About the Office for National Statistics

The Office for National Statistics (ONS) is the government agency responsible for compiling, analysing and disseminating many of the United Kingdom's economic, social and demographic statistics, including the retail prices index, trade figures and labour market data, as well as the periodic census of the population and health statistics. It is also the agency that administers the statutory registration of births, marriages and deaths in England and Wales. The Director of ONS is also the National Statistician and the Registrar General for England and Wales.

A National Statistics publication

National Statistics are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political influence.

Megawatt hour (MWh)	= 10 ⁶ watt hours (Wh)	
Gigawatt hour (GWh)	= 10 ⁶ kilowatt hours = 34,121 therms	

Food and drink

Butter	23,310 litres milk	= 1 tonne butter (average)
Cheese	10,070 litres milk	= 1 tonne cheese
Condensed milk	2,550 litres milk	= 1 tonne full cream condensed milk
	2,953 litres skimmed milk	= 1 tonne skimmed condensed milk
Milk	1 million litres	= 1,030 tonnes
Milk powder	8,054 litres milk	= 1 tonne full cream milk powder
	10,740 litres skimmed milk	= 1 tonne skimmed milk powder
Eggs	17,126 eggs	= 1 tonne (approximate)
Sugar	100 tonnes sugar beet	= 92 tonnes refined sugar
	100 tonnes cane sugar	= 96 tonnes refined sugar

Shipping

Gross tonnage	= total volume of all the enclosed spaces of a vessel, the unit of measurement being a 'ton' of 100 cubic feet.
Deadweight tonnage	= Deadweight tonnage is the total weight in tons of 2,240 lb. that a ship can legally carry, that is the total weight of cargo, bunkers, stores and crew.

Monthly Digest Navigation Instructions

Overview

This PDF file of Monthly Digest has been created from the pages of the book. These brief instructions will help you find your way around the electronic publication.

Navigation

The PDF file has a 'bookmarks' panel down the left hand side, which allows you to jump from one section to another. The main chapters have lower levels of bookmarks enabling you to jump to the tables contained in each chapter. You can show and hide the bookmarks panel using the show/hide navigation buttons on the Acrobat Reader toolbar at the top of the screen. Thumbnails (small replicas of the pages) are also available in the navigation pane. Clicking on a thumbnail of a page will allow you to jump to that page. Similarly, clicking on the Contents table will permit you to skip to any chapter or individual table.

Searching

The first large binoculars (find) button at the top of the screen will do a simple search on a word in the current document. To see if the word appears again in the publication click again on the binoculars button.

Spreadsheets

Clicking anywhere on a table number, table title or the main body of a table will launch an Excel file. A number of the tables in this pdf document are spread over more than page. Efforts have been made to combine these into a single worksheet in each of the corresponding Excel files. Where this has not been possible, as where units or periodicity differ from page to page, each page has been accorded its own separate worksheet within the same Excel file. The worksheet tabs and the instructions appearing in red at the top of the affected tables indicate how each has been treated. To permit the data in the Excel spreadsheets to be used in calculations, it has also been necessary to remove "flags" and footnote indicators from the numbers in the files.

In the event of differences between the data appearing in the Excel files and those presented in the corresponding pdf tables, the pdf versions are to be regarded as definitive.

Index

Clicking on an index entry will take you automatically to the relevant table.

Screen Resolution

Adobe Acrobat works with any screen resolution. For this product 800x600 is acceptable, but 1024x768 works better if the monitor and graphics card will support it. To change the view type to one which best suits your screen, use the View menu.

Other

If the text looks blurry on screen, this may be improved by visiting File Menu, Preferences, General and switching 'Smooth Text and Monochrome images' off.

Introduction

This publication has been prepared by the Office for National Statistics (ONS) in collaboration with a number of government departments and other organisations. The assistance provided by them is gratefully acknowledged.

The name of the department or organisation providing the statistics is shown under each table, additionally, on some tables this is followed by a contact telephone number.

All the data series published in the *Monthly Digest* are contained on an ONS database, and nearly all are stored with a four letter identification code (e.g. ABMZ). These codes appear at the start of columns or rows so that they can be quoted if you contact us requiring any further information.

