A National Statistics publication

National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They are produced free from political influence.

Not all the statistics contained within this publication are national statistics because it is a compilation from various sources.

About us

The Office for National Statistics

The Office for National Statistics (ONS) is the executive office of the UK Statistics Authority, a non-ministerial department which reports directly to Parliament. ONS is the UK government's single largest statistical producer. It compiles information about the UK's society and economy which provides evidence for policy and decision-making and in the allocation of resources.

Monthly Digest Navigation Instructions

Overview

This PDF file of Monthly Digest has been created from the pages of the book. These brief instructions will help you find your way around the electronic publication.

Navigation

The PDF file has a 'bookmarks' panel down the left hand side, which allows you to jump from one section to another. The main chapters have lower levels of bookmarks enabling you to jump to the tables contained in each chapter. You can show and hide the bookmarks panel using the show/hide navigation buttons on the Acrobat Reader toolbar at the top of the screen. Thumbnails (small replicas of the pages) are also available in the navigation pane. Clicking on a thumbnail of a page will allow you to jump to that page.

Searching

The first large binoculars (search) button at the top of the screen will do a simple search on a word in the current document. To see if the word appears again in the publication click again on the binoculars button.

In the event of differences between the data appearing in the Excel files and those presented in the corresponding pdf tables, the pdf versions are to be regarded as definitive.

Screen Resolution

Adobe Acrobat works with any screen resolution. For this product 800x600 is acceptable, but 1024x768 works better if the monitor and graphics card will support it. To change the view type to one which best suits your screen, use the View menu.

Other

If the text looks blurry on screen, this may be improved by visiting File Menu, Preferences, General and switching 'Smooth Text and Monochrome images' off.

Introduction

This publication has been prepared by the Office for National Statistics (ONS) in collaboration with a number of government departments and other organisations. The assistance provided by them is gratefully acknowledged.

The name of the department or organisation providing the statistics is shown under each table, additionally, on some tables this is followed by a contact telephone number.

All the data series published in the *Monthly Digest* are contained on an ONS database, and nearly all are stored with a four letter identification code (e.g. ABMZ). These codes appear at the start of columns or rows so that they can be quoted if you contact us requiring any further information.

The latest Annual Supplement to *Monthly Digest* was published in the January 2009 edition. This gives detailed definitions and explanatory notes and includes an index of sources.

Definitions and classifications

The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Seasonality. Except where otherwise stated, all statistics are not adjusted to take account of seasonal factors.

The UK Standard Industrial Classification 1992 is used in a number of tables in this digest to split economic activity. Full details are available from *UK Standard Industrial Classification of Economic Activities 1992*, and *Indexes to the UK Standard Industrial Classification of Economic Activities 1992*, both available from Palgrave Macmillan.

Regional classification is based on the Government Office Regions.

Symbols and conventions used

Change of basis. Where consecutive figures have been compiled on different bases and are not strictly comparable, a footnote is added indicating the nature of the difference. Also, a line may be drawn across a column between two consecutive figures indicating that the figures above and below the line have been compiled on different bases.

Units of measurement. The various units of measurement used in this digest are listed on the opposite page.

Symbols. The following symbols have been used throughout:

.. = not available (also information suppressed to avoid disclosure)

- = nil or less than half the final digit shown

† = indicates that the data have been revised

p = provisional data

since the last edition: the period marked is the earliest in the table to have been revised

Also, some tables have symbols specific to them. These will be explained in the footnotes to those tables.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be a slight discrepancy between the sum of the constituent items and the total as shown.

Provisional data

Some figures are provisional and may be subject to revision in later editions. This applies particularly to data for the most recent time periods. Where data has been revised a dagger symbol, as previously mentioned, will appear.

National Statistics Online: www.ons.gov.uk

Web-based access to time series, cross sectional data and metadata from across the Government Statistical Service (GSS), available using the site search and index functions from the homepage. Download many datasets, in whole or in part, or consult directory information for all GSS statistical resources, including censuses, surveys, periodicals and enquiry services. Information is posted as PDF electronic documents or in XLS and CSV formats, compatible with most spreadsheet packages.

