About the Office for National Statistics

The Office for National Statistics (ONS) is the government agency responsible for compiling, analysing and disseminating many of the United Kingdom's economic, social and demographic statistics, including the retail prices index, trade figures and labour market data, as well as the periodic census of the population and health statistics. The Director of ONS is also the National Statistician and the Registrar General for England and Wales, and the agency administers the statutory registration of births, marriages and deaths there.

A National Statistics publication

Official statistics bearing the National Statistics logo are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

BACKGROUND TO PRODUCER PRICES

INTRODUCTION

This publication contains price information from UK manufacturers and importers. Output data is based on the revised Standard Industrial Classification SIC(92), the import data is based on the Standard International Trade Classification SITC (R3) and the export data on the Combined Nomenclature (CN).

WHAT ARE PRODUCER PRICES?

Producer Price Indices (PPIs) are a series of economic indicators that measure the price movement of goods bought and sold by UK manufacturers. It is a base weighted index working on the basket of goods concept. A wide range of representative products are selected and the prices of these goods collected each month. The movement in these prices are weighted to reflect the relative importance of the products in a chosen year (known as the base year) currently 1995. These are then aggregated for various sectors of industry to provide the published indices in the monitor.

The input PPIs (table 3) measure changes in the price of materials and fuel bought by manufacturers for processing. The output PPIs (table 4) indicate changes in the prices manufacturers charge for goods destined for the UK market as they leave the factory net of VAT and after discounts.

More information can be found on our website

<http://www.statistics.gov.uk/ppi>

NS DATABANK

The four letter identifiers listed against each of the index descriptions are part of the datasets available from the NS Databank and provide access to longer runs of data than appear in these tables. The NS Databank is a collection of mostly macro-economic time series available in computer readable format which can be loaded as spreadsheets and viewed using standard spreadsheet packages.

Details of the services offered and the schedule of charges are available from Marketing and Customer Services Department, Zone B1/06, 1 Drummond Gate, London SW1V 2QQ
Tel 020 7533 5675 or Fax 020 7533 5688.

The databank services can also be provided over the Internet, which can be accessed from the NS Web Site address which is <http://www.statistics.gov.uk>

INFORMATION

How to use this Publication

Need Some Help?

This publication gives you all the available information on price data. However, if you have any technical queries the following help line is available and staff will be happy to take your call:

☎ (01633) 812106

For general enquiries and tables 1 to 6.

Alternatively you can email us at **ppi@ons.gov.uk**

Publication Dates

The dates on which this publication is available in 2002 are:

January	22	May	21	September	17
February	19	June	18	October	22
March	19	July	16	November	19
April	23	August	20	December	17

What is MM22?

This publication is produced monthly and provides price movement data at all manufacturing, aggregated industry and product group level. It consists of data supplied from individual UK manufacturers, importers and exporters.

What's included?

The Producer Price Indices are calculated from the price movements of around 9,000 closely defined materials and products purchased (including imports) and manufactured by UK industry. This price data is converted into a basic set of price indices from which broad series are built up. Products destined for sale in the UK are grouped in accordance with the Standard Industrial Classification 1992 with weighting patterns based on overall purchases and sales by manufacturers within those groupings. The indices published in this monitor are widely used by business in price escalation clauses in contracts and for monitoring price movements in the products they trade.

A number of export price indices classified to the European harmonised tariff code system is published in table 6. Coverage is being extended to include other areas of manufacturing exports.

Special Indices

NS can for a charge, make up a special index for you and provide regular monthly updates. For example you may wish to monitor the movement in price of a group of products from different sectors of this monitor or to use weighting patterns which more closely reflect your companies own trends of purchases or sales. In either case it is likely we can help.

If you would like more details of this service please call **(01633) 812106** or write to the following address **National Statistics, Publication Section, Room 1.162, Government Buildings, Cardiff Road, Newport, South Wales, NP10 8XG** or email us at ppi@ons.gov.uk

Statfax!?

It is possible to obtain a copy of the latest PPI First Release printed from your own fax machine just minutes after it is issued by polling **0906 7360 221**. This contains all the important headline data from producer prices and is updated within minutes of the figures being published.

What is Navidata?