The latest Annual Supplement to *Monthly Digest* was published in the January 2006 edition. This gives detailed definitions and explanatory notes and includes an index of sources.

Definitions and classifications

The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Seasonality. Except where otherwise stated, all statistics are not adjusted to take account of seasonal factors.

The UK Standard Industrial Classification 1992 is used in a number of tables in this digest to split economic activity. Full details are available from *UK Standard Industrial Classification of Economic Activities 1992*, and *Indexes to the UK Standard Industrial Classification of Economic Activities 1992*, both available from Palgrave Macmillan.

Regional classification is based on the Government Office Regions.

Symbols and conventions used

Change of basis. Where consecutive figures have been compiled on different bases and are not strictly comparable, a footnote is added indicating the nature of the difference. Also, a line may be drawn across a column between two consecutive figures indicating that the figures above and below the line have been compiled on different bases.

Units of measurement. The various units of measurement used in this digest are listed on the opposite page.

Symbols. The following symbols have been used throughout:

.. = not available (also information suppressed to avoid disclosure)

- = nil or less than half the final digit shown

† = indicates that the data have been revised

p = provisional data

since the last edition: the period marked is the earliest in the table to have been revised

Also, some tables have symbols specific to them. These will be explained in the footnotes to those tables.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be a slight discrepancy between the sum of the constituent items and the total as shown.

Provisional data

Some figures are provisional and may be subject to revision in later editions. This applies particularly to data for the most recent time periods. Where data has been revised a dagger symbol, as previously mentioned, will appear.

National Statistics Online: www.statistics.gov.uk

Web-based access to time series, cross sectional data and metadata from across the Government Statistical Service (GSS), available using the site search and index functions from the homepage. Download many datasets, in whole or in part, or consult directory information for all GSS statistical resources, including censuses, surveys, periodicals and enquiry services. Information is posted as PDF electronic documents or in XLS and CSV formats, compatible with most spreadsheet packages.

Time Series Data

Access to around 40,000 time series, of primarily macro-economic data, drawn from the main tables in a range of our major economic and labour market publications. Download complete releases, or view and download your own customised selection of individual time series.

1 Components of output are valued at basic prices, which excludes taxes less subsidies on products, whereas GDP is valued at market prices.

2 The latest data for the index of production (series CKYW) are presented in Table 7.1. The figures given in this table are consistent with the figures for gross value added.

3 Includes an implicit discrepancy compared with the sum of the previous columns because the GDP aggregate takes account of other information based on incomes and expenditures.

4 The weights shown are in proportion to total gross value added (GVA) in 2003 and are used to combine the industry output indices to calculate the totals for 2004 and 2005. For 2003 and earlier, totals are calculated using the equivalent weights for the previous year (eg total for 2002 use 2001 weights).

1 Until September 2001, Household Expenditure was published and broken down into 13 main headings according to existing UK National Accounts convention. From September 2001 it has been reclassified so as to conform to the European System of Accounts 1995 (ESA 95) COICOP (Classification Of Individual Consumption by Purpose).

2 Final consumption expenditure by UK households in the UK and abroad.

3 Final expenditure consumption in the UK by UK and foreign households.

4 Following reclassification to COICOP, alcohol consumed on the premises has been transferred from the "alcohol and tobacco" heading to "restaurants and hotels". Similarly, under reclassification, transport now includes purchase of bicycles.

1 Remaining investment by public corporations included within business investment.

2 Not including dwellings and purchases less sales of land and existing buildings.

3 Please note that the data in the second quarter of 2005 is due to the transfer of nuclear reactors. In April 2005 British Nuclear Fuels (BNFL) transferred to the Nuclear Decommissioning Authority (NDA) nuclear reactors that were reaching the ends of their productive lives. BNFL is classified as a public

corporation in the National Accounts and the NDA as central government. This transfer does not affect whole economy gross fixed capital formation (GFCF) since it is an acquisition by one sector and a disposal by another. The value of the transfer was -£15.6 billion. The negative value reflects the fact that the reactors are at the end of their productive lives and have large decommissioning and clean-up liabilities.

