## **A National Statistics publication**

National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They are produced free from political influence.

## **About us**

### **The Office for National Statistics**

The Office for National Statistics (ONS) is the executive office of the UK Statistics Authority, a non-ministerial department which reports directly to Parliament. ONS is the UK government's single largest statistical producer. It compiles information about the UK's society and economy, and provides the evidence-base for policy and decision-making, the allocation of resources, and public accountability. The Director-General of ONS reports directly to the National Statistician who is the Authority's Chief Executive and the Head of the Government Statistical Service.

### **The Government Statistical Service**

The Government Statistical Service (GSS) is a network of professional statisticians and their staff operating both within the Office for National Statistics and across more than 30 other government departments and agencies.

## **BACKGROUND TO PRODUCER PRICES**

### **INTRODUCTION**

This publication contains price information from UK manufacturers and importers. All data is now based on the Standard Industrial Classification SIC (2007).

### **PRODUCER PRICES IMPLEMENTATION OF SIC 2007**

Producer prices (PPI) implemented the change onto the Standard Industrial Classification of All Economic Activities 2007 (UKSIC 2007) in November 2010. The most significant change to PPI output prices is the reclassification of recovered secondary raw materials (i.e. recycling) and publishing out of manufacturing and into the service sector. The SIC 2007 project has included fundamental changes made to the classification of the PPI Trade surveys, import price indices (IPI) and export price indices (EPI). The collection of these is now on an SIC basis, a switch for the Standard International Trade Classification (SITC) and Combined Nomenclature (CN) previously used. As a result PPI trade surveys are now compliant with Eurostat Short Term Statistics Regulation. This change of classification used will have a direct impact on the framework structure of PPI input prices, as IPI's account for a large proportion of total input price sales.

Further information on the changes and impact of the SIC 2007 on the PPI can be found by following this link:

[www.statistics.gov.uk/downloads/theme\\_economy/ppi-sppi-implementation-of-sic2007.pdf](http://www.statistics.gov.uk/downloads/theme_economy/ppi-sppi-implementation-of-sic2007.pdf)

### **WHAT ARE PRODUCER PRICES?**

Producer Price Indices (PPIs) are a series of economic indicators that measure the price movement of goods bought and sold by UK manufacturers. It is a base weighted index working on the basket of goods concept. A wide range of representative products are selected and the prices of these goods collected each month. The movement in these prices are weighted to reflect the relative importance of the products in a chosen year (known as the base year) currently 2005. These are then aggregated for various sectors of industry to provide the published indices in the monitor.

The input PPIs (table 3) measure changes in the price of materials and fuel bought by manufacturers for processing. The output PPIs (table 4) indicate changes in the prices manufacturers charge for goods destined for the UK market as they leave the factory net of VAT and after discounts.

More information can be found on our website

<http://www.statistics.gov.uk/ppi>

**National Statistics Online:**

[www.statistics.gov.uk](http://www.statistics.gov.uk)

Users can download time series, cross sectional data and metadata from across the Government Statistical Service (GSS) using the search and index functions from the homepage. Many datasets can be downloaded, in whole or in part, and directory information for all GSS statistical resources can be consulted, including censuses, surveys, periodicals and enquiry services. Information is posted as PDF electronic documents or in XLS and CSV formats, compatible with most spreadsheet packages.

**Time Series Data**

The Time Series data facility on the website provides access to around 40,000 time series, of primarily macro-economic data, drawn from the main tables in a range of our major economic and market publications. Users can download complete releases, or view and download customised selections of individual time series.

## INFORMATION

### How to use this Publication

#### Need Some Help?

This publication gives you all the available information on price data. However, if you have any technical queries the following help line is available and staff will be happy to take your call:

☎ (01633) 455941

For general enquiries and tables 1 to 6.

Alternatively you can email us at [ppi@ons.gov.uk](mailto:ppi@ons.gov.uk)

---

#### Publication Dates

The dates on which this publication is available in 2011 are:

25 January 2011	17 May 2011	20 September 2011
22 February 2011	21 June 2011	18 October 2011
22 March 2011	19 July 2011	22 November 2011
19 April 2011	16 August 2011	20 December 2011

---

#### What is MM22?

This publication is produced monthly and provides price movement data at all manufacturing, aggregated industry and product group level. It consists of data supplied from individual UK manufacturers, importers and exporters.

