About the Office for National Statistics

The Office for National Statistics (ONS) is the government
Agency responsible for compiling, analysing and
disseminating many of the United Kingdom's economic,
social and demo-graphic statistics, including the retail
prices index, trade figures and labour market data, as well
as the periodic census of the population and health
statistics. The Director of ONS is also the National
Statistician and the Registrar General for England and
Wales, and the agency administers the statutory
registration of births, marriages and deaths there.

Guide to this publication

Noticeboard

Date of this publication: 21 December 2006.

Revised data are included from 2005 quarter 1.

Household expenditure volume series are chainlinked annually. The chained volume series have all been re-referenced to 2003 in this issue, ie the chained volume measure in 2003 equals the current price value of expenditure in 2003.

Growth in each year up to and including 2004 is calculated at average prices of the previous year. Growth from 2004 onwards is calculated at average prices of 2003. Volume series are additive only for the most recent periods; annual data for 2003 onwards and quarterly data for 2004 quarter 1 onwards.

The next issue of *Consumer Trends* will be available on 28 March 2007.

Consumer Trends presents comprehensive estimates of household final consumption expenditure, constructed to conform to the European System of Accounts 1995 (ESA 95) Classification Of Individual Consumption by Purpose (COICOP).

Definition of household consumption

A definition of household final consumption expenditure within the context of the UK national accounts is:

Personal expenditure on goods - durable, semi-durable and non-durable - and on services, including the imputed rent of owner-occupied dwellings, the administrative costs of non-life insurance and life insurance and superannuation schemes.

Business expenditure and expenses, interest and other transfer payments and capital expenditure on dwellings are all excluded from household consumption.

At UK national level, which represents final consumption expenditure in the UK and abroad by UK resident households, net tourism expenditure is included. This is netted off to produce the aggregate total UK domestic expenditure, representing final consumption expenditure in the UK by UK and foreign households. These and other points which affect the general definition of household final consumption expenditure are discussed in greater detail in Appendix A.

Sources of data

The quarterly and annual estimates of household final consumption expenditure at current and previous year prices are built up commodity by commodity from a variety of independent sources. Where more than one potential source is available the source used for a particular good or service is the one which is judged to provide the most reliable estimate of the level and changes in expenditure on that good or service. In some cases a combination of sources is employed so as to make the best use of the available information. Each component series within household final consumption expenditure is individually seasonally adjusted in current price and volume terms. The main sources of data for household final consumption expenditure are detailed in Appendix B.

COICOP

COICOP is one of the functional classifications in the System of National Accounts 1993, adapted for Europe as the European System of Accounts 1995.

As well as being used for Household Final Consumption Expenditure (HHFCE), as published in *Consumer Trends*, it is also used for household budget surveys, as adopted for the UK Expenditure and Food Survey, and international comparisons of Gross Domestic Product.

COICOP splits total HHFCE into 12 divisions **by purpose**:

Food and non-alcoholic beverages
Alcoholic beverages and tobacco
Clothing and footwear
Housing, water, electricity, gas and other fuels
Furnishings, household equipment and routine household maintenance
Health
Transport
Communication
Recreation and culture
Education
Restaurants and hotels
Miscellaneous goods and services

COICOP also identifies durable goods, semi-durables, non-durables and services within these divisions.

A modified system of table numbering has been adopted in *Consumer Trends*. COICOP Division numbers (with the grand total shown as 0) are used for the first set of tables. This is followed by a second set encompassing the same data, using initial letters:-

TOUR for UK and foreign tourist expenditure
0GS for goods and services summary
TG for total goods
DG for durable goods
SDG for semi-durables
NDG for non-durable goods
SER for services
0A for annual data summary
0GSA for goods and services annual summary
ALC for total alcoholic beverages

Each table has six variants, denoted by a suffix:-

CN for current prices, not seasonally adjusted
CS for current prices, seasonally adjusted
KN for chained volumes, not seasonally adjusted
KS for chained volumes, seasonally adjusted
DN for deflators, not seasonally adjusted
DS for deflators, seasonally adjusted

The *Consumer Trends* briefing article is also organised by these headings and the information

covered by the three regular appendices (Definitions and conventions; Sources; and Classification of household consumption headings) reflects the COICOP classification.

More information on the detail contained within each COICOP division can be found in appendix C, and at the United Nations Classifications Registry Online <http://esa.un.org/unsd/cr/registry>

Annual chain-linking

With the publication of the 2003 Q2 edition of *Consumer Trends* the volume measures of expenditure (shown in the .KN and .KS tables) moved to a calculation method using annual chain-linking. Previously, a fixed base methodology was used, in which expenditure on goods and services were valued at prices of a particular year, most recently 1995. Growth in expenditure since 1995 was measured in the same terms, with the relative importance of individual goods and services in the total being a reflection of expenditure on them in 1995.

The base year had previously been changed roughly every five years in a process known as re-basing. Earlier time periods used expenditure shares from 1990, 1985 and so on to weight together the various goods and services purchased. Under annual chain linking, re-basing is carried out every year, with growth being measured by re-valuing current period expenditure at average prices prevailing in the previous year and comparing the result with actual expenditure in the previous year. The weight given to individual goods and services within the total is updated every year. In this way changes in the structure of the economy are reflected in statistics of growth at a much earlier stage than previously.

The move to annual chain-linking involved a change in the reference year used for volume series. The reference year is the one in which current price series and the corresponding volume measures equal each other in £ (or take the value 100 in index number form). This year is now 2003.

Although the use of chain-linking produces more accurate growth rates there is a loss of additivity for the volume series. This means that components no longer sum to the totals before 2003 for the annual figures and 2004 for the quarters. While this may be

inconvenient for users it should be noted that under the old fixed base methodology there was a lack of additivity before the latest year used to link constant price data on different price bases (most recently, 1994).

The volume series are now referred to as chained volume measures (CVM) in £ million rather than constant prices. The individual series identifiers did not change from the previous 1995-based ones.

Work is continuously undertaken to improve the collection of detailed data below the headings we are now publishing. We would welcome feedback via e-mail on specific areas of interest to readers of *Consumer Trends* so that we may consider your needs when planning the publication of additional detail in future.

Revisions analysis

An analysis of revisions to the key household expenditure series - growth rates of total expenditure at current prices and in chained volume terms - appears at the end of the following article entitled *Consumer Trends briefing*. The format and statistical test of possible bias in revisions is common to all key economic time series published by the ONS in First Releases. Further details of the test being applied are given in an article on the ONS website at:

<http://www.statistics.gov.uk/cci/article.asp?ID=793>

***Consumer Trends* on the Internet**

In line with other National Statistics publications, *Consumer Trends* is now published on the National Statistics website. It can be found at:-
www.statistics.gov.uk/consumertrends

Consumer Trends is no longer published on paper, but basic paper copies can be easily printed by the customer direct from this website. Please refer to respective bookmarks for the pages you wish to print. For all tables appearing in *Consumer Trends*, historic data pre-2002 are available electronically from the website using the Time Series Data link on the *Consumer Trends* page or the links to Excel spreadsheets.

National statistics Online

www.statistics.gov.uk

The household final consumption data in this publication can be obtained in computer readable form via the ONS. There is web-based access to time series, cross sectional data and metadata from across the Government Statistical Service (GSS), available using the site search and index functions from the homepage. Download many datasets, in whole or in part, or consult the directory for all GSS statistical resources, including censuses, surveys, periodicals and enquiry services. Information is posted as pdf electronic documents, or in xls and csv formats, compatible with most spreadsheet packages.

Time series data

Access over 40,000 time series, cross sectional data and metadata from across the Government Statistical Service (GSS), organised by theme and subject. Alternatively, the data are available on Navidata, a Windows based package available from the above address.

Consistency with other publications

The household final consumption estimates in this edition of *Consumer Trends* are consistent with those appearing at Tables E1-E4 of the first release *Quarterly National Accounts* published on 21 December 2006. Data up to the end of 2005 are the same as in the 2006 edition of *United Kingdom National Accounts (The Blue Book)*.

Consumer Trends Briefing

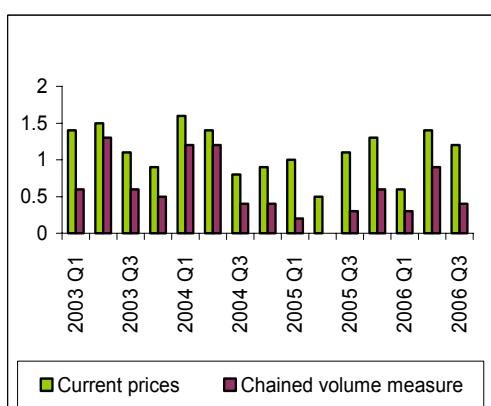

By Nafisah Ahmad (consumertrends@ons.gov.uk)

Total Expenditure

[All data below relates to data in volume terms, seasonally adjusted, unless otherwise stated].

