tables 25 and 26.

Appendix B: Sources

This Section briefly describes the main sources of data used for each of the main headings appearing in the tables of this publication.

The method used for estimating each equivalent household final consumption series at constant prices depends on the methods used for the current price estimate. Generally the current price estimate in value terms is deflated by an appropriate price index. The indices most widely used for this purpose are components of the Retail Prices Index (RPI). The index does not cover the whole range of household final consumption and other indices have to be used or estimated where necessary. Similarly where the current price estimate is not in value terms other methods have to be adopted. These are detailed in *United Kingdom National Accounts - Concepts, Sources and Methods* which is published by The Stationery Office. Constant price series are estimates of the volume of expenditure expressed in the average prices prevailing in the base year of 1995.

Summary of household consumption (Tables 1.1-1.4)

These tables summarise the totals from tables 2.1-20.4.

Durable goods (Tables 2.1-2.4)

A new, direct method to estimate expenditure on new motor vehicles was introduced in the June 1996 edition of the former Consumers' Expenditure Business Monitor (MQ24). Previously, expenditure on new cars was taken as the residual after subtracting capital formation from the value of total new car registrations. It is now possible, using information on the V55 Registration Document to measure directly the number of vehicles sold to private individuals. These are valued using trade information and taking account of on the road costs. The method has been applied back to 1993. Estimates for Other Vehicles are largely based on information obtained from trade sources. For Motor Vehicles there are two different methods of producing estimates at constant prices. For new motor vehicles these are calculated by valuing registrations at 1995 prices whereas, for second hand cars, a component of the RPI is used to deflate to constant prices. The deflation of Other Vehicles is largely based on producer price data.

Estimates for Other Durable Goods are based on the **Retailing Inquiries** and the **Retail Sales Index (RSI)**. Retailing Inquiries are conducted by ONS on an annual basis; these provide a breakdown of sales by commodity. The RSI collects total retail sales by type of retailer on a monthly basis. It is used to interpolate a quarterly path and to project forward the commodity information obtained from the most recent Retailing Inquiry.

Food (Tables 3.1-3.4)

Estimates for food are based on the **National Food Survey (NFS)** conducted by the Ministry of Agriculture, Fisheries & Food with the exceptions of Confectionery,

Soft Drinks and ice cream (the latter of which is subsumed within Other Food). The NFS provides a detailed record of expenditure brought into the home. Given the importance of "casual" purchases (which never enter the home) in the cases of confectionery, soft drinks and ice cream, NFS data is supplemented with or, in some cases, replaced by information from other sources such as trade associations.

Expenditure on food outside the home (e.g. in restaurants) is, with the exception of "casual" purchases of confectionery, soft drinks and ice cream, included under Catering (see Tables 12.1-12.4).

Relevant components of the RPI are used to deflate to constant prices, except for Confectionery and Soft Drinks, where average 1995 prices are applied to volume data in order to obtain constant price estimates.

Alcohol & tobacco (Tables 4.1-4.4)

Estimates for alcoholic drink are based on volume of sales and average prices of individual types of alcoholic beverages for both the "off" and "on" trades. This information is obtained from a continuous survey of retail outlets. The volume data extracted from this survey is grossed up to align with annual figures obtained from HM Customs & Excise relating to the quantities of alcoholic drink released for sale within the UK. The price data obtained from the survey is used to deflate to constant prices.

Estimates for tobacco are based on data obtained from HM Customs & Excise relating to the quantities of tobacco released for sale within the UK. Relevant components of the RPI are used to convert this volume data into current and constant price estimates.

Clothing & footwear (Tables 5.1-5.4)

Estimates for Clothing & Footwear are based on the **Retailing Inquiries** and the **Retail Sales Index**.

Energy products (Tables 6.1-6.4)

Estimates for Energy Products are based on data obtained by the Department of Trade & Industry from various energy suppliers. Estimates for Engine Oil, however, are based on the **Family Expenditure Survey**. This is a survey of household expenditure undertaken continuously throughout the year. For Petrol, Coal & Coke and Other Fuels, average 1995 prices are applied to volume data in order to obtain constant price estimates. For Electricity, Gas and Engine Oil, relevant components of the RPI are used to deflate to constant 1995 prices.