4 Including costs associated with the transfer of ownership of buildings, dwellings, and non-produced assets.

4 Includes Agricultural Contractors.

5 The data in the second quarter of 2005 is due to the transfer of nuclear reactors. In April 2005 British Nuclear Fuels (BNFL) transferred to the Nuclear Decommissioning Authority (NDA) nuclear reactors that were reaching the ends of their productive lives. BNFL is classified as a public corporation in the National Accounts and the NDA as central government. This transfer does not affect whole economy gross fixed capital formation (GFCF) since it is an acquisition by one sector and a disposal by another. The value of the transfer was -£15.6 billion. The negative value reflects the fact that the reactors are at the end of their productive lives and have large decommissioning and clean-up liabilities.

Note: Figures may not add exactly due to rounding.

1 Excluding stillbirths.

2 Birth figures for England and also for Wales each exclude events for persons usually resident outside England and Wales. These events are however, included in the totals for England and Wales combined, and for the United Kingdom.

3 For England and Wales, figures relate to numbers occurring in a period; for Scotland and Northern Ireland, figures relate to those registered in a period.

4 Provisional.

1 The data in this table include revised figures for self-employment to reflect the results of the 2001 Census.

2 Estimates for employee jobs and workforce jobs for Great Britain now use the Annual Business Inquiry as a benchmark on which the quarterly movements are based. For further information see Labour Market Statistics First Release April 2001.

3 Estimates of the self-employed are based on the results of the Labour Force Survey. The estimates given in the table are unadjusted.

4 HM Forces figures, provided by the Ministry of Defence, represent the total number of UK service personnel, male and female, in HM Regular Forces wherever serving and including those on release leave. The numbers are not subject to seasonal adjustment.

1 Intake from civilian life, includes re-enlistments and rejoined reservists.

2 Outflow includes recalled reservists on release and outflow to the Home Service battalions of the Royal Irish Regiment.

3 Denotes provisional. Due to the introduction of a new Personnel Administration System for RAF, all data from 1st May 2006 and onwards are provisional and subject to review.

Figures are for UK Regular Forces (including both Trained and Untrained personnel), and therefore exclude Gurkhas, Full Time Reserve Service personnel, the Home Service battalions of the Royal Irish Regiment, mobilised reservists and Naval Activated Reservists.

Due to the rounding methods used, totals may not always equal the sum of the parts. When rounding to the nearest 10, numbers ending in 5 have been rounded to the nearest multiple of 20 to prevent systematic bias.

¹ Figures exclude farmers, partners, directors and their spouses, salaried managers, school children and most trainees. Includes estimates for minor holdings.

² In 1998, fundamental changes were introduced to the labour questions on the June Agricultural and Horticultural Census in England, Wales and Scotland. It appears that this change in questions may have led to the recording of additional Labour who were not previously included in the returns. The change in questions has also led to a redistribution of labour between the various categories. We therefore advise caution when comparing the results from 1998 onwards with previous years.

³ Due to an English register improvement only the top figure for 2001 is directly comparable with June 2000, while the bottom figure for 2001 is only comparable with data from June 2002.

1 The seasonally adjusted series relate only to claimants aged 18 or over in order to maintain the consistent series, available back to 1971 (1974 for the regions - see p.608 of the December 1990 *Employment Gazette* and pS16 of the April 1994 issue for the list of discontinuities taken into account). It also takes into account the effect of the change in benefit eligibility rules introduced with Jobseeker's Allowance (see p.219-24, Labour Market Trends, May 2000). The latest national and regional seasonally adjusted claimant count figures are provisional and are subject to revision mainly in the following month.

2 Percentage rates have been calculated by expressing the number of claimants as a percentage of the estimated total workforce (the sum of claimants, employees jobs, self-employed, HM Forces and participants on work related government training programmes) at mid-2005 estimates for 2005 and 2006 figures and at the corresponding mid-year estimates for earlier years.

1 Due to slight methodological differences between the way the national and regional LFS estimates have been interim adjusted for the 2001 Census, there may be small differences between the UK totals and the sum of the regional components.