Household final consumption expenditure grew by 1.2 per cent in current price terms and by 0.4 per cent in volume terms, seasonally adjusted, in the third quarter of 2006. In both measures, this was slower than the rate seen in the second quarter (Chart C1). Growth in the third quarter of the previous year in volume terms continued to rise steadily at 2.1 per cent.

Chart C1
Household final consumption expenditure
Growth rates on previous quarter
Seasonally adjusted, percentage change

During the third quarter of 2006, expenditure on goods was stronger than on services. This can be attributed to strong growth of 1.8 per cent in the expenditure on semi-durable goods. Growth in durable goods fell by 0.3 per cent after displaying robust growth of 3.1 per cent in the previous quarter.

Non-durable goods experienced a modest 0.2 per cent rise in quarter three after displaying a growth of 0.6 per cent in the second quarter. Spending on services rose 0.3 per cent in the third quarter. This growth in the latest quarter was the highest in any third quarter since 2003.

The main contribution to the growth in household final consumption expenditure of 0.4 per cent is

attributable to expenditure on recreation and culture, which was up 1.4 per cent following robust growth of 3.3 per cent in the previous quarter. This was largely driven by games of chance, up 6.7 per cent. This growth was, however, balanced by a marked fall in expenditure on audio visual equipment, which declined 6.9 per cent. Clothing and footwear continued its trend of increasing growth, rising 1.7 per cent in the third quarter.

Growth in vehicle fuels and lubricants displayed a sharp acceleration of 2.0 per cent after experiencing declining growth in the first two quarters of 2006. Expenditure on food and drink reverted back to a growth rate similar to that observed in the first quarter, rising by 1.4 per cent in the third quarter.

Growth in these areas was partially offset by a fall in expenditure on housing declining by 0.5 per cent following a more moderate growth of 0.4 per cent in quarter two.

Household final consumption expenditure implied deflator

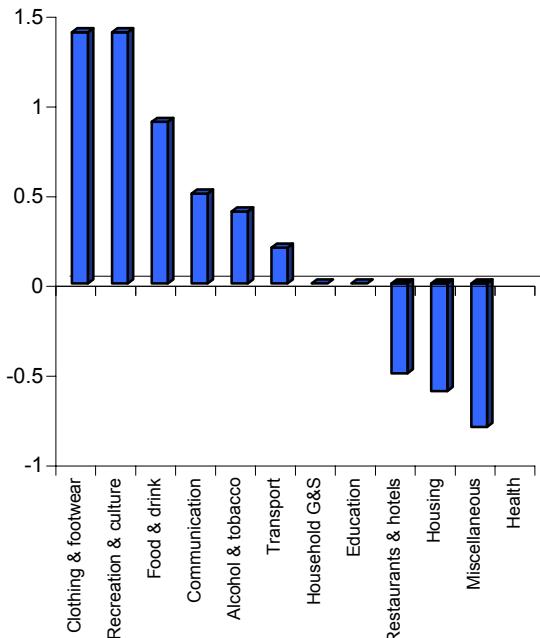

The rate of growth of the implied deflator was 0.8 per cent in the third quarter. Year on year rate of growth was constant, at 2.4 per cent. The durable goods deflator experienced no growth. In contrast, the deflators for non-durable goods and services showed a rather stronger growth of 1.8 per cent and 1.0 per cent respectively. The implied deflator for semi-durable goods fell by 0.3 per cent in the latest quarter.

The implied deflators are calculated by dividing expenditure at current prices by expenditure in volume terms. Changes reflect both price movements and changes in the commodity 'mix' within expenditure.

Chart C2**Growth rates**

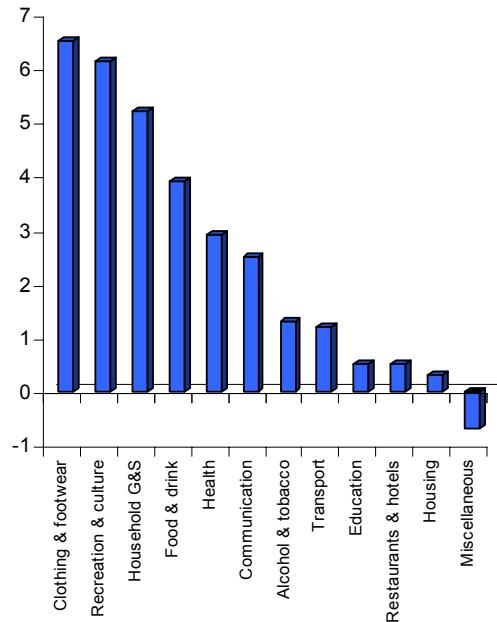

Quarter 3 2006 on quarter 2 2006

Quarter 3 2006 on quarter 3 2005

Seasonally adjusted, chained volume measure

**Chart C4****Household final consumption expenditure**

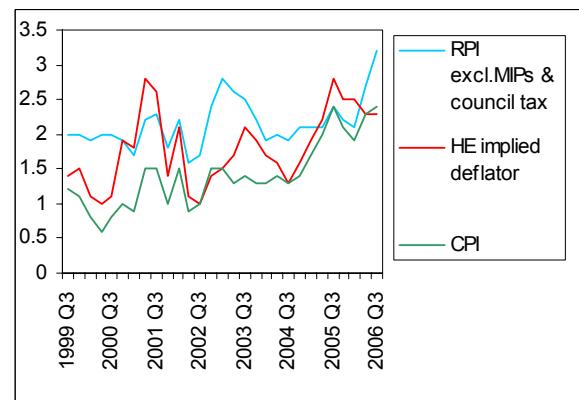

Implied deflator total

Seasonally adjusted, percentage change

**Chart C5****Deflators**

Not seasonally adjusted

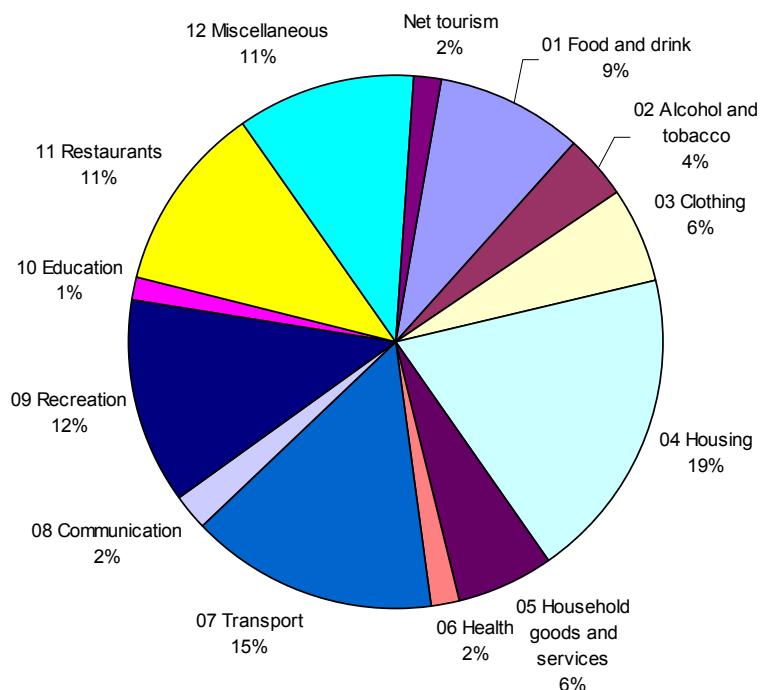

Year on year percentage change

Most of household expenditure is deflated by low level components of the RPI. The CPI is not used for deflation. Its construction is technically different from the RPI although its weighting uses national accounts household expenditure data.

Chart C5 shows the year-on-year percentage change, not seasonally adjusted, in the household expenditure total implied deflator compared with the Retail Prices Index (RPI) excluding mortgage interest payments (MIPs) and council tax, and the Consumer Prices Index (CPI).

Chart C6
Share of household final consumption expenditure, 2006.
 Chained volume measures, referenced to 2003

Commodity Changes

(Growth of expenditure between quarter two in 2006 and quarter three 2006.)

The share of household final consumption expenditure is shown in Chart (C6).