---

#### What's Included?

The Producer Price Indices are calculated from the price movements of around 6,750 closely defined materials and products purchased (including imports) and manufactured by UK industry. This price data is converted into a basic set of price indices from which broad series are built up. Products destined for sale in the UK are grouped in accordance with the Standard Industrial Classification 2007 with weighting patterns based on overall purchases and sales by manufacturers within those groupings. The indices published in this monitor are widely used by business in price escalation clauses in contracts and for monitoring price movements in the products they trade.

## Special Indices

ONS may for a charge, make up a special index for you and provide regular monthly updates. Each case is considered against the resources required to produce and maintain the series requested.

If you would like more details of this service please call **(01633) 455941** or write to the following address **National Statistics, Publication Section, Room 1.227, Government Buildings, Cardiff Road, Newport, South Wales, NP10 8XG** or email us at [ppi@ons.gov.uk](mailto:ppi@ons.gov.uk)

## Data Formats

Data can be downloaded in either plain text file or Navidata<sup>®</sup> 3.1 formats. Navidata<sup>®</sup> 3.1 is free software developed specifically for analysing and using economic time series data - it enables you to create tables and charts, and export in CSV (comma or tab separated) formats which are compatible with your PC's spreadsheet software [Download Navidata<sup>®</sup> 3.1 software](#) and a [sample dataset](#).

---

## NOTES

### Reading the data

These notes should help you interpret the information in the following tables.

---

## What are Net Sector Output Indices?

The weighting patterns used to calculate net sector output indices exclude transactions between companies classified to the same sector e.g. manufacturing sector or manufacturing excluding food, drink, tobacco and petroleum. For example, for Net Sector Output purposes, the value of an electronic component manufacturer's sales to a car manufacturer would be excluded from the weighting patterns used to derive final index values (thereby reflecting the value of sales to only those purchasers outside the manufacturing sector).

---

## What are Gross Sector Output Indices?

This series is found in tables 2 and 4 represents the price movement of goods sold within the UK by companies classified to manufacturing as defined by SIC (2007). Weights are calculated on a gross basis i.e. all transactions are included in deriving the weighting patterns, including sales within the same industry.

---

<b>What are Input/Output Group Input Indices?</b>	This series represents the price movement of materials and fuels purchased by UK manufacturers and is found in table 3. The I/O group input series all include purchases of materials and fuel including those between manufacturers classified to the same sector of industry (e.g. one chemical manufacturer to another).
<b>How are Export Prices calculated?</b>	The Export Price Indices (EPIs) use broadly the same methodology as the PPI. A range of representative products are selected and the prices of these goods collected each month from established exporters within specified 6 digit SIC (2007) codes. The movement in these prices are weighted to reflect the relative importance of these products and aggregated to provide the published indices in table 6. The series are calculated on a base year of 2005=100.
<b>What about VAT and Excise Duties?</b>	All indices are compiled exclusive of Value Added Tax. Excise duties (on cigarettes, tobacco, alcoholic liquor and hydrocarbon oils) are included except where specified otherwise.
<b>What about Provisional Data?</b>	Indices for the latest two months are provisional and flagged with a 'p' marker due to the level of imputation present for items where the latest prices are not available. The latest five months are subject to revisions in light of (a) late and revised contributor data and (b) revisions to seasonal adjustment factors which are re-estimated every month.
<b>What about Revisions?</b>	Occasionally, information is received that produces a change in an index value that has already been published as firm. Where the change is significant, index values are recalculated and annotated with an 'r' marker. More information on the cause of the revisions is presented in the PPI Statistical Bulletin <a href="http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=790">http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=790</a>
<b>What about Price Changes?</b>	The monthly index data relates to an average calculation for the month. The effect of price changes occurring part way through the period will only be reflected in an index in the following month's publication.
<b>New ONS website</b>	ONS will launch its new website on 28 August 2011, postponed from the original date of 30 April 2011. Find out more at <a href="http://www.ons.gov.uk/about/what-we-do/programmes-projects/web-development/index.html">http://www.ons.gov.uk/about/what-we-do/programmes-projects/web-development/index.html</a>

## **No Data?**

You will see that various symbols are used throughout this publication to provide meaning to the gaps in the data or where the quality of the index values is reduced. There are a number of these and the following key will provide an explanation:

**B** These index values are considered less reliable mainly due to the lack of market coverage.

---

**F** Indices labelled F are based on relatively few quotes and in the long term should not be relied upon for contractual purposes.

