GENERAL INTRODUCTORY NOTES

1. Scope of Accounts. - The Annual Statement of the Trade of the United Kingdom for 1965 is issued in five volumes. Volume I contains summaries of the import and export trade; Volume II gives detailed statements respecting articles imported and re-exported, and of imports and exports of gold and coin; Volume III gives similar details of exports of the produce and manufactures of the United Kingdom; Volume IV gives details of the trade with individual countries; and Volume V gives particulars of the trade at the ports of the United Kingdom.

For full particulars of the contents of each Volume see the Schedule to this introduction.

Official accounts are maintained under each description of goods separately distinguished in the official "Statistical Classification for Imported Goods and for Re-exported Goods" and the "Export List". The order and grouping of the headings in these Lists are based on those of the Standard International Trade Classification, Revised, of the United Nations (S. I. T. C., Revised), which provides headings corresponding directly with those of the Brussels Tariff Nomenclature.

Less detailed particulars respecting trade are published monthly in the Overseas Trade Accounts of the United Kingdom. Information in amplification of those Accounts and in advance of these annual publications can be obtained (when circumstances allow) from the Controller, Statistical Office, Customs and Excise, Portcullis House, 27, Victoria Avenue, Southend-on-Sea, Essex, on payment of a fee to cover the cost of preparing the information.

Throughout these Volumes the term United Kingdom comprises Great Britain, Northern Ireland and the Isle of Man. Trade between the United Kingdom and the Channel Islands is regarded for statistical purposes as internal trade and has been excluded from the statistics. Conversely, for statistical purposes, direct trade between the Channel Islands and overseas countries other than the United Kingdom is treated as United Kingdom external trade.

2. Exclusions: The following classes of goods are not included in the import and export statistics:

- (a) Sea-going vessels and aircraft (except ships for breaking up and newly built vessels or aircraft arriving on purchase from abroad or departing on sale abroad).
- (b) Certain atomic energy materials imported by the United Kingdom Atomic Energy Authority or its agents, including uranium ore and concentrates.
- (c) Stores and equipment exported for use by United Kingdom forces abroad or returned from such use. other British Government owned stores exported for British Government use overseas or returned from such use. (Stores shipped abroad for N. A. A. F. I., the Y. M. C. A. and similar organisations are however included).
- (d) Stores and equipment imported by Commonwealth and foreign government forces in the United Kingdom solely for their own use (including American Post Exchange Stores); and such stores re-exported.
- (e) Goods directly imported by Ambassadors or Ministers accredited to the United Kingdom.
- (f) Touring, passenger or load-carrying road or railway vehicles, temporarily entering or leaving the United Kingdom, for subsequent departure or return.
- (g) Circulatory containers, pallets and the like.
- (h) Fish and other natural produce of the sea or sea-bed taken by vessels registered in the United Kingdom.
- (i) Personal and household effects; parcels carried by passengers for private use; legacies.
- (j) Used clothing and household goods exported by charitable organisations.
- (k) Stores and fuel on board ships, aircraft and vehicles and intended for consumption en route.

- (l) Ballast not of commercial value; dunnage; oil sludge and tank cleanings; waste for dumping at sea.
- (m) Professional effects (e.g. survey; film and radio equipment, theatrical properties, musical instruments and the like) temporarily imported or exported for a specific use and subsequent return.
- (n) Works of art and other goods temporarily imported or exported solely for exhibition, display or demonstration purposes and subsequent return.
- (o) Trade samples (including arbitration samples).

3. Gold and Coin - Particulars of imports and exports of gold and monetary items as defined by the International Monetary Fund are excluded from all general tables, but are given in special tables in Volumes I and II. (Notes of legal tender in the United Kingdom are excluded throughout.) There were no transshipments of gold and coin recorded during the year 1965.

4. Parcel Post - Imports by parcel post valued at over £50 and charged with duty are included, according to their descriptions, with other goods imported. In general, all other imports and exports by parcel post are shown as such in Section 9, and, consequently, the figures for the descriptions of goods throughout these accounts are deficient to the extent of the volume of this parcel post trade which, in some cases, is known to be considerable. Exports of imported merchandise by parcel post are included with the exports of the produce and manufactures of the United Kingdom.

The figures of imports and exports under the heading "Post Parcels not classified according to kind" relate to goods sent through the G. P. O. as "parcel post"; they do not include packets sent by "letter post" or by "printed paper post". The limit of weight for parcel post is 22 lb.