Household goods & cleaning materials (Tables 7.1-7.4)

Estimates for Household Goods are based on the **Retailing Inquiries** and the **Retail Sales Index** while estimates for Cleaning Materials are based on the **Family Expenditure Survey**.

Books, newspapers & magazines (Tables 8.1-8.4)

Estimates are based on the **Family Expenditure Survey**.

Chemists' & opticians goods (Tables 9.1-9.4)

Estimates for Medication and Toiletries are based on the **Retailing Inquiries** and the **Retail Sales Index** while estimates for Spectacles are based on the **Family Expenditure Survey**.

Miscellaneous goods (Tables 10.1-10.4)

Estimates for Horticultural Goods, Photos & Pets are based on the **Family Expenditure Survey** while other components of Miscellaneous Goods are based on the **Retailing Inquiries** and the **Retail Sales Index**.

Rent, water and sewerage charges (Tables 11.1-11.4)

Estimates for rents make use of **Family Expenditure Survey** data except for public sector rented dwellings where data supplied by local authorities to the Department of the Environment and to the Scottish, Welsh and Northern Ireland Offices is used. Estimates of rent receipts by New Town corporations and other public corporations are also included.

A change to the method for calculating owner-occupiers' imputed rent was introduced in the June 1996 edition of the former Consumers' Expenditure Business Monitor (MQ24) for years subsequent to 1995. In accordance with a European Union Council Decision under the GNP Directive, a new benchmark establishing the value of imputed rents has been set for Q1 1991. This is based on an econometric regression model which uses certain characteristics of dwellings to link owner-occupied to rented properties. This benchmark is then projected forward using numbers of owner-occupied dwellings and broadly comparable **Family Expenditure Survey** paid rents data.

In order to construct constant 1995 price estimates, the number of occupied dwellings is used as a volume indicator. This indicator is based on total housing stock data, less estimates of unoccupied dwellings supplied by the Department of the Environment, and adjusted by a quality factor to take account of overall improvements in the housing stock.

Estimates for water and sewerage charges are based upon data provided by the Office of Water Services (OFWAT) and the Scottish Office. The constant price estimates are based on movements in domestic rateable values up to 1995. Thereafter, the appropriate component of the RPI is used to deflate the current price series.

Catering (Tables 12.1-12.4)

Householders' expenditure on meals and accommodation away from home is based on the **Family Expenditure Survey**. Similar expenditure by students living in university or college accommodation is derived from surveys sponsored by the Department for Education & Employment (DFEE). Estimates of expenditure by persons living in private residential and nursing homes are benchmarked on a 1993 survey of such establishments. Estimates for fees and charges paid by similar persons residing in Local Authority administered homes are based upon data obtained from the Department of the Environment and the Scottish and Welsh Offices. Ministry of Defence survey data is used to construct estimates of expenditure by military personnel residing in barracks. A number of different deflators, including relevant components of the RPI, are used to obtain constant 1995 price estimates for catering.

Motor vehicle running costs (Tables 13.1-13.4)

Estimates for cars-in-kind (the imputed value of the use of company cars for private purposes) are based on data relating to the taxable value of company cars collected by the Inland Revenue. Cherished number plates are based upon data collected by the Driver and Vehicle Licensing Agency (DVLA). Driving licences are based on administrative records, they are deflated by an appropriate price index selected by the ONS. Estimates for other components of Motor Vehicle Running Costs are largely based on the **Family Expenditure Survey**.

Travel & communications (Tables 14.1-14.4)

Estimates for air and sea travel are based on the **International Passenger Survey (IPS)**. The IPS is a continuous sample survey of passengers (both UK residents and foreigners) travelling between the UK and foreign countries. In order to construct constant 1995 price estimates, the number of journeys, based on information collected by the IPS, is used as a volume indicator. Estimates for taxi fares are based on the **Family Expenditure Survey**. Estimates for other components of travel are largely based on data collected by the Department of Transport.