Time Series Data

Access to around 40,000 time series, of primarily macro-economic data, drawn from the main tables in a range of our major economic and labour market publications. Download complete releases, or view and download your own customised selection of individual time series.

1 Components of output are valued at basic prices, which excludes taxes less subsidies on products, whereas GDP is valued at market prices.

2 The latest data for the index of production (series CKYW) are presented in Table 7.1. The figures given in this table are consistent with the figures for gross value added.

3 Includes an implicit discrepancy compared with the sum of the previous columns because the GDP aggregate takes account of other information based on incomes and expenditures.

4 The weights shown are in proportion to total gross value added (GVA) in 2003 and are used to combine the industry output indices to calculate the totals for 2004 and 2005. For 2003 and earlier, totals are calculated using the equivalent weights for the previous year (eg total for 2002 use 2001 weights).

1 Remaining investment by public corporations included within business investment.

2 Not including dwellings and purchases less sales of land and existing buildings.

3 Please note that the data in the second quarter of 2005 is due to the transfer of nuclear reactors. In April 2005 British Nuclear Fuels (BNFL) transferred to the Nuclear Decommissioning Authority (NDA) nuclear reactors that were reaching the ends of their productive lives. BNFL is classified as a public

corporation in the National Accounts and the NDA as central government. This transfer does not affect whole economy gross fixed capital formation (GFCF) since it is an acquisition by one sector and a disposal by another. The value of the transfer was -£15.6 billion. The negative value reflects the fact that the reactors are at the end of their productive lives and have large decommissioning and clean-up liabilities.

4 Including costs associated with the transfer of ownership of buildings, dwellings, and non-produced assets.

5 Estimates are given to the nearest £ million but cannot be regarded as accurate to this degree.

4 Includes Agricultural Contractors.

5 The data in the second quarter of 2005 is due to the transfer of nuclear reactors. In April 2005 British Nuclear Fuels (BNFL) transferred to the Nuclear Decommissioning Authority (NDA) nuclear reactors that were reaching the ends of their productive lives. BNFL is classified as a public corporation in the National Accounts and the NDA as central government. This transfer does not affect whole economy gross fixed capital formation (GFCF) since it is an acquisition by one sector and a disposal by another. The value of the transfer was -£15.6 billion. The negative value reflects the fact that the reactors are at the end of their productive lives and have large decommissioning and clean-up liabilities.

Note: Figures may not add exactly due to rounding.

1 Excluding stillbirths.

2 Birth figures for England and also for Wales each exclude events for persons usually resident outside England and Wales. These events are, however, included in the totals for England and Wales combined, and for the United Kingdom.

3 For England and Wales, figures relate to numbers occurring in a period; for Scotland and Northern Ireland, figures relate to those registered in a period.

4 The Civil Partnership Act 2004 came into force on 5 December 2005 in the UK

1 The data in this table include revised figures for self-employment. For more information please see: <http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=9765>

2 Estimates for employee jobs and workforce jobs for Great Britain use the Annual Business Inquiry as a benchmark for which the quarterly movements are based. There is a discontinuity in the employee jobs series between December 2005 and September 2006 due to improvements to the annual

benchmark. Further information can be found at <http://www.statistics.gov.uk/Statbase/Product.asp?vlnk=9765>.

3 Estimates of the self-employed are based on the results of the Labour Force Survey. The estimates given in the table are unadjusted.

4 HM Forces figures, provided by the Ministry of Defence, represent the total number of UK service personnel, male and female, in HM Regular Forces wherever serving and including those on release leave. The numbers are not subject to seasonal adjustment.

1 UK Armed Forces comprises all UK Regular Forces and full time UK Non-Regular Forces but excludes mobilised reservists.

2 Prior to 1 July 2009 figures include some FTRS personnel that were not deployable overseas. As such, there is a discontinuity in the time series for trained FTRS personnel.