5. Quantities and Values of Imports and Exports - Quantities and values are based on the declarations of importers and exporters, or their agents, which may be verified, by Customs officials.

Quantities are not recorded in respect of all goods, but where goods are required to be entered by weight the quantities given represent the net weight of the goods exclusive of containers, internal wrapping or any other packing, except that all air transshipments are entered by gross weight.

The value of the imports represents the value as defined in the Sixth Schedule to the Customs and Excise Act, 1952 (and applied by Section 258 of that Act) at the time when the goods are entered. Briefly stated, this value is the price which the goods would fetch at that time, on a sale in the open market between buyer and seller independent of each other, with delivery to the buyer at the port or place of importation, the seller bearing freight, insurance, commission and all other costs, charges and expenses incidental to the sale and delivery of the goods with the exception of any duty or tax chargeable in the United Kingdom. Normally, for goods imported under a contract of sale negotiated in fully open market conditions the value is represented by the price made under that contract, adjusted as necessary to take account of costs, charges and expenses as above. Where an amount in foreign currency has had to be converted to its sterling equivalent the rate of exchange used has been that appropriate at the time of lodgment of the Customs entry.

The value of the exports represents the cost of the goods to the purchaser abroad, including packing, inland and coastal transport in the United Kingdom, dock dues, loading charges, and all other costs, profits, charges and expenses (e.g. insurance and commission) accruing up to the point where the goods are deposited on board the exporting vessel or aircraft or at the land boundary of Northern Ireland, and is known as the "free on board" value.

6. Transit Trade - Goods entered for transshipment, whether dutiable or free, either for removal from a vessel in one port and conveyance to another port for re-shipment abroad, or removed under the same conditions from one vessel to another in the same port, are not included in the general tables of imports and exports of imported merchandise but particulars are shown in special tables (see Schedule to Introduction). Goods transhipped under bond are to be distinguished from goods which are entered for storage in bonded warehouses and are afterwards exported therefrom, these goods being included in the general tables of imports and exports of imported merchandise.

7. Countries to which Imports and Exports are credited - Imports are classified as received from the country of consignment; that is, the country from which the goods were originally despatched to the United Kingdom, with or without breaking bulk in the course of transport, but without any commercial transaction in any intermediate country. The country of consignment is not necessarily the country of shipment, origin or manufacture. Exports are classified as despatched to the country of consignment; that is, the last country to which the goods are consigned, with or without breaking bulk in the course of transport, but without any commercial transaction in any intermediate country. The country of consignment is therefore not necessarily the country of unshipment or ultimate destination. Exports of newly built sea-going ships are normally classified as despatched to the country of registration.

Goods consigned direct to the United Kingdom from fishing vessels other than those of United Kingdom registration are classified as received from the country in which the vessel is registered.

8. Arrangement of Countries - The countries are arranged in two parts, namely:-
(a) Commonwealth countries (this term is used to include colonies, protectorates, protected states, trust territories and the territory under condominium (New Hebrides)) and (b) foreign countries.

Shortened forms of certain full country designations in the "Statistical Classification" and "Export List" have been used in Volumes II and III.

The shortened and full titles are given below.

<u>Shortened Title</u>	<u>Full Title</u>

9. Revenue Statistics - Figures of Customs and Excise Revenue are published annually in the Report of the Commissioners of H. M. Customs and Excise and in greater detail in a separate publication under the title of "Protective Duties: Values or quantities of imported goods entered for home use in the United Kingdom and receipts of duty".

10. Bonded Warehouse Account - Details of the quantities of certain articles of food, beverages and tobacco delivered free of duty from bonded warehouses for the use of H. M. Forces and for use as stores on ships and aircraft are given in Volume IV (see Schedule to Introduction).

11. Exports of Imported Merchandise comprise goods, materials and articles exported in the condition in which they were imported, or after having undergone repair or minor operations which leave them essentially unchanged, e. g. simple blending, cleaning, drying, sorting, husking or shelling, repacking, bottling, &c. Goods finished or wholly or partly manufactured in the United Kingdom from imported raw materials, and goods completed or further advanced towards completion in the United Kingdom after being imported partly manufactured (except goods which have undergone only repair or minor operations and are essentially unchanged) are, on exportation, included in the tables of exports of the produce and manufactures of the United Kingdom.

Re-exports of horses and greyhounds, and of precious stones, are included in the figures of exports owing to the difficulty of separate classification.

