An extended abstract will contain the same information in a full paper, only in a shorter and more concise format. An extended abstract will contain references, comparisons to related work, any key equations and information that would be expected in a full paper.

The length of an extended abstract will be anywhere between 800 and 3000 words.

What to include:

- Title
- Authors
- References
- Introduction
- Methodology
- Results
- Conclusion
- Acknowledgements

What not to include:

- Future work
- Details of proofs or implementation that should seem plausible to reviewers
- Ramifications not relevant to the key ideas of the abstract
- Appendices
