Monthly Digest Navigation Instructions

Overview

This PDF file of Monthly Digest has been created from the pages of the book. These brief instructions will help you find your way around the electronic publication.

Navigation

The PDF file has a 'bookmarks' panel down the left hand side, which allows you to jump from one section to another. The main chapters have lower levels of bookmarks enabling you to jump to the tables contained in each chapter. You can show and hide the bookmarks panel using the show/hide navigation buttons on the Acrobat Reader toolbar at the top of the screen. Thumbnails (small replicas of the pages) are also available in the navigation pane. Clicking on a thumbnail of a page will allow you to jump to that page. Similarly, clicking on the Contents table will permit you to skip to any chapter or individual table.

Searching

The first large binoculars (find) button at the top of the screen will do a simple search on a word in the current document. To see if the word appears again in the publication click again on the binoculars button.

Spreadsheets

Clicking anywhere on a table number, table title or the main body of a table will launch an Excel file. A number of the tables in this pdf document are spread over more than page. Efforts have been made to combine these into a single worksheet in each of the corresponding Excel files. Where this has not been possible, as where units or periodicity differ from page to page, each page has been accorded its own separate worksheet within the same Excel file. The worksheet tabs and the instructions appearing in red at the top of the affected tables indicate how each has been treated. To permit the data in the Excel spreadsheets to be used in calculations, it has also been necessary to remove "flags" and footnote indicators from the numbers in the files.

In the event of differences between the data appearing in the Excel files and those presented in the corresponding pdf tables, the pdf versions are to be regarded as definitive.

Index

Clicking on an index entry will take you automatically to the relevant table.

Screen Resolution

Adobe Acrobat works with any screen resolution. For this product 800x600 is acceptable, but 1024x768 works better if the monitor and graphics card will support it. To change the view type to one which best suits your screen, use the View menu.

Other

If the text looks blurry on screen, this may be improved by visiting File Menu, Preferences, General and switching 'Smooth Text and Monochrome images' off.

Introduction

This publication has been prepared by the Office for National Statistics (ONS) in collaboration with a number of government departments and other organisations. The assistance provided by them is gratefully acknowledged.

The name of the department or organisation providing the statistics is shown under each table, additionally, on some tables this is followed by a contact telephone number.

All the data series published in the *Monthly Digest* are contained on an ONS database, and nearly all are stored with a four letter identification code (e.g. ABMZ). These codes appear at the start of columns or rows so that they can be quoted if you contact us requiring any further information.

The latest Annual Supplement to *Monthly Digest* was published in the January 2006 edition. This gives detailed definitions and explanatory notes and includes an index of sources.

Definitions and classifications

The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Seasonality. Except where otherwise stated, all statistics are not adjusted to take account of seasonal factors.

The UK Standard Industrial Classification 1992 is used in a number of tables in this digest to split economic activity. Full details are available from *UK Standard Industrial Classification of Economic Activities 1992*, and *Indexes to the UK Standard Industrial Classification of Economic Activities 1992*, both available from Palgrave Macmillan.

Regional classification is based on the Government Office Regions.

Symbols and conventions used

Change of basis. Where consecutive figures have been compiled on different bases and are not strictly comparable, a footnote is added indicating the nature of the difference. Also, a line may be drawn across a column between two consecutive figures indicating that the figures above and below the line have been compiled on different bases.

Units of measurement. The various units of measurement used in this digest are listed on the opposite page.

Symbols. The following symbols have been used throughout:

.. = not available (also information suppressed to avoid disclosure)

- = nil or less than half the final digit shown

† = indicates that the data have been revised

p = provisional data

since the last edition: the period marked is the earliest in the table to have been revised

Also, some tables have symbols specific to them. These will be explained in the footnotes to those tables.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be a slight discrepancy between the sum of the constituent items and the total as shown.

Provisional data

Some figures are provisional and may be subject to revision in later editions. This applies particularly to data for the most recent time periods. Where data has been revised a dagger symbol, as previously mentioned, will appear.

Note to Readers

Local authority staffing. The old table 3.7 (Monthly Digest February 2005) on Local authority staffing has been dropped from this edition. The methodology underlying this has been reviewed as part of the review of public sector employment, and has been found to be below the standard required for publication.