NS has now launched a software package that will represent PPI datasets in a tabulation and graphical format. This software is available for purchase as a floppy disc and allows users to create tailor made datasets for comparison. For details of availability and prices or to place an order **Tel 020 7533 5675** or **Fax 020 7533 5688**.

NOTES

Reading the data

These notes should help you interpret the information in the following tables.

General Information

The weighting patterns used to calculate index values are sourced from several areas of NS. The Gross Sector Output Series are based on sales values (excluding exports) obtained from the annual and quarterly PRODCOM inquiries. Weights for Input/Output Group Input Indices are based on data produced by I/O section. The Net Sector Output Series weights are based upon the results of the Purchases and Prodcum Inquiry and Input/Output tables.

What is SIC (92)?

The PPI uses four main levels of classification as defined by the European Standard Industrial Classification SIC(92). They are: class level - 4 digit numeric; division level - 2 digit numeric; sub section – 2 digit alpha; section - 1digit alpha.

In table 1 there are three published numerical constituents of the SIC (92). Series of the form 6292----- are higher level indices on a net sector basis. Series of the form 6192----- and 6112----- are lower level indices calculated on a gross sector basis. For table 2, there are four published numerical constituents. They are 72092----- for the higher level indices on a net sector basis, followed by 71092-----, 7111----- and 7112----- on a gross sector basis. For table 3 (which is based on input/output groupings), the numerical constituents of the indices which are on a gross sector basis, begin with 6113 followed by a 2 digit group number.

The numerical constituents of the indices found in table 4 such as 1411000000 are broken down as follows: 14- the division (othermining and quarrying), 141- the group (quarrying of stone), 1411- the class (quarrying of stone for construction) and 141100---- the specific manufactured product. In addition, certain series are available below the 4 digit level.

What are Net Sector Output Indices?

The weighting patterns used to calculate net sector output indices exclude transactions between companies classified to the same sector e.g. manufacturing sector or manufacturing excluding food, drink, tobacco and petroleum. For example, for Net Sector Output purposes, the value of an electronic component manufacturer’s sales to a car manufacturer would be excluded from the weighting patterns used to derive final index values (thereby reflecting the value of sales to only those purchasers outside the manufacturing sector).

What are Input/Output Group Input Indices?

This series represents the price movement of materials and fuels purchased by UK manufacturers and is found in table 3. The I/O group input series all include purchases of materials and fuel including those between manufacturers classified to the same sector of industry (eg one chemical manufacturer to another).

What are GrossSector Output Indices?

This series is found in table 4 and represents the price movement of goods sold within the UK by companies classified to manufacturing as defined by SIC(92). Weights are calculated on a gross basis i.e. all transactions are included in deriving the weighting patterns, including sales within the same industry.

**How are
Export Prices
calculated?**

The Export Price Indices (EPIs) use broadly the same methodology as the PPI. A range of representative products are selected and the prices of these goods collected each month from established exporters within specified 6 digit tariff codes of the Harmonised System (HS). The movement in these prices are weighted to reflect the relative importance of these products and aggregated to 3 digit (CN) level to provide the published indices in table 6. The series are calculated on a base year of 1995=100.

**What is the
Combined
Nomenclature?**

Trade headings, or the Combined Nomenclature (CN codes) as they are more widely recognised, are the eight digit European Community classification system of goods for overseas trade statistics. The numbering system used, corresponds to the codes in the Harmonised System (HS) which are used for international trade.

**What about
VAT and
Excise Duties?**

All indices are compiled exclusive of Value Added Tax. Excise duties (on cigarettes, tobacco, alcoholic liquor and hydrocarbon oils) are included except where specified otherwise. Please see separate note for information on Climate Change Levy.

**What about
Provisional
Data?**

Indices for the latest two months are always provisional and flagged with a 'p' marker due to the level of imputation present for items where the latest prices are not available. This level of imputation, reduces significantly for earlier months allowing index data to be published as firm values.

**What about
Revisions?**

Occasionally, information is received that produces a change in an index value that has already been published as firm. Where the change is significant, index values are recalculated and annotated with an 'r' marker.

**What about
Price Changes?**

The monthly index data relates to an average calculation for the month. The effect of price changes occurring part way through the period will only be reflected in an index in the following month's publication.

No Data?