3 UK Regular Forces comprises trained and untrained personnel. It does not include Gurkhas, Full Time Reserve Service (FTRS) personnel and mobilised reservists.

4 Full Time UK Non-Regular Forces comprises Gurkhas and FTRS Personnel. Mobilised Reservists are not classed as Full time UK Non-Regular Forces. Due to the ongoing validation of data from the new Personnel Administration System, all Naval Service and RAF strength statistics from 1 May 2007 and all Army strength statistics from 1 April 2007 are provisional and subject to review.

1 Intake to UK Regular Forces includes all trained and untrained personnel which comprises new entrants, re-entrants, direct trained entrants (including professionally qualified officers) and intake from the reserves. They exclude all movements within the Regular Forces; including flows from untrained to trained strength, transfers between Services and flows from ranks to officer due to promotion.

2 Outflow from UK Regular Forces, both trained and untrained, including personnel leaving the Services, deaths, recalled reservists on release and outflow to the Home Service battalions of the Royal Irish Regiment, (which was disbanded on 31 March 2008). They do not include promotion from ranks to officers or flows between Services.

3 UK Regular Forces comprises trained and untrained personnel. It does not include Gurkhas, Full time Reserve personnel, and mobilised reservists.

4 Long Term Absentees (LTAs) are service personnel who have been absent without leave (AWOL) for more than 21 days.

5 Prior to year ending 31 March 2009, Army outflow included the net flow of personnel from the Regular Armed forces to Long Term Absentee (LTA). Post year ending 31 March 2009 outflow does not include this flow to LTA. As such, there is a discontinuity in the time series for Total Army Outflow between the Financial Year 2008-09.

6 Voluntary outflow is defined as all exits from trained personnel which are voluntarily generated by the individual before the end of their agreed engagement or commission period.

7 Due to ongoing validation of data from the Joint Personnel Administration, Army Officer reasons for exit, including VO, are unavailable from the 12 month period ending 31 March 2007 onwards.

8 Strengths at the end of the period may not equal the sum of the strength at the beginning of the period and intervening intake and outflow. This is due to movements between Services.

1 Figures exclude farmers, partners, directors and their spouses, salaried managers, school children and most trainees. Includes estimates for minor holdings.

2 In 1998, fundamental changes were introduced to the labour questions on the June Agricultural and Horticultural Census in England, Wales and Scotland. It appears that this change in questions may have led to the recording of additional Labour who were not previously included in the returns. The change in questions has also led to a redistribution of labour between the various categories. We therefore advise caution when comparing the results from 1998 onwards with previous years.

3 Due to an English register improvement only the top figure for 2001 is directly comparable with June 2000, while the bottom figure for 2001 is only comparable with data from June 2002.

1 The seasonally adjusted series relate only to claimants aged 18 or over in order to maintain the consistent series, available back to 1971 (1974 for the regions - see p.608 of the December 1990 *Employment Gazette* and pS16 of the April 1994 issue for the list of discontinuities taken into account). It also takes into account the effect of the change in benefit eligibility rules introduced with Jobseeker's Allowance (see p.219-24, Labour Market Trends, May 2000). The latest national and regional seasonally adjusted claimant count figures are provisional and are subject to revision mainly in the following month.

2 Percentage rates have been calculated by expressing the number of claimants as a percentage of the estimated total workforce (the sum of claimants, employees jobs, self-employed, HM Forces and participants on work related government training programmes) at mid-2005 estimates for 2005 and 2006 figures and at the corresponding mid-year estimates for earlier years.

3 Provisional.

1 Due to slight methodological differences between the way the national and regional LFS estimates have been interim adjusted for the 2001 Census, there may be small differences between the UK totals and the sum of the regional components.