1 Components of output are valued at basic prices, which excludes taxes less subsidies on products, whereas GDP is valued at market prices.

2 The latest data for the index of production (series CKYW) are presented in Table 7.1. The figures given in this table are consistent with the figures for gross value added.

3 Includes an implicit discrepancy compared with the sum of the previous columns because the GDP aggregate takes account of other information based on incomes and expenditures.

4 The weights shown are in proportion to total gross value added (GVA) in 2002 and are used to combine the industry output indices to calculate the totals for 2003 and 2004. For 2002 and earlier, totals are calculated using the equivalent weights for the previous year (eg total for 2002 use 2001 weights).

1 Until September 2001, Household Expenditure was published and broken down into 13 main headings according to existing UK National Accounts convention. From September 2001 it has been reclassified so as to conform to the European System of Accounts 1995 (ESA 95) COICOP (Classification Of Individual Consumption by Purpose).

2 Final consumption expenditure by UK households in the UK and abroad.

3 Final expenditure consumption in the UK by UK and foreign households.

4 Following reclassification to COICOP, alcohol consumed on the premises has been transferred from the "alcohol and tobacco" heading to "restaurants and hotels". Similarly, under reclassification, transport now includes purchase of bicycles.

1 The differences between strengths at successive dates may not match the intake and outflow figures for corresponding periods in table 3.5 because of delays in recording data, transfers between the Services and commissions from the ranks.

2 Data are provisional, except 1 Feb 2005.

3 Naval Service comprises Royal Navy, Royal Marines and Queen Alexandra's Royal Naval Nursing Service (QARNNS).

4 The recorded Army Officer FTRS strength shows a significant downward

revision. This is due to the identification of discrepancies within the underlying raw data supplied to DASA. The process is currently under review and the figures contained in this publication have been supplied by the Army Personnel Centre and should be considered as provisional. FTRS figures for April 2001 are not available, data is March 2001.

1 Figures exclude farmers, partners, directors and their spouses, salaried managers, school children and most trainees. Includes estimates for minor holdings.

2 In 1998, fundamental changes were introduced to the labour questions on the June Agricultural and Horticultural Census in England, Wales and Scotland. It appears that this change in questions may have led to the recording of additional Labour who were not previously included in the returns. The change in questions has also led to a redistribution of labour between the various categories. We therefore advise caution when comparing the results from 1998 onwards with previous years.

3 Due to an English register improvement only the top figure for 2001 is directly comparable with June 2000, while the bottom figure for 2001 is only comparable with data from June 2002.

1 The seasonally adjusted series relate only to claimants aged 18 or over in order to maintain the consistent series, available back to 1971 (1974 for the regions - see p.608 of the December 1990 *Employment Gazette* and pS16 of the April 1994 issue for the list of discontinuities taken into account). It also takes into account the effect of the change in benefit eligibility rules introduced with Jobseeker's Allowance (see p.219-24, Labour Market Trends, May 2000). The latest national and regional seasonally adjusted claimant count figures are provisional and are subject to revision mainly in the following month.

2 Percentage rates have been calculated by expressing the number of claimants as a percentage of the estimated total workforce (the sum of claimants, employees jobs, self-employed, HM Forces and participants on work related government training programmes) at mid-2002 estimates for 2002 and 2003 figures and at the corresponding mid-year estimates for earlier years.

¹ Due to slight methodological differences between the way the national and regional LFS estimates have been interim adjusted for the 2001 Census, there may be small differences between the UK totals and the sum of the regional components.

1 Only a proportion of all vacancies are notified to Jobcentres. These could include some that are suitable for young persons and similarly vacancies notified to careers offices could include some for adults. Because of possible duplication the two series should not be added together. The figures represent only the number of vacancies notified by employers and remaining unfilled on the day of the count.

2 The publication of the vacancy figures for Northern Ireland has been suspended since March 1999 as a result of a difficulty caused by the introduction of a new computer system for processing vacancies to Training and Employment Agency offices. For the purpose of the seasonally adjusted United Kingdom figures it has been assumed provisionally that the Northern Ireland figures have remained constant since February 1999.