- Recreation and culture (including garden and pet products, newspapers etc.) up 1.3 per cent
- Health down 1.4 per cent
- Housing (including electricity, gas and other fuels) down 4.0 per cent
- Miscellaneous (other products for personal care) down 2.2 per cent

Durable goods down 0.3 per cent

- Audio visual equipment down 6.9 per cent
- Miscellaneous down 1.6 per cent
- Furnishings and household goods down 0.7 per cent
- Health down 0.7 per cent
- Purchase of vehicles down 0.5 per cent

Services up 0.3 per cent

- Recreation and culture up 2.2 per cent
- Communication up 0.7 per cent
- Housing up 0.3 per cent
- Miscellaneous (including insurance and other financial services) down 0.2 per cent
- Transport (public transport and vehicle maintenance and repair) down 0.3 per cent

Semi-durable goods up 1.8 per cent

- Clothing and footwear up 1.8 per cent
- Recreation and culture (including games, toys and hobbies) up 1.4 per cent
- Furnishing and household goods up 1.1 per cent

Tourism

- Foreign tourist expenditure in the UK down 4.0 per cent
- UK tourist expenditure abroad down 2.0 per cent

Non-durable goods up 0.2 per cent

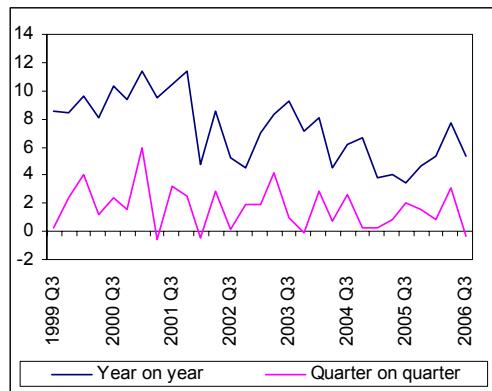

- Vehicle fuels and lubricants up 2.0 per cent
- Food and non-alcoholic beverages up 1.4 per cent

Durable goods

Expenditure on durable goods fell by 0.3 per cent in the third quarter after strong growth of 3.1 per cent in the previous quarter (Chart C7). Growth on the corresponding quarter of the previous year rose by 5.3 per cent. Although this was lower than in the previous quarter, it was still considerably above the growth rates observed in 2005.

Chart C7 Durable goods, growth rates

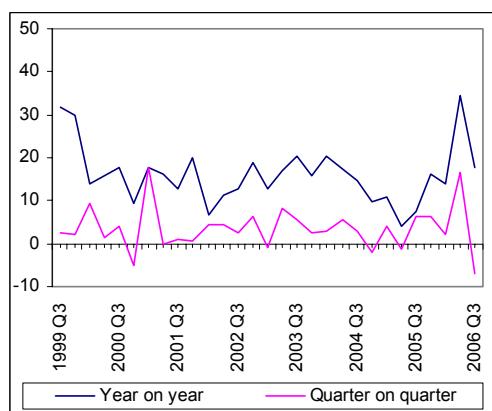

Seasonally adjusted, chained volume measure
Percentage change

The decline in the quarter on quarter growth can be attributed to a decline in expenditure of audio visual equipment, which fell by 6.9 per cent. This decline followed a significant rise in growth of 16.5 per cent in the second quarter, which was due to the effect of World Cup 2006 football tournament held in June, particularly relating to the purchase of flat screen televisions (Chart C8).

Chart C8 Audio visual equipment, growth rates

Seasonally adjusted, chained volume measure
Percentage change

The fall in expenditure on audio visual equipment was accompanied by more modest falls for most durable goods. Furnishings and household goods declined by 0.7 per cent after a significant growth of 3.2 per cent in the second quarter. Expenditure on furnishings and household goods has long shown an erratic quarterly growth pattern.

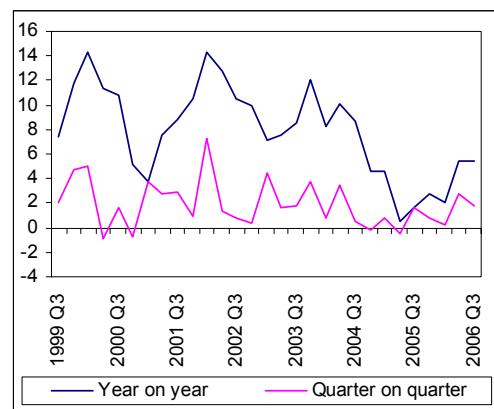

Spending on miscellaneous (jewellery, clocks and watches) and purchase of vehicles displayed continuous decline since the second quarter, falling 1.6 per cent and 0.5 per cent respectively in the third quarter.

Semi-durable goods

Expenditure on semi-durable goods rose by 1.8 per cent on the previous quarter. This was lower than the previous quarter which stood at 2.7 per cent (Chart C9). The quarter on corresponding quarter of the previous year growth continued its upward trend rising by 5.5 per cent.

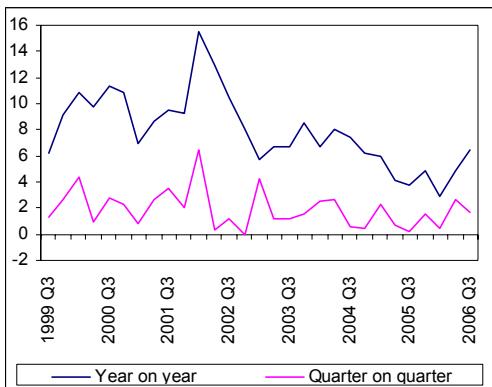

Chart C9 Semi-durable goods, growth rates

Seasonally adjusted, chained volume measure
Percentage change

The rise in spending on semi-durable goods is being driven by spending on clothing and footwear, up 1.8 per cent in the latest quarter, although down from 2.7 per cent growth in the previous quarter (Chart C10). The growth in the latest quarter was largely driven by a 1.9 per cent increase in garments. The slowdown in consumption of semi-durable goods on the previous quarter was a result of flat growth seen in shoes and footwear in the latest quarter in comparison to a growth of 2.2 per cent in the second quarter.

Chart C10
Clothing and footwear, growth rates
Seasonally adjusted, chained volume measure
Percentage change

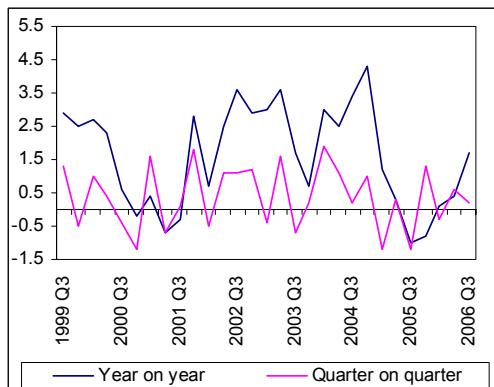

Recreation and culture spending continued its growth in the latest quarter, up 1.4 per cent, albeit lower than experienced in the second quarter, which stood at 4.0 per cent. This is mainly attributable to slower growth in games, toys & hobbies and recording media which both rose by 1.7 per cent and 0.9 per cent respectively in comparison to robust growth of 5.4 per cent and 4.8 in the second quarter.

Furnishing and households goods experienced moderate upward growth of 1.1 per cent after experiencing falls at the end of 2004 and a turnaround in 2005.

Non-durable goods

Expenditure on non-durable goods increased slightly by 0.2 per cent following a moderate increase of 0.6 per cent in the previous quarter. The quarter on corresponding quarter of the previous year growth saw a stronger growth of 1.7 per cent following minor increases in the first and second quarter of 2006 (Chart C11).

Chart C11
Non-durable goods, growth rates
Seasonally adjusted, chained volume measure
Percentage change

The moderate growth was due to contributions of vehicle fuels and lubricants, which experienced a turnaround in the latest quarter rising by 2.0 per cent following two quarters of falls in growth.

Non-alcoholic beverages growth saw a marked rise by 5.6 per cent in the latest quarter following a moderate rise of 0.9 per cent in the previous quarter. This was the highest growth level experienced since the fourth quarter of 2004 and may be partly explained by the warmer than usual summer. Alcoholic beverages experienced a more moderate rise of 1.7 per cent, up from 1.4 per cent in the second quarter.

Expenditure on recreation and culture rose 1.3 per cent, the strongest yet in 2006. Food continued its upward pattern in the latest quarter of 2006, accelerating to 0.8 per cent, compared to a growth of 0.5 per cent in the second quarter. This was largely driven by continuous irregular movements in expenditure on meat and bread and cereals, which experience a turnaround in growth on the second quarter rising to 1.7 per cent and 1.4 per cent in the latest quarter.

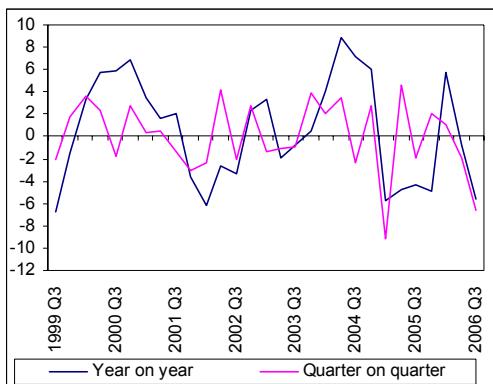

The increased expenditure on these categories was largely offset by a larger than normal decline in housing expenditure, falling 4.0 per cent following a moderate rise of 0.2 per cent in the second quarter (Chart C12). Growth in this category has been moving erratically, with gas continuing its marked falls, declining by of 9.2 per cent in the third quarter. This may be the result of the warmer than usual weather. Expenditure on electricity has also

experienced a marked decline in growth in the latest quarter, falling 4.1 per cent following flat growth in the second quarter.