You will see that various symbols are used throughout this publication to provide meaning to the gaps in the data or where the quality of the index values is reduced. There are a number of these and the following key will provide an explanation:

B These index values are considered less reliable mainly due to the lack of market coverage.

F Indices labelled F in Table 4 are based on relatively few quotes and in the long term should not be relied upon for contractual purposes.

" These values have been suppressed because the index would risk disclosure of individual price movements.

n.e.c. Not elsewhere classified.

MM22 MONITOR LAYOUT

How do I use the data?

The example below of the MM22 layout, shows what the data within the tables will tell you:

The Specific Table Heading

The Base Year of the Index (see introductory notes)

The Specific Product Index Number SIC(92)-PPI/SSPI SITC(R3)-IPI CN-EPI

The Monthly Index Value (shows price level compared with 1995 base year)

The Index Description

The SIC(92) or SITC(R3) Division Number

Suppressed values

The ONS Database Identifier

The Average Index Value for the Year

Producer prices

December 2001

The output price index for home sales of manufactured products fell 1.2 per cent in the twelve months to December, compared with a fall of 1.4 per cent in the twelve months to November. Unadjusted, the index remained unchanged between November and December, reflecting a fall in petrol product prices being offset by food and alcohol price rises.

The output price index excluding excise duties (PPIY) fell 0.4 per cent in the year to December and seasonally adjusted remained unchanged between November and December.

The output price index excluding food, beverages, tobacco and petroleum rose 0.1 per cent in the year to December. In seasonally adjusted terms the index remained unchanged in December.

NSA/SA not/seasonally adjusted

Input prices : summary

The Climate Change Levy is now included in all input indices and tables (except Table 7). The CCL was introduced from April 2001 and affects fuels purchased and hence aggregate indices.

The input price index for materials and fuels purchased by manufacturing industry fell 6.6 per cent in the year to December and fell by 0.3 per cent between November and December. Between November and December there was a fall in crude oil prices, which was partially offset by a rise in gas, electricity and home produced food materials prices. Prices of imported materials as a whole (including oil) fell 0.6 per cent between November and December.

Seasonally adjusted the input price index fell 0.7 per cent between November and December.

The input price index for manufacturing industry excluding the food, beverages, tobacco and petroleum industries fell 2.8 per cent in the year to December. Seasonally adjusted the index fell 0.7 per cent between November and December.

BACKGROUND NOTES

1. Index numbers shown in the main text of this First Release are on a net sector basis. The index for any sector relates only to transactions between that sector and other sectors: sales and purchases within sectors are excluded. However, the more detailed figures shown in Tables 5 and 7 are on a gross basis; that is, intra industry sales and purchases are included in each of these indices.
2. The index for materials and fuels purchased by manufacturing industry is subject to large seasonal fluctuations. These mainly reflect variations in the cost of industrial electricity arising from the structure of the public electricity supply companies' tariffs and in prices of materials purchased by the food manufacturing industry.
3. Indices relate to average prices for a month. The full effect of a price change occurring partway through any month will only be reflected in the following month's index.
4. All index numbers exclude VAT. Excise duties (on cigarettes, manufactured tobacco, alcoholic liquor and petroleum products) are included, except where labelled otherwise.
5. More information on the PPI, including the definition of the product groups on page 3 and 4 of this release and the input and output weights can be found at www.statistics.gov.uk/ppi
6. The Climate Change Levy (CCL) is introduced into the PPI for the first time this month. The levy was introduced in April 2001 and only affects input producer prices. So for example, from April 2001 the headline input index and input index excluding food, beverages, tobacco and petroleum industries now include the CCL. The CCL has added between 0.8 and 0.9 per cent to the headline input index since April 2001.
7. The detailed input indices of prices of materials and fuels purchased by industry (table 7) do not include the CCL. This is because each industry can in practice pay its own rate for the various forms of energy, depending on the various negotiated discounts (and exemptions) that apply. DTI and ONS are unable to disaggregate CCL-inclusive industry input indices below manufacturing, although in the medium term it is hoped to study the feasibility of collecting the necessary information on energy prices for each industry .
8. Details of the policy governing the release of new data are available from the press office. Also available is a list of the names of those given pre-publication access to the contents of this release.
9. **National Statistics** are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference. © Crown Copyright 2002.
