A National Statistics publication

National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They are produced free from political influence.

Not all the statistics contained within this publication are national statistics because it is a compilation from various sources.

About us

The Office for National Statistics

The Office for National Statistics (ONS) is the executive office of the UK Statistics Authority, a non-ministerial department which reports directly to Parliament. ONS is the UK government's single largest statistical producer. It compiles information about the UK's society and economy which provides evidence for policy and decision-making and in the allocation of resources.

Monthly Digest Navigation Instructions

Overview

This PDF file of Monthly Digest has been created from the pages of the book. These brief instructions will help you find your way around the electronic publication.

Navigation

The PDF file has a 'bookmarks' panel down the left hand side, which allows you to jump from one section to another. The main chapters have lower levels of bookmarks enabling you to jump to the tables contained in each chapter. You can show and hide the bookmarks panel using the show/hide navigation buttons on the Acrobat Reader toolbar at the top of the screen. Thumbnails (small replicas of the pages) are also available in the navigation pane. Clicking on a thumbnail of a page will allow you to jump to that page.

Searching

The first large binoculars (search) button at the top of the screen will do a simple search on a word in the current document. To see if the word appears again in the publication click again on the binoculars button.

In the event of differences between the data appearing in the Excel files and those presented in the corresponding pdf tables, the pdf versions are to be regarded as definitive.

Screen Resolution

Adobe Acrobat works with any screen resolution. For this product 800x600 is acceptable, but 1024x768 works better if the monitor and graphics card will support it. To change the view type to one which best suits your screen, use the View menu.

Other

If the text looks blurry on screen, this may be improved by visiting File Menu, Preferences, General and switching 'Smooth Text and Monochrome images' off.

Introduction

This publication has been prepared by the Office for National Statistics (ONS) in collaboration with a number of government departments and other organisations. The assistance provided by them is gratefully acknowledged.

The name of the department or organisation providing the statistics is shown under each table, additionally, on some tables this is followed by a contact telephone number.

All the data series published in the *Monthly Digest* are contained on an ONS database, and nearly all are stored with a four letter identification code (e.g. ABMZ). These codes appear at the start of columns or rows so that they can be quoted if you contact us requiring any further information.

The latest Annual Supplement to *Monthly Digest* was published in the January 2010 edition. This gives detailed definitions and explanatory notes and includes an index of sources.

Definitions and classifications

The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Seasonality. Except where otherwise stated, all statistics are not adjusted to take account of seasonal factors.

The UK Standard Industrial Classification 1992 is used in a number of tables in this digest to split economic activity. Full details are available from *UK Standard Industrial Classification of Economic Activities 1992*, and *Indexes to the UK Standard Industrial Classification of Economic Activities 1992*, both available from Palgrave Macmillan.

Regional classification is based on the Government Office Regions.

Symbols and conventions used

Change of basis. Where consecutive figures have been compiled on different bases and are not strictly comparable, a footnote is added indicating the nature of the difference. Also, a line may be drawn across a column between two consecutive figures indicating that the figures above and below the line have been compiled on different bases.

Units of measurement. The various units of measurement used in this digest are listed on the opposite page.

Symbols. The following symbols have been used throughout:

.. = not available (also information suppressed to avoid disclosure)

- = nil or less than half the final digit shown

† = indicates that the data have been revised

p = provisional data

since the last edition: the period marked is the earliest in the table to have been revised

Also, some tables have symbols specific to them. These will be explained in the footnotes to those tables.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be a slight discrepancy between the sum of the constituent items and the total as shown.

Provisional data

Some figures are provisional and may be subject to revision in later editions. This applies particularly to data for the most recent time periods. Where data has been revised a dagger symbol, as previously mentioned, will appear.

National Statistics Online: www.ons.gov.uk

Web-based access to time series, cross sectional data and metadata from across the Government Statistical Service (GSS), available using the site search and index functions from the homepage. Download many datasets, in whole or in part, or consult directory information for all GSS statistical resources, including censuses, surveys, periodicals and enquiry services. Information is posted as PDF electronic documents or in XLS and CSV formats, compatible with most spreadsheet packages.