2 Unemployed as a percentage of total economically active (the sum of unemployed and those in employment).

1 The seasonally adjusted series relate only to claimants aged 18 or over in order to maintain the consistent series, available back to 1971 (1974 for the regions - see p.608 of the December 1990 *Employment Gazette* and pS16 of the April 1994 issue for the list of discontinuities taken into account). It also takes into account the effect of the change in benefit eligibility rules introduced with Jobseeker's Allowance (see p.219-24, Labour Market Trends, May 2000). The latest national and regional seasonally adjusted claimant count figures are provisional and are subject to revision mainly in the following month.

2 Percentage rates have been calculated by expressing the number of claimants as a percentage of the estimated total workforce (the sum of claimants, employees, self-employed, HM Forces and participants on work related government training programmes) at mid-2005 estimates for 2005 and 2006 figures and at the corresponding mid-year estimates for earlier years.

1 Only a proportion of all vacancies are notified to Jobcentres. These could include some that are suitable for young persons and similarly vacancies notified to careers offices could include some for adults. Because of possible duplication the two series should not be added together. The figures represent only the number of vacancies notified by employers and remaining unfilled on the day of the count.

2 The publication of the vacancy figures for Northern Ireland has been suspended since March 1999 as a result of a difficulty caused by the introduction of a new computer system for processing vacancies to Training and Employment Agency offices. For the purpose of the seasonally adjusted United Kingdom figures it has been assumed provisionally that the Northern Ireland figures have remained constant since February 1999.

3 Publication of the Jobcentre vacancy statistics has been deferred. Figures from May 2001 are affected by the introduction of Employer Direct. This major change involves transferring the vacancy taking process from local Jobcentres to regional Customer Service Centres, as part of Modernising the Employment Service. ONS and the Department of Work and Pensions will continue to monitor and review the data with the aim of publishing the series as soon as it is possible to produce a consistent measure.

¹ Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost are 100 or more. There may be some under-recording of small or short stoppages; this would have much more effect on the total stoppages than on working days lost.

² The working days lost figures relate to the total working days lost within each of the periods shown as a result of stoppages *in progress* in that period, whether the stoppages began in that period or earlier.

1 Child Benefit figures are taken from the Child Benefit Computer System 5% scan in the months shown. Figures exclude overseas cases.

2 Jobseeker's Allowance figures have been derived by applying 100% WPLS proportions to 5% data. This figure is based on Contribution Based only Jobseekers Allowance.

3 Excluding pensioners in receipt of non-contributory State Pension awarded under National Insurance Acts 1970 and 1971. Also excludes overseas and Channel Islands.

4 Includes all Widow's Benefit and Bereavement Benefit except Widow's Payment and Bereavement Payment. Excludes overseas and Channel Island cases.

5 The figures for Incapacity Benefit are calculated from 100% counts but are provisional and therefore subject to amendment.

6 Child Benefit is the responsibility of HM Revenue and Customs.

1 IS claimants have been assigned to a statistical group according to a hierarchy. The order is as shown in the table, i.e. "Aged 60 and over", "Incapacity Benefits" etc. For example, lone parents with both Incapacity Benefits and Income Support will fall into the "Incapacity Benefits" category.

2 "Aged 60 and over" are benefit units where the claimant and/or partner is aged 60 or over.

3 "Incapacity Benefits" refer to claimants aged under 60 claiming Incapacity Benefit (IB) or Severe Disablement Allowance (SDA), including IB credits only cases.

4 "Lone Parents" are single recipients of Income Support aged under 60 with a child under 16 who are not in receipt of IB/SDA.

5 "Others" are recipients of Income Support not in one of the other categories.

6 Since 6th October 2003, Income Support for claimants aged 60 or over have been paid via the new Pension Credit. Pension Credit eligibility is also more generous than prior to 6th October 2003, increasing the numbers of pensioners in receipt.

7 JSA figures have been derived by applying 100% WPLS proportions to 5% totals.

1 Data on Ophthalmic Services are collected six-monthly and presented against the second quarter covered.

2 The data covers all prescriptions dispensed by community pharmacists and appliance contractors, dispensing doctors, and prescriptions submitted by prescribing doctors for items personally administered.