Chart C12

Electricity, gas and other fuels, growth rates

Seasonally adjusted, chained volume measure
Percentage change

Expenditure on miscellaneous (other personal products for personal care) fell 2.2 per cent, the lowest since quarter four of 2000, following robust growth in the second quarter of 4.4 per cent. Similarly, expenditure on health has experienced a slowdown, falling by 1.4 per cent in comparison to a growth of 6.5 per cent in the previous quarter.

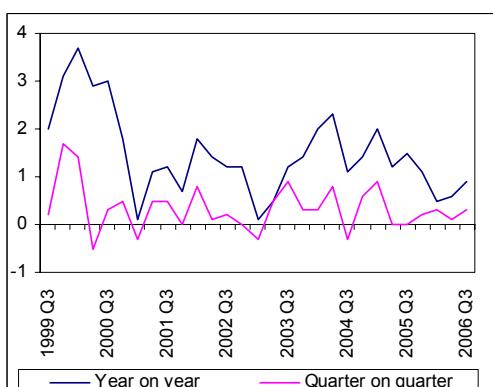

Services and tourism

Expenditure on services continued on an upward trend, rising 0.3 per cent in the latest quarter, whilst the year on year growth rose to 0.9 per cent (Chart C13).

Chart C13

Services, growth rates

Seasonally adjusted, chained volume measure
Percentage change

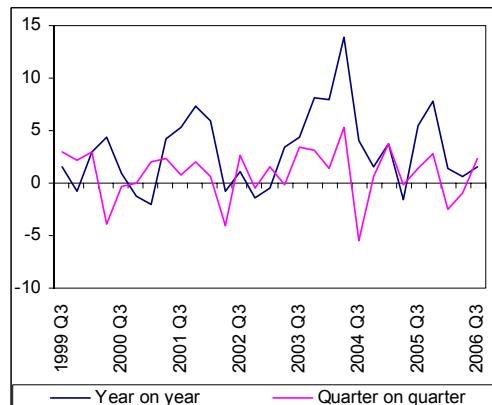

The strongest contribution to the latest quarter's growth came from expenditure on recreation and culture services, which grew by 2.2 per cent in the latest quarter following two consecutive quarters of declining growth (Chart C14).

Chart C14

Total recreation and cultural services

Seasonally adjusted, chained volume measure
Percentage change

Whilst expenditure on recreational and sporting services saw a continued decline in growth by 3.5 per cent, cultural services rose 2.1 per cent in the latest quarter. Net expenditure (stakes less winnings) on games of chance saw a reversal from the falling growth seen in the first and second quarter of 2006, rising markedly to 6.7 per cent in the latest quarter. This strong growth is attributable to National Lottery.

Other categories that experienced moderate increases include communication, which continued to accelerate since the first quarter of 2006 rising by 0.7 per cent in the third quarter. Housing rose 0.3 per cent; and furnishing and household services which by 0.1 per cent in the latest quarter.

Catering services also made a marginal contribution to growth with a rise of 0.2 per cent on the previous quarter and a rise of 0.3 per cent on the same quarter in the previous year. This modest acceleration is partly the result of increases in both alcohol and food consumption in restaurants, cafes, canteens and similar establishments.

These upward movements were partially offset by expenditure on accommodation services falling by 1.3 per cent in the third quarter following a stronger growth in the previous quarter. Transport services also fell in the latest quarter by 0.3 per cent. This was

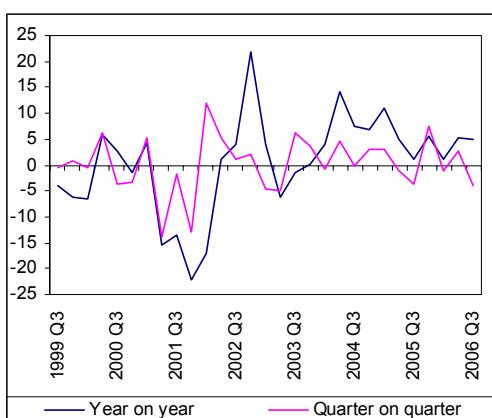

mainly driven by air and road services, which declined by 0.8 per cent and 0.2 per cent respectively.

Foreign tourist expenditure in the UK was down by 4.0 per cent, following a growth of 2.8 per cent in the previous quarter (Chart C15). UK tourist expenditure abroad fell 2.0 per cent, having risen during the last two quarters of 2006.

Chart C15

Foreign tourist expenditure

Seasonally adjusted, chained volume measure
Percentage change

Long term trends

For most of the series in Consumer Trends, long runs of quarterly and annual data are also available (for details see the guide to this publication). These show the extent of changes to the consumption and trends in household expenditure.

In 1970 current price terms, share of the total spending on services was 35 per cent in 1970. This has continued its upward growth trend and risen ever since, reached 46 per cent by 1990 and again by 51 per cent in 2005. Over the same period the share of

the total spent on non-durable goods have fallen considerably from a high of 42 per cent in 1970 to 24 per cent in 2005.

Semi-durable goods have changed little, falling from a growth of 14 per cent to 3 per cent over the same period. The proportion of durable goods has also changed a little over this period, rising by 3 per cent to 13 per cent from 1970 to 1990 and then falling slightly to 12 per cent in 2005 (Chart C16).

Chart C16

Household final consumption expenditure

Main component shares

Current prices, annual data

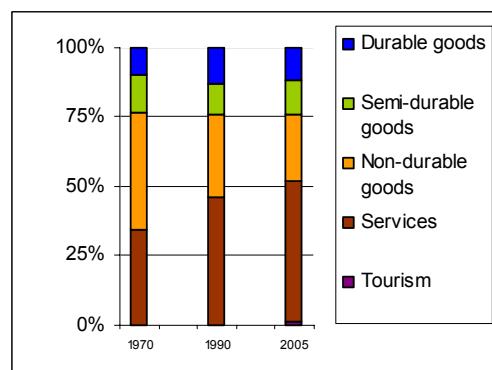

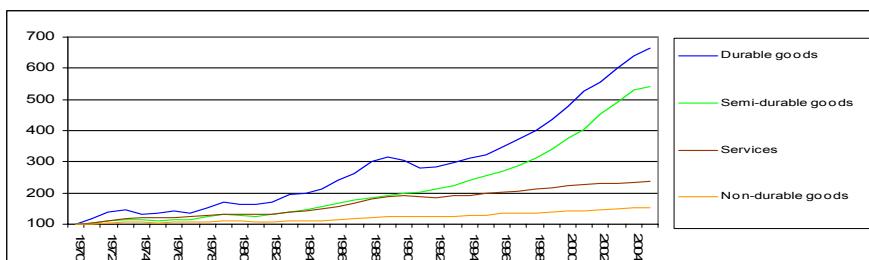

Chart C17 demonstrates the different patterns of growth of the four main groups of goods and services in volume terms between 1970 and 2005. During this period, durable goods experienced the largest and the most erratic growth. Services and semi-durables experienced aligned growth up to 1990, whilst semidurables have grown at a faster pace. Spending on non-durable goods has increased only slightly in comparison over the period.

Chart C17

Household final consumption expenditure 1970-2005

Chained volume measures annual data
Index Numbers (1970 = 100)

Revisions

In common with all components of UK gross domestic product (GDP), household final consumption expenditure is subject to the revisions policy of the national accounts. This allows revisions to earlier data to be made only at particular times of the year.

In this edition of Consumer Trends, revisions to total household final consumption expenditure have been made from the first quarter of 2005.

Revisions since the last edition of Consumer Trends, published in September 2006, are summarised in Table C18. They reflect updated data from suppliers as well as any adjustments required by the GDP balancing process.

Table C18
Revisions to household final consumption expenditure
Seasonally adjusted

	Current prices revision to value £ million	Current prices revision to % change over preceding period	Volume measure revision to % change over preceding period
2005	-198	0.0	-0.1
2005 Q1	76	0.1	0.1
2005 Q2	-63	-0.1	0.0
2005 Q3	-67	0.0	-0.1
2005 Q4	-144	0.0	-0.1
2006 Q1	-279	0.0	-0.3
2006 Q2	-227	0.0	-0.3

One indication of the reliability of the key indicators of total household expenditure can be obtained by monitoring the size of revisions. Table C19 records the size and pattern of revisions which have occurred over the last five years. It should be noted that these indicators only report summary measures for revisions. The revised data themselves may be subject to sampling or other sources of error. The table covers estimates of growth rates of household expenditure first published from March 1999 (for 1998 quarter 4 data) to December 2003 (for 2003 quarter 3 data) at current prices and in volume terms.