3 Publication of the Jobcentre vacancy statistics has been deferred. Figures from May 2001 are affected by the introduction of Employer Direct. This major change involves transferring the vacancy taking process from local Jobcentres to regional Customer Service Centres, as part of Modernising the Employment Service. ONS and the Department of Work and Pensions will continue to monitor and review the data with the aim of publishing the series as soon as it is possible to produce a consistent measure.

¹ Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost are 100 or more. There may be some under-recording of small or short stoppages; this would have much more effect on the total stoppages than on working days lost.

² The working days lost figures relate to the total working days lost within each of the periods shown as a result of stoppages *in progress* in that period, whether the stoppages began in that period or earlier.

1 IS claimants have been assigned to a statistical group according to a hierarchy. The order is as shown in the table, i.e. "Aged 60 and over", "Incapacity Benefits" etc. For example, lone parents with both Incapacity Benefits and Income Support will fall into the "Incapacity Benefits" category.

2 "Aged 60 and over" are benefit units where the claimant and/or partner is aged 60 or over.

3 "Incapacity Benefits" refer to claimants aged under 60 claiming Incapacity Benefit (IB) or Severe Disablement Allowance (SDA), including IB credits only cases.

4 "Lone Parents" are single recipients of Income Support aged under 60 with a child under 16 who are not in receipt of IB/SDA.

5 "Others" are recipients of Income Support not in one of the other categories.

6 Since 6th October 2003, Income Support for claimants aged 60 or over have been paid via the new Pension Credit. Pension Credit eligibility is also more generous than prior to 6th October 2003, increasing the numbers of pensioners in receipt.

7 JSA figures have been derived by applying 5% proportions to 100% WPLS totals.

1 The counting rules were revised on 1 April 1998 with an expanded coverage of offences and the emphasis more on measurement of one crime per victim. All offences that are triable on indictment and triable-either-way are now included as are some summary offences which are closely linked to more serious offences. The changes mainly impact on the violence against the person, fraud and forgery, drug offences and "other" offence groups.

2 Some forces adopted the principles of the National Crime Recording Standard in advance of its national implementation on 1 April 2002. For 2001/02 as a whole it has been calculated that this in itself has inflated the total number of crimes recorded by 5%, although the impact differs for each offence group.

3 The National Crime Recording Standard was introduced across all police forces from April 2002, and this has increased the recorded crime figures significantly. For 2002/03 it has been estimated that the implementation of the Standard has inflated the total number of recorded crimes by 10%, although the impact differs for each offence group. Violence against the person was particularly affected.

4 Much of the increase in violence against the person in 2003/04 is likely to be due to the continuing impact of changes in recording.

5 The Sexual Offences Act 2003, introduced in May 2004, re-defined many sexual offences. This change in legislation could, in itself, account for much of the increase in recorded sexual offences and means figures for 2004/05 are not comparable with earlier years.

1 Data are available only quarterly.

2 Percentage alcohol by volume.

3 Made wine with alcoholic strength 1.2% to 5.5%, includes alcoholic lemonade of appropriate strength.

4 From 28 April 2002 duty on spirit-based ready-to-drink (RTDs) products is charged at the same rate as spirits per litre of alcohol. Until September 2002, RTDs were recorded under the imported and spirits. Customs and Excise have now been able to estimate the amount of RTDs under the spirits and remove them from the spirits clearances. Spirit-based RTDs were previously dutied at the made wine rate.

5 Includes imported spirits.

6 Due to the effect of the holiday period, these figures are subject to greater uncertainty than usual.

1 Not temperature corrected.

2 Coal, petroleum and natural gas are temperature corrected.

3 For details of temperature correction see DTI energy statistics website at www.dti.gov.uk/energy/inform/dukes/dukes2004/01longterm.pdf.

4 Includes solid renewable sources (wood, straw, waste, geothermal and active solar heat) net foreign trade and stock changes in other solid fuels.

5 Excludes non-energy use.

6 Includes gas used during production, colliery methane, landfill gas and sewage gas. Excludes gas flared or re-injected and non-energy use of gas.

7 Includes generation at wind stations. Excludes generation from pumped storage stations.

1 Layout comparable with annual balances published in Table 1.1 of DUKES 2003.

2 Stock fall (+), stock rise (-).

3 Primary supply minus primary demand.

4 Annual transfers should ideally be zero. For manufactured fuels differences occur in the rescreening of coke to breeze. For oil and petroleum products differences arise due to small variations in the calorific values used.