SPECIAL INTRODUCTORY NOTE TO VOLUME I

Weight Conversion Factors - Under the terms of the International Convention relating to Economic Statistics drawn up by the League of Nations in 1928 and adopted in an amended form by the United Nations under a Protocol signed in December, 1948, adhering countries are required to publish in their Annual Trade Returns an estimate of the average weight of each item which is recorded by a unit of measure other than weight. In accordance with this requirement a table of weight conversion factors has been furnished by the Board of Trade and is printed on the following pages. These factors, which have been calculated by the Board of Trade from such information as was available, cover a number of the items recorded in these Trade Returns by a unit of measure other than weight. It has not been found practicable to calculate conversion factors for every item, but it is hoped to add to the list as opportunity offers. The Board of Trade wish it to be understood that whilst every care has been exercised in compiling the statement the figures given in the table are only estimates, applicable to aggregate imports or exports, and not necessarily to trade with individual countries and that they are subject to revision in the light of fuller information which may become available. The same factors are suggested for imports and exports unless separate factors are given.

SCHEDULE

The information contained in the five volumes of the Annual Statement of Trade is as follows: -

Volume I

Table of approximate weight equivalents of units of measure other than weight for certain Imports and Exports.

Abstract tables showing: -

(1) Value of total Imports and Exports of merchandise and of gold and coin from and to (a) Commonwealth Countries, (b) Foreign Countries, (c) All countries (Tables 1 and 2).

(2) For each Section and Division of the official "Statistical Classification" and "Export List" value of total Imports from, Exports of (a) Produce and manufactures of the United Kingdom, (b) Imported merchandise to, (i) Commonwealth Countries, (ii) Foreign Countries, (iii) All countries (Tables 3 - 5).

(3) For each description of goods separately distinguished in the official "Statistical Classification" and "Export List" - total (a) Imports, (b) Exports of produce and manufactures of the United Kingdom and (c) Exports of imported merchandise. (Table 6 - 8).

(4) For each country - value of total (a) Imports, (b) Exports of produce and manufactures of the United Kingdom. (c) Exports of imported merchandise and (d) Exports (Table 9).

(5) As at (4) but in addition showing total value under each of the ten Sections in the official "Statistical Classification" and "Export List" (Tables 10 - 13).

(6) Gold and coin - total quantity and value for each heading of (a) Imports, (b) Exports (Tables 14 and 15).

(7) Value of total Imports of merchandise transhipped (Table 16).

Volume II

Detailed tables showing -

(1) Generally, for each description of goods separately distinguished in the official "Statistical Classification", Imports from, and Exports of imported merchandise to, specified countries (Tables 1 and 2).

(2) Gold and coin:

(a) Imports from, and (b) Exports to, each country (Tables 3 and 4).

Volume III

Detailed table showing -

Generally, for each description of goods separately distinguished in the official "Export List" - Exports of the produce and manufactures of the United Kingdom to specified countries.

Volume IV

Detailed tables showing -

(1) For each country, (a) Imports, (b) Exports of the produce and manufactures of the United Kingdom, and (c) Exports of imported merchandise, distinguishing the principal descriptions of goods (Table 1).

(2) For goods transhipped in the United Kingdom:

(a) Total value of the principal articles and of all other articles of merchandise imported for, and exported after, transhipment (Table 2).

(b) Total value from and to each country (Tables 4 and 6).

(c) Air transhipments (Tables 3, 5 and 7).

(3) Total quantities of certain articles of food, beverages and tobacco delivered free of duty from bonded warehouses for the use of H. M. Forces and for stores on ships and aircraft (Table 8).

Volume V

Detailed tables showing -

(1) Value of the total Imports and Exports of merchandise at ports of the United Kingdom (Table 1).

(2) For each port - Total (a) Imports, (b) Exports of the produce and manufactures of the United Kingdom, and (c) Exports of imported merchandise distinguishing the principal descriptions of goods (Table 2):

(3) For goods transhipped -

(a) Value of the principal articles of merchandise imported for, and exported after, transhipment at the principal seaports in the United Kingdom together with the total value of such merchandise (Tables 3 and 4).

(b) Airports (Table 5).

TABLE 9

Value of the total IMPORTS and EXPORTS of merchandise consigned from and to each Commonwealth and Foreign Country

The countries in this table are divided into two main sections: Commonwealth Countries and Foreign Countries. In each section the countries are arranged by continents except that Extra-European possessions, Trust Territories, &c., of European Countries other than United Kingdom are shown under that heading and not under the respective continental headings.