Revisions are measured after three years have elapsed from first publication. Volume data were first published at constant 1990 prices prior to September 1998 and at constant 1995 prices from then until September 2003 when annually chained volume measures were introduced. A relatively minor change in coverage, from total consumers' expenditure to total household final consumption, took place with the introduction of the European System of Accounts 1995 in September 1998.

A statistical test has been applied to the average revisions over the last five years to see whether there is statistical evidence that the bias is significantly different from zero. An asterisk (*) shows that the test is significant. No statistically significant bias was identified in either growth measure. Further details of the test procedures can be found in an article entitled *Revisions information in ONS First Releases*, at: <http://www.statistics.gov.uk/cci/article.asp?ID=79>

Appendix A: Definitions and conventions

This annex describes a number of issues of coverage, definition and presentation of the main statistical series appearing in Consumer Trends. More detail is contained in UK National Accounts Concepts, Sources and Methods, particularly Chapter 22 and the annex to it, - published by the Stationery Office price £75 - ISBN 0 11 621062 1.

It is also available to download from the National statistics website at:-

[www.statistics.gov.uk/downloads/theme_economy/Concepts_Sources & Methods.pdf](http://www.statistics.gov.uk/downloads/theme_economy/Concepts_Sources_%26_Methods.pdf)

Household Final Consumption Expenditure

Household final consumption expenditure represents, in the main, traditional consumer spending. It includes imputed rent for the provision of owner-occupied housing services and consumption of own production.

For national accounting purposes, households are individuals or groups of people sharing living accommodation and, possibly, other aspects of daily life such as meals. The household sector thus includes not only those living in traditional households, but also those people living in institutions, such as retirement homes, boarding houses or prisons. Household final consumption expenditure covers the purchase of all goods and services, including housing services, to meet their requirements for day-to-day living. It does not include the purchase of dwellings or expenditure on valuables (antiques and some jewellery), which are part of capital formation, nor does it include any expenditure on goods or services for use in a business.

Household consumption includes goods and services received by households as income in kind, in lieu of cash. The same estimates are also included, for consistency, as part of output for the production measure and within compensation of employees in the income estimates of gross domestic product.

The accounts relate to consumption expenditure by UK resident households, which can take place either in the UK or the rest of the world. Spending by non-

residents in the UK is excluded from the total. The UK consumption expenditure which takes place in the rest of the world is regarded as an import of services to the UK. Correspondingly, consumption expenditure in the UK by households resident in the rest of the world is regarded as an UK export of services in the national accounts. Thus, total final consumption expenditure in the UK by all households has to have imports of services added and exports deducted in order to arrive at UK household final consumption expenditure for the national accounts. Historically, UK household expenditure data have been compiled by this route, starting with the so-called "domestic concept" and moving to the "national concept".

Classification of individual consumption

For presentation purposes, household final consumption expenditure is broken down according to COICOP. However, the underlying data series are assembled by a variety of methods and routes, depending on the data sources used. As a result, some of the historic details in the COICOP presentation are derived from older presentations used for UK purposes. Direct collection of data using the COICOP framework was introduced during 2001 and historic COICOP estimates continue to be reviewed as necessary in the light of recent data and in accordance with the revisions policy for the national accounts.

Business expenditure and expenses

Household final consumption excludes any business expenditure incurred by the household as part of the economic activity of unincorporated businesses. Such expenditure is included in household intermediate consumption. Also excluded from household final consumption is any business expenditure which might otherwise be claimed for tax purposes, for example, on cars.

Household final consumption expenditure does not cover the whole of expenditure on consumer type goods and services. Where methods of estimation rely on total supplies or sales, for example the ONS

Annual Business and Retail Sales Inquiries, purchases by businesses must be excluded, but in practice this can be done only roughly.

Income in kind

Household consumption includes a wide range of goods and services received by households as income in kind, in lieu of cash. The main items are the use of company cars for private purposes, and free or subsidised accommodation or meals.

Own account production

Household production of goods and certain services for own consumption is included in household consumption. The main items are owner-occupied housing services, domestic service and agricultural produce. Consumption of own account agricultural production is included within the food items. The employment of paid domestic staff, such as servants and gardeners, is regarded as part of household consumption. However, where such work is undertaken by members of the household for the household, the activity is not part of consumption.

Second-hand goods

The estimates of household consumption are net of sales of second-hand goods. Where the sale of such goods is between households, neither the sale nor the purchase is recorded in household consumption (since they cancel each other out). However, where purchases are made from dealers, the figures include the net value of the dealers' margins. Where transactions are with other sectors, such as the purchase of a second-hand company car, the full value of the purchase is recorded in household consumption (while the sale value would have been included as negative capital formation). See also *Valuables* below.

Games of chance (betting and gaming)

Household expenditure on games of chance, including the national lottery, is defined as the amount staked less the amount returned in winnings, representing, essentially, the cost of the service. In the case of the National Lottery this is ticket sales less prizes.

Insurance

Insurance premiums are composite payments, which consist of a charge for the service of insuring, a payment covering the risk insured and, in the case of life assurance and pension schemes, a substantial element of saving. Only the first of these elements is included in household expenditure. For non-life insurance an imputed "premium supplement" must be added to the gross premiums actually paid so as to calculate the service charge. This supplement represents all property income received from investing any reserves held by the insurance company but deemed to belong to policy holders. Without this income the company would have to charge higher premiums to cover its charges.

Fees paid to general government

Households make certain payments to government to obtain various kinds of licences, permits, certificates or passports. In the accounts, some of these payments are treated as taxes and the rest as household consumption. In broad terms, if licences are granted automatically on receipt of the due fee, then the payment is regarded as a tax. However, where government uses the issue of a licence to undertake some regulatory function, the payments are treated as household expenditure. Thus, payments for owning and using vehicles, boats and aircraft, TV licences and also for licences to hunt, shoot and fish are all to be regarded as taxes. All other payments are included within household consumption.

Fines paid direct to general government are regarded as transfers and are outside the scope of household consumption.

Interest payments

Interest payments in general, though part of a household's spending, are treated as distributive transactions of property income in the economic accounts and not part of household consumption. This applies to all interest payments on loans or credit purchase arrangements except where the credit is extended by the retailer and is included in the amount charged for the goods.

Imputed rentals for owner-occupied dwellings

One particular feature of the household sector is that owner-occupiers are deemed to be unincorporated businesses producing housing services which they then consume. This requires imputing a rental payment to the owner-occupied sector, analogous to the activity of payment of market or public sector rentals. The main reason for this approach is to minimise distortions to the consumption and GDP figures which would otherwise arise when there were changes in housing tenure, for example from rented to owner-occupied.

In the UK national accounts, as required by a European Commission Decision, rentals for owner occupied dwellings are imputed from actual rents charged (plus housing subsidies where appropriate) for tenanted dwellings. However, imputed rentals are then shown in the accounts after deduction of maintenance, repair and structural insurance expenditure incurred by owner occupiers. Expenditure on those items is recorded separately under the relevant COICOP headings (04.3 and 12.5.2).

Other imputed rentals

In the same way as for owner occupied dwellings, rentals are also imputed for dwellings occupied by tenant households paying very little or no rent. Examples are dwellings provided "free" as part of compensation for employment.

Capital expenditure on dwellings

Expenditure on the purchase of dwellings, including any transfer costs, or on major improvements to existing dwellings, is not part of household consumption, but is included in gross fixed capital formation (GFCF).

Durable goods

With the exception of GFCF on dwellings, household consumption embraces spending on all other durable goods, such as motor cars. In certain circumstances, such expenditure might be thought of, not as final

consumption, but as GFCF. However, to treat this expenditure in this way would require, say, the imputation of an annual amount representing the value of the benefit derived by the household from the goods, essentially as is done for owner-occupied dwellings. Such imputation would be far from easy. Expenditure is treated as household consumption spending. Nevertheless, to aid interpretation, durable goods items as determined within the COICOP are separately identified within household consumption. Semi-durable goods, non-durable goods and services are also identified separately.

Valuables

Valuables are items such as antiques and jewellery which are primarily held as a store of value and which do not decline in value over time. They are thus not consumed. A proportion of the sales of antiques dealers is deemed to represent the transfer costs of valuables and is excluded from household consumption and included in Gross Capital Formation.