3 Number scheduled for payment in the General Dental Service.

4 Includes prescriptions dispensed by Community Pharmacies, appliance suppliers, dispensing doctors and stock orders.

5 Some early information relates only to the General Dental Service.

6 A new NHS dental contract was introduced on 1 April 2006. Information based on the new contract are not comparable with information under the old contractual arrangements. Data cannot be separated between GDS and PDS contracts from 1 April 2006 and data only for England have been provided under the new contract. Information for 2006 Q2 is based on incomplete data as this is the period immediately following the introduction of the new contract. The data reported in later quarters will be more complete as activity levels and the reporting cycle mature.

1 Some forces adopted the principles of the National Crime Recording Standard in advance of its national implementation on 1 April 2002. For 2001/02 as a whole it has been calculated that this in itself has inflated the total number of crimes recorded by 5%, although the impact differs for each offence group.

2 The National Crime Recording Standard (NCRS) was introduced across all police forces from April 2002, and this has increased the recorded crime figures significantly. For 2002/03 it has been estimated that the implementation of the Standard has inflated the total number of recorded crimes by 10%, although the impact differs for each offence group. Violence against the person was particularly affected. Due to the introduction of the NCRS in April 2002, figures before and after this date are not directly comparable.

3 Much of the increase in violence against the person in 2003/04 is likely to be due to the continuing impact of changes in recording.

4 The Sexual Offences Act 2003, introduced in May 2004, re-defined many sexual offences. This change in legislation could, in itself, account for much of the increase in recorded sexual offences and means figures for 2004/05 are not comparable with earlier years.

5 Figures for the British Transport Police have been added to these statistics as from April 2002 onwards.

¹ Data are available only quarterly.

² Percentage alcohol by volume.

³ Made wine with alcoholic strength 1.2% to 5.5%, includes alcoholic lemonade of appropriate strength.

⁴ From 28 April 2002 duty on spirit-based ready-to-drink (RTDs) products is charged at the same rate as spirits per litre of alcohol. Until September 2002, RTDs were recorded under the imported and spirits. Customs and Excise have now been able to estimate the amount of RTDs under the spirits and remove them from the spirits clearances. Spirit-based RTDs were previously dutied at the made wine rate.

⁵ Includes imported spirits.

⁶ Due to the effect of the holiday period, these figures are subject to greater uncertainty than usual.

⁷ HMRC revised the beer production and clearances data back to April 2005 with the latest available information.

1 Output per filled job is the ratio of the output index numbers published in Table 7.1 and productivity jobs. A monthly series for total manufacturing industries is presented in Table 7.3.

2 Whole economy output per job is based on Gross Value Added at Basic Prices.

1 Not seasonally adjusted.

2 Coal, petroleum and natural gas are temperature corrected.

3 For details of temperature correction see DTI energy statistics website at www.dti.gov.uk/energy/inform/dukes/dukes2004/01longterm.pdf.

4 Includes solid renewable sources (wood, straw, waste, geothermal and active solar heat) net foreign trade and stock changes in other solid fuels.

5 Excludes non-energy use. A statistical month adjustment has been removed.

6 Includes gas used during production, colliery methane, landfill gas and sewage gas.

Excludes gas flared or re-injected and non-energy use of gas.

7 Includes generation at wind stations. Excludes generation from pumped storage stations.

1 Layout comparable with annual balances published in Table 1.1 of DUKES 2005.

2 Stock fall (+), stock rise (-).

3 Primary supply minus primary demand.

4 Annual transfers should ideally be zero. For manufactured fuels differences occur in the rescreening of coke to breeze. For oil and petroleum products differences arise due to small variations in the calorific values used.

5 Generation of heat for sale under the provision of a contract.

6 Includes all manufactured solid fuels, benzole, tars, coke oven gas and blast furnace gas.

7 Includes colliery methane.

8 Includes heat sold.

9 Includes geothermal and solar heat. Latest quarter is estimated from the previous year and adjusted according to average annual rate of change over the last three years.

10 Includes public administration, commercial, agriculture and miscellaneous use.

¹ Includes waste and own use but excludes gas flared.² Gas used for drilling, production and pumping operations.³ Includes exports direct from the UKCS as well as others carried out by the downstream gas industry from the national transmission system.⁴ Gas available at terminals for consumption in the UK as recorded by the terminal operators.⁵ Gas input into inland transmission systems. It includes public gas supply, direct supply by North Sea producers, third party supplies, and

stock changes. Figures differ from gas available for consumption in the UK mainly because of additional stock changes at local distribution zones. The figures also differ from total consumption (expressed in oil equivalent in Table 8.1) because they exclude producers' and operators' own use and losses.