2 Unemployed as a percentage of total economically active (the sum of unemployed and those in employment).

1 The seasonally adjusted series relate only to claimants aged 18 or over in order to maintain the consistent series, available back to 1971 (1974 for the regions - see p.608 of the December 1990 *Employment Gazette* and pS16 of the April 1994 issue for the list of discontinuities taken into account). It also takes into account the effect of the change in benefit eligibility rules introduced with Jobseeker's Allowance (see p.219-24, Labour Market Trends, May 2000). The latest national and regional seasonally adjusted claimant count figures are provisional and are subject to revision mainly in the following month.

2 Provisional.

3 Percentage rates have been calculated by expressing the number of claimants as a percentage of the estimated total workforce (the sum of claimants, employees jobs, self-employed, HM Forces and participants on work related government training programmes) at mid-2005 estimates for 2005 and 2006 figures and at the corresponding mid-year estimates for earlier years.

1 Excludes Agriculture, Forestry and Fishing.

2 Not seasonally adjusted. 'Energy and water' and 'Other services' do not display seasonality. Therefore the unadjusted series is the best estimate of a 'seasonally adjusted' series.

3 Includes both public and private sectors.

4 In this release Vacancies are shown to the nearest thousand - in previous releases they were shown to the nearest hundred. This brings the presentation of vacancies estimates into line with workforce jobs and the National First Release.

¹ Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost are 100 or more. There may be some under-recording of small or short stoppages; this would have much more effect on the total stoppages than on working days lost.

² The working days lost figures relate to the total working days lost within each of the periods shown as a result of stoppages *in progress* in that period, whether the stoppages began in that period or earlier.

1 Jobseeker's Allowance figures have been derived by applying 100% WPLS proportions to 5% data. This figure is based on Contribution Based only Jobseekers Allowance. All jobseeker's Allowance statistics were revised in May 2008 following improvements to methodology.

2 November 2007 Jobseekers Allowance figures are unavailable due to an embargo on the transfer of data to the department.

3 The figures relating to Employment Support Allowance have been thoroughly quality assured to National Statistics standard. However, it should be noted that this is a new benefit using a new data source which may not have reached steady state in terms of operational processing and retrospective. Hence, for October 2008 onwards, ESA figures are provisional and subject to change.

4 The figures for Incapacity Benefit are calculated from 100% counts but are provisional and therefore subject to amendment.

5 From 27th October 2008, new claims to Incapacity Benefit can also be allocated on incapacity grounds, to the newly introduced Employment and Support Allowance (ESA). Decreasing numbers of new claimants to Incapacity Benefit will be seen from herein.

6 Includes all Widow's Benefit and Bereavement Benefit except Widow's Payment and Bereavement Payment. Excludes overseas and Channel Island cases.

7 WB and BB figures are obtained from 100% Work and Pensions Longitudinal Data.

1 IS claimants have been assigned to a statistical group according to a hierarchy. The order is as shown in the table, i.e. "Aged 60 and over", "Incapacity Benefits" etc. For example, lone parents with both Incapacity Benefits and Income Support will fall into the "Incapacity Benefits" category.

2 "Incapacity Benefits" refer to claimants aged under 60 claiming Incapacity Benefit (IB) or Severe Disablement Allowance (SDA), including IB credits only cases.

3 "Lone Parents" are single recipients of Income Support aged under 60 with a child under 16 who are not in receipt of IB/SDA.

4 "Others" are recipients of Income Support not in one of the other categories.

5 Since 6th October 2003, Income Support for claimants aged 60 or over have been paid via the new Pension Credit. Pension Credit eligibility is also more generous than prior to 6th October 2003, increasing the numbers of pensioners in receipt.

6 JSA figures have been derived by applying 100% Works/Pensions Longitudinal Survey (WPLS) proportions to 5% totals. All Jobseeker's Allowance statistics were revised in May 2008 following improvements to methodology.

7 November 2007 figures are unavailable due to an embargo on the transfer of data to the department.

1 Data on Ophthalmic Services are collected six-monthly and presented against the second quarter covered.

2 The data covers all prescriptions dispensed by community pharmacists and appliance contractors, dispensing doctors, and prescriptions submitted by prescribing doctors for items personally administered.