Time Series Data

Access to around 40,000 time series, of primarily macro-economic data, drawn from the main tables in a range of our major economic and labour market publications. Download complete releases, or view and download your own customised selection of individual time series.

1 Components of output are valued at basic prices, which excludes taxes less subsidies on products, whereas GDP is valued at market prices.

2 The latest data for the index of production (series CKYW) are presented in Table 7.1. The figures given in this table are consistent with the figures for gross value added.

3 Includes an implicit discrepancy compared with the sum of the previous columns because the GDP aggregate takes account of other information based on incomes and expenditures.

4 The weights shown are in proportion to total gross value added (GVA) in 2003 and are used to combine the industry output indices to calculate the totals for 2004 and 2005. For 2003 and earlier, totals are calculated using the equivalent weights for the previous year (eg total for 2002 use 2001 weights).

1 Until September 2001, Household Expenditure was published and broken down into 13 main headings according to existing UK National Accounts convention. From September 2001 it has been reclassified so as to conform to the European System of Accounts 1995 (ESA 95) COICOP (Classification Of Individual Consumption by Purpose).
 2 Final consumption expenditure by UK households in the UK and abroad.
 3 Final expenditure consumption in the UK by UK and foreign households.

4 Following reclassification to COICOP, alcohol consumed on the premises has been transferred from the "alcohol and tobacco" heading to "restaurants and hotels". Similarly, under reclassification, transport now includes purchase of bicycles.

1 Remaining investment by public corporations included within business investment.

2 Not including dwellings and purchases less sales of land and existing buildings.

3 Please note that the data in the second quarter of 2005 is due to the transfer of nuclear reactors. In April 2005 British Nuclear Fuels (BNFL) transferred to the Nuclear Decommissioning Authority (NDA) nuclear reactors that were reaching the ends of their productive lives. BNFL is classified as a public corporation in the National Accounts and the NDA as central government. This transfer does not affect whole economy gross fixed capital formation (GFCF) since it is an acquisition by one sector and a disposal by another. The value of the transfer was £15.6 billion. The negative value reflects the fact that the reactors are at the end of their productive lives and have large decommissioning and clean-up liabilities.

4 Including costs associated with the transfer of ownership of buildings, dwellings, and non-produced assets.

5 Estimates are given to the nearest £ million but should not be regarded as accurate to this degree.

3 All private sector figures are exclusive of expenditure on dwellings.

4 Includes Agricultural Contractors.

5 Please note that the data in the second quarter of 2005 is due to the transfer of nuclear reactors. In April 2005 British Nuclear Fuels (BNFL) transferred to the Nuclear Decommissioning Authority (NDA) nuclear reactors that were reaching the end of their productive lives. BNFL is classified as

a public corporation in the National Accounts and the NDA as central government. This transfer does not affect whole economy gross fixed capital formation (GFCF) since it is an acquisition by one sector and a disposal by another. The value of the transfer was -£15.6 billion. The negative value reflects the fact that the reactors are at the end of their productive lives and have large decommissioning and clean-up liabilities.

1 Excluding stillbirths.

2 Birth figures for England and also for Wales each exclude events for persons usually resident outside England and Wales. These events are, however, included in the totals for England and Wales combined, and for the United Kingdom.

3 For England and Wales, figures relate to numbers occurring in a period; for Scotland and Northern Ireland, figures relate to those registered in a period.

4 The Civil Partnership Act 2004 came into force on 5 December 2005 in the UK

1 The data in this table have not been adjusted to reflect the 2001 Census population data.

2 Estimates for employee jobs and workforce jobs for Great Britain use the Annual Business Inquiry as a benchmark for which the quarterly movements are based. There is a discontinuity in the employee jobs series between December 2005 and September 2006 due to improvements to the annual benchmark. Further information can be found at <http://www.statistics.gov.uk/Statbase/Product.asp?vlnk=9765>.