Estimates for postal services are based on the **Family Expenditure Survey**. Estimates for telecommunications are based on trade data for British Telecom (BT) phones, OFTEL data (the industry regulator) for non-BT and cable, and the **Family Expenditure Survey** for mobile phones.

Financial services (Tables 15.1-15.4)

Estimates for the administrative costs of Life Assurance and Pension funds are largely based on inquiries conducted by ONS. An appropriate Average Earnings Index is used to deflate to constant 1995 prices. Estimates for stamp duties on stocks and shares make use of Inland Revenue data while estimates for stockbrokers' charges are based on stock exchange information. For both stamp duties and stockbrokers' charges, an index of stocks and share prices are used to deflate to constant 1995 prices. Estimates for financial services use data provided by the Bank of England and several other sources. A number of different deflators are used to obtain constant 1995 price estimates for financial services.

Household & domestic services (Tables 16.1-16.4)

Estimates for household and domestic services are mainly based on the **Family Expenditure Survey** with the exception of service in kind where data relating to the value of clothing provided to HM armed forces is collected by the Ministry of Defence (MOD) and certain insurance data from within ONS and the Association of British Insurers.

Recreational & cultural services (Tables 17.1-17.4)

There are two data sources for estimates for television and video rental charges. Estimates for rental of audio-visual equipment are based on the **Retailing Inquiries** and the **Retail Sales Index** while estimates for the rental of video software make use of data collected from trade sources. Estimates for television licences are based on receipts data collected by the relevant licensing authority and an index of licence fee rates is used to deflate to constant 1995 prices. Estimates for television and video repairs are based on the **Family Expenditure Survey**. Estimates for cinema admissions are based on box office takings obtained from the Cinema Exhibitors Inquiry. Constant 1995 price estimates are obtained by multiplying the number of admissions by the average charge in the base year. Estimates for other admissions and social subscriptions are based on the **Family Expenditure Survey**.

Estimates for betting and gaming (excluding the National Lottery) are based on duty receipts provided by HM Customs & Excise. Estimates for the National Lottery are based on data obtained from Department of National Heritage. Estimates for education are based on data received from the Higher Education Funding Council and the Independent Schools Information Service while education fees charged by local authorities are derived from the local government accounts. A number of different price deflators are used to construct constant 1995 price estimates for education.

Medical services (Tables 18.1-18.4)

Estimates for NHS payments and private medicine are based on Department of Health data and the **Family Expenditure Survey** respectively. Estimates for medical insurance are based on a survey of companies conducted by the Department of Health. For NHS payments and medical insurance, average 1995 prices are applied to volume data in order to obtain constant price estimates. For private medicine, relevant components of the RPI are used to deflate to constant 1995 prices.

Miscellaneous services (Tables 19.1-19.4)

Estimates for hairdressing and accident insurance are based on the **Family Expenditure Survey**. Estimates for undertaking make use of number of deaths data collected by ONS. A price deflator obtained from survey data is used to convert this volume data into both current and constant 1995 price expenditure estimate. Estimates for survey fees are based on Department of the Environment data. Current price estimates are obtained by multiplying together the total value of mortgages advanced, the number of surveys carried out per household and the fee for a survey as a proportion of the mortgage value. In order to construct constant 1995 price estimates, the number of new mortgages is used as a volume indicator. Estimates for miscellaneous fees paid to government come from ONS registration data, the Home Office and administrative records, they are deflated by appropriate price indices selected by the ONS. Miscellaneous services not included elsewhere represent notional estimates for certain items for which there are currently no satisfactory data sources.

UK and foreign tourist expenditure (Tables 20.1-20.4)

Estimates for foreign tourist expenditure and UK tourist expenditure abroad are based on the **International Passenger Survey**. Special price deflators are constructed by ONS for the purposes of revaluing foreign tourists' expenditure at constant 1995 prices. For UK tourist expenditure abroad, retail price indices are available for most of the countries visited and special indices are constructed by ONS to represent the kind of goods and services likely to be bought by UK travellers overseas.

Summary of household consumption - Annual data (Tables 21-22)

These tables summarise the annual totals back to 1963.