3 Number scheduled for payment in the General Dental Service.

4 Includes prescriptions dispensed by Community Pharmacies, appliance suppliers, dispensing doctors and stock orders.

5 Some early information relates only to the General Dental Service.

6 Annual data provided for the financial year 2006-07 (2006Q2 to 2007Q1) as comparable quarterly information is not available for this period.

7 A new NHS dental contract was introduced on 1 April 2006. Information based on the new contract are not comparable with information under the old contractual arrangements. Data cannot be separated between GDS and PDS contracts from 1 April 2006 and data only for England have been provided under the new contract.

8 Data from 2006 q3 onwards (CKQJ) are for England only.

9 Free NHS eye examinations were extended to all on 1st April 2006 in Scotland.

10 These data are based on financial years and financial quarters.

1 The National Crime Recording Standard (NCRS) was introduced across all police forces from April 2002, therefore figures before and after that date are not directly comparable. The introduction of the NCRS has increased the recorded crime figures significantly. For 2002/03 it has been estimated that the implementation of the Standard has inflated the total number of recorded crimes by 10%, although the impact differs for each offence group. Violence against the person was particularly affected.

2 Much of the increase in violence against the person in 2003/04 is likely to be due to the continuing impact of changes in recording.

3 The Sexual Offences Act 2003, introduced in May 2004, re-defined many sexual offences. This change in legislation could, in itself, account for much of the increase in recorded sexual offences and means figures for 2004/05 are not comparable with earlier years.

4 The Fraud Act 2006 commenced on 15 January 2007, altering the definition and coverage of fraud and forgery offences. At that time, the counting of cheque and credit card fraud changed to a 'per account' basis rather than a 'per transaction' basis.

1 Data are available only quarterly and in the months following the quarter.

2 Percentage alcohol by volume.

3 Made wine with alcoholic strength 1.2% to 5.5%, includes alcoholic lemonade of appropriate strength.

4 From 28 April 2002 duty on spirit-based ready-to-drink (RTDs) products is charged at the same rate as spirits per litre of alcohol. Spirit-based RTDs were previously dutied at the made wine rate and details on quantities can be found in made wine coolers.

5 Includes imported spirits.

6 Due to the effect of the holiday period, these figures are subject to greater uncertainty than usual. Also, unusually high or low figures may be changed on receipts of amendments to returns data.

¹ Output per filled job is the ratio of the output index numbers published in Table 7.1 and productivity jobs. A monthly series for total manufacturing industries is presented in Table 7.3.

² Whole economy output per job is based on Gross Value Added at Basic Prices.

*Note - Revisions due to the recent publication of the Digest of UK Energy Statistics 2008, which includes revisions to data back to 2005.

1 Layout comparable with annual balances published in Table 1.1 of DUKES 2006.

2 Stock fall (+), stock rise (-).

3 Primary supply minus primary demand.

4 Annual transfers should ideally be zero. For manufactured fuels differences occur in the rescreening of coke to breeze. For oil and petroleum products differences arise due to small variations in the calorific values used.

5 Generation of heat for sale under the provision of a contract.

6 Includes all manufactured solid fuels, benzole, tars, coke oven gas and blast furnace gas.

7 Includes colliery methane.

8 Includes heat sold.

9 Includes geothermal and solar heat. Latest quarter is estimated from the previous year and adjusted according to average annual rate of change over the last three years.

10 Includes public administration, commercial, agriculture and miscellaneous use.

1 Includes an estimate for slurry.

2 Figures are as recorded in the Overseas Trade Statistics of the United Kingdom (OTS) except that import and export figures for recent months are estimated on the basis of information available for the extra-EC trade until monthly statistics for Intra-EC trade become available from HM Revenue and Customs.

1 Includes waste and own use but excludes gas flared.

2 Gas used for drilling, production and pumping operations.

3 Includes exports direct from the UKCS as well as others carried out by the downstream gas industry from the national transmission system.