3 ONS has changed the collection of production industries employee jobs data to a quarterly periodicity in line with all other sectors. The monthly series has not been updated since the first publication of December 2009 estimates in February 2010. 2009 Q4 data include revisions.

1 UK Armed Forces comprises all UK Regular Forces and full time UK Non-Regular Forces but excludes mobilised reservists.

2 Prior to 1 July 2009 figures include some FTRS personnel that were not deployable overseas. As such, there is a discontinuity in the time series for trained FTRS personnel between 1 April 2009 - 1 January 2010.

3 UK Regular Forces comprises trained and untrained personnel. It does not include Gurkhas, Full Time Reserve Service (FTRS) personnel and mobilised reservists.

4 Full Time UK Non-Regular Forces comprises Gurkhas and FTRS Personnel. Mobilised Reservists are not classed as Full time UK Non-Regular Forces.

5 For a reservist to serve full time they are required to be trained.

For more information on the total strength of the UK Armed Forces, broken down by trained and untrained, and Regular and Non-Regular components see tables 2a, 2b and 2c of the UK Armed Forces Quarterly Manning Report which can be found at www.dasa.mod.uk

1 Intake to UK Regular Forces includes all trained and untrained personnel which comprises new entrants, re-entrants, direct trained entrants (including professionally qualified officers) and intake from the reserves. They exclude all movements within the Regular Forces; including flows from untrained to trained strength, transfers between Services and flows from ranks to officer due to promotion.

2 Outflow from UK Regular Forces, both trained and untrained, including personnel leaving the Services, deaths, recalled reservists on release and outflow to the Home Service battalions of the Royal Irish Regiment, (which was disbanded on 31 March 2008). They do not include promotion from ranks to officers or flows between Services.

3 UK Regular Forces comprises trained and untrained personnel. It does not include Gurkhas, Full time Reserve personnel, and mobilised reservists.

4 Long Term Absentees (LTAs) are service personnel who have been absent without leave (AWOL) for more than 21 days.

5 Prior to year ending 31 March 2009, Army outflow included the net flow of personnel from the Regular Armed forces to Long Term Absentee (LTA). Post year ending 31 March 2009 outflow does not include this flow to LTA and LTA intake and outflow are shown separately for all Services. As such, there is a discontinuity in the time series for Total Army Outflow between the Financial Year 2008-09 and 12 months ending 31 December 2009.

6 Voluntary outflow is defined as all exits from trained personnel which are voluntarily generated by the individual before the end of their agreed engagement or commission period.

7 Due to ongoing validation of data from the Joint Personnel Administration, Army reasons for exit, including VO, are unavailable from the 12 month period ending 31 March 2007 to the 12 month period ending 28 February 2009.

8 Strengths at the end of the period may not equal the sum of the strength at the beginning of the period and intervening intake and outflow. This is due to movements between Services.

9 From 1 April 2009 onwards, Army intake figures include transfers from the Gurkhas to the UK Regular Forces.

For more information on the intake to and outflow from UK Regular Forces by Service, see tables 4a, 4b and 6 in the UK Armed Forces Quarterly Manning Report which can be found at www.dasa.mod.uk

Due to the ongoing validation of data from the Joint Personnel Administration System, Army reasons for exit, including VO, are unavailable from the 12 month period ending 31 March 2007 to the 12 month period ending 28 February 2009.

1 Figures exclude farmers, partners, directors and their spouses, salaried managers, school children and most trainees. Includes estimates for minor holdings.

2 In 1998, fundamental changes were introduced to the labour questions on the June Agricultural and Horticultural Census in England, Wales and Scotland. It appears that this change in questions may have led to the recording of additional Labour who were not previously included in the returns. The change in questions has also led to a redistribution of labour between the various categories. We therefore advise caution when comparing the results from 1998 onwards with previous years.

3 Due to an English register improvement only the top figure for 2001 is directly comparable with June 2000, while the bottom figure for 2001 is only comparable with data from June 2002.