---

**"** These values have been suppressed because the index would risk disclosure of individual price movements.

---

**n.e.c.** Not elsewhere classified.

## Producer Prices

### May 2011

**Date:** 10 June 2011

**Coverage:** United Kingdom **Theme:** The Economy

#### Output prices: summary

In the year to May, movements in output prices for UK manufactured products were as follows:

- The output price index for home sales of manufactured products rose 5.3 per cent, compared with a rise of 5.5 per cent last month.
- The output price index excluding food, beverages, tobacco and petroleum rose 3.4 per cent.
- The output price index excluding excise duty rose 5.4 per cent.

Between April and May:

- The output price index for home sales of manufactured products rose 0.2 per cent, mainly reflecting price rises in food and other manufactured products being partly offset by a fall in the price of petroleum products.

**Output prices**  
12 months percentage change

#### Output prices (home sales)

Percentage change (Not seasonally adjusted)

		All manufactured products		Excluding food, beverages, tobacco and petroleum		All manufactured products excluding duty	
		12 months	1 month	12 months	1 month	12 months	1 month
2010	Dec	4.2	0.5	2.7	0.0	4.0	0.6
2011	Jan	5.0	1.1	3.3	0.8	5.0	1.1
	Feb	5.3	0.5	3.1	0.0	5.2	0.5
	Mar	5.6	1.1	3.1	0.5	5.5	1.1
	Apr	5.5	1.0	3.6	0.8	5.7	0.8
	May	5.3	0.2	3.4	0.2	5.4	0.2

## Input prices: summary

In the year to May, movements in input prices of materials and fuels purchased by the UK manufacturing industry were as follows:

- The total input price index rose by 15.7 per cent.
- The input price index for the manufacturing industry excluding the food, beverages tobacco and petroleum industries rose 10.9 per cent.

Between April and May:

- The total input price index fell 2.0 per cent, mainly reflecting a fall in the price of crude oil.
- Seasonally adjusted, the input price index for the manufacturing industry excluding the food, beverages tobacco and petroleum industries fell 0.5 per cent.
- The price of imported materials as a whole (including crude oil) fell 2.1 per cent.

**Input prices (materials & fuel) manufacturing industry**  
12 months percentage change

NSA/SA not/seasonally adjusted

<sup>1</sup> These indices include the Climate Change Levy which was introduced in June 2001

<sup>2</sup> These indices include the Aggregates Levy which was introduced in June 2002

## Revisions (Tables 8R and 9R)

For this bulletin Tables 8R and 9R highlight revisions to movements in price indices previously published in last month's Statistical Bulletin. These are mainly caused by changes to the most recent estimates, as more price quotes are received, and revisions to seasonal adjustment factors, which are re-estimated every month.

## Output prices: detail

The contributions to movements in the total output index by the main product groups over the last year and month (not seasonally adjusted) are:

### 12 month change to May

Product group	Percentage change
Food products	7.6
Tobacco & alcohol	4.9
Clothing, textiles, leather	5.0
Paper & printing	5.3
Petroleum products	14.4
Chemicals & pharmaceuticals	6.5
Metal, machinery & equipment	3.6
Computer, electrical & optical	-0.6
Transport equipment	1.1
Other manufactured products	3.4
All manufacturing	5.3

Contribution to 12 months percentage change  
in total (5.3%)

### 1 month change to May

Product group	Percentage change
Food products	0.6
Tobacco & alcohol	0.1
Clothing, textiles, leather	0.6
Paper & printing	0.3
Petroleum products	-0.7
Chemicals & pharmaceuticals	-0.4
Metal, machinery & equipment	0.2
Computer, electrical & optical	-0.1
Transport equipment	0.0
Other manufactured products	0.5
All manufacturing	0.2

Contribution to 1 month percentage change  
in total (0.2%)

## Input prices: detail

The contributions to movements in the total input index by the main commodities over the year and month (not seasonally adjusted) are:

### 12 month change to May

Product group	Percentage change
Fuel incl. CCL	9.7
Crude oil etc	37.0
Home food materials	13.5
Imported food materials	9.6
Other home-prod. materials	6.9
Imported metals	14.2
Imported chemicals	11.0
Imported parts & equipment	4.2
Other imported materials	8.3
<b>All manufacturing</b>	<b>15.7</b>

Contribution to 12 months percentage change  
in total (15.7%)

### 1 month change to May

Product group	Percentage change
Fuel incl. CCL	-0.7
Crude oil etc	-7.6
Home food materials	0.4
Imported food materials	0.5
Other home-prod. materials	0.2
Imported metals	-0.8
Imported chemicals	1.0
Imported parts & equipment	0.1
Other imported materials	1.0
<b>All manufacturing</b>	<b>-2.0</b>

Contribution to 1 month percentage change  
in total (-2.0%)

## Summary of statistics for producer prices – May 2011

### Output prices

The overall output price index rose 5.3 per cent in the year to May, compared with a rise of 5.5 per cent in the year to April. The index rose 0.2 per cent between April and May, mainly reflecting price rises in food and other manufactured products being partly offset by a fall in the price of petroleum products (including duty). Between April and May 2010 the index rose 0.3 per cent.

Food product prices rose 0.6 per cent between April and May and rose 7.6 per cent in the year to May. This is the highest annual rate since December 2008 when the index rose 8.0 per cent. The monthly rise was due to a 2.5 per cent increase in the price of processed and preserved meat and a 1.8 per cent increase in the price of processed and preserved poultry meat.

Other manufactured product prices rose 0.5 per cent between April and May and rose 3.4 per cent in the year to May. This is the largest monthly rise since March 2010 when the index rose 0.6 per cent. The monthly rise was due to a 1.6 per cent increase in the price of manufactured goods not elsewhere specified and a 1.9 per cent increase in the price of soft drinks, mineral waters and other bottled water.

Petroleum products (including duty) prices fell 0.7 per cent between April and May and rose 14.4 per cent in the year to May. This is the largest monthly fall since June 2010 when the index fell 1.9 per cent. The monthly fall was due to a decrease of 3.6 per cent in the price of diesel and gas oil.

Apart from falls in chemicals and pharmaceutical products and computer, electrical and optical product prices, all other product groups recorded price rises in the month of May.

### Output price index excluding food, beverages, tobacco and petroleum

The output price index for manufactured products excluding food, beverages, tobacco and petroleum rose 3.4 per cent in the year to May, compared with a rise of 3.6 per cent in the year to April. This index is not affected by changes in excise duty. The index rose 0.2 per cent between April and May compared with a rise of 0.4 per cent between April and May 2010.

### Output price index excluding excise duty

The output price index for all manufactured products excluding excise duty is shown in Table 3 of the Statistical Bulletin. This index rose 5.4 per cent in the year to May, compared with a rise of 5.7 per cent in the year to April. The index excluding excise duty rose 0.2 per cent between April and May, compared with a rise of 0.4 per cent between April and May 2010.

### Input prices

The overall input index rose 15.7 per cent in the year to May, compared with a rise of 17.9 per cent in the year to April (Table 5).

The input index for all manufacturing fell 2.0 per cent between April and May compared with a fall of 0.2 per cent between April and May 2010. This is the largest monthly decrease since April 2009 when the index also fell 2.0 per cent. The last time the decrease was higher was in December 2008 when the index fell by 2.5 per cent. The monthly fall in the input index between April and May mainly reflected a fall in the price of crude oil, and to a lesser extent, falls in imported metals and fuels (inc CCL). These falls were partially offset by an increase of 1.0 per cent in the price of imported chemicals

Crude oil prices fell 7.6 per cent between April and May and rose 37.0 per cent in the year to May. This is the largest monthly fall since December 2008 when the index fell by 22.4 per cent.

Imported metal prices fell 0.8 per cent between April and May and rose 14.2 per cent in the year to May. The monthly fall mainly reflected a decrease of 1.6 per cent in the price of imported cold formed or folded products.

Fuel (inc CCL) prices fell 0.7 per cent between April and May and rose 9.7 per cent in the year to May. The monthly fall was mainly due to a fall of 2.1 per cent in the price of gas and a 0.1 per cent fall in the price of electricity.