Household consumption overseas and spending in the UK by non-residents

The UK national aggregate of household consumption in the accounts includes spending overseas by UK residents and excludes spending in the United Kingdom by non-residents. However, the data collected to estimate the UK domestic aggregate does the reverse : includes expenditure in the UK by non-residents and excludes expenditure outside the UK by UK residents. At present, these series are identified separately in the TOUR tables of this publication. There is no single COICOP division encompassing tourist expenditure.

Time of recording

Expenditure must be understood as the acquisition of goods and services rather than actual disbursements of cash in the period of account. It relates to the total value of goods acquired whether paid for outright or not. Thus when consumers buy on hire purchase or other forms of credit much of the payment may occur after the transaction is recorded. Similarly, contributions to Christmas or holiday funds are not in principle regarded as expenditure until goods or services are actually acquired. Payments in advance

are, in effect, regarded as saving and payments in arrears, dis-saving.

Final Consumption Expenditure of Non-Profit Institutions Serving Households

The final consumption expenditure of non-profit institutions serving households (NPISH) is separated from expenditure of households on goods and services. Final expenditure by NPISH is defined as expenditure on wages and salaries, etc. plus the imputed charge for capital consumption plus purchases of goods and services (including any taxes on expenditure) less sales of goods and services. It represents expenditure on goods and services which is paid for not by the beneficiaries directly but out of other resources available to the NPISH, for example gifts, endowments, property income, government grants, etc. Implicit in this approach is the assumption that NPISH are producers of goods and services as well as being consumers of them. NPISH include charities and colleges of further and higher education amongst many others.

Actual final consumption

Household final consumption expenditure includes only the direct spending of resident households.

Some of this spending is on goods and services, such as health and education, which are provided by both the market and the State. Household consumption includes only the former. However, spending by Government (and NPISH) on such goods and services is part of the provision of individual (as opposed to collective) goods and services by these sectors. This spending is included in final consumption expenditure of the providing sector. For these and other 'individual' components of spending, changes in the pattern of provision will clearly affect the level of the figures of household final consumption.

Thus, an alternative, wider concept of consumption has been established. This is called actual final consumption, and for households is defined as household final consumption expenditure plus government and NPISH individual consumption expenditure. Figures of actual final consumption are not affected by arrangements for who provides the good or service and are of use for comparative analyses of spending over time and between countries.

More detailed information is available in the United Kingdom National Accounts - The Blue Book which is available on the ONS website at:-

<http://212.58.231.21/statbase/Product.asp?vlnk=143>

Appendix B: Sources

This section briefly describes the main sources of data used for each of the main headings appearing in the tables of this publication.

The method used for estimating each equivalent household final consumption series at chained volume measure depends on the methods used for the current price estimate. Generally the current price estimate in value terms is deflated by an appropriate price index. Unless otherwise noted below, the indices used for this purpose are components of the RPI, weighted as appropriate to reflect national accounting product groups. The RPI does not cover the whole range of household final consumption and other indices have to be used or estimated where necessary. Similarly where the current price estimate is not in value terms other methods have to be adopted. These are detailed in *United Kingdom National Accounts - Concepts, Sources and Methods*, which is published by The Stationery Office. It is available electronically at:-

www.statistics.gov.uk/downloads/theme_economy/Concepts_Sources_&_Methods.pdf

Chained volume measure series are estimates of the volume of expenditure expressed in the average prices prevailing in the reference year of 2002.

Abbreviations used in this appendix

ABI = Annual Business Inquiry
BT = British Telecom
COICOP = Classification of Individual Consumption by Purpose
CVM = Chained volume measure
DCLG = Department for Community and Local Government
DEFRA = Department of the Environment, Food & Rural Affairs
DfES = Department for Education & Skills
DfT = Department for Transport
DH = Department of Health
DTI = Department of Trade & Industry
DVLA = Driver & Vehicle Licensing Agency
EFS = Expenditure & Food Survey (see note below)
FES = Family Expenditure Survey

HMRC = Her Majesty's Revenue & Customs

IPS = International Passenger Survey

MoD = Ministry of Defence

NFS = National Food Survey

NHS = National Health Service

OFWAT = Office of Water Services

ONS = Office for National Statistics

RPI = Retail Prices Index

RSI = Retail Sales Inquiry

Note: the EFS replaced both the FES and NFS with effect from April 2001.

Tables 0.CN - 0.DS

Summary of household consumption

These tables summarise the totals from

COICOP Division tables 01.CN-12.DS

Details of the components of each division can be found under the GS tables, covering durable, non-durable and semi-durable goods and services, below.

Also included directly after the divisional tables are:

TOUR - UK and foreign tourist expenditure

Estimates for foreign tourist expenditure and UK tourist expenditure abroad are based on the IPS. Special price deflators are constructed by ONS for the purposes of revaluing foreign tourists' expenditure to volume terms. For UK tourist expenditure abroad, retail price indices are available for most of the countries visited and special indices are constructed by ONS to represent the kind of goods and services likely to be bought by UK travellers overseas.

GS tables

Goods and services summary tables, which are further broken down into the following:-

DG - Durable goods

SDG - Semi-durable goods

NDG - Non-durable goods

SER - Services

DG - Durable goods

Durable goods are goods that can be used repeatedly or continuously over a period of considerably more than one year. They also have a high price relative to other goods.

Most durable goods data in this table except for cars are based on the ABI to retailers and others with retail activity. Quarterly estimates are derived from the RSI. The annual inquiries provide a breakdown of sales by commodity. The RSI collects total retail sales by type of retailer on a monthly basis. It is used to interpolate the ABI data and to project forward the commodity information obtained from the most recent annual inquiry.

Further subdivision by product is estimated using the more detailed expenditure data in the EFS. All durable goods listed below are estimated in this way, unless otherwise specified.

An article explaining, among other things, the similarities and differences between household expenditure estimates and the RSI was published on the ONS website in January 2005
http://www.statistics.gov.uk/articles/nojournal/Early_estimates_of_consumer_spend.pdf

DG Division 05 Furniture and furnishings

Furniture and furnishings include lights, lamps and pictures but exclude works of art and antiques.

Carpets and other floor coverings

This includes estimates for carpets and other floor coverings.

Major household appliances

These include appliances such as refrigerators, washing machines, cookers and vacuum cleaners.

Major tools and equipment

Estimates for major household tools and equipment eg major power tools.

DG Division 06

Therapeutic appliances and equipment

Estimates for therapeutic appliances and equipment are derived from the EFS.

DG Division 07 Purchase of vehicles

Information on the V55 Registration Document is used to measure the number of motor cars and motor cycles sold to private individuals. These are valued using trade information and include on-the-road costs other than vehicle excise duty. The method has been applied back to 1993. Prior to that, for motor cars, expenditure on new cars was taken as the residual after subtracting capital formation from the value of total new car registrations. Used vehicles are estimated from motor traders' data from the ABI. This heading also includes estimates for cars-in-kind (the imputed value of the use of company cars for private purposes), based on the taxable value of company cars as required by HM Revenue & Customs.

For motor cars there are two different methods of calculating growth to produce chained volume estimates. For new cars, expenditure is calculated by valuing registrations directly at current prices and prices of the previous year; for used cars, current price estimates are deflated by the RPI for used cars to derive estimates at previous year prices.

DG Division 08 Telephone and telefax equipment

Estimates for telephone and telefax equipment are based on the ABI and RSI.

DG Division 09

Unless otherwise indicated, all items in DG Division 09 are estimated using the ABI and RSI.

Audio visual equipment

This includes televisions, video recorders, CD players, sound systems and components and radios.

Photo and cinema equipment and optical instruments

This includes estimates for photo and cinema equipment and optical instruments.

Information processing equipment

This includes computers and software packages and other Information processing equipment.

Major durables for outdoor recreation

Estimates for major durables for outdoor recreation are based on the ABI and other sources as available.

Musical instruments and major durables for indoor recreation

Estimates for musical instruments and major durables for indoor recreation are derived from the ABI.

DG Division 12

Jewellery, clocks and watches

Estimates for jewellery, clocks and watches are based on the ABI and RSI and exclude antiques.

SDG - Semi-durable goods

Semi-durable goods differ from durable goods in that their expected lifetime of use, though more than one year, is often significantly shorter and their purchase price is substantially less than for durable goods.

The data are estimated from either the ABI and RSI or the EFS. Sources are listed below.

SDG Division 03

Clothing materials

Estimates for clothing materials are derived from the ABI and RSI.

Garments

Estimates for garments and footwear are based on the ABI and RSI.

Other articles of clothing and clothing accessories

Estimates for other articles of clothing and clothing accessories are derived from the ABI and RSI.

Shoes and other footwear

Estimates for shoes and other footwear are based on the ABI and RSI.

SDG Division 05

Household textiles

Estimates for household textiles are based on the ABI and RSI.

Small electric household appliances

Estimates for small electric household appliances are derived from the ABI and RSI.