4 Totals may not necessarily agree with the sum of their components due to rounding.

1 The seasonally adjusted series relate only to claimants aged 18 or over in order to maintain the consistent series, available back to 1971 (1974 for the regions - see p.608 of the December 1990 *Employment Gazette* and pS16 of the April 1994 issue for the list of discontinuities taken into account). It also takes into account the effect of the change in benefit eligibility rules introduced with Jobseeker's Allowance (see p.219-24, Labour Market Trends, May 2000). The latest national and regional seasonally adjusted claimant count figures are provisional and are subject to revision mainly in the following month.

2 Percentage rates have been calculated by expressing the number of claimants as a percentage of the estimated total workforce (the sum of claimants, employees, self-employed, HM Forces and participants on work related government training programmes) at mid-2005 estimates for 2005 and 2006 figures and at the corresponding mid-year estimates for earlier years.

3 Provisional.

1 Due to slight methodological differences between the way the national and regional LFS estimates have been interim adjusted for the 2001 Census, there may be small differences between the UK totals and the sum of the regional components.

2 Unemployed as a percentage of total economically active (the sum of unemployed and those in employment).

1 The seasonally adjusted series relate only to claimants aged 18 or over in order to maintain the consistent series, available back to 1971 (1974 for the regions - see p.608 of the December 1990 *Employment Gazette* and pS16 of the April 1994 issue for the list of discontinuities taken into account). It also takes into account the effect of the change in benefit eligibility rules introduced with Jobseeker's Allowance (see p.219-24, Labour Market Trends, May 2000). The latest national and regional seasonally adjusted claimant count figures are provisional and are subject to revision mainly in the following month.

2 Provisional.

3 Percentage rates have been calculated by expressing the number of claimants as a percentage of the estimated total workforce (the sum of claimants, employees jobs, self-employed, HM Forces and participants on work related government training programmes) at mid-2005 estimates for 2005 and 2006 figures and at the corresponding mid-year estimates for earlier years.

Please note: From next month, July's edition, Labour Disputes will start publishing on an SIC 2007 basis in Monthly Digest which will result in a slight change in table 3.14. Data on an SIC 2007 basis will be available on a monthly basis from January 2008 and will contain annual totals for 2008 and 2009.

1 Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost are 100 or more. There may be some under-recording of small or short stoppages; this would have much more effect on the total stoppages than on working days lost.

2 The working days lost figures relate to the total working days lost within each of the periods shown as a result of stoppages *in progress* in that period, whether the stoppages began in that period or earlier.

1 Jobseeker's Allowance figures have been derived by applying 100% WPLS proportions to 5% data. This figure is based on Contribution Based only Jobseekers Allowance. All jobseeker's Allowance statistics were revised in May 2008 following improvements to methodology.

2 The figures for Incapacity Benefit are calculated from 100% counts but are provisional and therefore subject to amendment.

3 From 27th October 2008, new claims to Incapacity Benefit can also be allocated, on incapacity grounds, to the newly introduced Employment and Support Allowance (ESA).

4 Includes all Widow's Benefit and Bereavement Benefit except Widow's Payment and Bereavement Payment. Excludes overseas and Channel Island cases.

5 WB and BB figures are obtained from 100% WPLS Data.

1 IS claimants have been assigned to a statistical group according to a hierarchy. The order is as shown in the table, i.e. "Aged 60 and over", "Incapacity Benefits" etc. For example, lone parents with both Incapacity Benefits and Income Support will fall into the "Incapacity Benefits" category.

2 "Incapacity Benefits" refer to claimants aged under 60 claiming Incapacity Benefit (IB) or Severe Disablement Allowance (SDA), including IB credits only cases.

3 "Lone Parents" are single recipients of Income Support aged under 60 with a child under 16 who are not in receipt of IB/SDA.

4 "Others" are recipients of Income Support not in one of the other categories.

5 Since 6th October 2003, Income Support for claimants aged 60 or over have been paid via the new Pension Credit. Pension Credit eligibility is also more generous than prior to 6th October 2003, increasing the numbers of pensioners in receipt.