Summary of household consumption - Annual data classified by COICOP (Tables 23-24)

These tables include annual data for household final consumption classified by function (COICOP).

Final consumption expenditure: Households, NPISH and general government Annual data classified by function (Tables 25-26)

These tables include annual data for final consumption of households, NPISH and general government classified by function (COICOP/COPNI/COFOG).

Estimates of general government consumption are produced by ONS Public Sector Branch. Requests for further data and information should be directed to Public Sector Branch, Office for National Statistics, D3/04, 1 Drummond Gate, London SW1V 2QQ (Tel: 020-7533 5988).

Households disposable income, consumption and saving (Table 27)

Estimates for the final expenditure of non-profit institutions serving households are based on data obtained from a number of sources including the Higher Education Funding Council, the Certification Office for Trades Unions & Employers' Associations and the Registrar of Friendly Societies. Estimates of expenditure by charities are derived from a 1993 survey of charities. Current price estimates of expenditure by universities are deflated by a price index constructed by the Committee of University Vice Chancellors while estimates of expenditure by other non-profit-making bodies are deflated by several appropriate price indices selected by ONS.

Estimates of personal income are produced by ONS Personal Sector and Charities Survey Branch.

Income and capital accounts (Tables 27.1-27.5)

Tables have been recently added at tables 27.1 to 27.5 covering the income and capital accounts.

Requests for further data and information should be directed to National Accounts Division, Office for National Statistics, D3/04, 1 Drummond Gate, London SW1V 2QQ (Tel: 020-7533 6034/5997/6029).

Consumer credit (Tables 28.1-28.2)

Estimates of consumer credit are produced by ONS Overseas and Financial Division. Requests for further data and information should be directed to Overseas and Financial Division, Office for National Statistics, Room D.101, Cardiff Road, Newport NP9 1XG (Tel: 01633 812782).

Fixed investment in dwellings and other borrowing (Table 29)

Estimates of fixed investment in dwellings and other borrowing are produced by the Bank of England and ONS Sector and Financial Accounts Branch. Requests for further data and information should be directed in the case of fixed investment in dwellings to the Bank of England, Threadneedle Street, London EC2R 8AH (Tel: 0171-601 4411) and in the case of other borrowing to the ONS Sector and Financial Accounts Branch, Office for National Statistics, D3/06, 1 Drummond Gate, London SW1V 2QQ (Tel: 020-7533 6033).

Retail Prices (Tables 30-31)

These tables are produced from Retail prices which are compiled by ONS Consumer Prices and General Inflation Division. Requests for further data and information should be directed to Office for National Statistics, Consumer Prices and General Inflation Division, 1 Drummond Gate, London SW1V 2QQ (Tel: 020-7533 5874).

Labour market (Table 32)

This table is compiled from estimates which are produced by the ONS Labour Market Survey and Earnings and Employment Divisions. Requests for further data and information should be directed to the ONS Labour Market Survey Division, Office for National Statistics, B4/10, 1 Drummond Gate, London SW1V 2QQ (Tel: 020-7533 6176).

Appendix C: Classification of household consumption headings

Table 1

Table 1 summarises the totals from the other household consumption tables. (Annual summaries follow Table 20).

Table 2

| Durables | Items included |
|--------------------------------|---|
| Motor vehicles | Private cars and motor cycles |
| Other vehicles | Bicycles, boats, caravans and planes |
| Furniture | All furniture (except office and garden furniture) nursery furniture, perambulators, mattresses, dealers' margins on second-hand furniture, picture frames, antiques and works of art, but excluding antiques etc purchased for investment |
| Floor coverings | Carpets, rugs, mats, carpet tiles; vinyl and linoleum floor coverings and floor tiles including wood |
| Audio-visual equipment | All audio-visual goods (eg radios, TVs, video recorders, CD players) camcorders, computers, calculators, telephones including mobiles (excluding call charges), musical instruments and other audio visual goods (excluding audio and video tapes which are included under "Records") |
| Photographic and optical goods | Cameras, and other photographic goods, (excluding the purchase & processing of photographic film which are included under "Photos") optical goods, non prescription spectacles and sunglasses (excluding prescription spectacles and contact lenses) |
| Major appliances | Domestic electrical and gas appliances (eg cookers, washing machines, refrigerators, dishwashers, heaters, vacuum cleaners, sewing machines, power tools, lawnmowers etc; but excluding central heating which is regarded as capital expenditure) |