5 Generation of heat for sale under the provision of a contract; data are not available before 1999 and for 1998 coal used for generating heat for sale will have been included as final use by the sector generating the heat.

6 Includes all manufactured solid fuels, benzole, tars, coke oven gas and blast furnace gas.

7 Includes colliery methane.

8 Includes heat sold.

9 Includes geothermal and solar heat. Latest quarter is estimated from the previous year and adjusted according to average annual rate of change over the last three years.

10 Includes public administration, commercial, agriculture and miscellaneous use.

1 Includes waste and own use but excludes gas flared.

2 Gas used for drilling, production and pumping operations.

3 Includes exports direct from the UKCS as well as others carried out by the downstream gas industry from the national transmission system.

4 Gas available at terminals for consumption in the UK as recorded by the terminal operators.

5 Gas input into inland transmission systems. It includes public gas supply, direct supply by North Sea producers, third party supplies, and

stock changes. Figures differ from gas available for consumption in the UK mainly because of additional stock changes at local distribution zones. The figures also differ from total consumption (expressed in oil equivalent in Table 8.1) because they exclude producers' and operators' own use and losses.

6 Including public gas supply, direct supplies by North Sea producers, third party supplies and stock changes.

1 The term indigenous is used in this table for convenience to include oil from the UK Continental Shelf as well as the small amounts produced on the mainland.

2 Foreign trade is as recorded by the petroleum industry and may differ from figures published in the *Overseas Trade Statistics*.

3 Crude oil plus condensates and petroleum gases derived at onshore treatment plants.

4 Crude oil plus NGLs.

5 Mainly recycled products (backflows to refineries).

6 Total arrivals less refinery shipments of crude oil, NGLs and process oils (ie partly refined products).

7 From January 2000 arrivals of petroleum products and marine bunkers contain estimated additions to allow for (temporarily) missing imports data.

1 The annual figures are greater than the sum of the four quarters owing to year end revision by Transport for London.

2 London Underground data partly estimated. Due to changes in the method of calculating passenger kilometres for National Rail from 2005 Q1, comparison with earlier quarters can not be made.

3 National Rail data provisional. New methodology being introduced which is likely to mean that these figures will be revised. Data can not be compared with previous quarters.

1 For information, the rebased back data for the headline PPI series is available under related links at www.statistics.gov.uk/ppi

2 A base weighted (1995=100) combination of the separate price indices for contractors' output in the six new work sectors. For a fuller description see *Economic Trends* No 297.

3 From February 2002, data are based on a significantly enlarged return from the Survey of Mortgage Lenders, and are calculated through improved methodology. Annual and quarterly data prior to February 2002 are from the 5% Survey of Mortgage Lenders, and have been rebased to Feb 2002=100. From September 2005 the index is based on the new Regulated Mortgage Survey (CML/BankSearch).

4 Indicates values which are considered less reliable than the remainder currently published mainly due to the lack of market coverage.

5 The Climate Change Levy was introduced in April 2001. Further information on PPI is available from the National Statistics Website: www.statistics.gov.uk/ppi.

1 Series based on prices at the mortgage completion stage collected through the Survey of Mortgage Lenders. The index takes into account the mix of properties sold.

2 The series starts at February 2002 rather than January 2002 because the required volume of completions was achieved from that date only.

3 From September 2005 the index is based on the new Regulated Mortgage Survey (CML/BankSearch).

1 The above table of 20 industries was first published in the Monthly Digest in May 2002 (as table 18.11). The new set of 20 industry sectors was introduced as it better reflects the current state of the economy. Data are available in two formats: excluding bonus and including bonus, with each available as an index value and as an annual percentage change. An article

covering the reasons for change can be found on our website: www.statistics.gov.uk/labour.

2 Users should note that the data contained in the previous set of 26 industry sectors are not comparable with the new set of 20 industry sectors.

1 District values for each element are computed using all available climate stations, excluding rooftop sites for minimum air temperature. The values in the table may not be compatible with other time series (eg. Central England Temperature, England and Wales Rainfall).

3 Raindays are the number of days during which the total precipitation is at least 0.2mm.