6 JSA figures have been derived by applying 100% Works/Pensions Longitudinal Survey (WPLS) proportions to 5% totals. All Jobseeker's Allowance statistics were revised in May 2008 following improvements to methodology.

1 The National Crime Recording Standard (NCRS) was introduced across all police forces from April 2002, therefore figures before and after that date are not directly comparable. The introduction of the NCRS has increased the recorded crime figures significantly. For 2002/03 it has been estimated that the implementation of the Standard has inflated the total number of recorded crimes by 10%, although the impact differs for each offence group. Violence against the person was particularly affected.

2 Much of the increase in violence against the person in 2003/04 is likely to be due to the continuing impact of changes in recording.

3 The Sexual Offences Act 2003, introduced in May 2004, re-defined many sexual offences. This change in legislation could, in itself, account for much of the increase in recorded sexual offences and means figures for 2004/05 are not comparable with earlier years.

4 The Fraud Act 2006 commenced on 15 January 2007, altering the definition and coverage of fraud and forgery offences. At that time, the counting of cheque and credit card fraud changed to a 'per account' basis rather than a 'per transaction' basis.

Note: Financial year data is only revised annually in July of each year.

1 Output per filled job is the ratio of the output index numbers published in Table 7.1 and productivity jobs. A monthly series for total manufacturing industries is presented in Table 7.3.

2 Whole economy output per job is based on Gross Value Added at Basic Prices.

1 Include solid renewable sources (wood, straw and waste), a small amount of renewable primary heat sources (solar, geothermal, etc.), and net foreign trade and stock changes in other solid fuels.

Sources: Department of Energy and Climate Change; (formerly the DTI and BERR) : 0300 068 5056

2 Inland deliveries for energy use, plus refinery fuel and losses, minus the differences between deliveries and actual consumption at power stations.

3 Includes gas used during production, colliery methane, landfill gas and sewage gas. Excludes gas flared or re-injected and non-energy use of gas.

4 Includes generation. Excludes generation from pumped storage stations by solar pv.

5 Not seasonally adjusted or temperature corrected.

6 Coal, petroleum and natural gas are temperature corrected.

7 Five week month

1 Layout comparable with annual balances published in Table 1.1 of DUKES 2006.

2 Stock fall (+), stock rise (-).

3 Primary supply minus primary demand.

4 Annual transfers should ideally be zero. For manufactured fuels differences occur in the rescreening of coke to breeze. For oil and petroleum products differences arise due to small variations in the calorific values used.

5 Generation of heat for sale under the provision of a contract.

6 Includes all manufactured solid fuels, benzole, tars, coke oven gas and blast furnace gas.

7 Includes colliery methane.

8 Includes heat sold.

9 Includes geothermal and solar heat. Latest quarter is estimated from the previous year and adjusted according to average annual rate of change over the last three years.

10 Includes public administration, commercial, agriculture and miscellaneous use.

1 2008 is 4 days longer than the standard 52 week statistical reporting period (SRP) for January to December 2008. This is to enable a smooth transition to publishing data on a calendar month basis from January 2009 rather than 4 and 5 week SRPs used for previous years.

2 Includes an estimate for slurry.

3 Figures are as recorded in the Overseas Trade Statistics of the United Kingdom (OTS) expect that import and export figures for recent months are estimated on the basis of information available for extra-EC trade until monthly statistics for intra-EC trade become available from HM Revenue & Customs.

4 Quarterly statistics from 2008 onwards of UK coal imports by country and grade of coal are available in Table 2.4 Coal imports (internet table only)

5 Trade is counted as an export under three conditions, when it is recorded as an import and is subsequently exported; it enters the UK port with the intention of being imported but due to a change of ownership at the port it is exported without having cleared the port; and when items leave the warehouse and are exported. Trade is not classified as exports when it is resting at a UK port and the UK is not the intended final destination.

6 5 week month (5 weeks and 4 days in 2008).

2 Low temperature carbonisation and patent fuel plants.

3 Includes estimates of imports.

4 Includes heat generation (generation of heat for sale under the provision of a contract data are not available before 1999), collieries, domestic, public administration, commerce and agriculture.