Table 3

| Food | Items included |
|---------------------|--|
| Bread | Bread and flour |
| Cakes & biscuits | Cakes and biscuits |
| Other cereals | Cereal breakfast foods, oatmeal, rice, barley products, semolina, pasta, sago, semolina, tapioca, arrowroot, cornflour, custard and blancmange powders |
| Meat & bacon | Fresh meat, bacon, offal, ham, pork, rabbit, game, poultry, sausage, spam, salami, canned meats, corned beef and other meat products |
| Fish | Fresh fish, frozen fish and fish products, including shell fish |
| Milk, cheese & eggs | Liquid, condensed and powdered milk; cream, yoghurt, cheese and eggs |

Table 3 (Continued)

| Food | Items included |
|---------------|---|
| Oils & fats | Butter, margarine, lard, cooking & salad oils and other fats |
| Fruit | Fresh, canned, dried, frozen and crystallized fruit, nuts (excluding fruit juices which are included in "soft drinks") |
| Potatoes | Potatoes, potato crisps, and other potato products |
| Vegetables | Fresh, canned, dried and frozen vegetables, pickles & sauces (excluding vegetable juices which are part of "other food") |
| Sugar | Refined, beet and cane sugar |
| Confectionery | Chocolate and sugar confectionery |
| Tea & Coffee | Tea, coffee, cocoa and malted drinks |
| Soft drinks | Soft drinks, fruit juice and mineral water |
| Other food | Infant and invalid foods, soups and ice cream; condiments and seasonings; preserves, including syrup, treacle, jam, marmalade, table jellies, honey; other manufactured foods |

Table 4

| Alcohol & tobacco | Items included |
|------------------------------|--|
| Beer | Stout, lager; brown, light, pale ales; bitter, heavy, mild |
| Spirits | Whisk(e)y, gin, vodka, brandy and other spirits |
| Wine | Sherry, vermouth, table wine, sparkling wine, "made" wine |
| Cider etc | Cider and perry |
| Cigarettes | Cigarettes |
| Other tobacco products | Pipe tobacco, cigars, snuff |

Table 5

| Clothing & footwear | Items included |
|----------------------------------|---|
| Men's and boys' wear | All types of men's and boys' garments including socks except sportswear (excluding repairs, alterations and footwear) |
| Women's girls' and infants' wear | As men's and boys' wear but including knitting wool, dress materials, and haberdashery etc |
| Footwear | Boots, shoes, slippers etc (excluding socks, stockings and repairs to footwear) |

Table 6

| Energy | Items included |
|-------------------|---|
| Petrol and diesel | All grades of petroleum/motor spirit; diesel oil (derv) |

Table 6 (Continued)

| Energy | Items included |
|---------------|--|
| Engine oil | Engine/motor oil |
| Electricity | Payment for consumption of domestic electricity |
| Gas | Payment for consumption of domestic gas |
| Coal & coke | All grades of house coal, miners' coal, anthracite, semi coke, coal and coke |
| Other fuels | Burning oils, liquid paraffin gas (LPG), paraffin, fuel oil, other liquid gases, wood, any other fuels |

Table 7

| Household goods & cleaning materials | Items included |
|---|--|
| Textiles & soft furnishings | Sheets, blankets, pillows (but not mattresses) cushions, furnishing fabrics, and other household textiles |
| Hardware | China, pottery, glassware, cutlery, ironmongery (excluding DIY goods and tools), garden tools and garden furniture, minor electrical fittings and accessories |
| DIY goods | Decorators' and DIY supplies including both self-assembly and ready-made kitchen units, sanitary equipment, sheet glass, paint, lighting but excluding electrical fittings and accessories |
| Household soap | Household soap (but not toilet soap) |
| Other cleaning materials | Detergents, soap powders and other cleaning materials |