4 Gas available at terminals for consumption in the UK as recorded by the terminal operators.

5 Gas input into inland transmission systems. It includes public gas supply, direct supply by North Sea producers, third party supplies, and stock

changes. Figures differ from gas available for consumption in the UK mainly because of additional stock changes at local distribution zones. The figures also differ from total consumption (expressed in oil equivalent in Table 8.1) because they exclude producers' and operators' own use and losses.

6 Including public gas supply, direct supplies by North Sea producers, third party supplies and stock changes.

1 Fuel used and electricity generated by major power producers (AES Electric Baglan Generation, Barking Power, BNFL British Nuclear Group, British Energy, Centrica Energy, Coolkeeragh ESB, Corby Power, Coryton Energy, Derwent Cogeneration, Drax Power, EDF Energy, E.ON UK, Fibrogen, Fibropower, Fibrothetford, First Hydro, Immingham CHP, International Power, Premier Power, RGS Energy, Rocksavage Power, RWE Npower, Scottish Power, Scottish and Southern Energy, Seabank Power, SELCHP, Spalding Energy, Teesside Power, Uskmouth Power, Western Power) and electricity available through the grid in England and Wales and from distribution companies in Scotland and N.I.

2 Including quantities used in the production of steam for sale.

3 Including oil used in gas turbine and diesel plant and for lighting up

coal-fired boilers and Orimulsion.

4 Including refuse-derived fuel, natural gas and sour gas.

5 Used in works and for pumping at pumped storage stations.

6 Coal Oil (including Orimulsion) and mixed or dual-fired (including gas).

7 Including gas turbine, diesel, and hydro-electric plant.

8 Including net imports and purchases from outside sources, mainly UKAEA and British Nuclear Fuels plc and net of supplies direct from generators to final consumers.

9 From September 2008 (with data from January 2007), major power producers also include major wind farm companies (Airtricity; Cumbria Wind Farms; Fred Olsen; HG Capital; Kentish Flats; RES Generation). Generation from wind by major producers listed in note 1 above is also included from these dates.

1 The term indigenous is used in this table for convenience to include oil from the UK Continental Shelf as well as the small amounts produced on the mainland.

2 Foreign trade as recorded by the petroleum industry and may differ from figures published in the *Overseas Trade Statistics*.

3 Crude oil plus condensates and petroleum gases derived at onshore treatment plants.

4 Crude oil, natural gas liquids (NGLs) and process oils (i.e. partly refined oils).

5 Crude oil plus NGLs.

6 Net imports (+) or net exports (-) of oil and oil products.

7 From January 1993 arrivals of petroleum industry and marine bunkers contain estimated additions to allow for (temporarily) missing imports data.

8 There have been some modest changes made to this table following the review announced by DTI in the June 2006 edition of *Energy Trends*. The review was aimed to improve data coherency and coverage between the difference quarterly and monthly DTI tables.

*Note - Revisions due to the recent publication of the Digest of UK Energy Statistics 2008, which includes revisions to data back to 2005.

1 Including amounts for petro-chemicals.

2 Ethane and other petroleum gases (OPG)

3 Excluding Orimulsion and refinery fuel.

4 Including other petroleum gases, aviation spirit, wide-cut gasoline, industrial and white spirits, petroleum wax, non-domestic standard burning oil and miscellaneous products, but excluding refinery fuel.

5 Includes gas, oil, marine diesel oil and middle distillate feedstock.

6 There have been some modest changes made to this table following the review announced by DTI in the June 2006 edition of *Energy Trends*. The review was aimed to improve data coherency and coverage between the different quarterly and monthly tables. Other petroleum gases are now shown. Middle distillate feedstock is now included with other gas/diesel oil rather than previously being combined with naphtha. Unleaded motor spirit and premier burning oil have been discontinued.

1 The most popular activity of recent Internet users was sending or receiving emails at 87 per cent. This proved to be the most popular activity for the oldest age group and the youngest age group. While the youngest age group was often the most likely to be involved in Internet activities, it was the least likely to use the Internet for services related to travel and accommodation (50 per cent), and seeking health related information (22 per cent).