5 Heat generation is based on an annual figure and is then split over a 12 month period. The 2009 heat generation will not be published until the end of July 2010. Therefore, the 2008 figure is used as an estimate for 2009.

6 Includes stocks held at ports.

7 Includes undistributed stocks.

¹ Includes waste and own use but excludes gas flared.² Gas used for drilling, production and pumping operations.³ Includes exports direct from the UKCS as well as others carried out by the downstream gas industry from the national transmission system.⁴ Gas available at terminals for consumption in the UK as recorded by the terminal operators.⁵ Gas input into inland transmission systems. It includes public gas supply, direct supply by North Sea producers, third party supplies, and stock

changes. Figures differ from gas available for consumption in the UK mainly because of additional stock changes at local distribution zones. The figures also differ from total consumption (expressed in oil equivalent in Table 8.1) because they exclude producers' and operators' own use and losses.

⁶ Including public gas supply, direct supplies by North Sea producers, third party supplies and stock changes.

¹ Fuel used and electricity generated by major power producers (National power, PowerGen, Nuclear Electric, National Grid Company, Scottish Power, Hydro Electric, Scottish Nuclear, NIGEN, Coolkeeragh Power Ltd, Ballyumford Power Ltd, Midlands Electricity, South Western Electricity, Teeside Power Ltd, Lakeland Power Ltd, Fibropower Ltd, Corby Power Ltd, Peterborough Power Ltd, Fibrogen Ltd, and Regional Power Ltd) and electricity available through the grid in England and Wales and from distribution companies in Scotland and Northern Ireland.² Including quantities used in the production of steam for sale.³ Including oil used in gas turbine and diesel plant and for lighting up

coal-fired boilers and Orimulsion.

⁴ Including refuse-derived fuel, natural gas and sour gas.⁵ Used in works and for pumping at pumped storage stations.⁶ Coal Oil (including Orimulsion) and mixed or dual-fired (including gas).⁷ Including gas turbine, diesel, and hydro-electric plant.⁸ Including net imports and purchases from outside sources, mainly UKAEA and British Nuclear Fuels plc and net of supplies direct from generators to final consumers.⁹ From September 2008 (with data from January 2007), major power producers also include major wind farm companies (Airtricity; Cumbria Wind Farms; Fred Olsen; HG Capital; Kentish Flats; RES Generation). Generation from wind by major producers listed in note 1 above is also included from these dates.

1 The term indigenous is used in this table for convenience to include oil from the UK Continental Shelf as well as the small amounts produced on the mainland.

2 Foreign trade as recorded by the petroleum industry and may differ from figures published in the Overseas Trade Statistics.

3 Crude oil plus condensates and petroleum gases derived at onshore treatment plants.

4 Crude oil, natural gas liquids (NGLs) and process oils (i.e. partly refined oils).

5 Crude oil plus NGLs.

6 Net imports (+) or net exports (-) of oil and oil products.

*Note - Revisions due to the recent publication of the Digest of UK Energy Statistics 2008, which includes revisions to data back to 2005.

1 Including amounts for petro-chemicals.

2 Ethane and other petroleum gases (OPG)

3 Excluding Orimulsion and refinery fuel.

4 Including other petroleum gases, aviation spirit, wide-cut gasoline, industrial and white spirits, petroleum wax, non-domestic standard burning oil and miscellaneous products, but excluding refinery fuel.

5 Includes gas, oil, marine diesel oil and middle distillate feedstock.

6 There have been some modest changes made to this table following the review announced by DTI in the June 2006 edition of *Energy Trends*. The review was aimed to improve data coherency and coverage between the different quarterly and monthly tables. Other petroleum gases are now shown. Middle distillate feedstock is now included with other gas/diesel oil rather than previously being combined with naphtha. Unleaded motor spirit and premier burning oil have been discontinued.