Table 8

| Books, newspapers and magazines | Items included |
|--|--------------------------------------|
| Books | Books, maps, diaries and book tokens |
| Newspapers | All newspapers |
| Magazines | Magazines and programmes for events |

Table 9

| Chemists' and opticians goods | Items included |
|--------------------------------------|---|
| Spectacles | Prescription spectacles and contact lenses, (excluding non prescription spectacles and sunglasses which are included in "Photographic and optical goods" and payments for NHS ophthalmic services which are included in "NHS payments") |
| Medication | Drugs and medicines other than those purchased on NHS prescriptions |
| Toiletries | Toilet articles, perfumery, toilet soap, toilet tissues and paper, toothpaste |

Table 10

| Miscellaneous goods | Items included |
|----------------------------|--|
| Sports and toys | Sports goods, toys, games; stamps and coins for collectors and camping equipment |
| Records etc | Records, compact discs, audio cassettes, (including software for video games and other computer software and camcorder cassettes) |
| Horticultural goods | Plants, seeds, cut flowers and other gardening requisites (excluding garden tools and garden furniture) |
| Photos | Photographic films and film processing |
| Pets | Purchase of pets, pet foods, pet accessories and veterinary costs |
| Jewellery | Jewellery, silverware etc; watches and clocks, excluding jewellery purchased for investment. |
| Stationery | Writing paper, printer paper, envelopes, pens, pencils, other writing materials, fax machines, picture postcards and other items of stationery |
| Novelties and souvenirs | Novelties, gifts and souvenirs |
| Travel goods | Suitcases, overnight bags, holdalls etc |

Table 11

| Rent, water and sewerage charges | Items included |
|---|--|
| Imputed rent | Imputed value of rent for the owner-occupied sector |
| Household rent | Paid rents by householders |
| Non household rent | Ground rents, chief rent, head rent, feu duty and similar payments, but excluding expenditure on hotel accommodation, boarding houses, holiday flats, and caravan rental which are included under "Catering" Mortgage repayments are treated as loans so are not included in household consumption. |
| Water and sewerage charges | All water rates and sewerage charges |

Table 12

| Catering | Items included |
|-------------------------|---|
| Meals and accommodation | Prepared meals and snacks for consumption on or off premises, including school meals, the cost of hotel accommodation |
| Food in kind | The value of subsidised food provided to employees, residents of residential and nursing homes, hostels and other communal establishments |
| LA homes | Payment to Local Authority Social Services Departments for residential fees and services rendered to individuals in Local Authority homes |

Table 13

| Motor vehicle running costs | Items included |
|---------------------------------------|---|
| Repairs and insurance | Repairs to motor vehicles whether financed by individuals or by insurance companies; administrative costs of motor insurance (ie expenditure on premiums plus property income attributed to policy holders minus payment of claims) |
| Motor vehicle spares | All spares and accessories |
| Other costs | Garage rents, parking fees, antifreeze, engineers reports, car repair tools, MOT tests, underseal, cherished number plates etc, but excluding parking fines which are not included in household consumption |
| Motoring organisation membership fees | Subscription charges to AA, RAC etc |
| Driving lessons | All fees for driving lessons |
| Driving licences & driving tests | All fees for driving licences and driving tests |
| Self drive hire | Charges for the hire of self drive vehicles for private use |
| Cars-in-kind | Imputed value of the use of company cars for private purposes |

Table 14

| Travel and communications | Items included |
|----------------------------------|---|
| National rail | Fares on rail services on the national network operated by the individual train operating companies |
| Other rail | Fares on London Underground, Docklands Light Railway, Greater Manchester, Strathclyde, Tyne & Wear, Sheffield and other metro systems |
| Buses | Fares on buses, coaches and non metro tramways (eg Blackpool) |
| Air | Fares for air travel including the air travel component of package tours |
| Taxis | Taxi fares |
| Sea | All sea travel including pleasure cruises and car ferries |
| Miscellaneous travel | Travel agents' commission, removal costs and travel not included in the above categories |
| Post | Charges for postal services |
| Telecommunications | Telephone, fax and computer transmission charges including mobile and cable |