Glassware, tableware, household utensils

Estimates for glassware tableware and household utensils are based on the ABI and RSI.

Small tools and miscellaneous accessories

Estimates for small tools and miscellaneous accessories are derived from the ABI and RSI.

SDG Division 07

Motor vehicle spares

Estimates for motor vehicle spares are derived from the EFS.

SDG Division 09

Recording media

Estimates for recording media based on the ABI and RSI.

Games, toys and hobbies

Estimates for games, toys and hobbies are based on the ABI and RSI.

Equipment for sport, camping and open-air recreation

Estimates for equipment for sport, camping and open-air recreation are derived from the ABI and RSI.

Books

Estimates for books are derived from the EFS.

SDG Division 12 **Electric appliances for personal care**

Estimates for electric appliances for personal care are derived from the ABI and RSI.

Other personal effects

Estimates for other personal effects are based on the ABI and RSI.

NDG - Non-durable goods

Non-durable goods are goods that can be used only once. They include food and all types of drink.

Data come from several sources which are listed below.

NDG Division 01 **Food and non alcoholic beverages**

The main data source for food estimates until March 2001 was the NFS conducted by DEFRA. This was superseded by the EFS conducted by the ONS in April 2001. The EFS provides a detailed record of expenditure on food brought into the home.

Expenditure on food outside the home (e.g. in restaurants), with the exception of "casual" purchases of confectionery, soft drinks and ice cream, is included under catering services.

Relevant components of the RPI are used to deflate expenditure at current prices to derive chained volume measures.

NDG Division 02 **Alcoholic beverages and tobacco**

Estimates for alcoholic beverages are based on volume of sales and average prices of individual types of alcoholic beverages for "off-licence" trades. This information is obtained from a continuous survey of retail outlets.

The volume data extracted from this survey are grossed up to align with monthly figures obtained from HMRC relating to the quantities of alcoholic drink released for sale within the UK. The price data obtained from the survey are used to derive both

current expenditure and estimates at previous year prices in order to derive chained volume measures.

Separate data are provided for outlets licensed to sell for consumption off the premises ("off-licence trade" – retail shops etc) from those licensed for consumption of alcohol on the premises ("licensed trade" – restaurants, public houses etc). This information has been used to derive separate estimates of household expenditure for the two appropriate COICOP categories: 2.1 alcoholic beverages – "off-licence trade"; and 11.1.1 restaurants, cafés, pubs and the like – "licensed trade". The overall totals for expenditure on alcoholic drink are summarised in separate tables **ALC.CN-ALC.DS** after the main household expenditure tables.

Estimates for tobacco are based on data obtained from HMRC relating to the quantities of tobacco released for sale within the UK. Relevant components of the RPI are used to convert this volume data into current and chained volume measure estimates.

Estimates of household expenditure on alcoholic drink and tobacco smuggled into the UK are also being made from 1994. These are based on HMRC intelligence on the level of smuggling, including freight smuggling and diversion fraud, taking place together with assumptions on the prices at which the goods are sold to final consumers through different types of outlet. For alcohol, retail shops and restaurants are assumed to sell the goods at the same prices as the rest of their stock. For "street" sales (i.e. not through off-licences or restaurants), 70% of the average legal UK price is used for beer and 115% of the French prices (published by the French Statistical Institute, INSEE) for wines and spirits.

For tobacco, the prices at which smuggled goods are bought by UK households are assumed to be slightly above Belgian market prices, although the goods are not necessarily regarded as having been sourced from Belgium.

NDG Division 04 Materials for the maintenance and repair of the dwelling

Estimates for materials for the maintenance and repair of the dwelling are based on the ABI and RSI.

Water supply

Estimates for water supply are based on data supplied by OFWAT and the Scottish Executive. The chained volume estimates are based on movements in domestic rateable values up to 1995. Thereafter, the appropriate component of the RPI is used to deflate the current price series.

Electricity, gas and other fuels

Estimates for electricity, gas and other fuels are based on data obtained by the DTI from various energy suppliers. Relevant components of the RPI are used to deflate current expenditure and derive chained volume measures.

NDG Division 05 Non-durable household goods

Estimates for non-durable household goods (including cleaning products) are based on the EFS.

NDG Division 06 Pharmaceutical and other medical products

Estimates are based on the ABI and RSI or the EFS.

NDG Division 07 Vehicle fuels and lubricants

Estimates for vehicle fuels are based on data obtained by the DTI from various energy suppliers together with EFS data on household expenditure. Estimates for lubricants are based on the EFS. For vehicle fuels, average prices of the previous year are applied to volume data in order to obtain chained volume measures.

NDG Division 09 Garden plants and flowers, pets and newspapers

Estimates are based on the EFS.

Stationery and drawing materials

Estimates are based on the ABI and RSI.

SER - Services

SER Division 03 Clothing and hire of clothing

Clothing and hire of clothing are based on the EFS.

Repair and hire of footwear

Repair and hire of footwear are based on the EFS.

SER Division 04 Actual and imputed housing rentals

Estimates for housing rentals make use of private sector data from the EFS and public sector rented dwellings data supplied by local authorities to the DCLG and to the Scottish Executive and the Wales and Northern Ireland Offices. Estimates of rent receipts by New Town corporations and other public corporations are also included.

A change to the method for calculating owner-occupiers' imputed rent was introduced in June 1996 for years subsequent to 1990. Up to 1990, domestic rateable values provided the basis for estimating rental values for owner occupied property. Following the abolition of the rating system in Great Britain, and in accordance with a European Union Council Decision under the GNP Directive, a new benchmark establishing the value of imputed rents was set for 1991.

This has subsequently been updated to 2001, using information on the dwelling stock from the 2001 Census together with survey and official data on rents. Estimates of imputed rents are based on an econometric regression model, which uses certain characteristics of dwellings to link owner-occupied and rent-free dwellings to rented properties in the social and private rented sectors. This benchmark is then projected forward using numbers and sizes of owner-occupied dwellings and broadly comparable data on paid rents. The latest benchmarking was

described in an article in the April 2005 edition of *Economic Trends*
[http://www.statistics.gov.uk/articles/economic_trends/
ET617Richardson.pdf](http://www.statistics.gov.uk/articles/economic_trends/ET617Richardson.pdf)

In order to construct chained volume measures, the number of occupied dwellings is used as a volume indicator. This indicator is based on total housing stock data, less estimates of unoccupied dwellings, supplied by the DCLG and adjusted by a quality factor to take account of overall improvements in the housing stock over time.

Services for maintenance and repair of the dwelling

Estimates for services for maintenance and repair of the dwelling are based on the EFS. They include expenditure by householders and, under insurance policies, by insurers.

Refuse collection

Estimates for refuse collection are based on the EFS.

Sewerage collection

Estimates for sewerage collection are based on the data supplied by OFWAT and the Scottish Executive. The methodology for deriving the chained volume measure is as described for water supply (NDG Division 04), above.

SER Division 05 Repair of furniture, furnishings and floor coverings

Estimates for repair of furniture, furnishings and floor coverings are based on the EFS.

Repair of household appliances

Estimates for repair of household appliances are based on the EFS.

Domestic and household services

Estimates for domestic and household and services are mainly based on the EFS.

SER Division 06

Outpatient and hospital services

Estimates for NHS payments and private medicine are based on DH data and the EFS respectively. Estimates for medical insurance are based on a survey of companies conducted by the DH and information on premiums is provided by the Association of British Insurers. For NHS payments and medical insurance, average prices of the previous years are applied to volume data in order to obtain chained volume measures. For private medicine, relevant components of the RPI are used to deflate to chained volume measure. Estimates for dental services are based on the EFS and DH data. Paramedical services are based on the EFS and hospital services are based on the EFS and DH data.

SER Division 07

Vehicle maintenance and repair and other vehicle services

Vehicle maintenance and repair also includes motoring organisation subscriptions. Data are obtained from the EFS.

Other vehicle services include cherished number plates, which are based upon data collected by the DVLA. Driving licences are based on administrative records, they are deflated by an appropriate price index. Estimates for other components are largely based on the EFS. These include driving lessons and tests and self-drive car hire.

Transport services

Estimates for national railways travel are derived from the Strategic Rail Authority. Light rail, road and other transport services are largely based on data collected by the DfT. Estimates for air and sea travel are based on the IPS. The IPS is a continuous sample survey of passengers (both UK residents and non-residents) travelling between the UK and foreign countries. In order to construct chained volume measure estimates, the number of journeys, based on information collected by the IPS, is used as a volume indicator.

SER Division 08 Postal services

Estimates for postal services are based on the EFS.

Telephone and telefax services

Estimates for telephone and telefax services are based on trade and OFTEL (the industry regulator) data for fixed lines, including cable, and the EFS for mobile phones.