1 The most popular activity of recent Internet users was sending or receiving emails at 90 per cent. This proved to be the most popular activity for the oldest age group and the youngest age group. While the youngest age group was often the most likely to be involved in Internet activities, it was the least likely to use the Internet for services related to travel and accommodation (53 per cent), and seeking health related information (31 per cent).

2 No year-on-year comparison available for 'Travel, accommodation or holidays' or for 'video games, computer software and upgrades'.

3 The survey is conducted in the first quarter of each year but should not be confused with being quarterly figures as they relate to use at a point in time.

¹ The data for tables 10.4 - 10.6 (and published in the Turnover and Orders in Production and Services Industries) are based on SIC2007 (the Standard Industrial Classification for 2007). The change is a result of the SIC2003 based MPI survey (which provided figures up to the April edition of the Monthly Digest) becoming part of the SIC2007 based Monthly Business Survey (MBS). This is part of an ONS wide project to convert all data series to the latest SIC. This means that the three tables: 10.4 Total engineering (SIC03 29-33); 10.5 Manufacture of machinery and equipment not elsewhere classified (SIC03 29); 10.6 Manufacture of electrical and optical equipment (SIC03 30-33) have been replaced with: 10.4 Total engineering (SIC07 25-28); 10.5 Manufacture of fabricated metal products and machinery and equipment n.e.c. (SIC07 25-28); 10.6 Manufacture of electrical and optical equipment (SIC07 26-27). Please note these new tables do not include Orders on Hand.

Note: ONS has introduced methodological changes to the Index of Production from March 2008 (January 2008 data). Also, a new industry structure means that the level of detail published is reduced. For the textile and clothing sector, industries are no longer available at the full level of disaggregation. Further information can be found on the NS website at - <http://www.statistics.gov.uk/cci/article.asp?id=1908>.

Note: PRODCOM 2008 estimates are now aligned with the NACE Rev 2 (2007). Because many of the product descriptions for 2007 have been merged or split leading to the new PRODCOM List for 2008, PRODCOM 2008 estimates cannot be comprehensively compared with those of 2007 and previous years.

The PRODCOM 2007 estimates in **Tables 11.2, 11.3, 11.4 and 11.5** of the **Monthly Digest** will not be updated. PRODCOM estimates for 2008 and 2009 will be published in restructured tables in the **Monthly Digest** in 2011.

1 For passenger kilometres, there is a break in series due to new methodology which has been applied to the 2003-04 and 2007-08 data to improve the categorisations of ticket type. Therefore direct comparisons between 2007-08 and earlier years should not be made.

2 Data for 2007 Q4 includes new TOCs as at 11 November 2007. New TOCs include Arriva Cross Country, East Midlands Trains, London Midland, London Overground and National.

3 TOCs that ceased to exist from 11 November 2007 include Silverlink

(METRO and Country), Central Trains, Virgin Cross Country, Midland Main Line and GNER.

4 These data do not include the non-franchised train operating companies.

5 Revisions have been made to the Ordinary fares and Season tickets quarterly and annual data from 2003-04 to 2006-07. These revisions have been provided by ATOC.

6 These data do not include the non-franchised train operating companies.

1 Freight train traffic only.

2 There is a break in the series between 2005 Q1 and 2005 Q2, since the 2005 Q2 figures onwards include some of the tonnes lifted by an additional Freight Operating Company.

3 There is a further break in series between 2007 Q1 and 2007 Q2 as coal data was not supplied by GB Railfreight prior to 2007 Q2.

Note: Freight lifted - Sources: Before 2005-06: Direct Rail Services, English Welsh & Scottish Railway and Freightliner. From 2005-06 onwards: Direct Rail Services, English Welsh & Scottish Railway, Freightliner and GB Rail. Freight moved - Source: Network Rail. There is a further break in series between 2007 Q1 and 2007 Q2 as coal data was not supplied by GB Railfreight prior to 2007 Q2.

4 2008-09 Q3 Figures have been revised. For further information on the revisions, please contact rstats@orr gsi.gov.uk

Note: Sea and Air passenger numbers are seasonal, which should be taken into account when comparing figures within a year.