Table 15

| Financial services | Items included |
|----------------------------------|---|
| Life assurance and pension funds | Administrative costs of life assurance and pension funds |
| Stamp duties | Stamp duties on stocks and shares (but not house purchase which is not part of household consumption) |

Table 15 (Continued)

| Financial services | Items included |
|---------------------------|--|
| Monetary services | Includes fees, charges and commissions paid to banks and building societies etc by private customers including cheque and credit card account fees, foreign exchange transaction charges, bank executor and trustee charges, travellers' cheque fees, purchase and management charges of unit trusts |
| Stockbrokers charges | Stockbrokers' commissions on transactions in stocks and shares |

Table 16

| Household and domestic services | Items included |
|---|---|
| Contractors' charges & structural insurance | Payment to contractors for maintenance and repair work plus the administrative costs of house building insurance (ie expenditure on premiums plus property income attributed to policy holders minus payment of claims) |
| Laundry | Laundry charges |
| Dry cleaning | Dry cleaning charges |
| Shoe repairs | Repairs to footwear |
| Other repairs | Repairs to clothing and domestic appliances |
| Contents insurance | Administrative costs of house contents insurance (ie expenditure on premiums plus property income attributed to policy holders minus payment of claims) |
| Service-in-kind | Value of uniform and other clothing provided to HM armed forces |
| Domestic services | Window cleaning, gardening, child minding, cleaning services, home help and other forms of domestic services |

Table 17

| Recreation and cultural services | Items included |
|---|---|
| TV rental | Rental of TV, video, satellite equipment and video tapes |
| TV licences | Value of receipts of TV licence fees |
| TV and video repairs | Cost of repairs to TV and video recorders |
| Cinema admission | Admission charges to cinemas |
| Other admission | Admissions to theatres, dances, participant and spectator sports events, theme parks, zoos, museums etc |
| Betting and gaming | Cost to consumers' of taking part in gambling ie stakes less winnings for football pools, horse and dog racing, bingo admission and stakes, lotteries, gaming machines, funfairs, and competitions, but excluding premium bonds which are not included in household consumption |
| Social subscriptions | Subscriptions to clubs, trades union, and friendly societies |

Table 17 (Continued)

| Recreation and cultural services | Items included |
|---|--|
| Education | University tuition fees, private school fees, tuition fees, Local Authority and other school charges for education |

Table 18

| Medical services | Items included |
|-------------------------|--|
| NHS payments | Payments for prescriptions, injections, dental services, ophthalmic services, hospital services, primary care, pharmaceutical services |
| Private medicine | All private medical charges, other than the purchase of drugs and medication which are included under "Medication" |
| Medical insurance | Gross insurance premiums covering the provision of medical goods and services plus property income attributed to policy holders |

Table 19

| Miscellaneous services | Items included |
|---|--|
| Hairdressing | Hairdressing and beauty care |
| Accident insurance | Administrative costs of accident insurance (ie expenditure on premiums plus property income attributed to policy holders minus payment of claims) |
| Undertaking | All funeral expenses |
| Survey fees | Surveyors' fees for mortgage loans |
| Miscellaneous fees paid to government | Birth certificate, passport and visa fees, firearms licences and other miscellaneous government fees |
| Miscellaneous services not included elsewhere | Expenditure on miscellaneous services not included elsewhere in the household consumption estimates eg legal and accounting fees (except for house purchase); introduction agencies/marriage bureaux, private newspaper advertisements, bicycle hire, clothes hire, deckchair hire, cloakroom fees, cable and satellite TV subscription, tool hire and private detective agency fees |

Table 20

| UK and foreign tourist expenditure | Items included |
|---|---|
| Foreign tourist expenditure | Expenditure by non-UK residents in the UK |
| UK tourist expenditure abroad | Expenditure by UK nationals on holiday abroad |

Index

The references in this index refer to table numbers

- AA and RAC subscriptions 13
- Accident insurance 19
- Accommodation and meals 12
- Admissions - recreational 17