Imported chemical prices rose 1.0 per cent between April and May and rose 11.0 per cent in the year to May. The monthly rise was mainly due to an increase of 3.1 per cent in the price of other organic basic chemicals (EU imports).

All other product groups recorded price rises in the month of May.

### Input price index excluding the food, beverages, tobacco and petroleum industries

The index for materials and fuels purchased by manufacturing industry excluding the food, beverages, tobacco and petroleum industries fell 0.5 per cent in seasonally adjusted terms between April and May. This is the largest monthly decrease since November 2009 when the index fell 0.7 per cent. The unadjusted index rose 10.9 per cent in the year to May, compared with a rise of 12.1 per cent in the year to April (Table 5).

More information on producer prices can be found at: [www.statistics.gov.uk/ppi](http://www.statistics.gov.uk/ppi).

## May records – Output prices

All manufactured products	Annual rate 5.3%, down from 5.5% last month. Also 5.3% in February 2011. Last lower in January 2011 (5.0%). Monthly rate 0.2% down from 1.0% last month. Last lower in September 2010 (0.0%).
Excluding food, beverages, tobacco and petroleum	Annual rate 3.4%, down from 3.6% last month. Monthly rate 0.2% down from 0.8% last month. Last lower in February 2011 (0.0%).
All manufactured products excluding duty	Annual rate 5.4%, down from 5.7% last month. Last lower in February 2011 (5.2%). Monthly rate 0.2% down from 0.8% last month. Last lower in September 2010 (0.0%).
Food products	Annual rate 7.6%, up from 7.3% last month. Last higher in December 2008 (8.0%). Monthly rate 0.6% up from 0.3% last month.
Tobacco and alcohol (inc duty)	Annual rate 4.9%, down from 5.8% last month. Monthly rate 0.1% down from 2.9% last month. Last lower in December 2010 (-0.2%).
Clothing, textiles and leather	Annual rate 5.0%, up from 4.6% last month. This is the highest annual rate since records began (January 1997). Monthly rate 0.6% down from 1.3% last month. Last lower in February 2011 (0.3%).
Paper and printing	Annual rate 5.3%, down from 5.6% last month. Monthly rate 0.3% down from 0.6% last month. Last lower in February 2010 (0.1%).
Petroleum products	Annual rate 14.4%, down from 14.9% last month. Last lower in December 2010 (13.2%). Monthly rate -0.7% down from 1.6% last month. Last lower in July 2010 (-1.1%).
Chemical and pharmaceutical products	Annual rate 6.5%, down from 7.5% last month. Last lower in December 2010 (6.2%). Monthly rate -0.4% down from 1.9% last month.
Metal, machinery and equipment nec	Annual rate 3.6%, down from 4.5% last month. Last lower in May 2010 (3.3%). Monthly rate 0.2%, down from 0.7% last month. Also 0.2% in November 2010. Last lower in October 2010 (0.1%).
Computer, electrical and optical equipment	Annual rate -0.6%, down from 0.5% last month. Last lower in November 2007 (-0.9%). Monthly rate -0.1% unchanged from last month. Last lower in December 2010 (-1.4%).
Transport equipment	Annual rate 1.1%, up from 0.8% last month. Also 1.1% in November 2010. Last higher in October 2010 (1.2%). Monthly rate 0.0% down from 0.4% last month.
Other manufactured products	Annual rate 3.4%, up from 3.1% last month. Also 3.4% in February 2011. Last higher in November 2010 (3.5%). Monthly rate 0.5% up from 0.4% last month. Last higher in March 2010 (0.6%).