2 The survey is conducted in the first quarter of each year but should not be confused with being quarterly figures as they relate to use at a point in time.

Note: ONS has introduced methodological changes to the Index of Production from March 2008 (January 2008 data). Also, a new industry structure means that the level of detail published is reduced. For the textile and clothing sector, industries are no longer available at the full level of disaggregation. Further information can be found on the NS website at - <http://www.statistics.gov.uk/cci/article.asp?id=1908>.

1 Not exceeding 3.5 tonnes gross vehicle weight. Includes all car based vans and those of the next larger capacity such as transit vans.

2 Goods vehicles over 3.5 tonnes gross vehicle weight.

3 The figures for road goods transport are estimated from a continuing sample enquiry; excluding estimates of work done by vehicles under 3.5 tonnes

gross vehicle weight. The quarterly figures relate to 13-week periods and not three calendar months.

4 These data are provisional, except the Index of tonne-kilometres of road goods transport (BMCN), when available.

5 Figures effected by heavy snowfall in February 2009.

1 For passenger kilometres, there is a break in series due to new methodology which has been applied to the 2003-04 and 2007-08 data to improve the categorisations of ticket type. Therefore direct comparisons between 2007-08 and earlier years should not be made.

2 Data for 2007 Q4 includes new TOCs as at 11 November 2007. New TOCs include Arriva Cross Country, East Midlands Trains, London Midland, London Overground and National.

3 TOCs that ceased to exist from 11 November 2007 include Silverlink

(METRO and Country), Central Trains, Virgin Cross Country, Midland Main Line and GNER.

4 These data do not include the non-franchised train operating companies.

5 Revisions have been made to the Ordinary fares and Season tickets quarterly and annual data from 2003-04 to 2006-07. These revisions have been provided by ATOC.

6 These data do not include the non-franchised train operating companies.

1 Freight train traffic only.

2 There is a break in the series between 2005 Q1 and 2005 Q2, since the 2005 Q2 figures onwards include some of the tonnes lifted by and additional Freight Operating Company.

3 There is a further break in series between 2007 Q1 and 2007 Q2 as coal data was not supplied by GB Railfreight prior to 2007 Q2.

Note: Freight lifted - Sources: Before 2005-06: Direct Rail Services, English Welsh & Scottish Railway and Freightliner. From 2005-06 onwards: Direct Rail Services, English Welsh & Scottish Railway, Freightliner and GB Rail. Freight moved - Source: Network Rail. There is a further break in series between 2007 Q1 and 2007 Q2 as coal data was not supplied by GB Railfreight prior to 2007 Q2.

Note: Sea and Air passenger numbers are seasonal, which should be taken into account when comparing figures within a year.

1 Excluding movement by land across the frontier between the Irish Republic and Northern Ireland, passengers travelling between the Channel Islands and Great Britain, passengers carried in aircraft chartered by British government departments and as far as possible, passengers travelling by sea on day trips and HM and other Armed Forces travelling in the course of their duties.

2 Due to rounding methods, total annual data may not equal the quarterly totals.

3 Passengers on pleasure cruises beginning and/or ending at UK seaports (excluding passengers between Southampton and New York which are included in rest of world).

4 Excluding oil rigs.

Note: Further information on the consumer prices index is available from the National Statistics website: www.statistics.gov.uk/cpi

1 Prior to 10 December 2003, the consumer prices index (CPI) was published in the UK as the harmonised index of consumer prices (HICP).

2 Inflation rates prior to 1997 and index levels prior to 1996 are estimated. Further details are given in *Economic Trends No. 541 December 1998*. These details are also available on the National Statistics website: <http://www.statistics.gov.uk/cpi/article.asp?ID=31&Pos=3&Col-Rank=2&Rank=720>

3 The coverage of these categories was extended in January 2000; further extensions to coverage came into effect in January 2001 for health and miscellaneous goods and services; the coverage of miscellaneous goods and services was further extended with effect from January 2002 (details are given in a series of *Economic Trends* articles available on the National Statistics website: www.statistics.gov.uk/cpi)

1 Published as the Consumer Prices Index (CPI) in the UK. (UK 2005=100, others 1996=100)

2 The EICP (European Index of Consumer Prices) is the official EU aggregate. It covers 15 member states until April 2004, 25 member states from May 2004, and 27 members from Jan 2007, the new member states being

integrated using a chain index formula. The EU 25 annual average for 2004 is calculated from the EU 15 average from January to April and the EU 25 average from May to December.