2 Due to rounding methods, total annual data may not equal the quarterly totals.

3 Passengers on pleasure cruises beginning and/or ending at UK seaports (excluding passengers between Southampton and New York which are included in rest of world).

4 Excluding oil rigs.

Sources: Department for Transport, Tel: 020 7944 4131; Civil Aviation Authority

1 Excluding movement by land across the frontier between the Irish Republic and Northern Ireland, passengers travelling between the Channel Islands and Great Britain, passengers carried in aircraft chartered by British government departments and as far as possible, passengers travelling by sea on day trips and HM and other Armed Forces travelling in the course of their duties.

Note: Further information on the consumer prices index is available from the National Statistics website: www.statistics.gov.uk/cpi

3 The coverage of these categories was extended in January 2000; further extensions to coverage came into effect in January 2001 for health and miscellaneous goods and services; the coverage of miscellaneous goods and services was further extended with effect from January 2002 (details are given in a series of Economic Trends articles available on the National Statistics website: www.statistics.gov.uk/cpi)

1 Prior to 10 December 2003, the consumer prices index (CPI) was published in the UK as the harmonised index of consumer prices (HICP).

2 Inflation rates prior to 1997 and index levels prior to 1996 are estimated. Further details are given in *Economic Trends* No. 541 December 1998. These details are also available on the National Statistics website: <http://www.statistics.gov.uk/cci/article.asp?ID=31&Pos=3&ColRank=2&Rank=720>

1 To find the purchasing power of the pound in 2000, given that it was 100 pence in 1990, select the column headed 1990 and look at the 2000 row. The result is 74 pence. These figures are calculated by taking the inverse ratio of the respective annual averages of the Retail Prices Index (RPI).

Note: Further information on the RPI is available from the National Statistics Website: www.statistics.gov.uk/rpi.

1 The Climate Change Levy was introduced in April 2001. Further information on PPI is available from the National Statistics Website: www.statistics.gov.uk/ppi

2 A base weighted (1995=100) combination of the separate price indices for contractors' output in the six new work sectors. For a fuller description see *Economic Trends* No 297.

3 From Aug 2005 data is from the Regulated Mortgage Survey. From February 2002, data are based on a significantly enlarged return from the Survey of Mortgage Lenders, and are calculated through improved methodology. Annual and quarterly data prior to February 2002 are from the 5% Survey of Mortgage Lenders and have been rebased to Feb 2002=100.

¹ Series based on prices at the mortgage completion stage collected through the Regulated Mortgage Survey. The index takes into account the mix of properties sold.

² The series starts at February 2002 rather than January 2002 because the required volume of completions was achieved from that date only.

1 The above table of 20 industries was first published in the Monthly Digest in May 2002 (as table 18.11). The new set of 20 industry sectors was introduced as it better reflects the current state of the economy. Data are available in two formats: excluding bonus and including bonus, with each available as a level and as an annual percentage change. An

article covering the reasons for change can be found on our website: www.statistics.gov.uk/labour.

2 Users should note that the data contained in the previous set of 26 industry sectors are not comparable with the new set of 20 industry sectors.

Anomalies are with respect to the 1961-90 averaging period. However, anomalies with respect to the 1971-2000 averaging period are available from <http://www.metoffice.gov.uk/climate/uk>

Mean temperatures were generally above the 1971-2000 normal for October, typically by between 1.0 and 1.5 deg C. This is largely due to a very mild last 10 days. Rainfall was below average across most of the UK, with parts of England and Wales recording less than 75% of normal. In contrast it was wetter than average across north-east Scotland, with nearly 175% of normal in Aberdeenshire. Sunshine was generally close to, or somewhat below, normal.

1 District values for each element are computed using all available climate stations, excluding rooftop sites for minimum air temperature. The values in the table may not be compatible with other time series (eg. Central England Temperature, England and Wales Rainfall).

2 Highest maximum and lowest minimum air temperatures for each district are determined by calculating 95 percentiles.

3 Raindays are the number of days during which the total precipitation is at least 0.2mm.