## May records – Input Prices

Materials and fuels purchased	Annual rate 15.7%, down from 17.9% last month. Monthly rate -2.0% down from 2.8% last month. Also -2.0% in April 2009. Last lower in December 2008 (-2.5%).
Excluding food, beverages, tobacco and petroleum industries	Annual rate 10.9%, down from 12.1% last month. Monthly rate (seasonally adjusted) -0.5% down from 1.9% last month. Last lower in November 2009 (-0.7%).
Fuel including climate change levy	Annual rate 9.7%, down from 15.6% last month. Monthly rate -0.7% unchanged from last month. Last lower in February 2011 (-1.0%).
Crude oil etc	Annual rate 37.0%, down from 38.6% last month. Monthly rate -7.6% down from 7.8% last month. Last lower in December 2008 (-22.4%).
Home food materials	Annual rate 13.5%, down from 17.9% last month. Monthly rate 0.4% down from 1.7% last month. Last lower in January 2011 (-0.1%).
Imported food materials	Annual rate 9.6%, down from 10.1% last month. Also 9.6% in January and March 2011. Last lower in December 2010 (6.8%). Monthly rate 0.5% up from 0.2% last month. Last higher in February 2011 (2.1%).
Other home-produced materials	Annual rate 6.9%, up from 6.4% last month. Also 6.9% in March 2009. Last higher in February 2009 (7.7%). Monthly rate 0.2% down from 2.0% last month. Last lower in February 2011 (-1.8%).
Imported metals	Annual rate 14.2%, down from 16.2% last month. Last lower in January 2010 (12.2%). Monthly rate -0.8% down from 0.8% last month. Last lower in July 2010 (-1.9%).
Imported chemicals	Annual rate 11.0%, down from 11.4% last month. Monthly rate 1.0% down from 1.6% last month. Last lower in February 2011 (0.8%).
Imported parts and equipment	Annual rate 4.2%, down from 4.3% last month. Monthly rate 0.1% down from 1.0% last month. Last lower in February 2011 (-0.3%).
Other imported materials	Annual rate 8.3%, down from 9.3% last month. Also 8.3% in March 2011. Last lower in April 2010 (4.5%). Monthly rate 1.0% up from 0.7% last month.

## Background Notes

### ONS Website

1. ONS will launch its new website on 28 August 2011, postponed from the original date of 30 April 2011. The new website will improve the way users can access our statistics but many existing bookmarks and links will no longer work and users will need to update them. Find out more at:

<http://www.ons.gov.uk/about/what-we-do/programmes-projects/web-development/index.html>

### Link to Summary Quality Report

2. A Summary Quality Report for the PPI can be found at:

[www.ons.gov.uk/about-statistics/methodology-and-quality/quality/qual-info-economic-social-and-bus-stats/quality-reports-for-business-statistics/summary-quality-report-for-producer-price-indices.pdf](http://www.ons.gov.uk/about-statistics/methodology-and-quality/quality/qual-info-economic-social-and-bus-stats/quality-reports-for-business-statistics/summary-quality-report-for-producer-price-indices.pdf)

This report describes in detail the intended uses of the statistics presented in this publication, their general quality and the methods used to produce them.

### Implementation of SIC 2007 in ONS: Update on PPIs and SPPIs

3. Producer Prices has implemented the change to the Standard Industrial Classification 2007 (SIC 2007). The most significant change to PPI output prices involves the reclassification of 'recovered secondary raw materials' and 'publishing'. These are no longer classified in the manufacturing sector, but are classified under services. In addition to this, a new SIC division, 'repair, installation and maintenance of machinery and equipment' has been created. Under SIC 2003 these activities were classified within the output of manufacturing, but as part of the specific industries where this activity took place.
4. Fundamental changes have been made to the classification of the PPI Trade surveys, Import Price indices (IPI) and Export Price Indices (EPI). As part of the reclassification project the classification of these trade surveys have become compliant with Eurostat's Short Term Statistics Regulation. The collection of IPI and EPI will now be on an SIC basis, a switch from the Standard International Trade Classification (SITC) and Combined Nomenclature (CN) previously used. PPI input prices are heavily dependant on IPI.

Further information on the changes and impact of the SIC 2007 on prices can be found by following these links:

[www.statistics.gov.uk/statbase/Product.asp?vlnk=15375](http://www.statistics.gov.uk/statbase/Product.asp?vlnk=15375)

[www.statistics.gov.uk/StatBase/Product.asp?vlnk=790&Pos=1&ColRank=1&Rank=208](http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=790&Pos=1&ColRank=1&Rank=208)

More general information on UK SIC 2007, including correlation tables can be found by following this link: [www.statistics.gov.uk/statbase/Product.asp?vlnk=14012](http://www.statistics.gov.uk/statbase/Product.asp?vlnk=14012)

Any comments about this work and its impact on PPI please contact [ppi@ons.gov.uk](mailto:ppi@ons.gov.uk).