⁶ Including public gas supply, direct supplies by North Sea producers, third party supplies and stock changes.

¹ Fuel used and electricity generated by major power producers and electricity available through the grid in England and Wales and from distribution companies in Scotland and Northern Ireland. For further information regarding major power producers please refer to Section 8 of the Annual Supplement in the January edition of *Monthly Digest*.² Including quantities used in the production of steam for sale.³ Including oil, windpower and refuse-derived fuel.⁴ Used in works and for pumping at pumped storage stations.⁵ Includes gas turbines, oil engines and plants producing electricity from renewable sources other than hydro.⁶ Includes wastes and renewable sources.⁷ Electricity supplied from major power producers plus purchased from other UK producers plus net imports from overseas.

1 The term indigenous is used in this table for convenience to include oil from the UK Continental Shelf as well as the small amounts produced on the mainland.

2 Foreign trade as recorded by the petroleum industry and may differ from figures published in the *Overseas Trade Statistics*.

3 Crude oil plus condensates and petroleum gases derived at onshore treatment plants.

4 Crude oil, natural gas liquids (NGLs) and process oils (i.e. partly refined oils).

5 Crude oil plus NGLs.

6 Net imports (+) or net exports (-) of oil and oil products.

7 From January 2000 arrivals of petroleum products and marine bunkers contain estimated additions to allow for (temporarily) missing imports data.

8 There have been some modest changes made to this table following the review announced by DTI in the June 2006 edition of *Energy Trends*. The review was aimed at improving data coherency and coverage between the different quarterly and monthly DTI tables. The 'net foreign imports' column has been replaced by 'total net imports/exports' and now covers oil 'total receipts' column for refinery receipts introduced instead.

¹ Including amounts for petro-chemicals.² Ethane and other petroleum gases (OPG)³ Excluding Orimulsion and refinery fuel.⁴ Including other petroleum gases, aviation spirit, wide-cut gasoline, industrial and white spirits, petroleum wax, non-domestic standard burning oil and miscellaneous products, but excluding refinery fuel.⁵ Includes gas oil, marine diesel oil and middle distillate feedstock.⁶ There have been some modest changes made to this table following the review announced by DTI in the June 2006 edition of *Energy Trends*. The review was aimed to improve data coherency and coverage between the different quarterly and monthly DTI tables. Other petroleum gases are now shown. Middle distillate feedstock is now included with other gas/diesel oil rather than previously being combined with naphtha. Unleaded motor spirit and premier burning oil have been discontinued.

1 Excludes iron foundries and refined iron works.

2 Including manganese ore.

3 Includes blast furnace ferro-alloys.

4 Includes blast furnace ferro-alloys, but excludes iron foundries and refined iron works.

5 Stocks of ingots, semi-finished and finished steel.

1 The figures shown represent the output of UK - based manufacturers classified to Subsections DK and DL of the Standard Industrial Classification 2003. The figures shown are derived from the monthly production inquiry (MPI) and include estimates for non-responders and for establishments which are not sampled.

2 Orders on hand figures are given for the end of the period to which they relate.

1 The figures shown represent the output of UK - based manufacturers classified to Subsections DK and DL of the Standard Industrial Classification 2003. The figures shown are derived from the monthly production inquiry (MPI) and include estimates for non-responders and for establishments which are not sampled.

2 Orders on hand figures are given for the end of the period to which they relate.

Note: From December 2006 (reference period October 2006) constant price seasonally adjusted data will no longer be available.

1 In addition to the sectors listed, this includes throwing, texturing, etc of continuous filament yarn; spinning and weaving of flax, hemp and ramie; jute and polypropylene yarns and fabrics, and miscellaneous textiles (ie lace; rope, twine and net; narrow fabrics and other miscellaneous textiles).

2 In addition to the sectors listed, this includes hats, caps and millinery; gloves, other dress industries (ie swimwear and foundation garments; umbrellas and miscellaneous industries).