3 The coverage of the European Union was extended to include Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia from 1 May 2004 and Bulgaria and Romania from 1 Jan 2007.

1 To find the purchasing power of the pound in 2000, given that it was 100 pence in 1990, select the column headed 1990 and look at the 2000 row. The result is 74 pence. These figures are calculated by taking the inverse ratio of the respective annual averages of the Retail Prices Index (RPI).

Note: Further information on the RPI is available from the National Statistics Website: www.statistics.gov.uk/rpi.

1 A base weighted (1995=100) combination of the separate price indices for contractors' output in the six new work sectors. For a fuller description see *Economic Trends* No 297.

2 From Aug 2005 data is from the Regulated Mortgage Survey. From February 2002, data are based on a significantly enlarged return from the Survey of Mortgage Lenders, and are calculated through improved methodology. Annual and quarterly data prior to February 2002 are from the 5% Survey of Mortgage Lenders, and have been rebased to Feb 2002=100.

3 Indicates values which are considered less reliable than the remainder currently published mainly due to the lack of market coverage.

4 The Climate Change Levy was introduced in April 2001. Further information on PPI is available from the National Statistics Website: www.statistics.gov.uk/ppi

1 Series based on prices at the mortgage completion stage collected through the Regulated Mortgage Survey. The index takes into account the mix of properties sold.

2 The series starts at February 2002 rather than January 2002 because the required volume of completions was achieved from that date only.

2 The sum of the percentages of categories included in "Goods & Services consumed" and "All Products" do not add to 100% due to the exclusion of some minor categories.

3 All data and weights have been revised to be in line with Eurostat policy that the *Agricultural Account* and the *API* should be the same.

4 A revised feedstuffs index has been calculated and incorporated in this edition. Further details are available on request.

5 Formerly *General expenses*.

6 Primarily including Oilseeds, Linseed and Protein crops.

1 The above table of 20 industries was first published in the Monthly Digest in May 2002 (as table 18.11). The new set of 20 industry sectors was introduced as it better reflects the current state of the economy. Data are available in two formats: excluding bonus and including bonus, with each available as an index value and as an annual percentage change. An article covering the reasons for change can be found on our website: www.statistics.gov.uk/labour.

2 Users should note that the data contained in the previous set of 26 industry sectors are not comparable with the new set of 20 industry sectors.

Anomalies are with respect to the 1961-90 averaging period. However, anomalies with respect to the 1971-2000 averaging period are available from <http://www.metoffice.gov.uk/climate/uk>

Mean temperatures over most of the UK were slightly above normal for the February. Temperatures over Northern Ireland and parts of north and east Scotland were above average by about 1.0 dec C, whereas in parts of SW England they were close to average. Rainfall was well below average in Northern Ireland, Wales and western Scotland, all of which had the driest February since 1993. It was also much drier over much of western England. In contrast, rainfall was above average in East Anglia and parts of SE England and eastern Scotland, largely due to the snowfalls early in the month. Sunshine was generally below normal across most of the UK and it was the dullest February since 1998 over Scotland and Northern Ireland and the dullest since 1993 over England and Wales.

1 District values for each element are computed using all available climate stations, excluding rooftop sites for minimum air temperature. The values in the table may not be compatible with other time series (eg. Central England Temperature, England and Wales Rainfall).

2 Highest maximum and lowest minimum air temperatures for each district are determined by calculating 95 percentiles.

3 Raindays are the number of days during which the total precipitation is at least 0.2mm.