### Relevance to users

5. Index numbers shown in the main text of this bulletin are on a net sector basis. The index for any sector relates only to transactions between that sector and other sectors, sales and purchases within sectors are excluded. However, the more detailed figures shown in tables 4 and 6 are on a gross basis; that is, intra industry sales and purchases are included in each of these indices.
6. Indices relate to average prices for a month. The full effect of a price change occurring part way through any month will only be reflected in the following month's index.
7. All index numbers exclude VAT. Excise duty (on cigarettes, manufactured tobacco, alcoholic liquor and petroleum products) are included, except where labelled otherwise. Since PPIs exclude VAT, they are not affected by the increase in the standard rate of VAT to 20 per cent from 4 January 2011.
8. The detailed input indices of prices of materials and fuels purchased by industry (Table 6) do not include the climate change levy (CCL). This is because each industry can, in practice, pay its own rate for the various forms of energy, depending on the various negotiated discounts and exemptions that apply.

### Common pitfalls in interpreting series

9. Expectations of accuracy and reliability in sample surveys are often too high. Revisions and sampling variability are inevitable consequences of the trade between timeliness, accuracy and the burden on respondents. Details of sampling variability are included elsewhere in this bulletin.
10. Very few statistical revisions arise as a result of 'errors' in the popular sense of the word. All estimates, by definition, are subject to statistical 'error' but, in this context, the word refers to the uncertainty in any process or calculation that uses sampling, estimation or modelling. Most revisions reflect either the adoption of new statistical techniques or the incorporation of new information which allows the statistical error of previous estimates to be reduced. Only rarely are there avoidable 'errors' such as human or system failures, and such mistakes are made quite clear when they are discovered and corrected.

## Accuracy

11. Figures for the latest two months are provisional and the latest five months are subject to revisions in light of (a) late and revised respondent data and (b), for the seasonally adjusted series, revisions to seasonal adjustment factors which are re-estimated every month. A routine seasonal adjustment review is normally conducted in the autumn annually. There are no planned methodological changes in the next 12 months.

## Revisions

12. Revisions to data provide one indication of the reliability of key indicators. The tables below show summary information on the size and direction of the revisions which have been made to the data covering a five year period. A statistical test has been applied to the average revision to find out if it is statistically significantly different from zero. An asterisk (\*) shows that the test is significant.
13. The table below presents a summary of the differences between the first estimates published between May 2005 and April 2010 and the estimates published 12 months later. These numbers include the effect of the reclassification onto SIC 2007. For more information on this see: [www.statistics.gov.uk/statbase/Product.asp?vlnk=15375](http://www.statistics.gov.uk/statbase/Product.asp?vlnk=15375)

### Revisions between first publication and estimates twelve months later

	Value in latest period	Percentages	
		Revisions between first publication and estimates twelve months later	
		Average over the last 5 years	Average over the last 5 years without regard to sign (average absolute revision)
Total output (JVZ7) -12 months	5.3	-0.06	0.12
Total output (JVZ7) - 1 month	0.2	0.03	0.09
Total input (K646) - 12 months	15.7	0.42*	0.74*
Total input (K646) - 1 month	-2.0	0.16	0.49

\* Statistically significant

14. Spreadsheets giving revisions triangles of estimates for all months from January 1998 through to April 2011 and the calculations behind the averages in the table are available on the Office for National Statistics website at: [www.statistics.gov.uk/StatBase/Product.asp?vlnk=790](http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=790)

## Publication Policy

15. The complete run of data in the tables of this bulletin are also available to view and download in other electronic formats free of charge using the Office for National Statistics Time Series Data website service. Users can download the complete release in a choice of zipped formats or view and download their own selections of individual series. The Time Series Data service can be accessed at: [www.statistics.gov.uk/statbase/tsdintro.asp](http://www.statistics.gov.uk/statbase/tsdintro.asp)
16. Details of the policy governing the release of new data are available from the Media Relations Office. Also available is a list of the names of those given pre-publication access to the contents of this bulletin. In the light of the timing of the Monetary Policy Committee (MPC) meeting, the PPI is provided to the Bank of England at 9.30am on Thursday in line with release protocols.
17. Follow us on [www.twitter.com/statisticsONS](https://twitter.com/statisticsONS) and [www.facebook.com/statisticsONS](https://www.facebook.com/statisticsONS)
18. National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.