3 For confidentiality reasons, the data for these industries have been suppressed from 2005 Q1 onwards. This suppression is required because both industries now fail ONS disclosure rules and are therefore no longer available for publication.

1 Not exceeding 3.5 tonnes gross vehicle weight. Includes all car based vans and those of the next larger capacity such as transit vans.

2 Goods vehicles up to 3.5 tonnes gross vehicle weight.

3 The figures for road goods transport are estimated from a continuing sample enquiry; excluding estimates of work done by vehicles under 3.5 tonnes gross vehicle weight. The quarterly figures relate to 13-week periods and not three calendar months.

4 Figures affected by September 2000 fuel protest.

1 Freight train traffic only.

2 There is a break in the series between 2004 Q1 and 2004 Q2, due to a change in the method of data collection.

3 There is a further break in the series between 2005 Q1 and 2005 Q2, since the 2005 Q2 figures onwards include some of the tonnes lifted by an additional Freight Operating Company.

Note: The freight lifted series has been revised. Previously the coal figure for one of the freight operating companies included iron ore. Iron ore has now been correctly assigned to the 'other' category. This revision did not affect the total figures, but caused a reduction in the coal and coke figures and an increase in the 'other' category.

1 Published as the Consumer Prices Index (CPI) in the UK. (UK 2005=100, others 1996=100)

2 The EICP (European Index of Consumer Prices) is the official EU aggregate. It covers 15 member states until April 2004 and 25 member states from May 2004, the new member states being integrated using a chain index

formula. The EU 25 annual average for 2004 is calculated from the EU 15 average from January to April and the EU 25 average from May to December.

3 The coverage of the European Union was extended to include Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia with effect from 1 May 2004. Data for the EU 25 average is only available from May 2004. Note: April 2006 data for 'Austria' and 'EU 25 average' is Provisional.

1 This month's edition contains data rebased onto 2000=100. For information the rebased back data for the headline PPI series is available under related links at www.statistics.gov.uk/ppi

2 A base weighted (1995=100) combination of the separate price indices for contractors' output in the six new work sectors. For a fuller description see *Economic Trends* No 297.

3 From February 2002, data are based on a significantly enlarged return from the Survey of Mortgage Lenders, and are calculated through improved methodology. Annual and quarterly data prior to February 2002 are from the 5% Survey of Mortgage Lenders, and have been rebased to Feb 2002=100.

4 Indicates values which are considered less reliable than the remainder currently published mainly due to the lack of market coverage.

5 The Climate Change Levy was introduced in April 2001. Further information on PPI is available from the National Statistics Website: www.statistics.gov.uk/ppti.

1 Series based on prices at the mortgage completion stage collected through the Survey of Mortgage Lenders. The index takes into account the mix of properties sold.

Source: Department for Communities and Local Government

2 The series starts at February 2002 rather than January 2002 because the required volume of completions was achieved from that date only.

3 From September 2005 the index is based on the new Regulated Mortgage Survey (CML/BankSearch).

2 The sum of the percentages of categories included in "Goods & Services consumed" and "All Products" do not add to 100% due to the exclusion of some minor categories.

3 All data and weights have been revised to be in line with Eurostat policy that the Agricultural Account and the API should be the same.

4 A revised feedstuffs index has been calculated and incorporated in this edition. Further details are available on request.

5 Formerly General expenses.

6 Primarily including Oilseeds, Linseed and Protein crops.

1 The above table of 20 industries was first published in the Monthly Digest in May 2002 (as table 18.11). The new set of 20 industry sectors was introduced as it better reflects the current state of the economy. Data are available in two formats: excluding bonus and including bonus, with each available as an index value and as an annual percentage change. An article

covering the reasons for change can be found on our website: www.statistics.gov.uk/labour.

2 Users should note that the data contained in the previous set of 26 industry sectors are not comparable with the new set of 20 industry sectors.

Anomalies are with respect to the 1961-90 averaging period.

1 District values for each element are computed using all available climate stations, excluding rooftop sites for minimum air temperature. The values in the table may not be compatible with other time series (eg. Central England Temperature, England and Wales Rainfall).

2 Highest maximum and lowest minimum air temperatures for each district are determined by calculating 95 percentiles.

3 Raindays are the number of days during which the total precipitation is at least 0.2mm.