SER Division 09 Repair of audio visual, photographic and information processing equipment

Estimates for repair of audio-visual, photographic and information processing equipment are based on the EFS.

Maintenance and repair of other major durables for recreation and culture

Estimates for maintenance and repair of other major durables for recreation and culture are based on the EFS.

Veterinary and other services for pets

Estimates for veterinary and other services for pets are based on the EFS.

Recreational and sporting services

Estimates for recreational and sporting services are based on the EFS.

This heading includes services provided by sports stadia, horse-racing courses, motor-racing circuits, swimming pools, tennis courts, bowling alleys, gymnasiums, fitness centres, fairs and amusement parks, ski facilities; hire of equipment and accessories for sport and recreation, such as sailing or camping, aerobics, weight-loss, dancing, music, skating, skiing and swimming; and services of tour guides, etc.

Cultural services

These include theatre and museum services, other admissions and social subscriptions; TV rental and repairs. Estimates for most of these are derived from the EFS. Licence fee rates are used to deflate

Games of chance

Data for games of chance other than the National Lottery are based on duty receipts provided by HMRC. Estimates for the National Lottery are based on data obtained from the National Lottery Commission.

SER Division 10 Education

Estimates for education are based on the EFS and DfES data and, in the past, data received from the Higher Education Funding Council, the Independent Schools Information Service and fees charged by local authorities (derived from local government accounts).

SER Division 11 Catering and accommodation services

Household expenditure on catering services is based on the EFS. Information provided from commercial data on alcohol sales has been used to derive household expenditure class 11.1.1 restaurants, cafes etc. "licensed trade" (see notes under NDG Division 02 Alcoholic beverages, above).

Similar expenditure by students living in university or college accommodation is derived from surveys sponsored by the DfES. MoD survey data is used to construct estimates of expenditure by military personnel residing in barracks. A number of different deflators, including relevant components of the RPI, are used to obtain chained volume measure estimates for catering.

SER Division 12 Hairdressing salons and personal grooming establishments

Estimates for hairdressing salons and personal grooming establishments are based on the EFS.

Social protection

Estimates for social protection, including childcare, are based on various sources, including the EFS. Estimates of expenditure by persons living in private residential and nursing homes are benchmarked on a 1993 survey of such establishments. Estimates for fees and charges paid by similar persons residing in Local Authority administered homes are based upon

data obtained from the DCLG, the Scottish Executive and the Wales Office.

Insurance and other financial services

Estimates for the administrative costs of life insurance and pension funds are largely based on inquiries conducted by the ONS and data published by the Association of British Insurers. An appropriate component of the Average Earnings Index is used to deflate current expenditure and derive a chained volume measure.

Estimates for stamp duties on securities make use of HM Revenue & Customs data while estimates for securities dealers' commission are based on stock exchange information. For both stamp duties and securities dealers' commission, an index of share prices is used to deflate current expenditure to derive chained volume measures.

Estimates for other financial services use data provided by the Bank of England and several other sources. A number of different deflators are used to obtain chained volume measure estimates for financial services. Estimates for most components of non-life insurance are based on the EFS.

Other services

This includes estimates for undertaking, which makes use of the number of deaths data collected by ONS. A price deflator obtained from survey data is used to convert this volume data into both current and expenditure estimates.

Also included are expenditure on legal services and on photocopying services.

Tables 0A

Summary of household consumption Annual data

These tables summarise the annual totals, which are available back to 1963.

Tables 0GSA

Summary goods and services Annual data

These tables summarise annual goods and services classified by COICOP function back to 1963.

Tables ALC

Total alcoholic beverages

These tables sum the alcohol purchased in retail outlets ("off-licence trade") and that purchased in cafes, restaurants, pubs and hotels ("licensed trade").

Tables AT

Alcoholic drink and tobacco, including smuggled goods

These tables were last published in the Quarter 1 2005 edition of *Consumer Trends*. They indicate the size of the estimates for smuggled alcohol and tobacco included within COICOP Division 02 Alcoholic drink and tobacco and Division 11 Restaurants and hotels. Only annual estimates are produced, one year in arrears, by HMRC. The total household expenditure series in this issue of *Consumer Trends* do, however, include estimates for all periods up to the present.

The methodology for smuggled goods was described in an article on page 240 of the Quarter 1 2002 issue of *Consumer Trends*. Since that publication, the coverage of freight smuggling and diversion fraud in the estimates has been improved.

Table DET.CN

Selected detailed components

Table ADD.KS

Additional totals requested by users

These tables show a selection of series in long-run annual format and do not necessarily comprise all components of the identified COICOP headings. Quarterly data can be found on the ONS website.

Appendix C: Classification of household consumption headings

Table 0

Table 0 summarises the totals from the other household consumption tables.

Table 01

COICOP	Food and non-alcoholic beverages	Items included
01.1.1	Bread and cereals	Rice, bread, pasta, pastry-cook products, other cereal products
01.1.2	Meat	Beef, pig meat, lamb, poultry, frozen and processed meat
01.1.3	Fish	Fresh, chilled, dried, smoked, salted, frozen processed or preserved fish and seafood
01.1.4	Milk, cheese and eggs	Milk, yoghurt, cheese, curd, milk desserts and drinks, eggs and sole egg products
01.1.5	Oils and fats	Butter, margarine and other vegetable fats, olive oil, edible oils, other edible animal fats
01.1.6	Fruit	Citrus fruits, bananas, apples, pears, stone fruits, berries, frozen, dried and preserved fruit
01.1.7	Vegetables	All vegetables including lettuce, celery, spinach, parsley, cabbage, cucumber, tomato beans, peppers, carrots, root and dried vegetables
01.1.8	Sugar and sweet products	Sugar, jams, marmalades, chocolate, confectionery
01.1.9	Food products n.e.c	Sauces, condiments, salt, spices, herbs, soups, yeast, dessert preparations
01.2.1	Coffee, tea and cocoa	All coffees, teas and cocoas
01.2.2	Mineral water and soft drinks	Mineral waters, spring waters, sodas lemonades, fruit juices, vegetable juices

Table 02

COICOP	Alcoholic beverages and tobacco	Items included
02.1.1	Spirits	Spirits and liqueurs
02.1.2	Wine	Grape and fruit wines, alco pops, cider and perry
02.1.3	Beers	Beers, ales, lagers, porters, shandies, including low alcohol beverages
02.2	Tobacco	Cigarettes, cigars, pipe chewing and spitting tobacco, loose tobacco and papers

Table 03

COICOP	Clothing and footwear	Items included
03.1.1	Clothing materials	Natural and man-made fabrics used in clothing
03.1.2	Garments	Men's, women's and children's clothing
03.1.3	Other articles of clothing/ accessories	Ties, handkerchiefs, scarves, gloves, belts, hats, threads, wool, buttons, zips, ribbons, laces - includes gardening and working gloves (but not rubber) and crash helmets for motor cycles and bicycles
03.1.4	Cleaning, repair and hire of clothing	Dry cleaning, laundering, dyeing and altering of clothing
03.2.1	Shoes and other footwear	Men's, women's and children's footwear including sports shoes but not sports specific, leggings, shoetrees but not orthopaedic footwear
03.2.2	Repair and hire of footwear	Repairs, cleaning, hire of non sports related footwear

Table 04

COICOP	Housing, water, electricity gas and other fuels	Items included
04.1.1	Actual rents paid by tenants for housing	Rent paid for use of land and dwelling only and all fixtures and contents supplied
04.1.2	Other actual rentals	Rentals paid for secondary residences
04.2.1	Imputed rentals of owner occupiers	Imputed value of rent for the owner occupied sector
04.2.2	Other imputed rentals	Imputed value for rent free households
04.3.1	Materials for maintenance and repair of the dwelling	Paints, wallpaper, plaster, tiles and small plumbing items
04.3.2	Services for maintenance and repair of the dwelling	Fees to plumbers, electricians, carpenters, glaziers, decorators etc
04.4.1	Water supply	Hire of meters, standing charges all bills but not including hot water or steam supplied by local authorities
04.4.2	Refuse collection	Charges for refuse collection and disposal
04.4.3	Sewerage collection	Charges for the collection and disposal of sewerage
04.4.4	Other dwelling related services	Caretaking, gardening, stairwell cleaning, maintenance charges, security services (excludes window cleaning)
04.5.1	Electricity	All charges for electricity
04.5.2	Gas	All charges for gas
04.5.3	Liquid fuels	Domestic heating and lighting oil
04.5.4	Solid fuels	Coal, coke etc.
04.5.5	Heat energy	Hot water and steam purchased from local authorities

Table 05

COICOP	Furnishings, equipment and routine maintenance of the house	Items included
05.1.1	Furniture and furnishings	All household furniture, lights, lamps pictures but excludes works of art and antiques
