

## ESCoE Publication Series

### Submission guidelines

#### REMIT

The ESCoE Publication Series is a repository for papers that focus on economic statistics and measurement. The series aims to promote knowledge exchange and the sharing of best practice in economic measurement and statistics. This encourages international collaboration between researchers and acts as a point of reference for research and development of economic statistics relevant for the modern economy. The series may include papers that contain early results to encourage discussion and debate. Papers are published throughout the year.

The series includes three types of papers:

**Discussion Papers** are research papers that focus on new methods of measurement in the modern economy, using advanced methods from economic theory, econometrics, mathematics and statistics to explore novel uses of data and aid the development of economic statistics.

**Technical Reports** are primarily a resource for best practice in economic statistics.

**Occasional Papers** engage with and debate issues of current interest and concern relevant to economic statistics and measurement of the modern economy.

#### SUBMISSIONS

ESCoE welcomes submissions that are relevant to our remit. We encourage submissions from our Research Associates as well as academics and practitioners from elsewhere, particularly those who have participated in our events and conferences.

Submission to the Publication Series should be made in word or PDF format to [info@escoe.ac.uk](mailto:info@escoe.ac.uk). On receipt, the paper will be allocated to an ESCoE editor. The editorial team is made up of ESCoE Leadership Executive members, with occasional guest editors.

#### REVIEW PROCESS

**ESCoE Research Associates:** Submissions will be allocated to an editor for a publication decision. If the paper is outside their field of expertise, they may seek advice from an alternative reviewer.

**External authors:** Submissions will be allocated to an editor who will then select an ESCoE Research Associate or external academic in the field as well as sending to the UK Office for National Statistics (ONS) for review. The reviewers will give an opinion of the paper's suitability for inclusion in terms of topic, format and relevance. Authors may suggest a referee when submitting their paper.

All submissions are sent to the ONS one week in advance of publication.

#### EDITORIAL POLICY

Editorial policy is deliberately light touch to encourage comment and discussion and to allow scope to support or challenge existing approaches.

Any views expressed in the ESCoE Publication Series are solely those of the author(s) and do not represent those of ESCoE, its partner institutions or the ONS.

## **REPUBLISHING ESCOE PAPERS AND BLOGS**

ESCoE papers and blogs may be republished on external websites and archived in institutional repositories, provided that ESCoE is fully acknowledged as the original source and a link to the original paper or blog is included.

Authors are free and encouraged to publish working papers on their own websites and to submit them to academic journals. If an ESCoE paper is subsequently published in a journal, please let us know so we can update our records and track the impact of our work.

## **BLOGS**

ESCoE's Communications Manager may get in contact to invite you to write a short blog on the research. They will share further guidance when they get in touch.
